The NRC staff has been reviewing proposed criteria for future LWRs submitted by Electric Power Research Institute (EPRI) and several new LWR designs with respect to the Commission's severe accident policy and the design certification aspects of 10 CFR part 52. In performing these reviews, the NRC staff has proposed criteria to address severe accident and containment issues that depart from the existing regulations. For the evolutionary LWR designs, many of these proposed criteria are contained in a paper provided to the NRC Commissioners on January 12, 1990, SECY–90–016, "Evolutionary LWR Certification Issues and Their Relationship to Current Regulatory Requirements." The NRC staff has sought and received Commission guidance on the application of these proposed severe accident and containment criteria to the evolutionary LWR designs now under review. Guidance from the Commission was provided in a Staff Requirements Memorandum, S. Chilk to J. Taylor, dated June 26, 1990. The criteria discussed in this ANPRM would codify much of the Commission's guidance for general application to all future LWRs.

Additionally, the NRC plans to improve its regulations for future plants by separating (decoupling) the acceptance criteria for a reactor site from the acceptance criteria for the design of various engineered safety features (ESF) via rulemaking changes to 10 CFR Parts 50 and 100. The first phase of this decoupling of siting criteria from design criteria focuses on updating and revising siting criteria. The second phase of this process would focus on updating 10 CFR part 50 for future LWRs to:

(1) Implement new LWR source term information,

(2) specify performance criteria for plant design features based on improved knowledge of the release of radioactive material into containment (i.e., new source term), and

(3) specify criteria for plant performance under severe accident conditions. The criteria discussed in this ANPRM are associated with a portion of this second phase, namely item (3) above.

Purpose of the Rule

The NRC believes that adopting a rule to specify acceptable plant performance in response to severe accidents would accomplish the following:

1. Codify the Commission's guidance on severe accident and containment issues that resulted from the review of advanced light water reactors.

2. Provide assurance that the performance of future LWRs under severe accident conditions is consistent with assumptions about severe accident performance used in developing new source term information.

3. Provide guidance to future LWR designers and potential applicants.

4. Add consistency and standardization to the resolution of severe accident issues based on the current technical information.

5. Facilitate design certification rulemakings.

This rule would then help assure that the risk to the public from severe accidents in future LWRs is maintained at very low levels in accordance with experience from existing plants, current insights from risk studies and research results, and the Commission's Safety Goal Policy (August 4, 1986; 51 FR 28044). In addition, this rule could complement and support the review of Severe Accident Design Mitigation Alternatives (SAMDAs) on future LWRs as part of the environmental review carried out under 10 CFR Part 51.

Basis for the Rule

This rule would reflect the NRC's current understanding of severe accident issues from its research, experience with light water reactors now in operation, and review of future designs. Accordingly, this rule would apply to light water reactor designs only, but could possibly provide guidance for establishing criteria for other reactor types. The development of this rule relies on the major factors discussed below.

Since the accident at Three Mile Island in 1979, considerable research on severe accidents has been performed. This research has explored the phenomena associated with in-vessel and ex-vessel severe accident processes; hydrogen generation and control; the form, quantity, and timing of radioactive material release into the containment; challenges to containment integrity; and the consequences to the public. This research has led to the development of data and analytical tools to analyze severe accidents for current and future designs, assess severe accident risk, and evaluate potential risk-reduction improvements in design and operation.

Application of these research results has occurred in many areas. One comprehensive application has been the development of NUREG–1150 [1], "Severe Accident Risk: An Assessment for Five U.S. Nuclear Power Plants." NUREG–1150 used probabilistic techniques to analyze five operating plants from a severe accident risk perspective. This analysis provided the NRC staff with basic insights into the important event sequences that can lead to severe accidents and the mechanisms that can lead to a loss of containment function during severe accidents. These basic insights identified challenges to containment integrity that can be divided into two groups: energetic or rapid energy releases, and slower,

[1] Copies of NUREGS may be purchased from the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20013–7082. Copies are also available from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. A copy is also available for inspection and/or copying at the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC.

gradually evolving releases to the closed containment system. Examples of containment loadings in the first group include high pressure core melt ejection with direct containment heating, hydrogen combustion, and the initial release of stored energy from the reactor coolant system. Decay heat and noncondensible gas generation from core-concrete interactions typify the group of slow energy releases to the containment. Further insights from this analysis identified major contributors to risk to the public and potential design solutions.

Also, the NRC has frequently interacted over the past several years with EPRI and various reactor designers concerning regulatory criteria for the future evolutionary and passive LWRs. Some of these interactions have addressed both probabilistic and deterministic criteria associated with plant performance under severe accident conditions. These potential criteria have been discussed in various correspondence with EPRI and the reactor designers, and are documented in draft safety evaluation reports on the EPRI Advanced Light Water Reactor Requirements Document.

Finally, in preparing this ANPRM, the NRC has benefitted from the insights provided by an independent study of containment design criteria made by the Advisory Committee on Reactor Safeguards (ACRS). In a letter to the Commission on May 17, 1991, the ACRS proposed a set of criteria addressing the specific challenges posed by severe accidents to the containment design for future light water reactor nuclear power plants. In SECY–92–070, dated February 28, 1992, the NRC staff analyzed these ACRS criteria with respect to EPRI design requirements for evolutionary and passive LWRs, evolutionary vendor designs, passive vendor designs, and the existing Commission guidance for the NRC staff's review of severe accident issues for evolutionary LWRs. This ANPRM reflects consideration of the results of this analysis and the ACRS proposed criteria.

Applicability of the Rule

The NRC has accumulated an understanding of the evolutionary light water reactor designs to complement its understanding of severe accident issues from operating reactors. Based on this understanding, it is expected that the criteria developed in this rule would be consistent and compatible with the criteria being developed and applied in evolutionary LWR reviews. However, due to the advanced stage of the reviews of the current evolutionary designs (GE ABWR and ABB/CE System 80+), it is likely that the resolution of severe accident issues for these designs will occur via the individual design certifications before completion of this rulemaking. The NRC expects the resolution of severe accident issues for the evolutionary LWRs and the results of this rule to be essentially the same.

The NRC staff is also reviewing future LWR designs that use a passive design concept. In contrast to the evolutionary designs, the NRC staff has reviewed only conceptual design information from the passive plant vendors. This preliminary review has not identified any unique features that would prevent the evaluation of these designs under the rule discussed in this ANPRM. Therefore, this rule would be generally applicable to passive LWR designs. However, as detailed design information becomes available and review of the passive systems is completed, further rulemaking may be necessary.

Proposed Changes to Part 50

Discussed below are three potential alternatives for incorporating plant performance criteria for severe accidents into the regulations.

Alternative 1: Hardware Oriented Rule

This alternative (as are the other alternatives discussed in this ANPRM) is based upon ensuring that the risk significant severe accident phenomena, which may cause a loss of containment function in an LWR, are considered in future LWR designs. Based upon currently available information, including the results of risk studies and severe accident research programs, these risk significant severe accident phenomena are:

1. Hydrogen generation and transport, including burning and/or detonation, resulting from metal-water and core concrete reactions;
2. High pressure ejection of molten core material from the reactor vessel;
3. Interactions between molten core debris and reactor basemat material, containment wall and structural material;
4. Containment overpressure and overtemperature from decay heat, non-condensible gas generation, metal-water reactions;
5. Steam explosions from fuel-coolant interactions; and
6. Containment bypass.

Alternative 1 would specify reasonable design features or attributes of design features directed toward prevention or mitigation of the above phenomena. Where design features cannot be precisely specified to prevent or mitigate a severe accident phenomenon, this alternative would require that the applicant provide an evaluation of the phenomenon with respect to the overall containment performance objective specified in the rule. This alternative is derived from the containment performance criteria developed as part of the Commission's advanced reactor reviews and essentially codifies those criteria.

In this approach, those features of the design needed for severe accident prevention and mitigation would be specified directly in the rule. These requirements would be an "overlay" on the existing design basis requirements in 10 CFR part 50 for nuclear power plants. The requirements would be considered and justified on an enhanced safety basis (i.e. using safety goal, cost-benefit analysis and other appropriate considerations such as defense-in-depth and uncertainties) and would complement the existing design basis to enhance the level of safety. However, because of the low likelihood of severe accidents, these new requirements would not be considered to be traditional design basis requirements. For example, design features provided only for severe accident mitigation would not be subject to the same conservative analysis and design requirements that are necessary for systems developed to cope with design basis accidents. A regulatory guide would provide additional guidance on such design details as redundancy, diversity, system capacity, power supply, equipment survivability and analytical assumptions.

An example of this alternative follows:

50.XX Prevention and mitigation of severe accidents

(a) *Applicability.* The criteria of this section apply to the design of light water nuclear power reactors being considered for a construction permit or operating license under 10 CFR part 50 or applications under 10 CFR part 52 on or after the effective date of this rule. The criteria of this section also may provide guidance in establishing the requirements for other types of reactor designs.

(b) *Containment Performance Objective.* The design shall include a containment system that provides a barrier against the release of radioactive material for a period of approximately 24 hours following the onset of core damage under the more likely severe accident challenges. Following this 24 hour period, the containment should continue to maintain a barrier against the uncontrolled release of large

quantities of fission products. This shall be accomplished by:

(1) Including plant design features that:

(i) Provide the reactor coolant system (RCS) with the capability to rapidly and reliably reduce RCS pressure.

(ii) Provide a reactor cavity design that restricts as much as practical the amount of ejected core debris that reaches the upper containment or impinges directly on the containment wall. The cavity design, as a mitigating feature, should not unduly interfere with operations including refueling, maintenance, or surveillance activities.

(iii) Provide a reactor vessel support structure sufficient to retain the reactor vessel in place under the loads generated by a high pressure core-melt ejection.

(iv) Provide for containment-wide hydrogen control (e.g., igniters, large volume), that accommodates the hydrogen resulting from a 100-percent metal-water reaction of the active fuel cladding, and limits containment hydrogen concentration to no greater than 10 percent; or provides that the post-accident atmosphere will not support hydrogen combustion.

(v) Reduce the potential for and effect of interactions with molten core debris by:

(A) Providing reactor cavity floor space to promote core debris spreading and coolability;

(B) Providing a means to flood the reactor cavity to assist in the cooling process and scrubbing of fission products;

(C) Protecting the containment liner and other structural members from direct contact by molten core debris;

(D) Employing basemat materials which reduce the production of non-condensible gases when in contact with molten core debris: and

(E) Ensuring that containment temperature and pressure increases or the generation of missiles resulting from decay heat, fuel-coolant interactions, combustible gas generation and control, and core-basemat material interactions involving a range of event sequences which release core debris into the containment do not cause containment stresses to exceed ASME service level C limits for steel containments, or equivalent for concrete containments, or significant degradation of the containment design leak rate.

(vi) Reduce the possibility of containment bypass and a loss of coolant accident outside containment by designing, to the extent practical, all elements of systems and subsystems (e.g. piping, instrument lines, pump seals, heat exchanger tubes, and valves) located outside containment and connected to the RCS to an ultimate rupture strength at least equal to the full RCS pressure.

(2) Not crediting use of containment venting during the 24 hour period following the onset of core damage in evaluating the design for compliance with the containment performance objective in paragraph (b) above.

(c) *Equipment Survivability.* Features provided for severe accident prevention or mitigation shall be designed to operate for the time period needed in the environment (e.g., pressure, temperature, radiation) in which the equipment is relied upon to function, including consideration of the circumstances of applicable initiating events (e.g., transients, loss of AC power, loss of coolant accidents).

Maintaining containment integrity for a period of approximately 24 hours following the onset of core damage provides time for the remaining airborne activity in the containment (principally noble gases and iodine) to decay to a level that, when analyzed realistically, would be unlikely to cause prompt health effects if containment failure or controlled venting were to occur after that time. In addition, it represents a level of safety significantly below the quantitative health objective for prompt fatalities defined in the Commission's Safety Goal Policy. However, considering the uncertainties involved in analyzing the severe accident phenomena and progression and emphasis on defense-in-depth, it is not unreasonable to include some conservatism in the criteria. This time period would also enhance the time available for offsite protective actions.

To the extent practical during this period, the passive capability of the containment and any related design features (e.g., suppression pool) should provide for containment integrity. Following this period, the containment should continue to provide a barrier against the uncontrolled release of fission products. However, in keeping with the concept of allowing for intervention in coping with long-term or gradual energy release, controlled, elevated venting (if provided in the design) may be given credit in the design analysis after the initial 24 hour period to reduce the chance of containment failure. The intent of specifying in the design analysis no reliance on containment venting during the initial 24 hour period is to achieve the design objective of high containment integrity but not to constrain use of venting during operation if for some reason venting were the desired course of action. Alternatively, a design may use diverse containment heat removal systems or rely on the restoration of normal containment heat removal capability if enough time is available for major recovery actions.

The advantages of this approach include prescribing those design features to reduce the risk from severe accidents, thus promoting a more standardized resolution to severe accident issues. In effect, this alternative is also prescriptive regarding the severe accident phenomena that a future LWR design must address, since the design features specified are a direct result of the phenomena considered. The prescriptive nature of this alternative will also tend to facilitate the NRC review and design certification process by focusing the review on the severe accident phenomena which must be considered and the basic features which the design must incorporate to address those phenomena, thus enhancing regulatory efficiency. In addition, this approach essentially codifies Commission guidance on severe accident and containment issues from the advanced LWR reviews. This approach does not require the applicant to perform extensive severe accident analysis to show compliance with the rule. The applicant could primarily rely upon design features which, through previous analyses and research, have been shown to be effective in reducing the risk from the more likely severe accident scenarios, coupled with deterministic analysis to confirm that the containment performance objective is met.

The disadvantage to this option is that it could discourage designers of future LWRs from developing other design approaches that might be more cost-effective, innovative, or safer.

Alternative 2: Phenomena Oriented Rule

This alternative is a modified version of the first alternative. It, like the first alternative, states an overall containment performance goal and is based upon preventing or mitigating the same severe accident phenomena as described in Alternative 1. However, instead of specifying hardware requirements in the rule to meet the goal, this alternative specifies the severe accident phenomena that need to be addressed in the design. Based upon analysis of these severe accident phenomena, the designer would develop and propose the actual design features necessary to meet the goal. Regulatory guides would address items such as analytical methods, assumptions, acceptance criteria and guidance on design criteria for severe accident

hardware. An example of this alternative follows:

50.XX Prevention and mitigation of severe accidents

(a) *Applicability.* The criteria of this section apply to the design of light water nuclear power reactors being considered for a construction permit or operating license under 10 CFR part 50 or applications under 10 CFR part 52 on or after the effective date of this rule. The criteria of this section also may provide guidance in establishing the requirements for other types of reactor designs.

(b) *Containment Performance Objective.* The design shall include a containment system that provides a barrier against the release of radioactive material for a period of approximately 24 hours following the onset of core damage under the more likely severe accident challenges. Following this 24 hour period, the containment should continue to maintain a barrier against the uncontrolled release of large quantities of fission products. This shall be accomplished by:

(1) Minimizing the likelihood or effects on containment integrity of the following severe accident phenomena:

(i) Uncontrolled hydrogen burning and detonation;

(ii) Interactions between molten core debris and the reactor basemat material, reactor vessel support structure, containment wall, and other structural materials;

(iii) High pressure melt ejection;

(iv) Containment bypass and loss of interfacing system integrity;

(v) Steam explosions due to fuel-coolant interaction; and

(2) Not crediting use of containment venting during the 24 hour period following the onset of core damage in evaluating the design for compliance with the containment performance objective in paragraph (b) above.

(c) *Equipment Survivability.* Features provided for severe accident prevention and mitigation shall be designed to operate for the time period needed in the environment (e.g., pressure, temperature, radiation) in which the equipment is relied upon to function, including consideration of the circumstances of applicable initiating events (e.g., transients, loss of AC power, loss of coolant accidents).

The approach in this phenomena-oriented alternative would be similar to the hardware-oriented alternative in that it is prescriptive regarding the severe accident phenomena which must be addressed in the design; however, it does provide flexibility for the designer to propose solutions specific for the design. This alternative could be made more prescriptive by specifying, for example, the amount of hydrogen or molten core debris which must be considered but, nevertheless, would provide designers with considerably more design flexibility to address severe accident issues than Alternative 1. Applicants would be required to provide analyses showing that their proposed design meets the containment performance objective. However, this alternative would place a heavy reliance on analytical codes to predict the likelihood of severe accidents and their behavior accurately. Limitations of these analytical codes and gaps in knowledge of the phenomenological progression of severe accidents may make such a heavy reliance unacceptable, unless bounding parameters are used. Like Alternative 1, this alternative would facilitate the NRC review and design certification process by focusing the review and limiting litigation on the severe accident phenomena which must be considered; however, it would leave open to review and litigation whether the designer has adequately addressed the severe accident phenomena. Accordingly, this alternative could potentially require considerable NRC review effort prior to accepting an applicant's analytical results. Similar to Alternative 1, this alternative would be in the form of an overlay on the existing design basis specified in 10 CFR part 50 and justified on an enhanced safety basis.

Alternative 3: General Design Criteria (GDC) Oriented Rule

In this alternative, the NRC would develop a set of new design requirements that would include definition of specific challenges posed by severe accidents and issue them as changes or additions to appendix A, "General Design Criteria" (GDC), to 10 CFR part 50. Each new GDC would describe the nature of the severe accident challenge or containment load as well as a success criterion. Usually, success would be defined simply as maintenance of the containment function for an appropriate period following the particular challenge. Regulatory Guides would be developed to provide additional guidance on items such as analysis methods and assumptions. The ACRS outlined this approach in more detail in a letter to NRC Chairman K. Carr, dated May 17, 1991.[8]

This alternative would differ from the other alternatives in that the existing 10 CFR part 50 design basis would be modified to include severe accidents. Accordingly, the design requirements for the severe accident equipment (e.g., quality assurance, equipment survivability, redundancy/diversity) would need to be determined in relation to those for traditional design basis equipment. Different design requirements may be appropriate for severe accident equipment because of the low probability associated with severe accident scenarios. This alternative would give the designer flexibility in devising proposed solutions to severe accident phenomena. Like alternative 2, this alternative would require applicants to submit analyses showing that the criteria are met. Like alternative 2, this would place a heavy reliance on analytical codes to predict severe accident behavior accurately and would leave open to review and litigation in a licensing hearing or design certification rulemaking whether the designer has adequately addressed the severe accident phenomena.

Plans and Schedules

The plant performance requirements described in this ANPRM are part of the second phase of a program to decouple siting and design criteria. In this phase, plant performance requirements for severe accidents, in combination with other necessary changes to 10 CFR part 50, will result in a rule that would complete the decoupling of siting and design. Currently, the Commission plans to publish the proposed rule for comment in mid-1993 and to publish the final rule in mid-1994.

Specific Considerations

The NRC invites comments and recommendations from interested persons on the three alternatives for the proposed rulemaking or additional alternatives, if desired. Furthermore, the NRC requests comments and supporting legal and technical information on the following questions:

1. Is a rulemaking addressing severe accident plant performance criteria desirable? If so, why? If not, why not? Would a rule provide better coherence and predictability to the design review and certification processes for future reactor designs or is rulemaking on these issues via individual design certification sufficient?

[8] The ACRS letter is available for inspection at the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC. Single copies are available from Mr. Thomas King, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301)492-3980.

2. Would a new rule in 10 CFR part 50 concerning plant performance for severe accidents, as discussed in the three alternatives, provide a basis for revising the requirements on Emergency Planning Zones for future LWRs? If so, why? If not, why not?

3. One option for an overall containment performance criterion that has been considered is that the conditional failure probability of the containment should be less than approximately one in ten. Two of the alternatives use a deterministic surrogate that states that the containment should remain leak tight for a period of approximately 24 hours following the onset of core damage and, after that time, remain a barrier against the uncontrolled release of radioactivity when faced with challenges from the more likely severe accident phenomena. Is this criterion a suitable substitute for the conditional containment failure probability of one in ten? If so, explain why. If not, explain why not. Is a period of approximately 24 hours an appropriate time frame? Is its degree of conservatism appropriate considering uncertainties and defense-in-depth? If not, what alternative would be appropriate? What other criteria (probabilistic or deterministic) might be considered?

4. Alternative 2 would require extensive reliance on analytical tools that calculate the effects of severe accident phenomena. Are there analytical tools that are sufficiently developed and adequate to allow effective implementation of such a phenomena-based rule? If so, what are they, and for what phenomena could they be used? How would alternative 2 be implemented? For example, should the codes and input parameters be approved by NRC? Should acceptance criteria be codified or put in a regulatory guide?

5. Should future LWR containment designs include features beyond those described in alternative 1 to prevent/mitigate severe accidents? If so, what are they?

6. Alternatives 2 and 3 specify phenomenological severe accident challenges that should be considered in the design. Alternative 1 is based upon the same phenomena/challenges. Are there other severe accident phenomena/challenges that should be considered? What should be the criteria for deciding whether a severe accident phenomena or challenge is likely and should be considered? Should the challenges be specified in more detail (for example, specifying the amount of hydrogen generation) or is a general statement of the challenge more desirable?

7. For what reason (e.g., not a risk significant phenomena, not a cost effective solution) would any of the criteria proposed in the three alternatives not be fully applicable to passive designed LWRs?

8. What features could an advanced LWR design include that would prevent or mitigate fuel-coolant interactions?

9. If a design includes the capability to rapidly depressurize the primary system, should it also be required to have a reactor cavity design and/or a reactor vessel support structure capable of mitigating and accommodating a high pressure melt ejection?

10. Should future LWR designs include an on-line instrumentation system that monitors containment atmosphere for gross leakage to reduce the risk from an inadvertent bypass of containment function? Would application of this system be sufficient basis to modify leak rate testing requirements under 10 CFR part 50, appendix J, "Primary Reactor Containment Leakage Testing for Water-Cooled Power Reactors."

11. What design criteria should be developed that provide assurance that the containment's integrity could easily be established during certain shutdown conditions?

12. Should equipment provided only for severe accident prevention or mitigation be subject to (a) the same requirements as design basis equipment (e.g., redundancy/diversity, power supply, environmental qualification, inclusion in plant Technical Specifications, maintenance priority, quality assurance); or (b) lesser standards (e.g., reduced design margins or the regulatory guidance found in appendices A and B of Regulatory Guide 1.155, "Station Blackout?"). If lesser standards, what standards would be appropriate?

13. Alternative 1 discusses not exceeding ASME service level C stress limits for steel containments under certain severe accident conditions. Are these limits appropriate for severe accident conditions? If not, what limits would be appropriate? Could these same stress limits also be used for loads generated by missiles? If not, what limits would be appropriate? What equivalent limits would be appropriate for concrete containments?

14. What information is available regarding the costs (capital and operational/maintenance) of design features that would be required under these alternatives?

15. The containment performance objective discussed in Alternatives 1 and 2 (i.e., containment shall provide a barrier against the release of radioactive material for a period of approximately 24 hours following the onset of core damage) represents a level of safety for a 3800 Mwt plant sited in accordance with 10 CFR part 100 approximately three orders of magnitude below the Commission's quantitative health objective for prompt fatalities, as defined in the Commission's Safety Goal Policy Statement. It could be argued that a future LWR design meeting this objective through analyses and the incorporation of design features need not consider the addition of other features, since these other features would be directed at even more highly unlikely severe accident phenomena and sequences which could be considered "remote and speculative" under the National Environmental Policy Act (NEPA) and 10 CFR part 51. Therefore, would the codification and compliance with such a containment performance objective be sufficient to also define a point of truncation and serve as the basis for an amendment to 10 CFR part 51 eliminating the need for further review of SAMDAs for future LWRs under 10 CFR part 51?

The preliminary views expressed in this ANPRM may change after considering the comments received. In any case, the NRC will provide an opportunity for additional public comment on any proposed rule developed as a result of this notice.

List of Subjects in 10 CFR Part 50

Antitrust, Classified information, Criminal penalties, Fire protection, Incorporation by reference, Intergovernmental relations, Nuclear power plants and reactors, Radiation protection, Reactor siting criteria, Reporting and recordkeeping requirements.

BILLING CODE 7590-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Part 416

RIN 0960-AC55

Supplemental Security Income for the Aged, Blind, and Disabled; Continuation of Full Benefit Standard for Persons Temporarily Institutionalized

AGENCY: Social Security Administration, HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: These proposed regulations would implement section 3 of the Employment Opportunities for Disabled Americans Act and section 9115 of the Omnibus Budget and Reconciliation Act of 1987. These statutory provisions amend the Social Security Act (the Act) to permit certain recipients to receive payments based on the full supplemental security income (SSI) benefit rate for a limited period after becoming residents of medical or psychiatric institutions.

DATES: To be sure your comments are considered, we must receive them no later than November 27, 1992.

ADDRESSES: Comments should be submitted in writing to the Commissioner of Social Security, Department of Health and Human Services, P.O. Box 1585, Baltimore, MD 21235, or delivered to the Office of Regulations, Social Security Administration, 3-B-1 Operations Building, 6401 Security Boulevard, Baltimore, MD 21235, between 8 a.m. and 4:30 p.m. on regular business days. Comments received may be inspected during these same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: L.V. Dudar, Legal Assistant, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235, (301) 965-1795.

SUPPLEMENTARY INFORMATION: The present regulations generally require the suspension of SSI benefits when a recipient is a resident of a public institution throughout a month, except that the recipient may receive a reduced benefit if he or she is a resident throughout a month in a public or private institution where over 50 percent of the cost of care is paid for by Medicaid. The following legislative provisions, however, now allow for benefits based on the full SSI Federal benefit rate to continue during months of residency in an institution under certain circumstances.

Benefits Payable Based on Section 1611(e)(1)(E) of the Act

Section 3 of Public Law 99-643 (the Employment Opportunities For Disabled Americans Act) added subparagraph (E) to section 1611(e)(1) of the Act. Based on this added provision, a recipient, whose SSI eligibility is based on section 1619 (a) or (b) of the Act for the month preceding the first full month of residence in (1) a public medical or psychiatric institution or (2) a public or private institution where Medicaid is paying more than 50 percent of the cost of care, can remain eligible for an SSI benefit based on the full Federal benefit rate for up to 2 months after entering the institution. This statutory provision also provides that payment is conditioned on an agreement by the institution that these benefits are to be retained by the recipient and cannot be used to defray the cost of institutional care.

Section 1902(o) of the Act requires that all State Medicaid plans provide for disregarding any SSI payments in computing the post-eligibility contribution of the individual to the cost of care. Therefore, if the institution is receiving Medicaid payments for the recipients, we will rely on the agreement the institution signed with the State Medicaid agency to ensure that this condition is met.

Benefits Payable Based on Section 1611(e)(1)(G) of the Act

Section 9115 of Public Law 100-203 (the Omnibus Budget Reconciliation Act of 1987) added subparagraph (G) to section 1611(e)(1) of the Act. Based on this added provision, a recipient is eligible for continued benefits for up to 3 full months after entering the institution if the following conditions are met:

1. A physician certifies that the recipient's stay in the institution or facility is likely not to exceed 3 months;
2. The recipient demonstrates a need to continue to maintain and provide for the expenses of a home or other living arrangement to which he or she may return after leaving the facility; and
3. The recipient was eligible for Federal SSI cash benefits or Federally-administered State supplementation in the month before the month benefits would otherwise be reduced or suspended because of residence in an institution.

The following policies implement the provisions of section 1611(e)(1)(G) of the Act.

We state in the proposed regulations at § 416.212(b) that, in order for a recipient to be eligible for these benefits, the physician's certification and the evidence of the need to pay home or living arrangement expenses must be submitted to SSA no later than the day of discharge or the 90th full day of confinement, whichever is earlier. We will determine the date of submission to be the date we receive it or, if mailed, the date of the postmark. This time frame for submission of the needed evidence to establish eligibility for continued payments represents what we believe is the best balance between the statutory language and congressional intent that:

- The benefits are payable "without interruption;"
- The physician's statement must be "anticipatory" (i.e., based on an expectation rather than accomplished fact); and,
- The Secretary will assist recipients in establishing eligibility for the payments.

We will encourage recipients to submit the necessary evidence as early as possible to facilitate our administration of the provision.

Section 1611(e)(1)(H) allows, but does not require, the Secretary to enter into agreements with outside agencies and organizations for making the determinations required under section 1611(e)(1)(G). We are not exercising the option at this time. The determinations are of a kind that the Social Security Administration makes in the normal course of administering the SSI program.

Proposed Regulations Applicable to Both Categories of Benefits

The proposed regulatory amendments include the following policy provisions that are applicable to both categories of benefits:

1. We will compute a recipient's benefits under sections 1611(e)(1)(E) and 1611(e)(1)(G) of the Act on the basis of the permanent living arrangement used to compute benefits for the month immediately prior to the first month the recipient is otherwise subject to suspension under § 416.1325 or subject to a reduced benefit amount under § 416.414 because of residence in an institution. All the Federal income provisions (including living arrangements, in-kind support and maintenance, and deeming) applicable to the recipient's permanent living arrangement will continue to apply for the period in which benefits are payable while in the institution. This also means that we will compute the benefits as an eligible couple (instead of as two eligible individuals) for months in which

either benefit is being paid to one member of the couple.

We are also proposing to amend the rules on temporary absence from a living arrangement at § 416.1149 to show that these recipients are "temporarily absent" from their permanent living arrangement. This living arrangement as a computation basis will not extend past the last month that section 1611(e)(1)(E) or section 1611(e)(1)(G) benefits are payable or, if the recipient is discharged in the month following the last month of eligibility for section 1611(e)(1)(E) or section 1611(e)(1)(G) benefits, past the date of discharge. In the event the recipient remains institutionalized and becomes eligible for a reduced benefit, the temporary absence ends, and we will consider the institution as the permanent living arrangement. The computation basis will no longer include factors (e.g., deemed income) which were applicable in the recipient's last permanent living arrangement.

We are amending §§ 416.1147, 416.1149, and 416.1167 to reflect the temporary absence rules applicable to the treatment of in-kind support and maintenance and deeming of income and resources for these two types of benefits. We are also amending §§ 416.410, 416.412, 416.413, and 416.414 both to reference the extension of full benefit eligibility to institutionalized recipients under sections 1611(e)(1)(E) and 1611(e)(1)(G) and to update and include the full Federal yearly benefit rate applicable in recent years to an eligible individual, qualified individual, and an eligible couple.

2. The proposed new §§ 416.212(a)(2) and 416.212(c) and proposed amendments to § 416.540 (b) and (c) state the policy barring reimbursement to an institution for a recipient's current maintenance (excepting, of course, reimbursement of expenditures for personal needs) from the benefits authorized under section 1611(e)(1)(E) and section 1611(e)(1)(G) of the Act.

Section 1611(e)(1)(E) prohibits payment of benefits unless the institution agrees to permit the recipient to retain any benefits paid under this section. If the institution is receiving Medicaid payments for the recipient, we rely on the agreement the institution signed with the State Medicaid agency to ensure this condition is enforced. However, section 1611(e)(1)(G) does not specifically require that the recipient be permitted to retain the benefits payable under that section, as does section 1611(e)(1)(E). The legislative history is clear, however, that Congress intended that the benefits payable under section 1611(e)(1)(G) be available for maintenance of the recipient's home or living arrangement and not for paying the institutions for the cost of the recipient's current maintenance except reimbursement of expenditures of personal needs. Moreover, as noted above, section 1902(o) of the Act requires that all State Medicaid plans provide for disregarding any SSI payments in computing the post-eligibility contribution of the individual to the cost of care. Consequently, to permit institutions to secure these benefits would appear to negate the purpose of the legislation and in the case of Medicaid institutions, be in conflict with section 1902(o) of the Act. Based on this intent and section 1902(o), we are extending the prohibition on the payment of benefits to, or the use of benefits by, an institution to defray current maintenance costs, except personal needs items, to benefits payable under section 1611(e)(1)(G). This prohibition concerning benefits payable under the two sections will be implemented as follows.

The current § 416.640(c) prohibits a representative payee from reimbursing an institution from SSI benefits for the current maintenance costs of an institutionalized recipient when Medicaid pays to the institution more than 50 percent of the cost of the individual's care. We amended § 416.640(c) to provide that the prohibition on reimbursement for current maintenance costs (with the exception of personal needs) would apply to recipients who are receiving benefits payable under section 1611(e)(1)(E) as well as section 1611(e)(1)(G) of the Act. Additionally, in view of Congressional intent that benefits payable under these two sections be used for meeting expenses outside the institution, the amended § 416.640(b) and new §§ 416.212(a)(2) and 416.212(c) provide that an institution must allow the recipient to retain benefits paid under sections 1611(e)(1)(E) and 1611(e)(1)(G). The institution can only be reimbursed for nominal costs it may have incurred for the recipient's personal needs such as personal hygiene items, snacks, and candy. We believe that payments to the institution for these costs is not inconsistent with sections 1611(e)(1)(E) and 1611(e)(1)(G). However, reimbursement is not permitted beyond personal needs.

3. We are proposing to amend § 416.2040 to reflect that for States whose supplementation programs are federally administered under the authority of section 1616(a) of the Act and/or section 212 of Public Law 93–66, institutionalized recipients receiving benefits under either section 1611(e)(1)(E) or section 1611(e)(1)(G) can continue to be eligible to receive the optional/mandatory State supplementary payments. In addition, a recipient who would be eligible for benefits authorized under § 416.212 but for countable income which reduces his or her Federal SSI benefit to zero may still be eligible to receive a Federally-administered States supplementary payment. Non-Federally-administered States will elect whether institutionalized beneficiaries receiving Federal benefits under either section 1611(e)(1)(E) or section 1611(e)(1)(G) will receive the same State supplementary payment they received in the first full month of institutionalization or the payment (if any) normally made in such circumstances.

We are extending eligibility for federally administered State supplementation to recipients receiving benefits payable under the two sections. With respect to federally administered optional State supplementation, section 1616(b)(2) of the Act provides the Secretary with broad authority to adopt such " * * * procedural or other general administrative provisions, as the Secretary finds necessary * * * to achieve efficient and effective administration of both the program which he conducts under this title and the optional State supplementation." The regulation at § 416.2005(d) provides similar authority for federally administered mandatory State supplements. These authorities enable SSA to administer statutory provisions that affect State supplementation in a fashion fully in accord with their underlying congressional intent. Congress, when enacting section 1611(e)(1)(E) and section 1611(e)(1)(G), intended that recipients not be disadvantaged financially when entering an institution for a stay of short duration. To implement this intention, we consider the recipient's living arrangement as not having changed when computing the amount of the Federal benefit payable under sections 1611(e)(1)(E) and 1611(e)(1)(G). The same policies used for determining the Federal benefit will be used to determine the State supplementary payment. Thus, a recipient's living arrangement would not be considered to have changed for purposes of determining the recipient's State supplementary payment. This will ensure that the State supplementary payments payable in the month prior to the first full month of institutionalization will, subject to the income counting provisions, continue through the months of institutionalization. Thus, we believe

that the policy will assist the Secretary in achieving efficient and effective administration of both the title XVI and State supplementary payment programs, because continuing the State supplementary payments will negate the need for field office intervention, with attendant error potential.

In light of the programmatic and administrative concerns set forth above, it is reasonable to conclude that the Secretary may exercise discretion and require, under the authority of section 1616(b)(2) of the Act, States, whose State supplementary payments are federally administered, to continue to supplement the full benefit rate payable for months of hospitalization under both section 1611(e)(1)(E) and section 1611(e)(1)(G).

4. We are also amending § 416.1325 of subpart M in part 416 to show that benefits will not be suspended for months of residency in a public institution is the recipient is eligible for benefits payable under section 1611(e)(1)(E) or section 1611(e)(1)(G) of the Act for those months. However, this amended rule is not being included in these regulations and, instead, will be separately published as an interim final rule in final regulations which recodify subpart M entitled: "Suspensions, Terminations, and Advance Notice of Unfavorable Determination."

Regulatory Procedures

Executive Order 12291

These proposed regulations have been reviewed under Executive Order 12291 and the Secretary has determined that this is not a major rule because program costs for implementing the legislation upon which these rules are based are not anticipated to exceed $16.9 million a year for the next 2 fiscal years. Therefore, a regulatory impact analysis is not required.

Paperwork Reduction Act

This proposed rule contains information collection requirements in §§ 416.212(b)(3) and 416.212(b)(4). As required by section 2(a) of the Paperwork Reduction Act of 1980, 44 U.S.C. 3504(h), we will submit a copy to the Office of Management and Budget (OMB) for its review. Other organizations and individuals desiring to submit comments on these information collection requirements should direct them to the agency official whose name appears in this preamble and to the Office of Information and Regulatory Affairs, OMB, New Executive Office Building, room 3208, Washington, DC 20503, Attention: Desk Officer for HHS.

Public reporting burden for each of these collections of information is estimated to average 5 minutes per response. This includes the time it will take to read the instructions, gather the necessary facts, and provide the information requested. The respondents to the collection in subsection (3) will be physicians. The respondents to the requirement in subsection (4) will be recipients of SSI payments. We estimate that 60,000 people will provide this information yearly. The total annual burden for both information collections is therefore estimated to be 5,000 hours. If you have any comments or suggestions on this estimate, write to the Social Security Administration, Attn: Reports Clearance Officer, 1–A–21 Operations Building, Baltimore, MD 21235, and to the Office of Management and Budget, Paperwork Reduction Project (0960–NEW), Washington, DC 20503.

Regulatory Flexibility Act

We certify that these proposed regulations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Therefore, a regulatory flexibility analysis as provided in Public Law 96–354 the Regulatory Flexibility Act, is not required.

(Catalog of Federal Domestic Assistance Programs No. 93.807, Supplemental Security Income Program.)

List of Subjects in 20 CFR Part 416

Administrative practice and procedure; Aged, Blind, Disability benefits; Public Assistance programs; Supplemental Security Income.

Dated: December 13, 1991.

Gwendolyn S. King,

Commissioner of Social Security.

Approved: March 11, 1992.

Louis W. Sullivan.

Secretary of Health and Human Services.

For the reasons set forth in the preamble, subparts B, D, F, K, and T of part 416 of chapter III of title 20 of the Code of Federal Regulations are amended to read as follows:

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Subpart B—Eligibility

1. The authority citation for part 416, subpart B is revised to read as follows:

Authority: Secs. 1102, 1110(b), 1602, 1611, 1614, 1615(c), 1619(a), 1631, and 1634 of the Social Security Act; 42 U.S.C. 1302, 1310(b), 1381a, 1382, 1382c, 1382d(c), 1382h(a), 1383, and 1383c.

2. Section 416.211 is amended by revising paragraphs (a)(1) and (b) to read as follows:

§ 416.211 You are a resident of a public institution.

(1) *General rule.* (1) Subject to the exceptions described in paragraphs (b), (c), and (d) of this section and § 416.212 of this subpart, you are not eligible for SSI benefits for any month throughout which you are a resident of a public institution as defined in § 416.201. In addition, if you are a resident of a public institution when you apply for SSI benefits and meet all other eligibility requirements, you cannot be eligible for benefits until the day of your release from the institution. The amount of your SSI benefits for the month of your release will be prorated (see subpart D) beginning with the date of your release.

* * * * *

(b) *Exception—SSI benefits payable at a reduced rate.* (1) You may be eligible for SSI benefits at a reduced rate described in § 416.414, if—

(i) The public institution in which you reside throughout a month is a medical care facility for which Medicaid (title XIX of the Act) pays a substantial part (more than 50 percent) of the cost of your care; or

(ii) You reside for part of a month in a public institution and the rest of the month in a public institution or private medical facility where Medicaid pays more than 50 percent of the cost of your care; and,

(iii) You are ineligible in that month for a benefit described in § 416.212 of this subpart that is payable to a person temporarily confined in a medical facility.

§§ 416.212 through 416.214 [Redesignated as §§ 416.213 through 416.215]

3. Sections 416.212 through 416.214 are redesignated as §§ 416.213 through 416.215 respectively and a new § 416.212 is added to read as follows:

§ 416.212 Continution of full benefits in certain cases of medical confinement.

(a) *Benefits payable under section 1611(e)(1)(E) of the Social Security Act.* Subject to eligibility and regular computation rules (see Subparts B and D of this Part), you are eligible for the benefits payable under section 1611(e)(1)(E) of the Social Security Act for up to 2 full months of medical confinement during which your benefits would otherwise be suspended because of residence in a public institution or reduced because of residence in a public or private institution where Medicaid

pays over 50 percent of the cost of your care if—

(1) You were eligible for benefits based on either section 1619(a) or section 1619(b) of the Social Security Act in the month before the first full month of residence in an institution;

(2) The institution agrees that no portion of these benefits will be paid to or retained by the institution excepting nominal sums for reimbursement of the institution for any outlay for a recipient's personal needs (e.g., personal hygiene items, snacks, candy); and,

(3) The month of your institutionalization is one of the first 2 full months of a continuous period of confinement.

(b) *Benefits payable under section 1611(e)(1)(G) of the Social Security Act.* Subject to eligibility and regular computation rules (see subparts B and D of this part), you are eligible for the benefits payable under section 1611(e)(1)(G) of the Social Security Act for up to 3 full months of medical confinement during which your benefits would otherwise be suspended because of residence in a public institution or reduced because of residence in a public or private institution where Medicaid pays over 50 percent of the cost if—

(1) You were eligible for SSI cash benefits and/or Federally-administered State supplementary payments for the month immediately prior to the first full month you were a resident in such institution;

(2) The month of your institutionalization is one of the first 3 full months of a continuous period of confinement;

(3) A physician certifies, in writing, that you are not likely to be confined for longer than 90 full consecutive days following the day you entered the institution, and the certification is submitted to SSA no later than the day of discharge or the 90th full day of confinement, whichever is earlier; and,

(4) You need to pay expenses to maintain the home or living arrangement to which you intend to return after institutionalization and evidence regarding your need to pay these expenses is submitted to SSA no later than the day of discharge or the 90th full day of confinement, whichever is earlier. We will determine the date of submission of the evidence required in paragraphs (b) (3) and (4) of this section to be the date we receive it or, if mailed, the date of the postmark.

(c) *Prohibition against using benefits for current maintenance.* If the recipient is a resident in an institution, the recipient or his or her representative payee will not be permitted to pay the institution any portion of benefits payable under section 1611(e)(1)(G) excepting nominal sums for reimbursement of the institution for any outlay for the recipient's personal needs (e.g., personal hygiene items, snacks, candy). If the institution is the representative payee, it will not be permitted to retain any portion of these benefits for the cost of the recipient's current maintenance excepting nominal sums for reimbursement for outlays for the recipient's personal needs.

Subpart D—Amount of Benefits

4. The authority citation for part 416, subpart D continues to read as follows:

Authority: Secs. 1102, 1611(a), (b), (c), and (e), 1612, 1617, and 1631 of the Social Security Act; 42 U.S.C. 1302, 1382(a), (b), (c), and (e), 1382a, 1382f, and 1383.

5. Section 416.410 is revised to read as follows:

§ 416.410 Amount of benefits; eligible individual.

The benefit under this part for an eligible individual (including the eligible individual receiving benefits payable under the § 416.212 provisions) who does not have an eligible spouse, who is not subject to either benefit suspension under § 416.1325 or benefit reduction under § 416.414, and who is not a qualified individual (as defined in § 416.221) shall be payable at the rate of $4,884 per year ($407 per month) effective for the period beginning January 1, 1991. This rate is the result of a 5.4 percent cost-of-living adjustment (see § 416.405) to the December 1990 rate. For the period January 1, through December 31, 1990, the rate payable, as increased by the 4.7 percent cost-of-living adjustment, was $4,632 per year ($386 per month). For the period January 1, through December 31, 1989, the rate payable, as increased by the 4 percent cost-of-living adjustment, was $4,416 per year ($368 per month). For the period January 1, through December 31, 1988, the rate payable, as increased by the 4.2 percent cost-of-living adjustment, was $4,248 per year ($354 per month). For the period January 1, through December 31, 1987, the rate payable, as increased by the 1.3 percent cost-of-living adjustment, was $4,080 per year ($340 per month). For the period of January 1, through December 31, 1986, the rate payable, as increased by the 3.1 percent cost-of-living adjustment, was $4,032 per year ($336 per month). For the period January 1, through December 31, 1985, the rate payable, as increased by the 3.5 percent cost-of-living adjustment, was $3,900 ($325 per month). For the period January 1, through December 31, 1984, the rate payable, as increased by the 3.5 percent cost-of-living adjustment, was $3,768 per year ($314 per month). For the period of July 1, through December 31, 1983, the rate payable was $3,561.60 per year ($304.30 per month), as provided by the Social Security Amendments of 1983 (Pub. L. 98–21, section 401). For the period July 1, 1982, through June 30, 1983, the rate, as increased by the 7.4 percent cost-of-living adjustment, was $3,411.60 yearly ($284.30 monthly). The monthly rate is reduced by the amount of the individual's income which is not excluded pursuant to subpart K of this part.

6. Section 416.412 is revised to read as follows:

§ 416.412 Amount of benefits; eligible couple.

The benefit under this part for an eligible couple (including couples where one or both members of the couple are receiving benefits payable under the § 416.212 provisions), neither of whom is subject to suspension of benefits based on § 416.1325 or reduction or benefits based on § 416.414 nor is a qualified individual (as defined in § 416.221) shall be payable at the rate of $7,320 per year ($610 per month), effective for the period beginning January 1, 1991. This rate is the result of a 5.4 percent cost-of-living adjustment (see § 416.405) to the December 1990 rate. For the period January 1, through December 31, 1990, the rate payable, as increased by the 4.7 percent cost-of-living adjustment, was $6,948 per year ($579 per month). For the period January 1, through December 31, 1989, the rate payable, as increased by the 4 percent cost-of-living adjustment, was $6,636 per year ($553 per month). For the period January 1, through December 31, 1988, the rate payable, as increased by the 4.2 percent cost-of-living adjustment, was $6,384 ($532 per month). For the period January 1, through December 31, 1987, the rate payable, as increased by the 1.3 percent cost-of-living adjustment, was $6,120 ($510 per month). For the period January 1, through December 31, 1986, the rate payable, as increased by the 3.1 percent cost-of-living adjustment, was $6,048 ($504 per month). For the period January 1, through December 31, 1985, the rate payable, as increased by the 3.5 percent cost-of-living adjustment, was $5,856 ($488 per month). For the period January 1, through December 31, 1984, the rate payable, as increased by the 3.5 percent cost-of-living adjustment, was $5,664 per year ($472 per month). For the period July 1, through December 31, 1983, the rate payable was $5,476.80 per year ($456.40 per month), as provided by the

Social Security Amendments of 1983 (Pub. L. 98–21, section 401). For the period July 1, 1982, through June 30, 1983, the rate, as increased by the 7.4 percent cost-of-living adjustment, was $5,116.80 yearly ($426.40 monthly). The monthly rate is reduced by the amount of the couple's income which is not excluded pursuant to subpart K of this part.

7. Section 416.413 is revised to read as follows:

§ 416.413 Amount of benefits; qualified individual.

The benefit under this part for a qualified individual (defined in § 416.221) is payable at the rate for an eligible individual or eligible couple plus an increment for each essential person (defined in § 416.222) in the household, reduced by the amount of countable income of the eligible individual or eligible couple as explained in § 416.420. A qualified individual will receive an increment of $2,448 per year ($204 per month), effective for the period beginning January 1, 1991. This rate is the result of the 5.4 percent cost-of-living adjustment (see § 416.405) to the December 1990 rate, and is for each essential person (as defined in § 416.222) living in the household of a qualified individual. (See § 416.532.) For the period January 1, through December 31, 1990, the rate payable, as increased by the 4.7 percent cost-of-living adjustment, was $2,316 per year ($193 per month). For the period January 1, through December 31, 1989, the rate payable, as increased by the 4 percent cost-of-living adjustment, was $2,208 per year ($184 per month). For the period January 1, through December 31, 1988, the rate payable, as increased by the 4.2 percent cost-of-living adjustment, was $2,124 ($177 per month). For the period January 1, through December 31, 1987, the rate payable, as increased by the 1.3 percent cost-of-living adjustment, was $2,040 ($170 per month). For the period January 1, through December 31, 1986, the rate payable, as increased by the 3.1 percent cost-of-living adjustment, was $2,016 ($168 per month). For the period January 1, through December 31, 1985, the rate payable, as increased by the 3.5 percent cost-of-living adjustment, was $1,956 ($163 per month). For the period January 1, through December 31, 1984, the rate payable, as increased by the 3.5 percent cost-of-living adjustment, was $1,884 per year ($157 per month). For the period July 1, through December 31, 1983, the rate was $1,830 per year ($152.50 per month), as provided by the Social Security Amendments of 1983 (Pub. L. 98–21, section 401). For the period July 1, 1982, through June 30, 1983, the rate, as increased by the 7.4 percent cost-of-living adjustment, was $1,710 yearly ($142.50 monthly). The total benefit rate, including the increment, is reduced by the amount of the individual's or couple's income that is not excluded pursuant to subpart K of this part.

8. Section 416.414 is amended by revising the introductory statement of paragraph (a) to read as follows:

§ 416.414 Amount of benefits; eligible individual or eligible couple in a medical care facility.

(a) *General rule.* Except where the § 416.212 provisions provide for payment of benefits at the rates specified under §§ 416.410 and 416.412, reduced SSI benefits are payable to persons and couples who are in medical care facilities where more than 50 percent of the cost of their care is paid by a State plan under title XIX of the Social Security Act (Medicaid). Persons and couples to whom these reduced benefits apply are—

* * * * *

Subpart F—Representative Payment

9. The authority citation for part 416, subpart F continues to read as follows:

Authority: Secs. 1102 and 1631(a)(2) and (d)(1) of the Social Security Act; 42 U.S.C. 1302 and 1383(a)(2) and (d)(1).

10. Section 416.640 is amended by revising paragraph (B) to read as follows:

§ 416.640 Use of benefit payments.

* * * * *

(b) *Institution not receiving Medicaid funds on beneficiary's behalf.* If a beneficiary is receiving care in a Federal, State, or private institution because of mental or physical incapacity, current maintenance will include the customary charges for the care and services provided by an institution, expenditures for those items which will aid in the beneficiary's recovery or release from the institution, and nominal expenses for personal needs (e.g., personal hygiene items, snacks, candy) which will improve the beneficiary's condition. Except for the benefits payable under the § 416.212 provisions which are intended to be used for maintaining a home or living arrangement outside the institution to which the individual intends to go after confinement and which the institution cannot use for a beneficiary's current maintenance, excepting nominal sums for the recipient's personal needs, there is no restriction in using SSI benefits for a beneficiary's current maintenance in an institution. Any payments remaining from SSI benefits may be used for a temporary period to maintain the beneficiary's residence outside of the institution unless a physician has certified that the beneficiary is not likely to return home.

Example: A hospitalized disabled beneficiary is entitled to a monthly benefit of $264. The beneficiary, who resides in a boarding home, has resided there for over 6 years. It is doubtful the beneficiary will leave the boarding home in the near future. The boarding home charges $215 per month for the beneficiary's room and board.

The beneficiary's representative payee pays the boarding home $215 (assuming an unsuccessful effort was made to negotiate a lower rate during the beneficiary's absence) and uses the balance to purchase miscellaneous personal items for the beneficiary. There are no benefits remaining which can be conserved on behalf of the beneficiary. The payee's use of the benefits is consistent with our guidelines.

(c) *Institution receiving Medicaid funds on beneficiary's behalf.* Except in the case of a beneficiary receiving benefits payable under § 416.212, if a beneficiary resides throughout a month in an institution that receives more than 50 percent of the cost of care on behalf of the beneficiary from Medicaid, any payments due shall be used only for the personal needs of the beneficiary and not for other items of current maintenance.

Example: A disabled beneficiary resides in a hospital. The superintendent of the hospital receives $30 per month as the beneficiary's payee. The benefit payment is disbursed in the following manner, which would be consistent with our guidelines:

Miscellaneous canteen items	$10
Clothing	12
Conserved for future needs of the beneficiary	8

For a beneficiary receiving benefits payable under § 416.212, benefits must be available for expenses of maintaining a home or living arrangement to which the beneficiary intends to go after medical confinement.

Subpart K—Income

11. The authority citation for part 416, subpart K is revised to read as follows:

Authority: Secs. 1102, 1602, 1611, 1612, 1613, 1614(f), 1621, and 1631 of the Social Security Act; 42 U.S.C. 1302, 1381a, 1382, 1382a, 1382b, 1382c(f), 1382j, and 1383.

12. Section 416.1147 is amended by revising paragraphs (c) and (f) to read as follows:

§ 416.1147 How we value in-kind support and maintenance for a couple.

* * * * *

(c) *One member of a couple lives in another person's household and*

receives food and shelter from that person and the other member of the couple is in a medical institution. (1) If one of you is living in the household of another person who provides you with both food and shelter and the other is in a medical institution that receives substantial Medicaid payments for his or her care (§ 416.211(b)) and is ineligible in the month for either benefit payable under § 416.212, we compute your benefits as if you were separately eligible individuals. This begins with the first full calendar month that one of you is in the medical institution. The one living in another person's household is eligible at an eligible individual's Federal benefit rate and one-third of that rate is counted as income not subject to any income exclusions. The one in the medical institution cannot receive more than the reduced benefit described in § 416.414(b)(1).

(2) If the one member of the couple in the institution is eligible for one of the benefits payable under the § 416.212 provisions, we compute benefits as a couple at the rate specified under § 416.412. However, if that one member remains in the institution for a full month after expiration of the period benefits based on § 416.212 can be paid, benefits will be computed as if each person were separately eligible as described under paragraph (c)(1) of this section. This begins with the first calendar month after expiration of the period benefits based on § 416.212 can be paid.

* * * * *

(f) *One member of a couple is subject to the presumed value rule and the other member is in a medical institution.* (1) If one of you is subject to the presumed value rule and the other is in a medical institution that receives substantial Medicaid payments for his or her care (see § 416.211(b)) and is ineligible in that month for either benefit payable under § 416.212, we compute your benefits as if both members of the couple are separately eligible individuals. This begins with the first full calendar month that one of you is in the medical institution. We value any food, clothing, or shelter received by the one outside of the medical institution at one-third of an eligible individual's Federal benefit rate, plus the amount of the general income exclusion (§ 416.1124(c)(12)), unless you can show that their value is less as described in § 416.1140(a)(2). The member of the couple in the medical institution cannot receive more than the reduced benefit described in § 416.414(b)(1).

(2) If one of you is subject to the presumed value rule and the other in the institution is eligible for one of the benefits payable under § 416.212, we compute the benefits as a couple at the rate specified under § 416.412. However, if the one in the institution remains in the institution after the period benefits based on § 416.212 can be paid, we will compute benefits as if each member of the couple were separately eligible as described in paragraph (f)(1) of this section.

13. Section 416.1149 is amended by revising paragraphs (a) and (c)(1) to read as follows:

§ 416.1149 What is a temporary absence from your living arrangement.

(a) *General.* A temporary absence may be due to employment, hospitalization, vacations, or visits. The length of time an absence can be temporary varies depending on the reason for your absence. For purposes of valuing in-kind support and maintenance under §§ 416.1130 through 416.1148, we apply the rules in this section. In general we will find a temporary absence from your permanent living arrangement if you (or you and your eligible spouse)—

(1) Become a resident of a public institution, or a public or private medical care facility where over 50 percent of the cost of care is paid by Medicaid, and are eligible for the benefits payable under § 416.212; or,

(2) Were in your permanent living arrangement for at least 1 full calendar month prior to the absence and intend to, and do, return to your permanent living arrangement in the same calendar month in which you (or you and your spouse) leave, or in the next month.

* * * * *

(c) *Rules for temporary absence in certain circumstances.*

(1)(i) If you enter a medical care facility that receives substantial Medicaid payments for your care (as described in § 416.211(b)) and you are not eligible for either benefit payable under § 416.212 (and you have not received such benefits during your current period of confinement) and you intend to return to your prior living arrangement (and you are eligible for the reduced benefits payable under § 416.414 for full months in the facility), we consider this a temporary absence regardless of the length of your stay in the facility. We use the rules that apply to your permanent living arrangement to value any food, clothing, or shelter you receive during the month (for which reduced benefits under § 416.414 are not payable) you enter or leave the facility. During any full calendar month you are in the medical care facility, you cannot receive more than the Federal benefit rate described in § 416.414(b)(1). We do not consider food or shelter provided during a medical confinement to be income.

(ii) If you enter a medical care facility and you are eligible for either benefit payable under § 416.212, we also consider this a temporary absence from your permanent living arrangement. We use the rules that apply to your permanent living arrangement to value any food, clothing, or shelter you receive during the month you enter the facility and throughout the period you are eligible for these benefits. We consider your absence to be temporary through the last month benefits under § 416.212 are paid unless you are discharged from the facility in the following month. In that case, we consider your absence to be temporary through the date of discharge.

* * * * *

14. Section 416.1167 is amended by revising paragraph (a) to read as follows:

§ 416.1167 Temporary absences and deeming rules.

(a) *General.* During a temporary absence, we continue to consider the absent person a member of the household. A temporary absence occurs when—

(1) You, your ineligible spouse, parent, or an ineligible child leaves the household but intends to and does return in the same month or the month immediately following; or

(2) You enter a medical care facility and are eligible for either benefit payable under § 416.212. We consider your absence to be temporary though the last month benefits under § 416.212 were paid unless you were discharged from the facility in the following month. In that case, we consider your absence to be temporary through the date of discharge.

* * * * *

Subpart T—State Supplementation Provisions; Agreements; Payments

15. The authority citation for part 416, subpart T is revised to read as follows:

Authority: Secs. 1102, 1616, 1618, and 1631 of the Social Security Act; 42 U.S.C. 1302, 1382e, 1382g, and 1383.

16. Section 416.2040 is amended by revising paragraph (a) and adding a new paragraph (d) to read as follows:

§ 416.2040 Limitations on eligibility.

* * * * *

(a) *Inmate of public institution.* A person who is a resident in a public institution for a month, is ineligible for a

Federal benefit for that month under the provision of § 416.211(a), and does not meet the requirements for any of the exceptions in § 416.211 (b), (c), or (d), or § 416.212, also shall be ineligible for a Federally-administered State supplementary payment for that month.

* * * * *

(d) *Recipient eligible for benefits under § 416.212.* A recipient who is institutionalized and is eligible for either benefit payable under § 416.212 for a month or months may also receive Federally-administered State supplementation for that month. Additionally, a recipient who would be eligible for benefits under § 416.212 but for countable income which reduces his or her Federal SSI benefit to zero, may still be eligible to receive Federally-administered State supplementation.

[FR Doc. 92-23267 Filed 9-25-92; 8:45 am]

BILLING CODE 4190-29-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 25

[Notice No. 755; 92F-047P]

Change in the Frequency of Filing Brewer's Reports of Operations and Additional Listing of Case and Keg Sizes

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: ATF is proposing to reduce administrative burdens on the brewing industry by allowing certain small brewers to submit reports of operations quarterly instead of monthly. Also, ATF is proposing to revise the conversion table used to calculate the tax liability on removals in containers to include more sizes commonly used in the brewing industry. The table will also be reorganized for ease of use.

These proposed changes should result in fewer forms being filed by brewers and fewer documents being processed by the government, and ease the tax computation process. ATF expects that this will result in cost savings both for the brewing industry and for the government. This proposal will reduce the regulatory burden on small brewers.

DATES: Written comments must be received by October 28, 1992.

ADDRESSES: Send written comments to: Chief, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 50221, Washington, DC 20091-0221; Notice No. 755.

Copies of written comments in response to this notice of proposed rulemaking will be available for public inspection during normal business hours at: ATF Reference Library, Office of Public Affairs and Disclosure, room 6300, 650 Massachusetts Avenue, NW., Washington, DC 20226.

FOR FURTHER INFORMATION CONTACT: Charles N. Bacon or Marjorie Ruhf, Wine and Beer Branch, 650 Massachusetts Avenue, NW., Washington, DC 20226; telephone (202) 927-8230.

SUPPLEMENTARY INFORMATION:

Background

On January 28, 1992, President Bush announced a regulatory initiative. This initiative called for a review of all existing regulations and programs to identify and which impose substantial costs on the economy. As part of this review, ATF is proposing regulations which will reduce the regulatory burden on small brewers.

Brewer's Report of Operations, Form 5130.9

ATF proposes to allow small brewers to file the Brewer's Report of Operations, Form 5130.9, quarterly instead of monthly. The criterion proposed in § 25.297(b) for a brewer to file a quarterly report is based on the size of the brewing operations the previous year. A brewer may file a quarterly report if, during the previous calendar year, the brewer produced less than 10,000 barrels of beer. Production is defined in § 25.297(b) as the total of beer brewed, liquids added to beer, and beer received from other breweries of the same ownerhip in the previous year.

To begin the quarterly filing of a Brewer's Report of Operations, a brewer would state such intent in the "Remarks" section when filing the last monthly Form 5130.9 before commencing the quarterly filing of these reports. Reports will be filed within 15 days after the close of the calendar quarter; i.e., by January 15th, for October through December reports, and by April 15th, July 15th, and October 15th for other calendar quarter reports. A definition of "calendar quarter" would be added to § 25.5.

If a brewer determines that the 10,000 barrel quantity will be exceeded in any year, a Form 5130.9 will be filed for the month in which that limitation is exceeded and for all subsequent months of that calendar year.

Brewers should note that the criterion for filing quarterly reports is different than the criteria for a small brewer to be eligible to pay the reduced rate of beer tax under 26 U.S.C. 5051. Furthermore, the criterion for filing the operational report quarterly applies to production at individual brewing locations and not to the overall size of the brewer. Thus, even a very large brewer may file quarterly reports for small brewing locations where the brewer's production does not exceed 10,000 barrels annually.

Under § 25.297(b), the regional director (compliance) may require any brewer filing reports of brewery operations quarterly to file such reports monthly if there is a jeopardy to the revenue.

The major reason for requiring a report of operations is for ATF to determine compliance with Internal Revenue Code brewery regulations and specifically, beer excise tax payments. Nearly 99 percent of beer excise tax is paid by breweries producing more than 10,000 barrels of beer per year.

A secondary reason for the report of operations is to provide monthly statistical data to the brewing industry and ATF. If small brewers file their reports of operations quarterly instead of monthly, the monthly reports received from large breweries would still provide most of the data furnished to ATF (nearly 99 percent). Under the proposed criterion in § 25.297(b), more than 280 of the approximately 345 qualified brewers would be eligible to file a quarterly report of operations instead of a monthly report. This would reduce the number of reports filed by over 54%, and reduce the number of burden hours in preparing and sending monthly reports of operations. Brewers operating near the maximum operational level for quarterly reporting may need to spend time each month to ensure they have not exceeded the 10,000 barrel level.

If this proposal becomes a final rule, Form 5130.9 will be revised. Further, if Form 5130.9 is revised, ATF plans to remove the shading from column (a), line 15, indicating direct cellar operation removals for consumption or sale. This change would allow brewpubs to show removals of tanks or from tanks in the brewery cellar, to a tavern operated on the brewery premises. When the form was originally designed, no provision was made for this activity, and brewpubs have reported such removals on a line which does not accurately describe the disposition. Therefore, this proposal does not require any new information, but simply changes the location on the form where the information will be reported. ATF welcomes suggestions for other revisions to the form.

This notice also proposes conforming changes to all sections of regulations which refer to the existing form title, Brewer's Monthly Report of Operations, or to the monthly reporting requirement.

Authorized Keg Sizes

Prescribed sizes for kegs are listed in § 25.156. All of these sizes are fractional parts of the beer barrel, which is defined by law as not more than 31 gallons. These sizes are used in making tax liability computations.

With the growth of the microbrewing industry, other keg sizes have come into common use; many of these are European in origin and reflect net contents in metric measure. As a result, individual brewers have requested permission to use keg sizes not prescribed by this section.

ATF proposes to add 5 gallon, 30 liter and 50 liter kegs as authorized fractional keg sizes in § 25.156. Additionally, this section will prescribe the barrelage equivalent for these kegs for the purpose of taxpayment and recordkeeping. Comments are solicited from brewers regarding other keg sizes which are in widespread use. If this proposal is adopted, the existing individual brewery authorizations to use these size kegs under the alternate method regulations will become obsolete.

Bottle and Case Sizes

Section 25.158 lists case sizes by number of bottles per case and the bottle size, and provides a barrelage equivalent for these various case sizes. This table is used for calculating the tax liability.

With the growth of the microbrewing industry, and the introduction of innovative packaging by many brewers, ATF finds that additional bottle and cases sizes have come into common use. Therefore, ATF proposes to add a number of bottles and cases to the table in § 25.158. Additionally, a separate table is proposed for bottles which are produced in metric sizes, including 500 and 750 milliliter bottles, and 1 liter, 2 liter, and 5 liter bottles. Barrelage equivalents are prescribed for all case sizes.

These tables are also reorganized, with the bottle size being listed first, followed by the number of bottles per case and the barrelage equivalent. ATF believes this organization will make the tables easier to use.

ATF solicits comment from brewers regarding other bottle sizes or case sizes which may be in common usage.

Executive Order 12291

In compliance with Executive Order 12291 issued February 17, 1981, ATF has determined that any regulation resulting from this notice of proposed rulemaking would not constitute a "major rule" since it would not result in:

(a) An annual effect on the economy of $100 million or more;

(b) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and

(c) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 604) are not applicable to this notice of proposed rulemaking because a final rule would not have a significant economic impact on a substantial number of small entities. Any final rule would not impose, or otherwise cause, a significant increase in reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

The final rule, if adopted, is not expected to have significant secondary or incidental effects on a substantial number of small entities. Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this notice will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Public Law No. 96–511, 44 U.S.C. chapter 35, and its implementing regulations, 5 CFR part 1320, do not apply to this proposed rule because it does not impose any new reporting requirements. This proposal, if implemented, will eliminate some of the reporting requirements applicable to small brewers.

Public Participation

ATF requests comments from all interested persons. Comments received no later than the closing date of the comment period will be carefully considered. Comments received after the closing date and too late for consideration will be treated as possible suggestions for future ATF action. ATF will not recognize any comment as confidential. Comments may be disclosed to the public. Any material which the respondent considers to be confidential or inappropriate for disclosure should not be included in the comment. The name of the person submitting the comment is public information. During the comment period, any person may submit a request to present oral testimony at a public hearing. However, the Director reserves the right, in light of all circumstances, to determine whether a public hearing would be necessary.

Other Regulations for Small Brewers

In addition to the specific proposals contained in this notice, ATF seeks comments on other changes in regulations which would benefit small brewers. ATF is seeking proposals or suggestions which would relieve the regulatory burden on microbrewers and pubbrewers in the area of qualification of the brewery, recordkeeping and reporting requirements, and in brewery operational requirements. Respondents should submit comments or suggestions of this nature to the address indicated above. ATF will consider these comments and suggestions in formulating future regulatory changes to brewery regulations.

Disclosure

Copies of this notice and written comments will be available for public inspection during normal business hours at: ATF Reading Room, Disclosure Branch, room 6300, 650 Massachusetts Avenue NW., Washington, DC.

Drafting Information

The principal authors of this document are Charles N. Bacon and Marjorie Ruhf, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 25

Administrative practice and procedure, Authority delegations (Government agencies), Beer, Claims, Electronic fund transfers, Excise taxes, Labeling, Packaging and containers, Reporting and recordkeeping requirements, Research, Surety bonds, Transportation.

Authority and Issuance

Accordingly, it is proposed to amend 27 CFR part 25, Beer, as follows:

Paragraph 1. The authority citation for part 25 continues to read as follows:

Authority: 19 U.S.C. 81c, 26 U.S.C. 5002, 5051–5054, 5056, 5061, 5091, 5111, 5113, 5142, 5143, 5146, 5222, 5401–5403, 5411–5417, 5551, 5552, 5555, 5556, 5671, 5673, 5684, 6011, 6061, 6065, 6091, 6109, 6151, 6301, 6302, 6311, 6313, 6402, 6651, 6656, 6676, 6806, 7011, 7342, 7606, 7805; 31 U.S.C. 9301, 9303–9308.

Par. 2. The table of contents for part 25 is amended by revising the heading of § 25.297 to read as follows:

Sec.

* * * * *

§ 25.297 Brewer's Report of Operations, Form 5130.9.

* * * * *

Par. 3. Section 25.11 is amended by revising the definition of the term *barrel* and by adding a definition of the term *calendar quarter* in alphabetical order to read as follows:

§ 25.11 Meaning of terms.

* * * * *

Barrel. When used as a unit of measure, the quantity equal to 31 U.S. gallons. When used as a container, a consumer package or keg containing a quantity of beer listed in § 25.156, or other size authorized by the regional director (compliance).

* * * * *

Calendar quarter. A three-month period during the year as follows: January 1 through March 31; April 1 through June 30; July 1 through September 30; and October 1 through December 31.

* * * * *

§ 25.152 [Amended]

Par. 4. Section 25.152(b)(2) is amended by removing the words "monthly report" and replacing them with the words "Brewer's Report of Operations."

Par. 5. Section 25.156 is revised to read as follows:

§ 25.156 Determination of tax on keg beer.

(a) In determining the tax on beer removed in kegs, a barrel is regarded as a quantity of not more than 31 gallons. The authorized fractional parts of a barrel are whole barrels, halves, thirds, quarters, sixths, and eights, and beer may be removed in kegs rated at those capacities. The following keg sizes are also authorized at the stated barrel equivalents:

Size of keg	Barrel equivalent
5 gallons	0.16129
30 liter	0.25565
50 liter	0.42608

(b) If any barrel or authorized size keg contains a quantity of beer more than two percent in excess of its rated capacity, tax will be determined and paid on the actual quantity of beer (without benefit of any tolerance) contained in the keg.

(c) The quantities of keg beer removed subject to tax will be computed to 5 decimal places. The sum of the quantities computed for any one day will be rounded to 2 decimal places and the tax will be calculated and paid on the rounded sum.

(26 U.S.C. 5051)

Par. 6. Section 25.158 is revised to read as follows:

§ 25.158 Tax computation for bottled beer.

Barrel equivalents for various case sizes are as follows:

(a) *For U.S. measure bottles.*

Bottle size (net contents in fluid ounces)	Number of bottles per case	Barrel equivalent
6	12	0.01815
6	24	0.03629
7	12	0.02117
7	24	0.04234
7	32	0.05645
7	35	0.06174
7	36	0.06351
7	40	0.07056
7	48	0.08468
8	12	0.02419
8	24	0.04839
8	36	0.07258
10	12	0.03024
10	24	0.06048
10	48	0.12097
11	12	0.03327
11	24	0.06653
11.5	24	0.06956
12	12	0.03629
12	15	0.04536
12	20	0.06048
12	24	0.07258
12	30	0.09073
12	48	0.14516
12	50	0.15121
14	12	0.04234
14	24	0.08468
16 (1 pint)	12	0.04839
16 (1 pint)	24	0.09677
22	12	0.06653
22	24	0.13306
24	12	0.07258
30	12	0.09073
32 (1 quart)	12	0.09677
40	12	0.12097
64	1	0.01613
64	4	0.06452
64	6	0.09677
128 (1 gallon)	1	0.03226
288	1	0.07258

(b) *For metric measure bottles.*

Bottle size (metric net contents)	Number of bottles per case	Barrel equivalent
500 milliliters	24	0.10226
750 milliliters	12	0.07670
1 liter	12	0.10226
2 liters	6	0.10226
5 liters	1	0.04261

(c) *For other case sizes.* If beer is to be removed in cases or bottles of sizes other than those listed in the above tables, the brewer shall notify the regional director (compliance) in advance and request to be advised of the fractional barrel equivalent applicable to the proposed case size.

(26 U.S.C. 5412)

§ 25.186 [Amended]

Par. 7. Section 25.186(d) is amended by removing the words "monthly report" wherever they appear, and replacing them with the words "Brewer's Report of Operations."

§ 25.192 [Amended]

Par. 8. Section 25.192(c) is amended by removing the words "monthly report" and replacing them with the words "Brewer's Report of Operations."

§ 25.195 [Amended]

Par. 9. Section 25.195 is amended by removing the words "monthly report" and replacing them with the words "Brewer's Report of Operations."

§ 25.196 [Amended]

Par. 10. Section 25.196(c) is amended by removing the words "monthly report" and replacing them with the words "Brewer's Report of Operations."

§ 25.276 [Amended]

Par. 11. Section 25.276(b) is amended by removing the words "monthly reports" and replacing them with the words "the Brewer's Report of Operations, Form 5130.9."

Par. 12. Section 25.286 is amended by revising paragraph (a) and the informational cite at the end of the section to read as follows:

§ 25.286 Claims for remission of tax on beer lost in transit between breweries.

(a) *Filing of claim.* Claims for remission of tax on beer lost in transit between breweries of the same ownership shall be prepared on Form 2635 (ATF F 5620.8) by the brewer or the brewer's authorized agent and submitted with Form 5130.9 of the receiving brewery for the reporting period in which the shipment is received. When the loss is by casualty, the claim will be submitted with the Form 5130.9 for the reporting period in which the loss is discovered. When, for valid reasons, the required claim cannot be submitted with Form 5130.9, the brewer shall attach a statement to Form 5130.9 stating the reason why the claim cannot be filed at the time and stating when it will be filed. A claim will not be allowed unless filed with the regional director (compliance) within 6 months of the date of the loss.

* * * * *

(26 U.S.C. 5056, 5414)

Par. 13. Section 25.296 is amended by revising paragraphs (b) introductory text, (b)(1) and (b)(2) and the informational cite at the end of the section to read as follows:

§ 25.296 Record of beer concentrate.

* * * * *

(b) *Summary report of operations.* A brewer who produces concentrate or reconstitutes beer shall report by specific entries on Form 5130.9, the quantity of beer entered into the concentration process, and the quantity of beer reconstituted from concentrate. In addition, the brewer shall prepare on Form 5130.9, a summary accounting of all concentrate operations at the brewery for the reporting period. This summary accounting will show, in barrels of 31 gallons with fractions rounded to 2 decimal places:

(1) Concentrate on hand beginning of the reporting period;

(2) Concentrate on hand end of the reporting period;

* * * * *

(26 U.S.C. 5415)

Par. 14. Section 25.297 is revised to read as follows:

§ 25.297 Brewer's Report of Operations, Form 5130.9.

(a) *Monthly report of operations.* Except as provided in paragraph (b) of this section, each brewer shall prepare and submit a monthly report of brewery operations on Form 5130.9 to the regional director (compliance) not later than the 15th day of the month following the close of the month for which prepared.

(b) *Quarterly report of operations.* (1) A brewer who produces less than 10,000 barrels of beer per calendar year may file the report of brewery operations quarterly. The report will be filed on Form 5130.9 with the regional director (compliance) not later than the 15th day of the month following the close of the calendar quarter for which prepared. For the purpose of establishing whether a quarterly report may be filed, the brewer will determine annual production of beer by totalling lines 2, 3, and 5, column (f), of Forms 5130.9 for all months of the previous calendar year.

(2) To begin the quarterly filing of a Brewer's Report of Operations, a brewer will state such intent in the "Remarks" section when filing the last monthly Form 5130.9 before the calendar quarter during which the brewer will commence the quarterly filings. A brewer beginning business may file Form 5130.9 quarterly if the brewer states in the "Remarks" section of the form that the annual production of beer is not likely to exceed 10,000 barrels.

(3) If a brewer determines that the 10,000 barrel quantity for a calendar year will be exceeded in any month, the brewer shall file a Form 5130.9 for that month and for all subsequent months of the calendar year.

(4) The regional director (compliance) may at any time require a brewer who is filing a Brewer's Report of Operations quarterly to file such report monthly if there is a jeopardy to the revenue.

(c) *Retention.* The brewer shall retain a copy of the Form 5130.9 as part of the brewery records.

(26 U.S.C. 5415, 5555)

Signed: August 20, 1992.

Stephen E. Higgins,

Director.

Approved: August 26, 1992.

BILLING CODE 4810-31-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA 11-12-5592, FRL-4512-4]

Approval and Promulgation of Implementation Plans; California State Implementation Plan Revision; Bay Area Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: EPA is proposing a limited approval and limited disapproval of revisions to the California State Implementation Plan (SIP) adopted by the Bay Area Air Quality Management District (BAAQMD) on August 2, 1989, and September 20, 1989. The California Air Resources Board submitted these revisions to EPA on December 31, 1990. The revisions concern the BAAQMD's Regulation 8, Rule 11 (Rule 8-11), Metal Container, Closure and Coil Coating, which controls the emission of volatile organic compounds (VOCs) from can and coil coating operations, and Regulation 8, Rule 16 (Rule 8-16), Solvent Cleaning Operations, which controls the emissions of VOCs from degreasing operations. EPA has evaluated the revisions to Rules 8-11 and 8-16 and is proposing a limited approval under sections 110(k)(3) and 301(a) of the Clean Air Act, as amended in 1990, (CAA or the Act) because these revisions strengthen the SIP. At the same time, EPA is proposing a limited disapproval under sections 110(k)(3) and 301(a) of the CAA because the rules do not meet the Part D, section 182(a)(2)(A) requirement of the CAA.

DATES: Comments must be received on or before October 28, 1992.

ADDRESSES: Comments may be mailed to: Esther Hill, Northern California, Nevada, and Hawaii Rulemaking Section (A-5-4), Air and Toxics Division, Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105.

Copies of the rule revisions and EPA's evaluation report of each rule are available for public inspection at EPA's Region 9 office during normal business hours. Copies of the submitted rule revisions are also available for inspection at the following locations:

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 1219 "K" Street, Sacramento, CA 95814

Bay Area Air Quality Management District, 939 Ellis Street, San Francisco, CA 94102

FOR FURTHER INFORMATION CONTACT: Denise Odenwalder, Southern California and Arizona Rulemaking Section (A-5-3), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105, Telephone: (415) 744-1200.

SUPPLEMENTARY INFORMATION:

Background

On March 3, 1978, EPA promulgated a list of ozone nonattainment areas under the provisions of the 1977 Clean Air Act (1977 CAA or pre-amended Act) that included the San Francisco Bay Area Air Basin. 43 FR 8964; 40 CFR 81.305. Because the Bay Area was unable to reach attainment by the statutory attainment date of December 31, 1982, California requested under pre-amended section 172(a)(2), and EPA approved, an extension of the attainment date to December 31, 1987. 40 CFR 52.238. The Bay Area did not attain the ozone standard by the approved attainment date. On May 26, 1988, EPA notified the Governor of California that the BAAQMD's portion of the SIP was inadequate to attain and maintain the ozone standard and requested that deficiencies in the existing SIP be corrected (EPA's SIP-Call). On November 15, 1990, amendments to the 1977 CAA were enacted. Public Law 101-549, 104 Stat. 2399, codified at 42 U.S.C. 7401-7671q. In amended section 182(a)(2)(A) of the CAA, Congress statutorily adopted the requirement that nonattainment areas fix their deficient reasonably available control technology (RACT) rules for ozone and established

a deadline of May 15, 1991 for states to submit corrections of those deficiencies.

Section 182(a)(2)(A) applies to areas designated as nonattainment prior to enactment of the amendments and classified as marginal or above as of the date of enactment. It requires such areas to adopt and correct RACT rules pursuant to preamended section 172(b) as interpreted in EPA's pre-amendment guidance.[1] EPA's SIP–Call used that guidance to indicate the necessary corrections for specific nonattainment areas. The Bay Area is classified as moderate [2]; therefore, this area is subject to the RACT fix-up requirement and the May 15, 1991 deadline.

The State of California submitted many revised RACT rules to EPA for incorporation into its SIP on December 31, 1990, including the rules being acted on in this notice. This notice addresses EPA's proposed action for BAAQMD Rule 8–11, Metal Container, Closure and Coil Coating, and Rule 8–16, Solvent Cleaning Operations. These submitted rules were found to be complete on February 28, 1991, pursuant to EPA's completeness criteria adopted on February 16, 1990 (55 FR 5830) and set forth in 40 CFR part 51, appendix V [3] and are being proposed for limited approval and limited disapproval.

Rule 8–11 controls the emission of volatile organic compounds (VOCs) from can and coil coating operations and Rule 8–16 controls the emission of VOCs from degreasing operations. VOCs contribute to the production of ground level ozone and smog. The BAAQMD's Rules 8–11 and 8–16 were originally adopted as part of BAAQMD's effort to achieve the National Ambient Air Quality Standard (NAAQS) for ozone and has been revised in response to EPA's SIP-Call and the section 182(a)(2)(A) CAA requirement. The following is EPA's evaluation and proposed action for BAAQMD's Rules 8–11 and 8–16.

[1] Among other things, the pre-amendment guidance consists of those portions of the proposed Post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); "Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations, Clarification to appendix D of November 24, 1987 **Federal Register** Notice" (Blue Book) (notice of availability was published in the **Federal Register** on May 25, 1988); and the existing control technique guidelines (CTGs).

[2] The BAAQMD retained its designation and was classified by operation of law pursuant to sections 107(d) and 181(a) upon the date of enactment of the Amendments. See 56 FR 56694 (November 6, 1991).

[3] EPA has since adopted completeness criteria pursuant to section 110(k)(1)(A) of the amended Act. See 56 FR 42216 (August 26, 1991).

EPA Evaluation and Proposed Action

In determining the approvability of a VOC rule, EPA must evaluate the rule for consistency with the requirements of the CAA and EPA regulations, as found in section 110 and Part D of the CAA and 40 CFR part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans). The EPA interpretation of these requirements, which forms the basis for today's action, appears in the various EPA policy guidance documents listed in footnote 1. Among the provisions of the CAA is the requirement that a VOC rule must, at a minimum, provide for the implementation of PACT for stationary sources of VOC emissions. This requirement was carried forth from the preamended Act.

For the purpose of assisting state and local agencies in developing PACT rules, EPA prepared a series of Control Technique Guideline (CTG) documents. The CTGs are based on the underlying requirements of the Act and specify the presumptive norms for what is RACT for specific source categories. Under the CAA, Congress ratified EPA's use of these documents, as well as other Agency policy, for requiring States to "fix-up" their RACT rules. See section 182(a)(2)(A). The CTG applicable to Rule 8–11, Metal Container, Closure and Coil Coating, is entitled Control of Volatile Organic Emissions from Existing Stationary Sources Volume II: Surface Coating of Cans, Coils, Paper, Fabrics, Automobiles, and Light-Duty Trucks, EPA document # EPA–450/2–77–008. The CTG applicable to Rule 8–16, Solvent Cleaning Operations, is entitled Control of Volatile Organic Emissions from Solvent Metal Cleaning, EPA document # EPA–450/2–77–022. Further interpretations of EPA policy are found in the Blue Book. In general, these guidance documents have been set forth to ensure that VOC rules are fully enforceable and strengthen or maintain the SIP.

BAAQMD's submitted Rule 8–11, Metal Container, Closure and Coil Coating, includes the following revisions from the current SIP rule:

- Deletes an exemption for used containers
- Includes additional definitions
- Deletes references to effective dates that have passed
- Limits the VOC content of exterior body spray, reconditioned drums, pails, and lids coatings, and inks
- Requires that surface preparation or cleanup solvent and cloth or paper used with the solvent be stored in closed containers
- Clarifies the requirements for use of abatement devices
- Updates the compliance schedule
- Adds requirements for operation and maintenance plans, recordkeeping, and test methods

BAAQMD's submitted Rule 8–16, Solvent Cleaning Operations, includes the following revisions from the current SIP rule:

- Changes the word "degreasing" to "solvent cleaning"
- Includes additional exemptions
- Includes additional definitions
- Distinguishes between the requirements for vapor solvent cleaners, conveyorized solvent cleaners, and cold cleaners
- Deletes a reference to carbon adsorption as one of several possible control systems for large degreasers
- Prohibits the solvent cleaning of porous or absorbent materials
- Adds sections on recordkeeping and test methods

EPA has evaluated BAAQMD's submitted Rules 8–11 and 8–16 for consistency with the CAA, EPA regulations, and EPA policy and has found that the revisions address and correct many deficiencies previously identified by EPA. These corrected deficiencies have resulted in clearer, more enforceable rules. Furthermore, the addition of more stringent limits for exterior body spray and reconditioned drums, pails, and lids coatings in submitted Rule 8–11 should lead to more emission reductions.

Although the approval of BAAQMD's Rules 8–11 and 8–16 will strengthen the SIP, these rules still contain deficiencies which were required to be corrected pursuant to the section 182(a) (2) (A) requirement of Part D of the CAA. The main deficiency of Rule 8–11 is that it allows the use of a test method, BAAQMD Method 30, that EPA has determined unacceptable. In addition, Rule 8–11 includes BAAQMD Methods 21 and 22, which EPA has not approved, and BAAQMD Method ST–7, which has not been approved for incinerators or other combustion devices. The main deficiency of Rule 8–16 is that it includes BAAQMD Methods 21, 22, and 31, which EPA has not approved. BAAQMD Methods 21, 22, 31, and ST–7 have been submitted to EPA for review. Since the sources regulated by Rule 8–16 do not use incinerators or other combustion devices, Method ST–7 is acceptable for use in the context of this rule. If Methods 21, 22, and 31 are all approved, then Rule 8–16 will not be deficient and EPA will take action to fully approve the rule. However, if any of Methods 21, 22, or 31 are disapproved, then Rule 8–16

will need to be revised. A detailed discussion of rule deficiencies can be found in the Technical Support Documents for Rules 8–11 (September 8, 1992) and 8–16 (September 8, 1992), which are available from the U.S. EPA, Region 9 office. Because of these deficiencies, the rules are not approvable pursuant to section 182 (a) (2) (A) of the CAA because they are not consistent with the interpretation of section 172 of the 1977 CAA as found in the Blue Book and may lead to rule enforceability problems. If Methods 21, 22, and 31 are approved, EPA would grant approval to Rule 8–16 in the final rulemaking process.

Because of the above deficiencies, EPA cannot grant full approval of these rules under section 110(k)(3) and part D. Also, because the submitted rules are not composed of separable parts which meet all the applicable requirements of the CAA, EPA cannot grant partial approval of the rules under section 110(k)(3). However, EPA may grant a limited approval of the submitted rules under section 110(k)(3) in light of EPA's authority pursuant to section 301(a) to adopt regulations necessary to further air quality by strengthening the SIP. The approval is limited because EPA's action also contains a simultaneous limited disapproval, due to the fact that the rules do not meet the section 182(a)(2)(A) requirement of part D because of the noted deficiencies. Thus, in order to strengthen the SIP, EPA is proposing a limited approval of BAAQMD's submitted Rules 8–11 and 8–16 under section 110(k)(3) and 301(a) of the CAA.

At the same time, EPA is also proposing a limited disapproval of these rules because they contain deficiencies that have not been corrected as required by section 182(a)(2)(A) of the CAA, and, as such, the rules do not fully meet the requirements of part D of the Act. Under section 179(a)(2), if the Administrator disapproves a submission under section 110(k) for an area designated nonattainment, based on the submission's failure to meet one or more of the elements required by the Act, the Administrator must apply one of the sanctions set forth in section 179(b) unless the deficiency has been corrected within 18 months of such disapproval. Section 179(b) provides two sanctions available to the Administrator: Highway funding and offsets. The 18-month period referred to in section 179(a) will begin at the time EPA publishes final notice of this disapproval. Moreover, the final disapproval triggers the federal implementation plan (FIP) requirement under section 110(c).

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Regulatory Process

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et. seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises and government entities with jurisdiction over populations of less than 50,000.

Limited approvals under sections 110 and 301 and subchapter I, part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

EPA's limited disapproval of the State request under §§ 110 and 301 and subchapter I, part D of the CAA does not affect any existing requirements applicable to small entities. Federal disapproval of the state submittal does not affect its state enforceability. Moreover, EPA's disapproval of the submittal does not impose any new federal requirements. Therefore, EPA certifies that this disapproval action does not have a significant impact on a substantial number of small entities because it does not remove existing requirements nor does it impose any new federal requirements.

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the Federal Register on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

Approval and Promulgation of Implementation Plans; Washington

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: By this Notice, EPA invites public comment on its proposal to approve in part, disapprove in part, and take no action in part, on numerous revisions to the State of Washington Implementation Plan which were submitted by the Washington Department of Ecology (WDOE) on January 23, 1989 and May 14, 1991. These revisions are essentially administrative in nature and were made to improve the clarity, effectiveness, and enforceability of the state's regulations. The revisions were submitted in accordance with the requirements of section 110 of the Clean Air Act (hereinafter the Act). EPA is also proposing to take no action on a number of provisions which are unrelated to the purposes of the implementation plan.

DATES: Comments must be postmarked on or before October 28, 1992.

ADDRESSES: Comments should be addressed to: Laurie M. Kral, Environmental Protection Agency, Air & Radiation Branch, Docket # WA2–2–5568, 1200 Sixth Avenue, AT–082, Seattle, Washington 98101.

Copies of the materials submitted to EPA may be examined during normal business hours at:

Air & Radiation Branch, Docket # WA2–2–5568, Environmental Protection Agency, 1200 Sixth Avenue, AT–082, Seattle, Washington 98101,

or
State of Washington, Department of Ecology, 4550 Third Ave. SE, Lacey, Washington 985047.

SUPPLEMENTARY INFORMATION:

I. Background

In response to EPA's promulgation of revised ambient air quality standards for particulate matter (PM–10) on July 1, 1987, the State of Washington Department of Ecology (WDOE) revised many of its regulations. On January 23, 1989 WDOE submitted new regulations for Solid Fuel Burning Device Standards (WAC 173–433), Solid Waste Incinerator Facilities (WAC 173–434) and Ambient Air Quality Standards for Particulate Matter (WAC 173–470), as well as revisions to existing regulations for General Regulations for Air Pollution Sources (WAC 173–400), Implementation of Regulations for Air Contaminant Sources (WAC 173–403), Kraft Pulping Mills (WAC 173–405), Sulfite Pulping Mills (WAC 173–410), Primary Aluminum Plants (WAC 173–415), Open Burning (WAC 173–425), and Emergency Episode Plan (WAC 173–435).

In the spring of 1989, WDOE undertook a project to improve the overall quality, consistency, and enforceability of its regulations. On May 14, 1991 WDOE submitted revised regulations for General Regulations for Air Pollution Sources (WAC 173–400), Kraft Pulping Mills (WAC 173–405), Sulfite Pulping Mills (WAC 173–410), Primary Aluminum Plants (WAC 173–415), Open Burning (WAC 173–425), Burning of Field and Forage and Turf Grasses Grown for Seed (WAC 173–430), Solid Fuel Burning Device Standards (WAC 173–433), Solid Waste Incinerator Facilities (WAC 173–434), Sensitive Areas (WAC 173–440), Emission Standards and Controls for Sources Emitting Volatile Compounds (WAC 173–490) and Weather Modification (WAC 173–495). In addition, the regulation for Implementation of Regulations for Air Contaminant Sources (WAC 173–403) was repealed. Many of the regulations and revisions in the January 23, 1989 submittal were superseded by completely revised and updated regulations in the May 14, 1991 submittal.

II. Plan Revisions

EPA is today proposing to approve in part, disapprove in part, and take no action in part, 12 of the 14 revised regulations submitted on January 23, 1989 and May 14, 1991. Action on the revised Emission Standards and Controls for Sources Emitting Volatile Compounds (WAC 173–490) is being proposed under separate rulemaking. The regulation for Weather Modification (WAC 173–495) is not related to the purposes of the Act and, therefore, EPA is taking no action on the submittal of this regulation. The following is a discussion of the revisions to each of the 12 regulations and EPA's proposed actions thereon:

General Regulations for Air Pollution Sources (WAC 173–400)

These regulations were extensively revised by incorporating all of the provisions of WAC 173–403, Implementation of Regulations for Air Contaminant Sources, into the existing WAC 173–400. The regulations were further revised by deleting duplicative and out-dated provisions, and clarifying emission limits and other requirements. EPA is proposing to approve the revisions to WAC 173–400 with the exceptions noted below. EPA is also proposing to approve the updated WDOE "Source Test Manual—Procedures for Compliance Testing," dated July 12, 1990, which is referenced in WAC 173–400–050, WAC 173–400–060, and WAC 173–400–105.

Note that EPA is proposing to approve WAC 173–400–110, New Source Review (NSR), even though it has not been revised to conform to the new requirements of the Clean Air Act Amendments of 1990. Under the provisions of the Act, revisions to Title I, Part D (nonattainment area) NSR rules are required to be submitted by June 30, 1992 for PM–10 nonattainment areas and by November 15, 1992 for most ozone and carbon monoxide nonattainment areas. The February 19, 1991 revisions to WAC 173–400–110 were made to comply with the requirements of EPA regulations (40 CFR part 51, subpart I) in effect at that time. EPA is, therefore, proposing to approve these revised regulations under the provision of its "grandfathering policy", since they meet the requirements of the regulations in effect at the time they were adopted and submitted by the state.

Director's Discretion Provisions

EPA is proposing to disapprove WAC 173–400–040(1) (c) and (d) which allow for the establishment of alternative opacity limits. While it is entirely appropriate for state regulations to contain procedures for establishing alternative opacity limits (i.e., a director's discretion provision), the state cannot unilaterally change the provisions of the EPA-approved SIP (see section 110(i) of the Act). In general, EPA does not approve "director's discretion" provisions for incorporation into the SIP, because the existence of such provisions in the SIP would create the misimpression that the state can change SIP requirements without EPA approval. Furthermore, WAC 173–400–040(1) (c) and (d) do not ensure that all of the requirements of the Act will be met prior to the approval of an alternative opacity limit.

EPA is proposing to disapprove the second paragraph of WAC 173–400–040(6). The second paragraph provides an exception to the sulfur dioxide emission limitation but does not ensure that all of the requirements of the Act will be met. Nor does it ensure that a replacement emission limit will be established for a source which is granted an exception under WAC 173–400–040(6).

EPA is proposing to disapprove the exception provision in WAC 173–400–050(3) which allows for the establishment of an alternative oxygen correction factor for combustion and incineration sources. Changes to the oxygen correction factor effectively change the emission limits. However, this provision does not ensure that all of the requirements of the Act will be met for emissions under an alternative oxygen correction factor.

EPA is proposing to disapprove WAC 173–400–180 Variance which allows the WDOE to grant a variance to the requirements governing the quality, nature, duration, or extent, of discharges of air contaminants. Again, this "director's discretion" provision does not ensure that all of the requirements of the Act will be met prior to the granting of a variance. Although WAC 173–400–180 recognizes that a variance granted by the WDOE does not set aside or delay any requirements of the Federal Clean Air Act, it does not indicate that provisions of the SIP remain in effect until the variance is approved by EPA as a SIP revision.

Emissions Trading Provisions

EPA is proposing to disapprove WAC 173–400–120 Bubble Rules, WAC 173–400–131 Issuance of Emission Reduction Credits, and WAC 173–400–136 Use of Emission Reduction Credits as these regulations do not comply with the requirements of EPA's Final Emissions Trading Policy Statement (51 FR 43814, December 4, 1986). These provisions were originally adopted by WDOE on August 28, 1983 as WAC 173–403–060, –070, and –075, respectively, and were

relocated unchanged to WAC 173–400. However, the provisions were not revised to meet the requirements of EPA's Emissions Trading Policy Statement and are, therefore, not approvable as revisions to the Washington SIP. Note that there is no requirement for the SIP to contain such emissions trading provisions. As with director's discretion provisions, WDOE is still free to approve bubbles and grant emission reduction credits. However, such actions do not change the requirements of the federally-approved SIP until such time as they are submitted to, and approved by, EPA as revisions to the SIP. Sources may still create and use emission reduction credits in "offsetting" and "netting" transactions so long as they comply with the provisions of the EPA-approved and/or promulgated new source review and prevention of significant deterioration regulations.

Prevention of Significant Deterioration

EPA is proposing to disapprove WAC 173–400–141 Prevention of Significant Deterioration (PSD) as it does not meet the requirements of 40 CFR 51.166. WDOE has adopted by reference, EPA's PSD regulations (40 CFR 52.21) as in effect on July 1, 1989. However, significant changes to EPA's regulations became effective on November 19, 1990. Note that the PSD provisions of the Washington SIP are currently disapproved and EPA's PSD regulations have been promulgated into the Washington SIP (see 40 CFR 52.2497). Until WAC 173–400–141 is revised to meet current EPA requirements and is approved by EPA, WDOE will continue to issue PSD permits under a partial delegation of the EPA PSD permit program.

Provisions Unrelated to the SIP

EPA is proposing to take no action on WAC 173–400–040(2) Fallout; WAC 173–400–040(4) Odors; WAC 173–400–070(7) Sulfuric Acid Plants; WAC 173–400–075 Emission Standards for Sources Emitting Hazardous Air Pollutants; and WAC 173–400–115 Standards of Performance for New Sources, as these provisions are not related to the criteria pollutants regulated under the SIP.

Implementation of Regulations for Air Contaminant Sources (WAC 173–403)—These regulations were repealed and their provisions incorporated into the General Regulations for Air Pollution Sources (WAC 173–400) as discussed above. EPA is proposing to approve the repeal of these regulations, thereby removing them from the Washington SIP.

Kraft Pulping Mills (WAC 173–405)—In general, these regulations were revised by cross-referencing WAC 173–400 for generally applicable provisions, deleting duplicative and out-dated provisions, and clarifying emission limits (e.g., averaging times, test methods). EPA is proposing to approve these regulations with the following exceptions: WAC 173–405–033 "Standards of Performance;" WAC 173–405–035 "Emission Standards for Sources Emitting Hazardous Air Pollutants;" WAC 173–405–040(1)(b), (1)(c), (3)(b), (3)(c), and (4) which are emission standards for total reduced sulfur (TRS); WAC 173–405–040(7), (8) and (9) which are provisions for alternative opacity limits; and WAC 173–405–072(2) which contains monitoring requirements for TRS emissions. EPA is proposing to take no action on WAC 173–405–033; –035; –040(1)(b), (1)(c), (3)(b), (3)(c), and (4); and –072(2) since these are not related to the criteria pollutants regulated under the SIP. However, EPA is proposing to disapprove WAC 173–405–040(7), (8), and (9) as these "director discretion" provisions do not ensure that all of the requirements of the Act will be met prior to the approval of an alternative opacity limit.

Sulfite Pulping Mills (WAC 173–410)—In general, these regulations were revised by cross-referencing WAC 173–400 for generally applicable provisions, deleting duplicative and out-dated provisions, and clarifying emission limits (e.g., averaging times, test methods). EPA is proposing to approve these regulations with the following exceptions; WAC 173–410–0-35 "Emission Standards for Sources Emitting Hazardous Air Pollutants;" the exception provision in WAC 173–410–040(3), and WAC 173–410–040(5) which is an emission standard for total reduced sulfur (TRS). EPA is proposing to take no action on WAC 173–410–035 and –040(5) since these are not related to the criteria pollutants regulated under the SIP. EPA is proposing to disapprove the exception provision in WAC 173–410–040(3) as this "director discretion" provision does not ensure that all of the requirements of the Act will be met prior to the approval of an alternative opacity limit.

Primary Aluminum Plants (WAC 173–415)—In general, these regulations were revised by cross-referencing WAC 173–400 for generally applicable provisions, deleting duplicative and out-dated provisions, and clarifying emission limits (e.g., averaging times, test methods). EPA is proposing to approve these regulations with the following exceptions: WAC 173–415–020(1) and (2) relating to emissions of fluorides; WAC 173–415–030(1) which contains emission standards for fluorides; WAC 173–415–030(3)(b) which is a provision for alternative opacity limits; WAC 173–415–040 "Standards of Performance;" and WAC 173–415–060(1)(a), (b), and (d) which are monitoring provisions for fluorides. EPA is proposing to take no action on WAC 173–415–020(1) and (2); –030(1); –040; and –060(1)(a), (b), and (d) since these are not related to the criteria pollutants regulated under the SIP. However, EPA is proposing to disapprove WAC 173–415–030(3)(b) as this "director discretion" provision does not ensure that all of the requirements of the Act will be met prior to the approval of an alternative opacity limit.

Open Burning (WAC 173–425)—In general, these regulations were revised by cross-referencing WAC 173–400 for generally applicable provisions, deleting duplicative and out-dated provisions, and clarifying requirements. EPA is proposing to approve these regulations in their entirety.

Burning of Field and Forage and Turf Grasses Grown for Seed (WAC 173–430)—In general, these regulations were revised by cross-referencing WAC 173–400 for generally applicable provisions, deleting duplicative and out-dated provisions, and clarifying requirements. EPA is proposing to approve these regulations in their entirety.

Solid Fuel Burning Device Standards (WAC 173–433)—These new regulations establish emission standards, certification standards and procedures, curtailment rules, and fuel restrictions for solid fuel burning devices. The regulations apply to any device that burns wood, coal, or any other nongaseous or nonliquid fuels and includes devices which are used for aesthetic or space-heating purposes in private residences or commercial establishments. The regulations establish performance standards for new woodstoves are well as appropriate certification procedures (WAC 173–433–100); establish a uniform statewide opacity standard (WAC 173–433–110); prohibit the burning of certain types of fuels (WAC 173–433–120); establish general emission standards (WAC 173–433–130); prohibit the use of solid fuel burning devices during air pollution episodes or periods of impaired air quality (WAC 173–433–150); and set a retail sales fee on the sale of all new and used solid fuel burning devices (WAC 173–433–170). EPA is proposing to approve WAC 173–433 in its entirety.

Solid Waste Incinerator Facilities (WAC 173–434)—These new regulations

establish emission standards, design standards, and performance standards for solid waste incinerator facilities. The regulations apply to all solid waste or solid waste derived fuel incinerator facilities that burn 12 or more tons per day. The regulations require the owner or operator of an incinerator to have an approved operation and maintenance plan (WAC 173–434–090); require new incinerators to use the best available control technology (WAC 173–434–100); establish emission standards (WAC 173–434–130); establish design and operation requirements (WAC 173–434–160); set monitoring and reporting requirements (WAC 173–434–170); and establish requirements for startup, shutdown, breakdown, or upset conditions (WAC 173–434–190). EPA is proposing to approve WAC 173–434 except for WAC 173–434–110 Standards of Performance, WAC 173–434–120 Emission Standards for Hazardous Air Pollutants, and WAC 173–434–130(2) which contains emission standards for hydrogen chloride. EPA is proposing to take no action on these sections since they are not related to the criteria pollutants regulated under the SIP.

Emergency Episode Plan (WAC 173–435)—In general, these regulations were revised to replace the episode levels for total suspended particulates with levels for PM–10 and to delete the combined levels for sulfur dioxide and particulate matter. Other revisions were made to improve the clarity and effectiveness of the regulations. EPA is proposing to approve WAC 173–435 with the exception of WAC 173–435–070(1). EPA is proposing to disapprove WAC 173–435–070(1) because it fails to meet the requirement of 40 CFR 51.151 to ensure that ambient concentrations at any location (including any validly sited monitoring station) do not reach significant harm levels.

Sensitive Areas (WAC 173–440)—These new regulations designate certain geographical areas of the state as sensitive areas and provide for the imposition of more stringent standards and compliance requirements for certain stationary source categories. The regulations designate the sensitive areas (WAC 173–440–040) and establish more stringent emission standards for wigwam burners located within any sensitive area (WAC 173–440–100). EPA is proposing to approve WAC 173–440, in its entirety.

Ambient Air Quality Standards for Particulate Matter (WAC 173–470)—These new regulations establish ambient air quality standards for total suspended particulates and PM–10, as well as particle fallout standards. EPA is proposing to approve WAC 173–470 with the exception of WAC 173–470–110 Particle Fallout, and WAC 173–470–150 Method of Measurement. EPA is proposing to take no action on WAC 173–470–110 since it is not related to the criteria pollutants regulated under the SIP. EPA is proposing to disapprove WAC 173–470–150 since this "director discretion" provision is inconsistent with the requirements for use of reference or equivalent methods in 40 CFR parts 50 and 53.

III. Summary of Action

EPA is today soliciting public comment on its proposal to approve in part and disapprove in part numerous revisions to the State of Washington Implementation Plan. Specifically, EPA is proposing to approve the following as revisions to the Washington SIP:

(1) WAC 173–400 (except for –040(1) (c) and (d); –040(2); –040(4); the second paragraph of –040(6); the exception provision in –050(3); –070(7); –075; –115; –120; –131; –136; –141; and –181), as in effect on March 22, 1991.
(2) WAC 173–405 (except for –033; –035; –040(1)(b), (1)(c), (3)(b), (3)(c), and (4); –040(7), (8), and (9); and –072(2)), as in effect on March 22, 1991.
(3) WAC 173–410 (except for 035; the exception provision in –040(3); and –040(5)), as in effect on March 22, 1991.
(4) WAC 173–415 (except for –020 (1) and (2); –030(1); –030(3)(b); –040; and –060(1) (a), (b), and (d)), as in effect on March 22, 1991.
(5) WAC 173–425, as in effect on October 18, 1990.
(6) WAC 173–430, as in effect on October 18, 1990.
(7) WAC 173–433, as in effect on October 18, 1990.
(8) WAC 173–434 (except for –110, –120, and –130(2)), as in effect on October 18, 1990.
(9) WAC 173–435 (except for –070(1)), as in effect on January 3, 1989.
(10) WAC 173–440, as in effect on October 18, 1990.
(11) WAC 173–470 (except for –110 and –150), as in effect on January 3, 1989.

EPA is also proposing to approve the repeal of WAC 173–403.

EPA is proposing to disapprove the following:

(1) WAC 173–400–040(1) (c) and (d), the second paragraph of –040(6), the exception provision in –050(3), –120, –131, –136, –141, and –180.
(2) WAC 173–405–040 (7), (8), and (9).
(3) the exception provision in WAC 173–410–040(3).
(4) WAC 173–415–030(3)(b).
(5) WAC 173–435–070(1).
(6) WAC 173–470–150.

EPA is proposing to take no action on the following:

(1) WAC 173–400–040(2), –040(4), –070(7), –075, and –115.
(2) WAC 173–405–033; –035, –040(1)(b), (1)(c), (3)(b), (3)(c), and (4); and –072(2).
(3) WAC 173–410–035 and –040(5).
(4) WAC 173–415–020 (1) and (2); –030(1); –040; and –060(1) (a), (b), and (d).
(5) WAC 173–434–110, –120, and –130(2).
(6) WAC 173–470–110.
(7) WAC 173–495.

Interested parties are invited to comment on all aspects of this proposed action. Comments should be submitted in triplicate, to the address listed in the front of this Notice. Public comments postmarked by October 28, 1992 will be considered in the final rulemaking action taken by EPA.

IV. Administrative Review

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et. seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under sections 110 and 301, and subchapter I, Part D of the CAA do not create any new requirements but simply approve requirements that the state is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S.E.P.A.*, 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

EPA's disapproval of the state request under section 110 and subchapter I, Part D of the CAA does not affect any existing requirements applicable to small entities. Any pre-existing federal requirements remain in place after this disapproval. Federal disapproval of the state submittal does not affect its state-enforceability. Moreover, EPA's disapproval of the submittal does not impose any new federal requirements. Therefore, EPA certifies that this disapproval action does not have a significant impact on a substantial number of small entities because it does not remove existing requirements nor

does it impose any new federal requirements.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic and environmental factors and in relation to relevant statutory and regulatory requirements.

List of Subjects in 40 CFR Part 52

Air pollution control, Carbon monoxide, Hydrocarbons, Incorporation by Reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

[FRL–4512–1]

Criteria for Exercising Discretionary Sanctions Under Title I of the Clean Air Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposal sets forth criteria that the EPA Administrator must consider when exercising his discretionary authority to apply sanctions on a statewide basis pursuant to section 110(m) of the Clean Air Act as amended in 1990 (amended Act). If EPA makes one of the findings of State implementation plan (SIP) deficiencies described in section 179(a), EPA may apply any of the sanctions listed in section 179(b) to any portion of the State that the Administrator determines is reasonable and appropriate for the purpose of ensuring that the requirements of the amended Act relating to plans are met. This proposal establishes the criteria EPA shall use in exercising its discretionary authority during the 24–month period following a finding of a plan deficiency to ensure that the sanctions listed in section 179(b) are not applied on a statewide basis when one or more political subdivisions are principally responsible for such deficiency. In addition, EPA describes the section 110(m) sanctions provision and EPA's anticipated application of these sanctions "at any time" after the Agency makes a finding.

The EPA anticipates that it will use its authority to apply sanctions earlier than 18 months after a finding only in limited cases and only after notice and an opportunity for comment.

DATES: Written comments on the proposed EPA action must be received by EPA at the address below on or before November 27, 1992.

ADDRESSES: Written comments may be submitted to the public docket. The public docket for this action, A–91–66, is available for public inspection and copying between 8 a.m. and 4 p.m., Monday through Friday, at EPA's Central Docket Section, South Conference Center, room 4, 401 M Street SW., Washington, DC. A reasonable fee for copying may be charged.

FOR FURTHER INFORMATION CONTACT: A. Ted Creekmore, U.S. EPA, MD–15, Research Triangle Park, North Carolina 27711, telephone (919) 541–5699.

SUPPLEMENTARY INFORMATION:

I. Overview

Section 110(m) of the Clean Air Act specifically requires the promulgation of criteria to ensure that, during the 24–month period following a finding, disapproval, or determination (hereinafter "finding") referred to in section 179(a), sanctions pursuant to section 110(m) are not applied on a statewide basis where one or more political subdivisions are principally responsible for such deficiency. Thus, these criteria apply only in the limited circumstance in which EPA is considering the imposition of statewide sanctions within 24 months after the Agency makes a section 179(a) finding.

Today's proposal provides five criteria that EPA will use to determine if sanctions imposed pursuant to section 110(m) may be applied statewide [see § 52.30(c) of the proposed regulatory text]. If at least one political subdivision meets all five of the criteria, then that political subdivision will be considered principally responsible, and EPA will not impose sanctions on a statewide basis. Rather, EPA will impose sanctions only on the areas of the States for which EPA determines it is reasonable and appropriate to impose sanctions. If all of the criteria are not met by at least one political subdivision, then no political subdivision is principally responsible, and EPA will use its discretion to determine whether to apply statewide sanctions. However, if EPA, using its discretion, initially determines that less-than-statewide sanctions should be applied, EPA will not be bound by the criteria and will impose sanctions on those political subdivisions found to be principally responsible, and possibly on others as reasonable and appropriate. Again, sanctions will only be applied on the geographic area of the State that the Administrator determines to be "reasonable and appropriate," and decisions will be made on a case-by-case basis.

II. Background

On November 15, 1990, the President signed into law the Clean Air Act Amendments (Amendments) of 1990.[1] These Amendments retained several of the types of sanctions provided for in the pre-amended Act, but substantially altered the mechanism for imposition of sanctions. The Amendments include two new sanctions provisions. First, section 110(m),[2] provides the Administrator with discretion to impose sanctions on any portion of the State that he determines is reasonable and appropriate. Second, section 179(a),[3] requires the Administrator to impose sanctions after specific timeframes if the deficiencies on which the sanctions are based are not corrected.[4] Although section 110(m) does not provide a specific timeframe for application of section 110(m) sanctions, EPA anticipates that it will impose sanctions earlier than 18 months only in limited circumstances, after notice-and-comment rulemaking. The specific types of sanctions which may be applied under section 110(m), or must be applied under section 179(a), are listed in section 179(b).

This rulemaking considers the application of sanctions under section 110(m). However, because section 110(m) and section 179 are interrelated, this preamble also will discuss sanctions under section 179(a) and (b) in order to clarify what is required by section 110(m).

III. Section 110(m)

Section 110(m) provides that:

---

[1] Pub Law No. 101–549, 104 Stat. 2399, codified at 42 U.S.C. sections 7401–7671q (1991).

[2] 42 U.S.C. 7410(m).

[3] 42 U.S.C. 7509(a).

[4] It is necessary, for clarity's sake, to understand that section 179(a) performs two very distinct functions: it defines several types of findings, and it requires EPA to impose sanctions if one of these findings has been made. Section 179(a)(1) through (4) sets forth the four types of findings which may lead to the imposition of a sanction. The introduction and latter part of section 179(a) mandate the EPA impose at least one sanction 18 months after a finding has been made with respect to certain types of plans if the deficiency is not corrected.

The Administrator may apply any of the sanctions listed in section 179(b) any time (or at any time after) the Administrator makes a finding, disapproval, or determination [under section 179(a)(1) through (4)] in relation to any plan or plan item * * * required under this Act, with respect to any portion of the State the Administrator determines reasonable and appropriate, for the purpose of ensuring that the requirements of this Act * * * are met. The Administrator shall, by rule, establish criteria for exercising his authority * * * to ensure that, during the 24-month period following a finding, disapproval, or determination referred to in section 179(a), such sanctions are not applied on a statewide basis where one or more political subdivisions covered by the applicable implementation plan are principally responsible for such deficiency.

In order to fully understand this section, it is necessary to recognize that section 110(m) may be divided into two distinct parts. The first part sets forth the following:

1. The timing of the application of section 110(m) sanctions.

2. The availability under section 110(m) of the sanctions listed in section 179(b).

3. The reference to a finding, disapproval, or determination under section 179(a).

4. The geographical scope of application of sanctions under section 110(m).

The second part requires the Administrator to propose criteria to be used when he is considering applying section 179(b) sanctions on a statewide basis under section 110(m) within 24 months of a section 179(a) finding.

Although the main purpose of this proposal is to set forth the criteria which EPA is required to establish under this second part, it is first necessary to address the three elements referred to above to ensure that the criteria can be fully understood.

IV. Available Sanctions, Findings Under Section 179(a), and the Scope of Sanctions

A. Timing of Section 110(m) Sanctions

Under section 110(m), EPA may apply either of the sanctions provided in section 179(b) at any time or at any time after the Agency makes a finding under section 179(a) (1) through (4). Section 110(m) provides EPA with discretion to apply these sanctions earlier than the 18-month mandatory period for application of sanctions under section 179(a). However, EPA anticipates that it will exercise this discretion to impose section 110(m) sanctions earlier than 18 months following a finding only in unusual circumstances where the State has indicated an explicit resistance to working to resolve a plan deficiency. As a matter or policy, EPA will provide notice and opportunity for comment prior to imposing sanctions earlier than 18 months after the finding pursuant to section 110(m).

B. Sanctions Available Under Section 110(m)

Section 179(b) establishes the two types of sanctions that the Administrator may impose pursuant to section 110(m): A highway funding sanction and a 2-to-1 offset sanction.[5]

1. Highway funding sanction. Under the highway funding sanction provision [section 179(b)(1)], the Administrator may impose a prohibition on the approval by the Secretary of Transportation of certain projects, or the awarding of certain grants under title 23 of the United States Code.

2. Emission offset sanction. Under the emissions offset sanction provision [section 179(b)(2)], a ratio of at least 2-to-1 will be required for emissions reductions from existing sources within the nonattainment area to offset emissions from major new or modified facilities. The offset requirement, established in section 173,[6] refers to reductions in emissions that major new and modified sources must get from existing sources before they may begin construction. [For comparison, for ozone, the pre-sanction ratio for volatile organic compounds (VOC) emissions ranges from greater than 1.0 to 1.5, depending upon the classification of the area.]

C. Finding Pursuant to Section 179(a)

Section 179(b) sanctions may be applied pursuant to section 110(m) when the Administrator makes a finding under section 179(a) (1) through (4), provided that the Agency has followed all procedural requirements (i.e., rulemaking requirements, such as notice and comment) for imposing a sanction. The Administrator has no authority under section 110(m), nor any mandatory duty under section 179(a), to impose sanctions until a finding has been made.

Section 179(a) sets forth the four types of findings which may lead to the imposition of a sanction:

1. That a State has failed to submit a SIP for a nonattainment area or an element of a SIP, or the SIP or SIP element fails to meet the completeness criteria issued pursuant to section 110(k).

2. That EPA disapproves a SIP submission for a nonattainment area based on its failure to meet one or more plan elements required by the amended Act.

3. That the State has not made any other submission, or has not made a complete submission, as required by the amended Act, or that EPA disapproves such a submission.

4. That a requirement of an approved plan is not being implemented.

D. Scope of Application of Section 110(m) Sanctions

When a finding under section 179(a) has been made, the Administrator may, under section 110(m), apply section 179(b) highway sanctions and offset sanctions to any area of the State which is determined to be reasonable and appropriate. The determination of where it would be reasonable and appropriate to apply sanctions, although important to the understanding of section 110(m) sanctions, is secondary to the discussion of the required criteria—the focus of this rulemaking. A further discussion of this issue is found in section V of this notice.

V. Development of Criteria

The second sentence of section 110(m) requires the Agency to establish criteria that EPA must apply if the Agency considers applying sanctions under section 110(m) on a statewide basis within 24 months of a section 179(a) finding. These criteria should enable EPA to determine when a political subdivision,[7] rather than the entire State, is principally responsible for a section 179(a) deficiency.

A. Principal Responsibility

The EPA recognized that an understanding of the term "principal responsibility" was integral to the development of the criteria. In this regard, the Agency faced a dilemma in trying to determine when a political subdivision would be principally responsible for a section 179(a) failure. The EPA recognizes that the States have primary responsibility for meeting the requirements of the amended Act. However, EPA also recognizes that the States may delegate principal responsibility for developing a plan or

---

[5] Other sanctions are also provided for under the amended Act; however, they will not be discussed in this rulemaking since they are not applicable under section 110(m).

[6] 42 U.S.C. 7503.

[7] EPA interprets the term "political subdivision" to refer to the representative body that is responsible for adopting and implementing air pollution controls for one, or any combination of one or more of the following: city, town, borough, county, parish, district, or any other geographical subdivision created by or pursuant to Federal or State law. This will include any agency designated under section 174, 42 U.S.C., section 7504, by the State to carry out the air planning responsibilities under part D.

plan element to one or more political subdivisions.

The EPA has attempted to draft criteria that would clearly indicate when the political subdivision carries the principal burden of carrying out an activity. The EPA recognizes that, in many instances, a State may retain the authority to perform an activity that it has delegated to a political subdivision upon the failure of the political subdivision to perform that activity.[8] However, the State's decision to retain authority should not preclude the conclusion that the political subdivision is principally responsible for the activity. Even if the State retains some authority to perform an activity, the political subdivision may still be principally responsible.

In addition, EPA believes that it is particularly necessary to focus on the interrelationship between a State and a political subdivision because of the wording of section 179(a) (1) and (3). The first and third findings under section 179(a), the finding of failure to submit a SIP or SIP element, and the finding of failure to make any submittal under the amended Act, specifically reference the State's failure to take an action. The EPA believes that this reference to a finding regarding a State does not preclude EPA from finding that the State's failure is primarily a result of a political subdivision's failure to carry out an activity. Although the Act references the State, the political subdivision may have had principal responsibility to carry out that activity. For example, under section 110 and part D of title I, the State is generally responsible for submitting SIP revisions to EPA. However, States frequently delegate the task of preparing new and revised rules to political subdivisions. If the political subdivision fails to submit the rules to the State, the State may then fail to submit the rules to EPA. If EPA finds, according to the criteria in today's rulemaking, that the political subdivision had principal responsibility to develop the new or revised rules and failed to do so, EPA will not impose sanctions on the entire State. Although the Agency makes the finding as to the State, EPA is obligated to examine the sources of the failure and determine what party is principally responsible.

[8] In fact, at least one provision of the Act specifically requires the State to retain some type of final responsibility to take action. Section 110(a)(2)(E)(iii) requires the State to make assurances that in instances where the State relies on a political subdivision to implement a plan provision, the State holds responsibility for ensuring adequate implementation of the plan provision.

B. Criteria

The EPA has developed five proposed criteria (summarized below) that it believes will enable a determination of when a State has relinquished its primary control over an activity, when it has delegated that control to a political subdivision, and whether the political subdivision has failed to perform that required activity. The EPA believes that this delegation is established when a political subdivision:

1. Has the legal authority to perform the required activity.

2. Has traditionally performed, or has been delegated the responsibility to perform, the required activity.

3. Has received, where appropriate, adequate funding, or authority to obtain funding, from the State to perform the required activity.

4. Has agreed to perform (and has not revoked that agreement) or is required to accept responsibility for performing the required activity.

5. Has failed to perform the required activity. If one or more political subdivisions each meet all five of the criteria, EPA will consider those subdivisions principally responsible, and hence, EPA may impose sanctions only on those political subdivisions and on other areas (short of the entire State) for which the Agency determines it is reasonable and appropriate.[9] The EPA would not impose sanctions statewide. However, if all of the criteria have not been met by at least one political subdivision,[10] EPA will use its discretion to determine whether to apply sanctions on a statewide basis.

These five criteria are intended to be applicable to SIP failures relating to stationary, area, and mobile sources. The EPA believes that the criteria developed here will enable it to successfully determine when a political subdivision is principally responsible.

VI. Scope of Application of Section 110(m) Sanctions

As stated earlier, once a finding under section 179(a) has been made, the Administrator may, pursuant to section 110(m), apply the section 179(b) sanctions to any portion of the State (consistent with the criteria established through this rulemaking). The language of section 110(m) indicates that sanctions may be applied on a broader basis than sanctions imposed pursuant to section 179(a). While section 110(m) indicates that sanctions may be applied to any area of the State, section 179(b) appears to limit, for the most part, the application of sanctions to nonattainment areas. Section 179(b)(1) contains a specific geographic limitation: "[t]he Administrator may impose a prohibition, applicable to a nonattainment area" on the approval by the Secretary of Transportation of certain projects or the awarding of certain grants under Title 23 of the U.S. Code.

The offset sanction, section 179(b)(2), is limited by the terms of the sanction itself. Under section 179(b)(2), the emissions offset requirement under section 173 (the nonattainment area new source review provisions) must be applied at a ratio of at least 2-to-1 for sources "for which a permit is required under Part D." While Part D generally applies to nonattainment areas, some requirements extend to other areas. Moreover, sources in those areas may be subject to the offset requirements of section 173. [11]

Section 110(m) establishes its own geographic scope for application of sanctions. Although section 110(m) refers to the sanctions established in section 179(b), there is no language stating that the same geographical limitations must apply. Section 110(m) refers only to the sanctions themselves, not the accompanying limitations. The language of section 110(m) sets forth its own, broader limitations by expressly providing that sanctions may be imposed on an entire State or any portion of a State. A portion of the section 110(m) language states, "The Administrator may apply any of the sanctions listed in section 179(b) * * * with respect to any portion of the State the Administrator determines reasonable and appropriate * * *." Moreover, this issue is addressed in the legislative history. In the House Conference Report on the amended Act, 136 Cong. Rec. H12854 (daily ed. October 26, 1990), Congressman Glenn Anderson stated, "The past failure of State legislatures to improve inspection and maintenance programs required by

[9] If EPA does not impose sanctions statewide, then it is not required to consider the criteria listed in this rulemaking. Consequently, EPA could impose sanctions on any area or political subdivision for which EPA deems reasonable and appropriate, provided that the requirements of section 110(m) are satisfied.

[10] It is important to note that all five criteria must be met through the action or inaction of the same political subdivision.

[11] For example, under section 184(b)(2), any stationary source that is located within an ozone transport region, and that emits, or has the potential to emit, 50 tons per year of VOC's is considered a major source and is subject to the requirements applicable to major sources located in a moderate nonattainment area. Therefore, at least within transport regions, some sources located in areas not designated nonattainment may be subject to section 173 offset requirements and, hence, may become subject to the offset sanction of section 179(b)(2).

a SIP can be cited as an appropriate circumstance where sanctions may be appropriate beyond the nonattainment area." Therefore, although the Administrator may impose section 110(m) sanctions on any area of the State, the offset sanction may only affect nonattainment areas or attainment areas that are otherwise subject to section 173. The highway sanction is not limited in such a manner and could be effective in all areas of a State.

VII. Request for Public Comments

The EPA would particularly like to solicit comments on three major portions of today's proposal. They are:

1. The selection and design of the five criteria.

2. The EPA's interpretation of the statutory requirements of section 110(m).

3. The use of EPA discretion [§ 52.30(d)(2)] to determine the appropriate area to apply sanctions if not all of the five criteria are met by a political subdivision of the State.

VIII. Limits of This Rulemaking

Nothing in the Act precludes EPA from applying sanctions pursuant to section 110(m), without examining the criteria, if the Agency elects to impose a sanction on a less-than-statewide basis or where EPA imposes statewide sanctions more than 24 months after a finding. Furthermore, this rulemaking does not affect the situation where a group of political subdivisions, whose combined area comprises the entire State, each suffers a deficiency. The EPA could impose a sanction on each of those political subdivisions as an independent area without applying the criteria, even though this may appear to be a statewide sanction. All decisions to impose sanctions will be made on a case-by-case basis.

This rule is not intended to identify which sanction EPA will apply in a particular circumstance, nor the type of deficiency for which EPA might use its discretion to apply sanctions. It is not intended to describe the notice and comment procedures EPA will ultimately use to impose a sanction pursuant to section 110(m).

IX. Miscellaneous

A. Relationship To Permit Program

The amended Act includes specific sanctions provisions for permitting requirements in section 502 (d) and (i), 42 U.S.C., and section 7661a (d) and (i). The finding regarding the permit program is not a finding under section 179(a); thus section 110(m) does not apply to the use of sanctions for addressing permit-related failures.

B. Executive Order 12291

Under Executive Order 12291, EPA must decide whether a rule is "major" and, therefore, subject to the requirement of a regulatory impact analysis (RIA). The proposed rule is intended to limit the circumstances under which EPA may impose sanctions on an entire State when one or more political subdivisions of that State are principally responsible for the action or lack of action that prompted the Administrator to make a section 179(a) finding. Moreover, this rule does not, of itself, apply any sanctions; thus any impacts would only be felt if and when sanctions were actually applied. The Administrator finds that this proposed rule will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices; and there will be no significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. This regulation will result in no significant environmental or energy impacts.

Although impacts may result in the future when EPA applies sanctions, the impacts are impossible to gauge since it is not known which States will, in fact, fail to meet requirements of the Act. However, this action potentially should reduce the number of statewide sanctions applied under section 110(m) of the Act, and thereby reduce the geographical area subject to sanctions. Thus, this proposed rule does not qualify as a major rule and is, therefore, not subject to the requirement of an RIA.

The EPA has submitted this regulation to the Office of Management and Budget (OMB) for review under Executive Order 12291, and their written comments and any EPA responses have been placed in the docket for this proceeding.

C. Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. section 605(b), I hereby certify that the attached proposed rule will not have a significant impact on a substantial number of small entities. Since the rule requires EPA to consider criteria before applying sanctions on a statewide basis, it could potentially result in a reduced burden on small entities.

D. Paperwork Reduction Act

This proposed rule does not contain any information collection requirements subject to review by OMB under the Paperwork Reduction Act of 1980, 44 U.S.C. section 3501, et seq.

List of Subjects in 40 CFR Part 52

Air pollution control, Carbon monoxide, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Dated: September 19, 1992.

William K. Reilly,

Administrator.

For the reasons set out in the preamble part 52, title 40 of the Code of Federal Regulations is proposed to be amended as follows.

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Subpart A—[Amended]

2. Part 52 is proposed to be amended by adding a new § 52.30 to subpart A to read as follows:

§ 52.30 Criteria for limiting application of sanctions under section 110(m) of the Clean Air Act on a statewide basis.

(a) *Definitions.* For the purpose of this section:

(1) The term *political subdivision* refers to the representative body that is responsible for adopting and implementing air pollution controls for one, or any combination of one or more of the following: City, town, borough, county, parish, district, or any other geographical subdivision created by, or pursuant to, Federal or State law. This will include any agency designated under section 174, 42 U.S.C. section 7504, by the State to carry out the air planning responsibilities under part D.

(2) The term *required activity* may include, but is not limited to, the submission of an adequate SIP or SIP element, or the implementation of a SIP or SIP element.

(3) The term *deficiency* means the failure to perform a required activity as defined above.

(b) *Sanctions.* During the 24 months after a finding, determination, or disapproval under section 179(a) of the Clean Air Act is made, EPA will not impose sanctions under section 110(m) of the Clean Air Act on a statewide basis if the Administrator finds that one or more political subdivisions of the State are principally responsible for the deficiency on which the finding, disapproval, or determination, as

provided under section 179(a) (1) through (4), is based.

(c) *Criteria.* The EPA will use the following criteria to determine whether a political subdivision is principally responsible for the deficiency.

(1) The State has provided adequate legal authority to a political subdivision to perform the required activity.

(2) The required activity is one which has traditionally been performed by the local political subdivision, or the responsibility for performing the required activity has been delegated to the political subdivision.

(3) The State has provided adequate funding or authority to obtain funding (when funding is necessary to carry out the required activity) to the political subdivision to perform the required activity.

(4) The political subdivision has agreed to perform (and has not revoked that agreement), or is required by State law to accept responsibility for performing, the required activity.

(5) The political subdivision has failed to perform the required activity.

(d) *Imposition of Sanctions.*

(1) If all of the criteria in paragraph (c) of this section have been met, through the action or inaction of the same political subdivision, EPA will not impose sanctions on a statewide basis.

(2) If not all of the criteria in paragraph (c) of this section have been met, through the action or inaction of the same political subdivision, EPA will determine the area for which it is reasonable and appropriate to apply sanctions.

Approval and Promulgation of Implementation Plans; Arizona State Implementation Plan Revision; Maricopa County Bureau of Air Pollution Control

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: EPA is proposing to disapprove two revised rules controlling volatile organic compounds (VOCs) adopted on July 13, 1988 by the Maricopa County Bureau of Air Pollution Control (the Bureau) for inclusion in the Arizona State Implementation Plan (SIP). The Arizona Department of Environmental Quality (DEQ) submitted these revisions to EPA on January 4, 1990. The revisions concern Rule 330, Volatile Organic Compounds, and Rule 336, Surface Coating Operations. EPA has evaluated the revisions to these rules and is proposing a disapproval under sections 110(k)(3) and 110(l) of the Clean Air Act, as amended in 1990 (CAA or the Act), because the rules do not meet the requirements of section 110 and Part D of the CAA.

DATES: Comments must be received on or before October 28, 1992.

ADDRESSES: Comments may be mailed to: Esther J. Hill, Rulemaking Section I (A–5–4), Air and Toxics Division, Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, CA 94105.

Copies of the rule revisions and EPA's evaluation report of each rule are available for public inspection at EPA's Region 9 office during normal business hours. Copies of the submitted rule revisions are also available for inspection at the following locations:

Arizona Department of Environmental Quality, Air Quality Planning Office, 2005 N. Central Avenue, Phoenix, AZ 85004

Maricopa County Air Pollution Control, 2406 S. 24th Street, Suite E214, Phoenix, AZ 85034.

FOR FURTHER INFORMATION CONTACT: William E. Davis, Jr., Rulemaking Section I (A–5–4), Air and Toxics Division, Environmental Protection Agency, 75 Hawthorne Street, San Francisco, CA 94105, Telephone: (415) 744–1183.

SUPPLEMENTARY INFORMATION:

Background

On March 3, 1978, EPA promulgated a list of ozone nonattainment areas under the provisions of the Clean Air Act, as amended in 1977 (1977 CAA or pre-amended Act), that included Maricopa County. 43 FR 8964. On March 19, 1979, EPA changed the name and modified the geographic boundaries of the ozone nonattainment area of Maricopa County to the Maricopa Association of Governments (MAG) Urban Planning Area. 44 FR 16391, 40 CFR 81.303. On February 24, 1984, EPA notified the Governor of Arizona that the Bureau's portion of the Arizona SIP was inadequate to attain and maintain the National Ambient Air Quality Standard (NAAQS) for ozone and requested that the State submit curative SIP revisions to EPA for approval (EPA's SIP-Call, 49 FR 18827, May 3, 1984). On May 26, 1988, EPA again notified the Governor of Arizona that the Bureau's portion of the Arizona SIP was inadequate to meet the ozone NAAQS and requested that deficiencies relating to VOC controls and the application of reasonably available control technology (RACT) in the existing SIP be corrected (EPA's second SIP-Call, 53 FR 34500, September 7, 1988). On November 15, 1990, amendments to the 1977 CAA were enacted. Public Law 101–594, 104 Stat. 2399, codified at 42 U.S.C. 7401–7671q. In amended section 182(a)(2)(A) of the CAA, Congress statutorily adopted the requirement that nonattainment areas correct their deficient RACT rules for ozone and established a deadline of May 15, 1991 for states to submit corrections of those deficiencies.

Section 182(a)(2)(A) applies to areas designated as nonattainment prior to enactment of the amendments and classified as marginal or above as of the date of enactment. It requires such areas to adopt and correct RACT rules pursuant to pre-amended section 172(b) as interpreted in EPA's pre-amendment guidance.[1] EPA's SIP–Call used that guidance to indicate the necessary corrections for specific nonattainment areas. The MAG Urban Planning Area is classified as a moderate nonattainment area;[2] therefore, this area is subject to the RACT fix-up requirement and the May 15, 1991 deadline. The Bureau adopted the two VOC-controlling rules being proposed for disapproval in this notice in July of 1988, and the Arizona DEQ, acting as the Governor's designee, submitted them to EPA on January 4, 1990, in response to the SIP–Calls. Although this submittal predates the amendments to the CAA, it also serves as a submittal under section 182(a)(2)(A).[3]

---

[1] Among other things, the pre-amendment guidance consists of those portions of the proposed post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); "Issues Relating to VOC Regulation, Cutpoints, Deficiencies, and Deviations, Clarification to Appendix D of November 24, 1987 Federal Register Notice (Appendix D or the Blue Book) (notice of availability was published in the Federal Register on May 25, 1988); and the existing control techniques guidelines (CTGs).

[2] Upon enactment of the CAA, the MAG Urban Planning Area continued as nonattainment for ozone pursuant to section 107(d) and was classified as moderate by operation of law pursuant to section 181(a). See 56 FR 56694 (November 6, 1991).

[3] The Agency has examined the issue of whether this action should be reviewed under the provisions of the pre-amended Act or whether EPA should review the submittal under amended Part D. As a general rule, where a newly enacted statute directly speaks to an issue, the new Act must apply to pending actions. *Kaiser Aluminum & Chem. Corp.* v. *Bonjorno*, 494 U.S. 827, 110 S.Ct. 1570, 1576–77. EPA believes that in the present case, the amended Act directly speaks to the issue by providing that States must correct their RACT rules as required under pre-amended section 172 as interpreted by EPA's pre-amendment guidance. Therefore, EPA has reviewed this submittal for conformance with the amended Act.

The State of Arizona submitted several revised rules to EPA for incorporation into its SIP on January 4, 1990, including the rules proposed for action in this notice. This notice addresses EPA's proposed action for Rule 330, Volatile Organic Compounds, and Rule 336, Surface Coating Operations. The submitted rules were found to be complete on May 25, 1990 pursuant to EPA's completeness criteria adopted on February 16, 1990 and set forth in 40 CFR part 51 appendix V,[4] and are being proposed for disapproval.

Both Rules 330 and 336 are rules that control volatile organic compounds (VOCs) from the generalized cleaning (degreasing) of parts and from the coating of metal parts, aerospace equipment, paper, films, plastic and flexible parts, respectively. VOCs contribute to the production of ground level ozone and smog. Rules 330 and 336 were originally adopted as part of the Bureau's effort to achieve the NAAQS for ozone in the MAG Urban Planning Area and have been revised in response to EPA's SIP–Calls and the section 182(a)(2)(A) CAA requirement. The following is EPA's evaluation and proposed action for the Bureau's Rule 330 and Rule 336.

EPA Evaluation and Proposed Action

In determining the approvability of a VOC rule, EPA must evaluate the rule for consistency with the requirements of the CAA and EPA regulations, as found in section 110 and Part D of the CAA and 40 CFR part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans). The EPA interpretation of these requirements, which forms the basis for today's action, appears in various EPA policy guidance documents listed in footnote 1. Among those provisions is the requirement that a VOC rule must, at a minimum, provide for implementation of RACT for stationary sources of VOC emissions. This requirement was carried forth from the pre-amended Act.

For the purpose of assisting state and local agencies in developing RACT rules, EPA prepared a series of Control Techniques Guideline (CTG) documents that, based on the underlying requirements of the Act, specified the presumptive norms for what is RACT for specific source categories. Under the CAA, Congress ratified EPA's use of these documents, as well as other Agency policy, for requiring States to "fix-up" their RACT rules. See section 182(a)(2)(A). There is no CTG applicable to Rule 330 which controls VOC emissions from operations not covered by other Bureau rules. The CTGs that apply to the Rule 336 are: (1) Surface Coating of Cans, Coils, Paper, Fabrics, Automobiles, and Light-Duty Trucks, EPA–450/2–77–008, Vol. II; (2) Summary of Group I Control Technique Guideline Documents for Control of Volatile Organic Emissions from Existing Stationary Sources, EPA–450/3–78–120; (3) Surface Coating of Large Appliances, EPA–450/3–78–120; (3) Surface Coating of Large Appliances, EPA–450/2–77–034; and (4) Surface Coating of Miscellaneous Metal Parts and Products, EPA–450/2–77–015. Further interpretations of EPA policy are found in the Blue Book. In general, these guidance documents have been set forth to ensure that VOC rules are fully enforceable and strengthen or maintain the SIP.

The rules discussed below are being proposed for disapproval because they do not meet the requirements of section 110 and Part D of the CAA.

Rule 330, Volatile Organic Compounds

This rule applies to VOC emitting sources, such as wood furniture coating facilities, not regulated by other Bureau rules. While there are some strengthening provisions, there are several appendix D deficiencies that cannot be approved under section 110 and Part D of the Act. These deficiencies include lack of test methods with which to determine compliance and a lack of adequate recordkeeping, which can lead to enforceability problems.

Rule 336, Surface Coating Operations

This rule applies to a variety of coating operations including the coating of cans, coils, metal furniture, large appliances, aerospace assemblies and components, and paper, film, fabric, vinyl, plastics, and flexible parts. VOC emission control is accomplished by setting limits on the amount of VOC that can be contained in the coating materials or by the use of emission control equipment. Despite certain strengthening provisions, this rule contains a number of appendix D deficiencies that cannot be approved under section 110 and Part D of the Act. For example, the rule does not specify adequate recordkeeping which can lead to enforceability problems. The rule also allows exemptions which are not provided in the CTG and have not been justified by the Bureau. In addition, a two-year compliance date extension for metal parts and products and a four-year compliance date for aerospace component coating have been set. Under sections 193 and 110(1) of the amended Act, SIP revisions may not provide for increased emissions over those required in the pre-amendment SIP nor may they interfere with applicable attainment and reasonable further progress (RFP) requirements. EPA believes that an extension of the compliance date would cause emissions in excess of what would occur under the presently approved SIP and, as a result, could interfere with attainment of the standard and RFP, as defined in section 171 of the Act. The State has not made any demonstration that there would be no excess emissions or no interference with RFP and attainment.

EPA has evaluated the Bureau's Rules 330 and 336 for consistency with the CAA, EPA regulations, and EPA policy and has found that the revisions contain deficiencies which were required to be corrected pursuant to the section 182(a)(2)(A) requirement of Part D of the CAA. A detailed discussion of the rule deficiencies can be found in the Technical Support Document for each rule which is available from the U.S. EPA's Region 9 office. Because of the deficiencies, the rules are not approvable pursuant to the section 182(a)(2)(A) of the CAA because they are not consistent with the interpretation of section 172 of the 1977 CAA as found in the Blue Book.

Section 193 of the amended Act provides that a State may not relax a control requirement in effect prior to amendment of the CAA in 1990 unless the State provides for equivalent or greater emission reduction elsewhere. Under Rule 336, Arizona has extended the compliance date for certain surface coating operations without providing how equivalent or greater reductions will be achieved during the time of extended compliance. In addition, section 110(1) of the CAA stipulates that EPA cannot approve rule revisions that would interfere with any applicable requirement concerning attainment and reasonable further progress (as defined in section 171 of the Act) or any other applicable requirements of the Act. The state has not demonstrated that the changes to Rule 336 will not interfere with reasonable further progress. Rule 336 allows for an unjustified and lengthy compliance period for regulation of aerospace product coatings and metal parts and product coatings. Thus, Rule 336 is proposed for disapproval under sections 110(1) and 193 of the CAA.

Under section 179(a)(2), if the Administrator disapproves a submission under section 110(k) for an area designated nonattainment, based on the submission's failure to meet one or more

[4] EPA has since adopted completeness criteria pursuant to section 110(k)(1)(A) of the amended Act. See 56 FR 42216 (August 26, 1991) to be codified at 40 CFR part 51, appendix V.

of the elements required by the CAA, the Administrator must apply one of the sanctions set forth in section 179(b) unless the deficiency has been corrected within 18 months of such disapproval. Section 179(b) provides two sanctions available to issues a finding of disapproval. Moreover, the final disapproval triggers the federal implementation plan (FIP) requirement under section 110(c).

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision of the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Regulatory Process

Under the Regulatory Flexibility Act, 5 U.S.C. section 600 et seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. sections 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

EPA's disapproval of the State request under sections 110 and 301 and subchapter I, part D of the CAA does not affect any existing requirements applicable to small entities. Any preexisting federal requirements remain in place after this disapproval. Federal disapproval of the state submittal does not affect its state-enforceability. Moreover, EPA's disapproval of the submittal does not impose any new federal requirements. Therefore, EPA certifies that this disapproval action does not have a significant impact on a substantial number of small entities because it does not remove existing requirements nor does it impose any new federal requirement.

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements.

Authority: 42 U.S.C. 7401–7671q.

Dated: September 18, 1992.

John Wise,

Acting Regional Administrator.

[CA 14–11–5591; FRL–4512–9]

Approval and Promulgation of Implementation Plans, California State Implementation Plan Revision; San Joaquin Valley Unified Air Pollution Control District, Kern County Air Pollution Control District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: EPA is proposing to approve revisions to the California State Implementation Plan (SIP) adopted by the San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD) and the Kern County Air Pollution Control District (KCAPCD) on April 11, 1991 and May 6, 1991, respectively. The California Air Resources Board submitted these revisions to EPA on May 30, 1991. The revisions concern SJVUAPCD's Rule 463.4, Wastewater Separators, and KCAPCD's Rule 414, Wastewater Separators. These rules control the emission of volatile organic compounds (VOCs) from wastewater separators. EPA has evaluated these rules and is proposing to approve them under Section 110(k)(3) as meeting the requirements of Section 110(a) and Part D of the Clean Air Act, as amended in 1990 (CAA or the Act).

DATES: Comments must be received on or before October 28, 1992.

ADDRESSES: Comments may be mailed to: John Ungvarsky, Acting Chief, Northern California, Nevada, and Hawaii Rulemaking Section (A–5–4), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105.

Copies of the rules revisions and EPA's evaluation report of each rule are available for public inspection at EPA's Region 9 office during normal business hours. Copies of the submitted rule revisions are also available for inspection at the following locations:

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 1219 "K" Street, Sacramento, CA 95814.

San Joaquin Valley Unified, Air Pollution Control District, 1745 West Shaw, suite 104, Fresno, CA 93711.

Kern Country Air Pollution Control District, 2700 M Street, suite 275, Bakersfield, CA 93301.

FOR FURTHER INFORMATION CONTACT: Denise Odenwalder, Southern California and Arizona Rulemaking Section (A–5–3), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105, Telephone: (415) 744–1200.

SUPPLEMENTARY INFORMATION:

Background

On March 3, 1978, EPA promulgated a list of ozone nonattainment areas under the provisions of the Clean Air Act, as amended in 1977 (1977 CAA), that included the following eight air pollution control districts (APCDs): Fresno County APCD, Kern County APCD,[1] Kings County APCD, Madera County APCD, Merced County APCD, San Joaquin County APCD, Stanislaus County APCD, and Tulare County APCD. 43 FR 8964, 40 CFR 81.305. Because these areas were unable to meet the statutory attainment date of December 31, 1982, California requested under Section 172(a)(2), and EPA approved, and extension of the attainment date to December 31, 1987.[2] On May 26, 1988, EPA notified the Governor of California that the above districts' portions of the California SIP were inadequate to attain and maintain the ozone standard and requested that deficiencies in the existing SIP be corrected (EPA's SIP-Call). On November 15, 1990, the Clean Air Act Amendments of 1990 were enacted. Pub. L. 101–549, 104 Stat. 2399, codified at 42 U.S.C. §§ 7401–7671q. In amended section 182(a)(2)(A) of the CAA, Congress statutorily adopted the requirement that nonattainment areas fix their deficient reasonably available control technology (RACT) rules for ozone and established a deadline of May 15, 1991 for states to submit corrections of those deficiencies.

On March 20, 1991, the San Joaquin Valley Unified Air Pollution Control

---

[1] At that time, Kern County included portions of two air basins: the San Joaquin Valley Air Basin and the Southeast Desert Air Basin. The San Joaquin Valley Air Basin portion of Kern County was designated as nonattainment, and the Southeast Desert Air Basin portion of Kern County was designated as unclassified. See 40 CFR 81.305 (1991).

[2] This extension was not requested for Kern County. Thus, Kern County's attainment date remained December 31, 1982

District (SJVUAPCD) was formed. The SJVUAPCD has authority over the San Joaquin Valley Basin which includes all of the above eight counties except for the Southeast Desert Air Basin portion of Kern County. Thus, Kern County Air Pollution Control District (KCAPCD) still exists, but only has authority over the Southeast Desert Air Basin portion of Kern County.

Section 182(a)(2)(A) applies to areas designated as nonattainment prior to enactment of the amendments and classified as marginal or above as of the date of enactment. It requires such areas to adopt and correct RACT rules pursuant to pre-amendment section 172(b) as interpreted in pre-amendment guidance.[3] EPA's SIP-Call used that guidance to indicate the necessary corrections for specific nonattainment areas. APCDs found in the San Joaquin Valley Air Basin (now collectively known as the SJVUAPCD) were subject to the RACT fix-up requirement and the May 15, 1991 deadline.[4] KCAPCD was subject to EPA's SIP-Call, but was not subject to the RACT fix-up requirement and the May 15, 1991 deadline.[5] Kern County is subject to the RACT requirement of section 182(b)(2) of the amended Act.

The State of California submitted many revised RACT rules for incorporation into its SIP on May 30, 1991, including the rules being acted on in this notice. This notice addresses EPA's proposed action for SJVUAPCD's Rule 463.4, Wastewater Separators, and KCAPCD's Rule 414, Wastewater Separators. These submitted rules were found to be complete on July 10, 1991 pursuant to EPA's completeness criteria adopted on February 16, 1990 (55 FR 5830) and set forth in 40 CFR part 51 Appendix V [6] and are being proposed for approval into the SIP.

Both rules control the emission of VOCs from wastewater separators. VOCs contribute to the production of ground level ozone and smog. The rules were adopted as part of each district's effort to achieve the National Ambient Air Quality Standard (NAAQS) for ozone and in response to EPA's SIP-Call and the section 182 RACT requirements. The Following is EPA's evaluation and proposed action for these rules.

EPA Evaluation and Proposed Action

In determining the approvability of a VOC rule, EPA must evaluate the rule of consistency with the requirements of the CAA and EPA regulations, as found in section 110 and Part D of the CAA and 40 CFR part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans). The EPA interpretation of these requirements, which forms the basis for today's action, appears in the various EPA policy guidance documents listed in footnote 3. Among the provisions of the CAA is the requirement that a VOC rule must, in a minimum, provide for the implementation of RACT for stationary sources of VOC emissions. This requirement was carried forth from the pre-amended Act.

For the purpose of assisting state and local agencies in developing RACT rules, EPA prepared a series of Control Technique Guideline (CTG) documents. The CTGs are based on the underlying requirements of the Act and specify the presumptive norms for what is RACT for specific source categories. Under the CAA, Congress ratified EPA's use of these documents, as well as other Agency policy, of requiring States to "fix-up" their RACT rules. See section 182(a)(2)(A). The CTG applicable to these rules is entitled, "Control of Refinery Vacuum Producing Systems, Wastewater Separators and Process Unit Turnarounds," EPA document # EPA–450/2–77–025. Further interpretations of EPA policy are found in the Blue Book, referred to in footnote 3. In general, these guidance documents have been set forth to ensure that VOC rules are fully enforceable and strengthen or maintain the SIP.

SJVUAPCD'S submitted Rule 463.4 is a revision of existing SIP approved rules from the eight districts that combined to form SJVUAPCD.[7] KCAPCD's submitted Rule 414 is a revision of the current SIP Rule 414, Wastewater Separators.

SJVUAPCD'S submitted Rule 463.4 and KCAPCD's submitted Rule 414 are essentially identical rules. The rules reduced the emission of VOCs by setting equipment specifications and operating procedures for wastewater separators. The rules include the following significant changes from the SIP approved rules:

- Clarifies the applicability of the rules;
- Includes additional definitions and revises existing definitions;
- Revises the rules' exemptions;
- Deletes sections giving discretion to the Control Officer to approve control equipment other than that required by the rules;
- Adds requirements for handling the oil or tar removed from wastewater separating devices;
- Adds sections on test methods; and
- Adds and updates compliance schedules.

EPA has evaluated the submitted rules and has determined that they are consistent with the CAA, EPA regulations, and EPA policy. Therefore, SJVUAPCD's Rule 463.4 and KCAPCD's Rule 414 are being proposed for approval under section 110(k)(3) of the CAA as meeting the requirements of section 110(a) and Part D.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Regulatory Process

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small

---

[3] Among other things, the pre-amendment guidance consists of those portions of the proposed Post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); "Issue Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations, Clarification to Appendix D of November 24, 1987 **Federal Register** Notice" (Blue Book) (notice of availability was published in the **Federal Register** on May 25, 1988); and the existing control technique guidelines (CTGs).

[4] The San Joaquin Valley Air Basin was redesignated nonattainment and classified as serious by operation of law pursuant to section 107(d) and section 181(a) upon the date of enactment of the Clean Air Act Amendments of 1990. See 56 FR 56694 (November 6, 1991).

[5] KCAPCD was not subject to the RACT fix-up requirement and the May 15, 1991 deadline because the Southeast Desert Air Basin portion of Kern County was not a pre-enactment nonattainment area, and thus, was not automatically designated nonattainment on the date of enactment of the Clean Air Act Amendments of 1990. (See section 107(d) and section 182(a)(2)(A) of the Clean Air Act Amendments of 1990.) However, the KCAPCD is still subject to the requirements of EPA's SIP-Call because the SIP-Call included all of Kern County. The substantive requirements of the SIP—Call are the same as those of the statutory RACT fix-up requirement.

[6] EPA has since adopted completeness criteria pursuant to section 110(k)(1)(A) of the CAA. See 56 FR 42216 (August 26, 1991).

[7] The SIP approved rules are San Joaquin County APCD's Rule 413, Refinery Oil-Water Separators; Fresno County APCD's Rule 413, Effluent Oil-Water Separators; Madera County APCD's Rule 420, Effluent Oil-Water Separators; Merced County APCD's Rule 413, Effluent Oil-Water Separators; Stanislaus County APCD's Rule 413, Effluent Oil-Water Separators; Tulare County APCD's Rule 414, Effluent Oil-Water Separators; KCAPCD's Rule 414, Wastewater Separators; and Kings County APCD's Rule 414, Wastewater Separators.

businesses, small not-for-profit enterprises and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under section 110 and subchapter I, Part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute Federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S. Ct. 1976); 42 U.S.C. § 7410(a)(2).

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

Approval and Promulgation of Implementation Plans; California State Implementation Plan Revision; Bay Area Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: EPA is proposing to approve revisions to the California State Implementation Plan (SIP) adopted by the Bay Area Air Quality Management District (BAAQMD) on September 5, 1990. The California Air Resources Board (CARB) submitted these revisions to EPA on April 5, 1991. The revisions concern the adoption of BAAQMD Regulation 8, Rule 17, Petroleum Dry Cleaning Operations and Regulation 8, Rule 27, Synthetic Solvent Dry Cleaning Operations. Both of these rules control the emissions of volatile organic compounds (VOCs) from their respective operations. EPA has evaluated each of these rules and is proposing to approve them under section 110(k)(3) as meeting the requirements of section 110(a) and Part D of the Clean Air Act, as amended in 1990 (CAA or the Act).

DATES: Comments must be received on or before October 28, 1992.

ADDRESSES: Comments may be mailed to: Esther Hill, Rulemaking Section I (A–5–4), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105.

Copies of the rule revisions and EPA's evaluation report of each rule are available for public inspection at EPA's Region IX office during normal business hours. Copies of the submitted rule revisions are also available for inspection at the following locations:

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 1219 "K" Street, Sacramento, CA 95814

Bay Area Air Quality Management District, 939 Ellis Street, San Francisco, CA 94109.

FOR FURTHER INFORMATION CONTACT: Wendy Colombo, Rulemaking Section I (A–5–4), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105, Telephone: (415) 744–1190.

SUPPLEMENTARY INFORMATION:

Background

On March 3, 1978, EPA promulgated a list of ozone nonattainment areas under the provisions of the Clean Air Act, as amended in 1977 (1977 CAA or pre-amended Act), that included the Bay Area. 43 FR 8964, 40 CFR 81.305. Because these areas were unable to meet the statutory attainment date of December 31, 1982, California requested under preamended Section 172(a)(2), and EPA approved, an extension of the attainment date to December 31, 1987. 40 CFR 52.238, 52.222. On May 26, 1988, EPA notified the Governor of California that the above districts' portions of the California SIP were inadequate to attain and maintain the ozone standard and requested that deficiencies in the existing SIP be corrected (EPA's SIP-Call). On November 15, 1990, the Clean Air Act Amendments of 1990 were enacted. Public Law 101–549, 104 Stat. 2399, codified at 42 U.S.C. section 7401–7671q. In amended section 182(a)(2)(A) of the CAA, Congress statutorily adopted the requirement that nonattainment areas fix their deficient reasonably available control technology (RACT) rules for ozone and established a deadline of May 15, 1991 for states to submit corrections of those deficiencies.

Section 182(a)(2)(A) applies to areas designated as nonattainment prior to enactment of the amendments and classified as marginal or above as of the date of enactment. It requires such areas to adopt and correct RACT rules pursuant to pre-amended section 172(b) as interpreted in pre-amendment guidance.[1] EPA's SIP-Call used that guidance to indicate the necessary corrections for specific nonattainment areas. The BAAQMD was subject to the RACT fix-up requirement and the May 15, 1991 deadline.[2]

The State of California submitted many revised RACT rules for incorporation into its SIP on May 30, 1991, including the rules being acted on in this notice. This notice addresses EPA's proposed action for two BAAQMD Rules: Regulation 8, Rule 17, Petroleum Dry Cleaning Operations and Regulation 8, Rule 27, Synthetic Solvent Dry Cleaning Operations. These submitted rules were found to be complete on May 21, 1991 pursuant to EPA's completeness criteria adopted on February 16, 1990 (55 FR 5830) and set forth in 40 CFR part 51 Appendix V [3] and are being proposed for approval into the SIP.

Both rules control the emission of VOCs, which contribute to the production of ground level ozone and smog. The rules were adopted as part of the district's efforts to achieve the National Ambient Air Quality Standards (NAAQS) for ozone and in response to EPA's SIP-Call and the section

---

[1] Among other things, the pre-amendment guidance consists of those portions of the proposed Post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); "Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations, Clarification to Appendix D of November 24, 1987 **Federal Register** Notice" (Blue Book) (notice of availability was published in the **Federal Register** on May 25, 1988); and the existing control technique guidelines (CTGs).

[2] The Bay Area retained its designation of nonattainment and was classified by operation of law pursuant to sections 107(d) and 181(a) upon the date of enactment of the amendments.

[3] EPA has since adopted completeness criteria pursuant to § 110(k)(1)(A) of the CAA. See 56 FR 42216 (August 26, 1991).

182(a)(2)(A) CAA requirement. The following is EPA's evaluation and proposed action for these rules.

EPA Evaluation and Proposed Action

In determining the approvability of a VOC rule, EPA must evaluate the rule for consistency with the requirements of the CAA and EPA regulations, as found in section 110 and Part D of the CAA and 40 CFR part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans). The EPA interpretation of these requirements, which forms the basis for today's action, appears in the various EPA policy guidance documents listed in footnote 1. Among the CAA provisions is the requirement that a VOC rule must, at a minimum, provide for the implementation of RACT for stationary sources of VOC emissions. This requirement was carried forth from the pre-amended Act.

For the purpose of assisting state and local agencies in developing RACT rules, EPA prepared a series of Control Technique Guideline (GTG) documents. The CTGs are based on the underlying requirements of the Act and specify the presumptive norm for what is RACT for specific source categories. Under the CAA, Congress ratified EPA's use of these documents, as well as other Agency policy, for requiring States to "fix-up" their RACT rules. See section 182(a)(2)(A). The CTG applicable to Rule 8–17 is entitled, Control of Volatile Organic Compound Emissions from Large Petroleum Dry Cleaners, EPA Document No. EPA 450/3–82–009. The CTG applicable to Rule 8–27 is entitled, Control of Volatile Organic Emissions from Perchloroethylene Dry Cleaning Systems, EPA Document No. EPA 450/2–78–050. Further interpretations of EPA policy are found in the Blue Book, referred to in footnote 1. In general, these guidance documents have been set forth to ensure that VOC rules are fully enforceable and strengthen or maintain the SIP.

BAAQMD Regulation 8, Rule 17, Petroleum Dry Cleaning Operations includes the following significant changes from the current SIP:

- Adds definitions;
- Changes the medium user exemption to a small user exemption;
- Adds operating requirements;
- Adds emission control requirements for solvent recovery dryers;
- Adds solvent filtration requirements; and
- Adds recordkeeping and test method requirements.

BAAQMD Regulation 8, Rule 27, Synthetic Solvent Dry Cleaning Operations includes the following significant changes from the current SIP:

- Adds a provision for future elimination of the small-user exemption;
- Expands the scope of the rule to include cleaning with all synthetic (halogenated) solvents;
- Adds definitions;
- Expands the operating requirements;
- Expands the emission control requirements;
- Expands the space limitation exemption requirements; and
- Adds recordkeeping and test method requirements.

EPA Region IX's technical support documents provide a more detailed discussion of the revisions to each rule.

EPA has evaluated the submitted rules and has determined that they are consistent with the CAA, EPA regulations, and EPA policy. Therefore, BAAQMD's Regulation 8, Rule 17, Petroleum Dry Cleaning Operations and Regulation 8, Rule 27, Synthetic Solvent Dry Cleaning Operations are being proposed for approval under section 110(k)(3) of the CAA as meeting the requirements of section 110(a) and Part D.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Regulatory Process

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et. seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities, 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under sections 110 and 301 and subchapter I, Part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S. Ct. 1976); 42 U.S.C. 7410(a)(2).

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the office of management and budget (OMB) waived Table 2 and Table 3 SIP revisions (54 FR 2222) from the requirements of Section 3 of Executive Order 12291 for a period of two years. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

Guideline for Federal Procurement of Paper and Paper Products Containing Recovered Materials

AGENCY: U.S. Environmental Protection Agency.

ACTION: Advance notice of public meeting.

SUMMARY: The Environmental Protection Agency (EPA) plans to conduct a public meeting to provide an opportunity for interested parties to express their views on issues pertaining to its "Guideline for Federal Procurement of Paper and Paper Products Containing Recovered Materials" (40 CFR part 250). The Agency anticipates inviting principals from industry, environmental organizations, state and Federal procuring agencies, and state and local solid waste and recycling agencies. The meeting will be open to all interested parties.

EPA plans to hold this meeting to ensure that the positions of all interested parties are known as the Agency considers possible revisions to

the existing paper procurement guideline. The issues to be discussed at the meeting will be determined by meeting participants. A tentative list of discussion topics will be prepared by EPA and announced in a future **Federal Register** notice to assist meeting participants as they develop the meeting agenda.

DATES: It is anticipated that the meeting will be held in early December of this year. The exact date and time of the meeting will be announced in a future **Federal Register** notice.

ADDRESSES: The meeting location will be announced in a future **Federal Register** notice.

FOR FURTHER INFORMATION CONTACT: For additional information, please contact Terry Grist of the Municipal and Industrial Solid Waste Division, U.S. Environmental Protection Agency (Mail Stop OS-301), 401 M Street, SW., Washington, DC 20460, 202-260-9718.

SUPPLEMENTARY INFORMATION: Section 6002 of the Resource Conservation and Recovery Act requires "procuring agencies" to procure paper products composed of the highest percentage of post-consumer recovered materials practicable. The statute also requires EPA to prepare guidelines to assist procuring agencies in fulfilling their obligations under the statute. Procuring agencies are Federal, State and local agencies (and their contractors), and those receiving grants, loans, and cooperative agreements that use appropriated Federal funds when purchasing designated items, including many paper products.

EPA issued its "Guideline for the Federal Procurement of Paper and Paper Products Containing Recovered Materials" on June 22, 1988 (see 40 CFR part 250). These guidelines became effective in June of 1989. The statute also establishes a $10,000 threshold to determine whether a procuring agency must comply with the guidelines and requires EPA to periodically revise its guidelines.

In general, EPA issued minimum content purchasing specifications (with a recommended percentage of post-consumer recovered material) for Newsprint, Tissue Products, Unbleached Packaging and Recycled Paperboard. In addition, we issued minimum content purchasing specifications for Printing & Writing papers. However, at the time the guidelines were issued, insufficient quantities of Printing & Writing papers were being produced with post-consumer content to satisfy the Federal government's demand for these products. Thus, EPA issued "waste paper" specifications for Printing & Writing papers, which include some pre-consumer wastes, such as converting scrap and printers' waste, as well as post-consumer fiber. Many individuals and representatives of public interest groups have complained that principally pre-consumer wastes, not post-consumer wastes, are being used to produce Printing & Writing papers purchased by the Federal government.

EPA has been monitoring developments in the marketplace since our guidelines were issued. There has been increasing evidence that Printing & Writing papers are being made with post-consumer recovered paper. On October 3, 1990, we published a **Federal Register** notice requesting information on the extent to which post-consumer materials were being used in making Printing & Writing papers and whether or not it was possible to issue post-consumer content specifications for these grades (see 55 FR 40384). We also suggest that, if a post-consumer standard was not practical, perhaps an alternative, "deinked fiber" specification could be established. "Deinked fiber" is a broader category than post-consumer that would include all printed material, whether pre- or post-consumer. We received some 65 sets of comments on this notice from paper mills, wholesalers, trade associations, government agencies, and public interest groups. We intend to make use of the information obtained from those comments as we consider revisions to the guidelines for Printing & Writing papers.

Over the last couple of years, a number of organizations have been evaluating the EPA paper procurement guidelines and their effectiveness in stimulating recycling. These groups have been evaluating the definitions and recycled content levels contained in our guidelines, and have made numerous suggestions on possible revisions. Among others, we have received recommendations from the Recycling Advisory Council, the Paper Definitions Working Group, and the Paper Recycling Coalition. There is a growing misconception by many, maybe even a fear, that EPA is going to adopt one of these recommended approaches without first notifying the public of any proposed revisions and taking comment on them. This is not the case. We intend to follow our standard process of first proposing revisions, taking comments, and subsequently finalizing any changes to the existing guidelines.

Over the last six months, we have received numerous inquiries concerning revisions to our guidelines. We have encouraged those who have contacted us to provide whatever information they believe is relevant to the EPA's deliberations on if and how the existing paper procurement guidelines should be revised. We are concerned that we have not necessarily heard from all interested parties. As a consequence, we have decided that it would be prudent to conduct a public meeting to provide all interested parties an opportunity to make their views known to EPA. We expect to hold this meeting in early December; it will most likely be a two day meeting. The exact dates, times and location of this meeting will be announced in a future **Federal Register** notice.

It is our intention that the issues to be discussed at the public meeting will be determined by the meeting participants. We will prepare a tentative list of discussion topics for consideration by the participants, to assist them as they develop the meeting agenda. This list will include, but not be limited to, the following topics:

- Should EPA focus only on the Printing & Writing papers as outlined in the October 1990 notice, or should we reconsider all of the paper grades included in our guideline?
- What approach should EPA take if it decides to revise its minimum recovered material content specifications—post-consumer only, deinked wastepaper, a combination of total recycled content and post-consumer or deinked wastepaper?
- How should recycled content be measured—fiber only? total weight of the product?
- Should measurements be based on specific production runs or should they be averaged over time?
- Should EPA also develop guidance for use by private sector purchasers of recycled paper?

The complete tentative list of topics will be included in the future **Federal Register** notice announcing the dates, times, and location of the meeting. EPA intends to use the information gained from the public meeting to supplement our own research and contribute to our efforts in considering possible revisions to the existing paper procurement guidelines.

Dated: September 17, 1992.

Don R. Clay,

Assistant Administrator.

Land Disposal Restrictions "No Migration" Variances

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and notice of availability; extension of comment period.

SUMMARY: The Environmental Protection Agency (EPA or Agency) is extending the comment period on the proposed land disposal restrictions "no migration" variances rule, which appeared in the **Federal Register** on August 11, 1992 (see 57 FR 35940). This extension of the comment period is provided to allow commenters an opportunity to complete their review and responses to the Agency's proposed rule.

DATES: EPA will accept public comments on the proposed rule and notice of availability until October 23, 1992. Comments postmarked after the close of the extended comment period will be stamped "late."

ADDRESSES: Comments should be addressed to the docket clerk at the following address: U.S. Environmental Protection Agency, RCRA Docket (Room 2427) (OS-305), 401 M Street, SW., Washington, DC 20460. One original and two copies should be sent and identified at the top by regulatory docket reference number F-92-NMVP-FFFFF. The Docket is open from 9 a.m. to 4 p.m., Monday through Friday, excluding Federal holidays. The public must make an appointment to review docket materials, and should call the docket clerk at (202) 260-9327 for appointments. The public may copy, at no cost, a maximum of hundred pages of material from any one regulatory docket. Additional copies are $0.15 per page.

Copies of the guidance manual for no migration petitioners can be obtained from the National Technical Information Service (NTIS), U.S. Department of Commerce, Springfield, Virginia 22161, at (703) 487-4600: No Migration Guidance (NTIS PB92-207 695).

FOR FURTHER INFORMATION CONTACT: For general information about this proposed rulemaking, contact the RCRA Hotline, Office of Solid Waste (OS-305), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (800) 424-9346 (tollfree) or (703) 920-9810 in the Washington, DC, metropolitan area.

For information on aspects of this proposed rule pertaining to No Migration, contact Dave Reeves, Office of Solid Waste (OS-343), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 260-4692.

For information on aspects of this proposed rule pertaining to control of organic air emissions from no migration units under RCRA Section 3004(n), contact Kent C. Hustvedt, Office of Air Quality Planning and Standards (MD-13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina, 27711, (919) 541-5395.

SUPPLEMENTARY INFORMATION: On August 11, 1992, EPA proposed its interpretation of the "no migration" variance to the Congressional mandated restrictions on land disposal of hazardous waste. In addition, EPA proposed procedural and substantive requirements for petitioning the Agency and demonstrating that there will be "no migration" from a land disposal unit. Also, the Agency proposed standards that would limit organic air emissions from land treatment, landfill, and waste pile units for those petitioners that have successfully demonstrated "no migration" and have received a variance from restrictions on land disposal of hazardous waste. Finally, in this proposed notice, the Agency announced the availability of a draft guidance manual for petitioners seeking to make no migration demonstration, entitled No Migration Variances to the Hazardous Waste Land Disposal Prohibitions: A Guidance Manual for Petitioners (U.S. EPA, Draft, July 1992). These actions are in response to amendments to the Resource Conservation and Recovery Act (RCRA), enacted through the Hazardous and Solid Waste Amendments of 1984 (HSWA). See 57 FR 35940 for a more detailed explanation of the Agency's proposal.

Since publication, the Agency has received a request from several commenters to extend the comment period because additional time is needed to review the proposed rule and the guidance document. The Agency considered the request and has decided to extend the comment period for 30 days to allow the commenters additional time to review the proposed rule. The public comment period for the proposed rule was originally scheduled to end on September 25, 1992. Today's notice extends the public comment period for the proposed rule to allow commenters an opportunity to finalize their review and responses to the Agency's proposed rulemaking.

Dated: September 23, 1992.

Richard J. Guimond,

Acting Assistant Administrator, Office of Solid Waste and Emergency Response (OSWER).

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List

AGENCY: Environmental Protection Agency.

ACTION: Notice of intent to delete the Suffern Village Well Field Site from the National Priorities List: Request for comments.

SUMMARY: The Environmental Protection Agency (EPA) Region II announces its intent to delete the Suffern Village Well Field site (Site) from the National Priorities List (NPL) and requests public comment on this action. The NPL is Appendix B of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to Section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended. EPA and the State of New York have determined that no further cleanup by responsible parties is appropriate under CERCLA. Moreover, EPA and the State have determined that CERCLA activities conducted at the Site to date have been protective of public health, welfare, and the environment.

DATES: Comments concerning this Site may be submitted on or before October 30, 1992.

ADDRESSES: Comments may be mailed to: Ms. Kathleen C. Callahan, Director, Emergency and Remedial Response Division, U.S. Environmental Protection Agency, Region II, 26 Federal Plaza, Room 737, New York, New York 10278.

Comprehensive information on this Site is contained in the EPA Region II public docket, which is located at EPA's Region II office, and is available for viewing, by appointment only, from 9 a.m. to 5 p.m., Monday through Friday, excluding holidays. To request an appointment to review the public docket, please contact: Mr. Richard Kaplan, Remedial Project Manager, U.S. Environmental Protection Agency, Region II, 26 Federal Plaza, Room 2930, New York, New York 10278, (212) 264-3819.

Background information from the Regional public docket is also available for viewing at the Site's Administrative Record repositories located at: Suffern Free Library, Maple and Washington, Suffern, New York 10901 and Suffern Village Town Hall, 61 Washington Avenue, Suffern, New York 10901.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Kaplan at (212) 264–3819.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. NPL Deletion Criteria
III. Deletion Procedures
IV. Basis for Intended Site Deletion

I. Introduction

EPA Region II announces its intent to delete the Site from the NPL and requests public comment on this action. The NPL constitutes Appendix B to the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to Section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended. EPA identifies sites that appear to present a significant risk to public health, welfare, or the environment and maintains the NPL as the list of those sites. Sites on the NPL may be the subject of remedial actions financed by the Hazardous Substances Superfund Response Trust Fund (FUND). Pursuant to § 300.425(e)(3) of the NCP, any site deleted from the NPL remains eligible for Fund-financed remedial actions, if conditions at the Site warrant such action.

EPA will accept comments concerning this Site for thirty (30) days (or until October 30, 1992) after publication of this notice in the **Federal Register.**

Section II of this notice explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action. Section IV discusses how the Site meets the deletion criteria.

II. NPL Deletion Criteria

The NCP establishes the criteria that the Agency uses to delete sites from the NPL. In accordance with 40 CFR 300.425 (e), sites may be deleted from the NPL where no further response is appropriate. In making this determination, EPA will consider whether any of the following criteria has been met:

(i) EPA, in consultation with the State, has determined that responsible or other parties have implemented all appropriate response actions required; or

(ii) All appropriate Fund-financed responses under CERCLA have been implemented and EPA, in consultation with the State, has determined that no further cleanup by responsible parties is appropriate; or

(iii) Based on a remedial investigation, EPA, in consultation with the State, has determined that the release poses no significant threat to public health or to the environment and, therefore, taking remedial measures is not appropriate.

III. Deletion Procedures

The NCP provides that EPA shall not delete a site from the NPL until the State in which the release was located has concurred, and the public has been afforded an opportunity to comment on the proposed deletion. Deletion of a site from the NPL does not affect responsible party liability or impede agency efforts to recover costs associated with response efforts. The NPL is designed primarily for informational purposes and to assist Agency management.

EPA Region II will accept and evaluate public comments before making a final decision to delete. The Agency believes that deletion procedures should focus on notice and comment at the local level. Comments from the local community may be most pertinent to deletion decisions. The following procedures were used for the intended deletion of the Site:

1. EPA Region II has recommended deletion and has prepared the relevant documents. EPA has also made all relevant documents available in the Regional office and local site information repositories.
2. The State of New York has concurred with the deletion decision.
3. Concurrent with this national Notice of Intent to Delete, a notice has been published in local newspapers and has been distributed to appropriate Federal, State and local officials, and other interested parties. This notice announces a thirty (30) day public comment period on the deletion package starting on September 30, 1992 and concluding on October 30, 1992.

The comments received during the comment period will be evaluated before any final decision is made. EPA Region II will prepare a Responsiveness Summary which will address the comments received during the public comment period.

If after consideration of these comments, EPA decides to proceed with deletion, the EPA Regional Administrator will place a Notice of Deletion in the **Federal Register**. The NPL will reflect any deletions in the next final update. Public notices and copies of the Responsiveness Summary will be made available to local residents by Region II.

IV. Basis for Intended Site Deletion

The Suffern Village Well Field Site is located in the Town of Ramapo, approximately 0.25 miles north of the New York-New Jersey border in Rockland County, New York. The Site includes a municipal water supply well field operated by the Village of Suffern, and a facility (Tempcon Corp.), approximately 2500 feet from the Well Field, from which hazardous substances were released or threatened to be released.

The Village operates four production wells that supply water at an average of approximately 1.8 million gallons per day. Recharge to the wells is derived principally from induced infiltration of water from the Ramapo River. Volatile organic contamination of the Well Field was first detected in tap water collected from the municipal distribution system in September 1978. Subsequent monitoring activities by the village, the Rockland County Department of Health (RCDOH) and the New York State Department of Environmental Conservation (NYSDEC), confirmed that ground water had become contaminated with 1,1,1-trichloroethane (TCEA), a volatile organic compound (VOC). Three of the Village's wells, with TCEA levels ranging from 90 to 114 parts per billion (ppb), were shut down in December 1978. Water supply requirements were provided by the remaining well which had TCEA levels significantly below the New York State Department of Health (NYSDOH) guideline of 50 ppb. (This guideline was revised to a standard of 5 ppb in January 1989).

In December 1978, RCDOH tentatively identified Tempcon Corp., a small oil burner reconditioning business, as a user of TCEA and a potential source of the TCEA contamination. In January 1979, Tempcon Corp. ceased disposing of TCEA into a seepage disposal pit located on its property and stopped using TCEA-based cleaning products. In March 1979, at the direction of RCDOH, Tempcon Corp. performed remedial measures including the removal of waste materials from its disposal pit and the excavation and devolatilization of contaminated soils. The Village constructed a spray aeration treatment system later that year to remove TCEA from the municipal water supply.

The system was operated until early 1985, when monitoring results indicated that TCEA levels were within the NYSDOH guideline of 50 ppb;

subsequently, TCEA concentrations remained below the guideline with only occasional excursions.

The Site was proposed for the NPL on October 10, 1984, and placed on the NPL on June 1, 1986. In March 1985, EPA entered into a cooperative agreement with New York State, which provided for the performance of an RI/FS by NYSDEC at the Site. In April 1986, DEC retained ERM-Northeast to perform this work.

The scope of the RI field work included extensive sampling of ground water, surface water, sediment, surface soil and ambient air. Analyses for metals, other inorganic, semivolatiles, and VOCs other than TCEA indicated that these substances were not a threat to human health or the environment. The only pathway of concern was ground water, bearing TCEA and degradation products, migrating southward from the Tempcon Facility and the E-well location (a monitoring well approximately 700 ft. southeast of Tempcon.)

A Feasibility Study was conducted during which a solute transport model (the "Suffern Aquifer Model") was developed to predict contaminant concentration profiles as a function of time.

The EPA community relations activities at the Site included a public meeting on August 19, 1987 to present the results of the RI/FS, and the preferred alternative. Public comments were received and addressed.

The Record of Decision (ROD) dated September 25, 1987 selected a "No Action" alternative based on the conclusion that contaminant levels had been naturally attenuating and the Suffern Aquifer Model predicted continued decreases in contaminant level down to approximately 1 ppb within 10 years and below 5 ppb within 4 years. A two-year monitoring program was planned to confirm the validity of the No Action alternative and to verify the predicted results of the Suffern Aquifer Model, as well as to ensure that the remedy was protective of human health and the environment.

Suffern Village installed a granular activated carbon adsorption unit and a maganese filtration unit to its existing water system, which as been in operation since the spring of 1990. This was necessitated by the revised January 1989 NYSDOH standard for TCEA concentrations in public water supplies of 5 ppb.

The first-year monitoring program was concluded in October 1990, and a report was issued in May 1991. After thorough review of the results, NYSDEC and EPA determined that the magnitude of the ROD monitoring program was not warranted, and decided to modify the program. This determination was based on the fact that the contaminant plume is attenuating, and the GAC system installed by Suffern Village has virtually eliminated the population's exposure to the low concentrations of TCEA present in the groundwater. NYSDEC prepared a Long-Term Monitoring Plan, dated October 9, 1991 with which EPA concurs.

The first-year ground water monitoring program has met the objectives set forth in the ROD. Water analyses indicate that the contaminant plume is attenuating, and support the conclusions of the Suffern Aquifer Model predictions. Further, the low levels of contamination in the production wells are below State drinking-water standards due to the recently installed GAC treatment system.

Having met the deletion criteria, EPA proposes to delete this site from the NPL. EPA and the State have determined that the response actions are protective of human health and the environment.

Dated: September 11, 1992.

Constantine Sidamon-Eristoff,

Regional Administrator.

BILLING CODE 6560-50-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 3160

[WO-610-4111-02-24 1A]

RIN 1004-AB72

Onshore Oil and Gas Operations; Federal and Indian Oil and Gas Leases; Onshore Oil and Gas Order No. 1, Approval of Operations; Reopening of Public Comment Period

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rule; Reopening of public comment period.

SUMMARY: A proposed rule that would revise Onshore Oil and Gas Order No. 1 was published on July 23, 1992 (57 FR 32756). The public comment period expired on September 21, 1992. The Order provides the requirements necessary for the approval of all proposed oil and gas exploratory, development, or service wells on all Federal and Indian (except the Osage Tribe) onshore oil and gas leases. It also covers most approvals necessary for subsequent well operations, including abandonment. These approvals are granted by the Bureau of Land Management (BLM). The comment period is being reopened to provide the public additional time to comment on this important Order, which is fundamental to all oil and gas exploration and development.

DATES: Comments should be submitted by October 28, 1992. Comments received or postmarked after this date may not be considered in the decision process of the final rulemaking.

ADDRESSES: Comments should be sent to: Director (140), Bureau of Land Management, room 5555, Main Interior Building, 1849 C Street, NW., Washington, DC 20240. Comments will be available for public review at this address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday (excepting Federal holidays).

FOR FURTHER INFORMATION CONTACT: Lynn E. Rust, (307) 772-2293, or Erick Kaarlela, (202) 653-2127.

Richard Roldan,

Deputy Assistant Secretary of the Interior.

BILLING CODE 4310-84-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 92-214, RM-8062]

Radio Broadcasting Services; Columbia and Bourbon, MO

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition filed by The Greenfield Group proposing the substitution of Channel 244C1 for Channel 244C3 at Columbia, Missouri, and modification of the construction permit for Station KCMQ(FM) to specify operation on Channel 244C1. The coordinates for Channel 244C1 are 38-37-40 and 92-07-00. To accommodate Channel 244C1 at Columbia, we shall propose to substitute Channel 297A for vacant Channel 244A at Bourbon, Missouri, or in the alternative, delete the channel at Bourbon if no applications are filed for Channel 244A and no interest is expressed in Channel 297A during the comment cycle in this proceeding. The coordinates for Channel 297A at Bourbon are 38-08-30 and 91-16-00. There is a site restriction 2.6

kilometers (1.6 miles) southwest of the community.

DATES: Comments must be filed on or before November 13, 1992, and reply comments on or before November 30, 1992.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner's counsel, as follows: Frank R. Jazzo, Fletcher, Heald & Hildreth, 1225 Connecticut Avenue, NW., Suite 400, Washington, DC 20036-0847.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 92-214, adopted August 24, 1992, and released September 22, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, 1990 M Street NW., suite 640, Washington, DC 20036, (202) 452-1422.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Adjudication; Meeting

AGENCY: Administrative Conference of the United States.

ACTION: Committee on Adjudication; Notice of public meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Committee on Adjudication of the Administrative Conference of the United States.

The Committee will continue its discussion on the project on the federal administrative judiciary. The project was returned to the Committee for further consideration at the Conference's September 9, 1992 Plenary Session.

Copies of the draft report are available from the Conference.

DATES: Thursday, October 29, 1992 at 1 p.m.

LOCATION: Library of the Administrative Conference, 2120 L Street, NW., suite 500, Washington, DC.

PUBLIC PARTICIPATION: The committee meeting is open to the interested public, but limited to the space available. Persons wishing to attend should notify the contact person at least two days prior to the meeting. The committee chairman may permit members of the public to present oral statements at the meetings. Any member of the public may file a written statement with the committee before, during, or after the meetings. 35 copies of the statement should be submitted. Minutes of the meeting will be available on request.

FOR FURTHER INFORMATION CONTACT: Nancy G. Miller, Office of the Chairman, Administrative Conference of the United States, 2120 L Street, NW., suite 500, Washington, DC 20037. Telephone: (202) 254–7020.

Dated: September 21, 1992.

BILLING CODE 6335–01–M

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: 1993 Annual Demographic Survey–Supplement to the Current Population Survey.

Form Number(s): CPS–1, CPS–665, CPS–575, CPS–580, CPS–580(SP), CPS–676, CPS–676(SP), CPS–676(A).

Agency Approval Number: 0607–0354.

Type of Request: Reinstatement of a previously approved collection for which approval has expired.

Burden: 29,100 hours.

Number of Respondents: 72,000.

Avg Hours Per Response: 24.25 minutes.

Needs and Uses: The Bureau of the Census conducts the Annual Demographic Survey (ADS) every year in March as a supplement to the Current Population Survey (CPS). The Bureau of the Census, the Bureau of Labor Statistics, and the Department of Health and Human Services sponsor this supplement. In the ADS, we collect information in the areas of work experience, migration, personal and household income and noncash benefits, and race. The Bureau of Labor Statistics and the Department of Health and Human Services use data gathered in the ADS to determine the official Government poverty statistics. We are also requesting clearance for these supplemental questions to be asked of the sample of CPS respondents participating in the CATI/CAPI Overlap (CCO) Test, sponsored by the Bureau of Labor Statistics, during the March 1993 CCO Test collection. We have included the additional reporting hours associated with the supplemental questions for the CCO Test in this clearance.

Affected Public: Individuals or households.

Frequency: Annually.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Edward Michals, DOC Forms Clearance Officer, (202) 377–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, room 3208, New Executive Office Building, Washington, DC 20503.

Dated: September 22, 1992.

Edward Michals,

Departmental Forms Clearance Officer, Office of Management and Organization.

Acrylic Sheet From Japan; Determination Not To Revoke Antidumping Finding

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of determination not to revoke antidumping finding.

SUMMARY: The Department of Commerce is notifying the public of its determination not to revoke the antidumping finding on acrylic sheet from Japan.

EFFECTIVE DATE: September 28, 1992.

FOR FURTHER INFORMATION CONTACT: Sheila E. Forbes or Thomas F. Futtner, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-8120/3814.

SUPPLEMENTARY INFORMATION:

Background

On August 3, 1992, the Department of Commerce (the Department) published in the **Federal Register** (57 FR 34115) its intent to revoke the antidumping finding on acrylic sheet from Japan (41 FR 36497, August 30, 1976). The Department may revoke an order if the Secretary concludes that the order is no longer of interest to interested parties. We did not receive a request for administrative review of the finding for the last five consecutive annual anniversary months, and therefore published a notice of intent to revoke the finding pursuant to 19 CFR 353.25(d)(4).

On August 19 and 20, 1992, Cyro Industries and E.I. DuPont de Nemours & Co., Inc., respectively, both domestic manufacturers of acrylic sheet, objected to our intent to revoke the finding. Therefore, we no longer intend to revoke the finding.

Dated: September 17, 1992.

Roland L. MacDonald,

Acting Deputy Assistant Secretary for Compliance

Initiation of Antidumping and Countervailing Duty Administrative Reviews

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of Initiation of Antidumping and Countervailing Duty Administrative Reviews.

SUMMARY: The Department of Commerce has received requests to conduct administrative reviews of various antidumping and countervailing duty orders, findings and suspension agreements with August anniversary dates. In accordance with the Commerce Regulations, we are initiating those administrative reviews.

EFFECTIVE DATE: September 28, 1992.

FOR FURTHER INFORMATION CONTACT: Roland L MacDonald, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 377-2104.

SUPPLEMENTARY INFORMATION:

Background

The Department of Commerce ("the Department") has received timely requests, in accordance with § 353.22(a)(1) of the Department's regulations, for administrative reviews of various antidumping and contervailing duty orders, findings, and suspension agreements, with August anniversary dates.

Initiation of Reviews

In accordance with § 353.22(c) and 355.22(c) of the Department's regulations, we are initiating administrative reviews of the following antidumping and countervailing duty orders, findings and suspension agreements. We intend to issue the final results of these reviews not later than August 31, 1993.

Antidumping duty proceedings and firms	Periods to be reviewed
Israel:	
Industrial Phosphoric Acid—A-508-604	
Rotem Fertilizers Ltd.	8/1/91-7/31/92
Haifa Chemicals Ltd.	
Italy:	
Granular Polytetrafluoroethylene (PTFE) Resin—A-475-703	
Ausimont Spa	8/1/91-7/31/92
Japan:	
Granular Ploytetrafluoroethylene (PTFE) Resin—A-588-707	
Diakin Industries, Ltd.	8/1/91-7/31/92
Mexico:	
Gray Portland Cement and Clinker—A-201-802	
Cemex, S.A.	8/1/91-7/31/92
Turkey:	
Acetylsalicylic Acid (Aspirin)—A-489-602	
Atabay Pharmaceutical Fine Chemicals Inc.	8/1/91-7/31/92
Countervailing Duty Proceedings	
Canada:	
Live Swine—C-122-404	4/1/91-3/31/92
Israel:	
Industrial Phosphoric Acid—C-508-605	1/1/91-12/31/91
Thailand:	
Certain Circular Welded Steel Pipes and Tubes— C-549-501	1/1/91-12/31/91

Interested parties must submit applications for administrative protective orders in accordance with §§ 353.34(b) and 355.34(b) of the Department's regulations.

These initiations and this notice are in accordance with section 751(a) of the Tariff Act of 1930 (19 U.S.C. 1675(a)) and 19 CFR 353.22(c) and 355.22(c) (1989).

Dated: September 18, 1992.

Roland L. MacDonald,

Acting Deputy Assistant Secretary for Compliance.

Preliminary Determination of Sales at Less Than Fair Value: Certain Hot-Rolled Lead and Bismuth Carbon Steel Products From Germany

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: September 28, 1992.

FOR FURTHER INFORMATION CONTACT: Cynthia Thirumalai, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-8498.

PRELIMINARY DETERMINATION: We preliminarily determine that certain hot-

rolled lead and bismuth carbon steel products from Germany are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (the Act). The estimated dumping margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the initiation of this investigation on May 4, 1992 (57 FR 19881, May 8, 1992), the following events have occurred.

On May 18, 1992, the U.S. International Trade Commission (ITC) issued an affirmative preliminary injury determination.

On June 16, 1992, the Department of Commerce (the Department) presented its questionnaire to Saarstahl AG (SAG), the sole respondent in this investigation. At the request of SAG, the Department extended the deadline for submission of responses until July 1, 1992, for Section A; July 20, 1992, for Sections B and C; July 24, 1992, for the computer tapes; and July 28, 1992, for Section D. With the exception of Section A, which was filed on July 2, 1992, SAG's responses were received on the above dates. SAG resubmitted its public version of Section A on July 12, 1992. Petitioners' comments on SAG's response to Section A were received on July 17, 1992, and those on sections B, C, and D on August 7, 1992. We issued a deficiency letter on August 12, 1992, for Sections A, B and C, and on August 13, 1992, for Section D. We received SAG's deficiency responses on August 26, 1992, for Sections A, B and C, and on August 27, 1992, for Section D. Petitioner's remarks on the deficiency responses were received September 9, 1992.

Scope of Investigation

The products covered by this investigation are hot-rolled bars and rods of nonalloy or other alloy steel, whether or not descaled, containing by weight 0.03 percent or more of lead or 0.05 percent or more of bismuth, in coils or cut lengths, and in numerous shapes and sizes. Excluded from the scope of this investigation are other alloy steels (as defined by the Harmonized Tariff Schedule of the United States (HTS) Chapter 72, note 1 (f)), except steels classified as other alloy steels by reason of containing by weight 0.4 percent or more of lead, or 0.1 percent or more of bismuth, tellurium, or selenium. Also excluded are semi-finished steels and flat-rolled products. Most of the products covered in this investigation are provided for under subheadings 7213.20.00.00 and 7214.30.00.00 of the HTS. Small quantities of the products may also enter the United States under the following HTS subheadings: 7213.31.30.00, 60.00; 7213.39.00.30, 00.60, 00.90; 7214.40.00.10, 00.30, 00.50; 7214.50.00.10, 00.30, 00.50; 7214.60.00.10, 00.30, 00.50; and 7228.30.80.00. Although the HTS subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

Period of Investigation

The period of investigation (POI) is November 1, 1991, through April 30, 1992.

Such or Similar Comparisons

We have determined that all the products covered by this investigation constitute a single category of such or similar merchandise. There were no sales of identical merchandise in the home market to compare to U.S. sales; therefore, we made similar comparisons on the basis of: (1) Chemical composition; (2) shape; (3) cut (coil or cut length); (4) size; and (5) grade. We made adjustments for differences in the physical characteristics of the merchandise, in accordance with section 773(a)(4)(C) of the Act.

Fair Value Comparisons

To determine whether sales of the subject merchandise from Germany to the Untied States were made at less than fair value, we compared the United States price (USP) to the foreign market value (FMV), as specified in the "United States Price" and "Foreign Market Value" sections of this notice.

United States Price

We based USP on purchase price, in accordance with section 772(b) of the Act, because the subject merchandise was sold to unrelated purchasers in the United States prior to importation and because exporter's sale price (ESP) methodology was not otherwise indicated. We calculated purchase price based on either packed, delivered or packed, landed CIF prices to customers in the United States. We made deductions, where appropriate, for foreign inland freight expenses incurred in both Germany and Belgium, ocean freight, marine insurance, U.S. duty, U.S. brokerage, U.S. inland freight, and U.S. trucking expenses.

In accordance with section 772(d)(1)(C) of the Act, we included in USP the amount of the German value-added tax (VAT) that would have been collected on the export sale had it been subject to the tax. Because SAG did not identify the tax base on which the VAT is calculated, we computed the hypothetical amount of the VAT based on the lowest possible tax base (*i.e.*, the ex-factory U.S. price) as the best information available (BIA) in accordance with 19 CFR 353.37.

Since SAG reported that its parent company, Usinor Sacilor, has access to U.S. dollar-denominated financing at the reported U.S. interest rate, we used SAG's reported U.S. interest rate in the calculation of U.S. credit expenses. See, Final Determination of Sales at Less Than Fair Value: Circular Welded Non-Alloy Steel Pipe from Mexico, 57 FR 42953 (September 17, 1992).

SAG reported that it paid commissions on its U.S. sales to related selling agents. We found the existence of a profit/loss transfer agreement between SAG and its related selling agents to be sufficient evidence that the commissions were not paid at arm's length; therefore, we did not adjust for related-party commissions incurred on U.S. sales.

SAG did not sufficiently describe and report its warranty/technical service expenses incurred in either the home or U.S. markets. Without sufficient information regarding the nature of these expenses, we assumed that they were directly related to U.S. sales, but not to home market sales. We used the per-unit amount of total selling expenses reported in the cost of production (COP) response for each product as BIA for the warranty/technical service expenses on U.S. sales. For those products sold in the U.S. for which there was no COP information, we used the highest per-unit amount of total expenses reported for all products in the COP response.

Foreign Market Value

In order to determine whether there were sufficient sales of similar merchandise in the home market to serve as a viable basis for calculating FMV, we compared the volume of home market sales to the volume of third country sales in accordance with section 773(a)(1)(B) of the Act. We found that SAG's home market was viable.

In accordance with 19 CFR 353.58, we compared U.S. sales to home market sales at the same level of trade.

Cost of Production

Based on petitioners' allegation, and in accordance with section 773(b) of the Act, we investigated whether SAG had home market sales that were made at less than its COP.

If over 90 percent of a respondent's sales of a given model were at prices above the COP, we do not disregard any below-cost sales because we determine that the below-cost sales were not made

in substantial quantities over an extended period of time. If between 10 and 90 percent of a respondent's sales of a given model are at prices above the COP, we disregard only the below-cost sales if made over an extended period of time. Where we find that more than 90 percent of a respondent's sales of a given model were at prices below the COP over an extended period of time, we disregard all sales of that model and calculate FMV based on constructed value (CV). In such cases, we determine that the respondent's below-cost sales were made in substantial quantities over an extended period of time.

In order to determine whether home market prices were above the COP, we calculated the COP based on the sum of the cost of materials, fabrication, general expenses, and home market packing. We recalculated SAG's reported COP with regard to material costs, general and administrative expenses (G&A), and interest expenses. We increased material costs because SAG's related supplier of pig iron had understated its actual production costs by not including an accrual for future blast furnace relining as recorded in the 1991 consolidated financial statement of Usinor Sacilor, the consolidated parent company. We recalculated SAG's G&A by including a portion of Usinor Sacilor's corporate G&A for such expenses as research and development, restructuring costs, and employee profit sharing. Since SAG did not report the interest expense of Usinor Sacilor, we recomputed interest expense based on the consolidated company's reported interest expenses.

We compared home market selling prices—plus surcharges, and inland freight reimbursed to SAG by the customer, less discounts, rebates, and movement charges—to each product's COP. We found that over 90 percent of home market sales were above cost for some products; all sales of these products were used for comparison to U.S. products. For other products, between 10 and 90 percent of SAG's home market sales were below cost; therefore, we disregarded those below-cost sales and used the remaining sales of that product for comparison purposes. For some products, more than 90 percent of the sales were below cost. We disregarded all sales of those products and based FMV on CV, as described in the "Constructed Value" section of this notice.

Price-to-Price Comparisons

For those products for which we have an adequate number of sales at prices above the COP, we based FMV on home market prices. We calculated foreign market value based on ex-factory, ex-basis point, or delivered prices, inclusive of packing, to unrelated customers.

SAG requested that the Department include its sales to related parties in the home market in the FMV calculation. In our deficiency letter of August 12, 1992, we requested SAG to demonstrate that its sales to related parties were at prices comparable to those to unrelated parties. Since SAG made no such showing, we have no basis on which to conclude that its sales to related parties in the home market were at arm's length. Accordingly, for purposes of the preliminary determination, we have disregarded SAG's home market sales to related parties in our calculation of FMV.

We added quantity and other surcharges, and amounts for inland freight charges reimbursed to SAG by its customers and deducted rebates, discounts, and foreign inland freight and rail expenses paid by SAG.

Pursuant to section 773(a)(4)(B) of the Act and 19 CFR 353.56(a)(2), we made circumstance of sale adjustments, where appropriate, for differences in credit, warranty/technical services, post-sale warehousing, and unrelated-party commission expenses. Because SAG did not report U.S. indirect selling expenses to offset unrelated party commissions, we used the amount of the unrelated party commissions, themselves, to offset the commissions as BIA. As discussed in the "United States Price" section of this notice, we assumed that SAG did not directly incur warranty/technical services expenses in the home market. We also deducted an amount for home market packing expenses and added an amount for export packing to the United States in accordance with 19 CFR 353.46(a)(1). Because home market prices were reported net of VAT, we added the hypothetical tax calculated for the U.S. sale to both USP and FMV as discussed in the "United States Price" section of this notice.

SAG paid commissions to both a related selling agent and an unrelated trading house on sales in the home market. We determined that the profit/loss transfer agreement between SAG and its related selling agent, according to which the sales agent made a year-end adjustment to its books to transfer its profits/losses to SAG, and the absence of any evidence of arm's length dealing was sufficient evidence to find that related-party commissions were not paid on an arm's length basis. Accordingly, we did not adjust for them.

Because SAG reported that it had DM-denominated financing in the home market, we used its reported home market interest rate to compute credit expenses. We recalculated SAG's reported home market credit expenses according to Department methodology. We based the calculation on a 365-day year since SAG has used a 365-day year to compute U.S. credit expenses and has not stated that it utilized a 360-day year in the normal course of business.

Constructed Value

For those products without an adequate number of sales at prices above the COP, we based FMV on CV. SAG supplied the Department with CV information for only two of the products sold in the United States. As BIA for the remaining U.S. products for which we were required to use FMV on CV, we used the highest margin calculated in the CV comparisons to USP for the two products with reported CV information, or the highest CV margin in the petition, whichever was found to be greater, as the applicable dumping margin for these sales.

We calculated CV for the two products for which SAG supplied CV information based on the sum of the cost of materials, fabrication, general expenses, and U.S. packing. We recalculated SAG's reported CV as described above in the "Cost of Production" section of this notice. In accordance with section 773(e)(1)(B)(i) of the Act, we included in CV the greater of the company's reported general expenses or the statutory minimum of ten percent of the cost of manufacture. For profit, we used the statutory minimum of eight percent since SAG did not report profit. (See, section 773(e)(1)(B)(ii) of the Act.)

For CV comparisons to USP, we made circumstance of sale adjustments for unrelated-party commissions, credit, post-sale warehousing, and warranty/technical service expenses (see, section on "Price-to-Price Comparisons" for discussion of commissions; *see*, section on "United States Price" for the calculation of warranty/technical service expenses).

Currency Conversion

We made currency conversions based on the official exchange rates in effect on the dates of the U.S. sales as certified by the Federal Reserve Bank.

Verification

As provided in section 776(b) of the Act, we will verify the information used in making our final determination.

Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the Customs Service to suspend liquidation of all entries of lead and bismuth carbon steel products subject to this investigation from Germany that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a bond equal to the estimated preliminary dumping margins, as shown below. This suspension of liquidation will remain in effect until further notice.

Producer/manufacturer/exporter	Weighted-average margin percentage
Saarstahl AG	49.30
All Others	49.30

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Public Comment

In accordance with 19 CFR 353.38, case briefs or other written comments in at least ten copies must be submitted to the Assistant Secretary for Import Administration no later than November 3, 1992. Rebuttal briefs must be submitted no later than November 10, 1992. In accordance with 19 CFR 353.38(b), we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the hearing will be held on November 12, 1992, at 1 p.m. at the U.S. Department of Commerce, room 1617 M4, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

Interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, room B–099, within ten days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. In accordance with 19 CFR 353.38(b), oral presentations will be limited to issues raised in the briefs.

This determination is published pursuant to section 733(f) of the Act and 19 CFR 353.15(a)(4).

Dated: September 21, 1992.

Rolf Th. Lundberg, Jr.,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–M

[A–412–810]

Preliminary Determination of Sales at Less Than Fair Value: Certain Hot-Rolled Lead and Bismuth Carbon Steel Products From the United Kingdom

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: September 28, 1992.

FOR FURTHER INFORMATION CONTACT: Michael Ready, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–2613.

PRELIMINARY DETERMINATION: We preliminarily determine that certain hot-rolled lead and bismuth carbon steel products from the United Kingdom are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the initiation of this investigation on May 4, 1992, (57 FR 19881, May 8, 1992), the following events have occurred.

On May 18, 1992, the U.S. International Trade Commission (ITC) issued an affirmative preliminary injury determination.

On June 16, 1992, the Department presented a questionnaire to United Engineering Steels Limited (UES), the company accounting for the overwhelming majority of exports of the subject merchandise from the United Kingdom during the period of investigation (POI). Responses to the questionnaire were originally due on June 30 and July 14, 1992. At the request of UES, the Department granted extensions of time until July 7, 1992, for Section A and July 28, 1992, for the Section B, C, and D. UES submitted its questionnaire responses on the specified dates. We issued supplemental questionnaires on August 12 and 14, 1992, and received responses to the supplemental questionnaires on August 31, 1992.

In a submission dated September 11, 1992, petitioner raised a number of serious questions concerning, among other things, UES's model matching, difference in merchandise adjustments, and cost of production calculations. Given the late date of petitioner's submission and the complexity of the matters raised, we have not addressed petitioner's concerns in this preliminary determination. We will, however, carefully examine these and other issues at verification, and will address these concerns in our final determination.

Scope of Investigation

The products covered by this investigation are hot-rolled bars and rods of nonalloy or other alloy steel, whether or not descaled, containing by weight 0.03 percent or more of lead or 0.05 percent or more of bismuth, in coils or cut lengths, and in numerous shapes and sizes. Excluded from the scope of this investigation are other alloy steels (as defined by the *Harmonized Tariff Schedule of the United States* (HTS) Chapter 72, note 1 (f)), except steels classified as other alloy steels by reason of containing by weight 0.4 percent or more of lead, or 0.1 percent or more of bismuth, tellurium, or selenium. Also excluded are semi-finished steels and flat-rolled products.

Most of the products covered in this investigation are provided for under subheadings 7213.20.00.00 and 7214.30.00.00 of the HTS. Small quantities of the following products may also enter the United States under the following HTS subheadings: 7213.31.30.00, 60.00; 7213.39.00.30, 00.60, 00.90; 7214.40.00.10, 00.30, 00.50; 7214.50.00.10, 00.30, 00.50; 7214.60.00.10, 00.30, 00.50; and 7228.30.80.00. Although the HTS subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

Period of Investigation

The POI is November 1, 1991, through April 30, 1992.

Such or Similar Comparisons

We have determined that all the products covered by this investigation constitute a single category of such or similar merchandise. Where there were no sales of identical merchandise in the home market to compare to U.S. sales.

we made comparisons on the basis of the following criteria listed in order of importance: (1) Chemical composition; (2) shape; (3) cut (coil or cut length); (4) size; and (5) grade. We made adjustments for differences in the physical characteristics of the merchandise, in accordance with section 773(a)(4)(C) of the Act.

Fair Value Comparisons

To determine whether sales of certain hot-rolled lead and bismuth carbon steel products from the United Kingdom to the United States were made at less than fair value, we compared the United States price (USP) to the foreign market value (FMV), as specified in the "United States Price" and "Foreign Market Value" sections of this notice.

UES requested that we make comparisons between U.S. sales with a total order quantity of 25 metric tons or more with home market sales of 25 metric tons or more, and between U.S. sales with a total order quantity of less than 25 metric tons with home market sales of less than 25 metric tons. However, given that (1) UES presented no analysis showing that there was any correlation between order quantity and price, and (2) petitioner raised credible objections to this claim, we have denied UES's request.

Related Party Issue

UES disclosed in a footnote to its response to Section A of the questionnaire that it "understands that a company called Allied Steel and Wire (ASW), which is a 20 percent subsidiary of British Steel, plc, may have made sales of the subject merchandise in the POI." British Steel and GKN, plc, each own 50 percent of the common stock in UES. ASW was not served a questionnaire at the outset of the investigation because (1) we were able to capture more than 60 percent of the exports of the subject merchandise, (see 19 CFR 353.42(b)) by serving UES only, and (2) we were unaware of the possible relationship between UES and ASW.

On August 12, 1992, the Department requested that UES supplement its responses to the questionnaire to include the sales of all related entities, including sales made by other units or subsidiaries of British Steel, plc, or GKN, plc, such as sales by ASW.

On August 17, 1992, UES requested that the Department amend its August 12, 1992, letter to exclude ASW sales because UES has no relationship with or control over ASW and cannot obtain ASW sales information. On August 19, 1992, petitioner submitted a letter arguing that evidence of coordination of the production, supply and sale of hot-rolled leaded steel products between British Steel, UES, and ASW exists and requested that the UES request be denied.

The Department has preliminarily determined, based on the information currently available, to accept UES's contention that a sufficient relationship between UES and ASW does not exist to warrant the reporting of ASW sales information by the respondent. However, we will examine this issue further at verification and consider it again at the final determination.

United States Price

We based USP on purchase price, in accordance with section 772(b) of the Act, because the subject merchandise was sold to unrelated purchasers in the United States prior to importation and because exporter's sale price (ESP) methodology was not indicated by other circumstances.

We calculated purchase price based on packed, delivered prices to customers in the United States. We made deductions, where appropriate, for invoice corrections, cash discounts, rebates, foreign inland freight, FOB charges in the United Kingdom, ocean freight, marine insurance, U.S. customs duty and merchandise processing fee, harbor maintenance fee, and handling, brokerage, and inland freight charges in the United States. While UES's shipments to the United States are transported by a related carrier, British Steel Shipping Service, UES failed to establish that the related carrier charges UES arm's length rates or to provide actual cost of such services, as requested in the Department's August 12, 1992, deficiency letter. Therefore, as best information available (BIA), we have deducted for ocean freight an amount equal to the ocean freight rate alleged in the petition, except in those instances where UES's reported rate exceeded the petition rate. In accordance with section 772(d)(1)(C) of the Act, U.S. price was increased to include the amount of the British value-added tax (VAT) that would have been collected on the export sale had it been subject to the tax. We computed the hypothetical amount of the tax by applying the home market tax rate to the delivered price to the United States customer, because in the home market, the tax is applied to the delivered price.

Foreign Market Value

In order to determine whether there were sufficient sales of the subject merchandise in the home market to serve as a viable basis for calculating FMV, we compared the volume of home market sales to the volume of third country sales in accordance with section 773(a)(1)(B) of the Act. We found that the home market was viable for sales by UES.

In accordance with 19 CFR 353.58, we compared U.S. sales to home market sales made at the same level of trade, where possible.

Cost of Production

Based on petitioner's allegation, and in accordance with section 773(b) of the Act, we investigated whether UES had home market sales that were made at less than their cost of production (COP).

If over 90 percent of a respondent's sales of a given model are at prices above the COP, we do not disregard any below-cost sales because we determine that the below-cost sales were not made in substantial quantities over an extended period of time. If between ten and 90 percent of a respondent's sales of a given model are at prices above the COP, we disregard only the below-cost sales, if we find that these have been made over an extended period of time. Where we find that more than 90 percent of a respondent's sales are at prices below the COP over an extended period of time, we disregard all sales for that model and calculate FMV based on constructed value (CV). In such cases, we determine that the respondent's below-cost sales were made in substantial quantities over an extended period of time and at prices that would not permit recovery of all costs within a reasonable period of time in the normal course of trade.

In order to determine whether home market prices were above the COP, we calculated the COP as described below. Given that UES did not provide sufficient reasons supporting a departure from its normal cost accounting system in providing COP data in its response, we adjusted the submitted COM data to reflect UES's costs as recorded in its normal accounting system as of December 31, 1991. We then added general expenses and foreign market packing cost.

We compared home market selling prices, net of movement charges, rebates, and invoice corrections, to each product's COP. We found that for some products, more than 90 percent of the sales were at prices above the COP. For other products, there were fewer than 10 percent of sales at prices above the COP. For the remainder of the products, between 10 and 90 percent of the sales were at prices above the COP.

Price-To-Price Comparisons

For those products for which we have an adequate number of sales at prices

above the COP, we based FMV on home market prices. We calculated foreign market value based on packed, delivered prices to unrelated purchasers. UES requested that we include sales to related parties in calculating foreign market value. However, UES presented no analysis showing that sales to related parties were at arm's length prices. Therefore, we calculated foreign market value based on sales to unrelated parties only. We made deductions, where appropriate, for rebates, inland freight, and for invoice corrections. Pursuant to section 773(a)(4)(B) of the Act, and 19 CFR 353.56(a)(2), we made circumstance of sale adjustments, where appropriate, for differences in credit expenses, warranty expenses, warehousing expenses, and commissions. Credit expenses for both markets were calculated using the interest rates used by UES in each of the two respective markets. *See*, Final Determination of Sales at Less Than Fair Value: Circular Welded Non-Alloy Steel Pipe from Mexico, 57 FR 42953 (September 17, 1992).

We recalculated credit expense for the U.S. market to account for the number of days between the time the goods left the factory and the time of shipment from the port, and to correct a minor error made by UES in calculating its weighted average U.S. interest rate. UES reported the date that the goods left the port as shipment date instead of the date that the goods left the factory, and that goods were shipped from the port on a monthly basis. As BIA, we assumed that there was a 30 day lag between date of shipment from the factory and shipment from the port. Because the home market prices were reported net of VAT, we adjusted for the VAT by adding the hypothetical tax on the U.S. sale to the foreign market value.

Constructed Value

For those products without an adequate number of sales at prices above the COP, we based FMV on CV. We calculated the CV based on the sum of the cost of materials, fabrication, general expenses, and U.S. packing cost. We adjusted UES's CV data in the same manner as we adjusted its COP data as discussed above. In accordance with section 773(e)(1)(B)(i) of the Act, we included in CV the greater of the company's reported general expenses or the statutory minimum of ten percent of cost of manufacture (COM). For profit, we used the actual profit earned by UES because the actual figure was higher than the statutory minimum of eight percent of the sum of COM and general expenses, in accordance with section 773(e)(1)(B)(ii) of the Act. We made circumstance of sale adjustments, where appropriate, for differences in direct selling expenses including credit expenses, warranty expenses, and pre-sale warehousing expenses.

Currency Conversion

We made currency conversions based on the official exchange rates in effect on the dates of the U.S. sales as certified by the Federal Reserve Bank.

Verification

As provided in section 776(b) of the Act, we will verify the information used in making our final determination.

Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the Customs Service to suspend liquidation of all entries of certain hot-rolled lead and bismuth carbon steel products from the United Kingdom that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a bond equal to the estimated preliminary dumping margins, as shown below. This suspension of liquidation will remain in effect until further notice.

Producer/manufacture/exporter	Weighted-average margin percentage
United Engineering Steels, Limited	32.02
All Others	32.02

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after out final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Public Comment

In accordance with 19 CFR 353.38, case briefs or other written comments in at least ten copies must be submitted to the Assistant Secretary for Import Administration no later than November 3, 1992. Rebuttal briefs must be submitted no later than November 10, 1992. In accordance with 19 CFR 353.38(b), we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the hearing will be held on November 12, 1992, at 10 a.m. at the U.S. Department of Commerce, room 1617 M4, 14th Street and Constitution Avenue NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

Interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, room B-099, within ten days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. In accordance with 19 CFR 353.38(b), oral presentations will be limited to issues raised in the briefs.

This determination is published pursuant to section 733(f) of the Act and 19 CFR 353.15(a)(4).

Dated: September 21, 1992.

Rolf Th. Lundberg, Jr.,

Acting Assistant Secretary for Import Administration.

[FR Doc. 92-23495 Filed 9-25-92; 8:45 am]

BILLING CODE 3510-DS-M

[A-427-804]

Preliminary Determination of Sales at Less Than Fair Value: Certain Hot-Rolled Lead and Bismuth Carbon Steel Products From France

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: September 28, 1992.

FOR FURTHER INFORMATION CONTACT: Edward Easton or Stephen Alley, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-1777, or (202) 377-5288, respectively.

PRELIMINARY DETERMINATION: We preliminarily determine that imports of certain hot-rolled lead and bismuth carbon steel products from France are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (the Act). Because Usinor Sacilor (Usinor), the sole respondent in this case, failed to provide adequate information in a timely manner, we have based our preliminary determination on the best information otherwise available (BIA). In this instance, because Usinor has been cooperative, we have determined BIA to

be an average of the margins that resulted from the fair value comparisons using constructed values for each of the transactions provided in the petition, as it was amended on April 27, 1992. The BIA margin is shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the initiation of this investigation on May 4, 1992, (57 FR 19881, May 8, 1992), the following events have occurred.

On May 28, 1992, the U.S. International Trade Commission (ITC) issued an affirmative preliminary injury determination.

On June 16, 1992, the Department presented a questionnaire requesting sales and cost information to Usinor Sacilor (Usinor), the manufacturer accounting for at least 60 percent of the exports of the subject merchandise to the United States.

Usinor submitted questionnaire responses in July 1992. On August 12 and 14, 1992, we issued letters citing significant deficiencies in Usinor's sales and cost responses, respectively. On August 26 and 28, 1992, we received responses to our deficiency letters from Usinor. These responses also contained serious deficiencies and errors. Specifically, Usinor failed to provide, among other information, appropriate cost of production information and information concerning differences in the merchandise sold to the United States. Without reliable information concerning the differences in the merchandise, we are unable to insure that we are making appropriate product comparisons. (See, also, September 18, 1992, Memorandum from Richard W. Moreland, Director, Office of Antidumping Investigations, and Marie E. Parker, Director, Office of Accounting, to Francis J. Sailer, Deputy Assistant Secretary for Investigations.)

On September 9, 1992, we informed counsel for Usinor that major problems with Usinor's deficiency responses had to be addressed or we would not be able to use its information in this investigation. We gave Usinor until September 21, 1992, to file an additional supplemental response, with new computer tapes, to correct the numerous deficiencies and errors in its earlier responses. If the deficiencies and errors are corrected, we will consider this supplemental response for our final determination.

Scope of Investigation

The products subject to this investigation are hot-rolled bars and rods of nonalloy or other alloy steel, whether or not descaled, containing by weight 0.03 percent or more of lead or 0.05 percent or more of bismuth, in coils or cut lengths, and in numerous shapes and sizes. Excluded from the scope of this investigation are other alloy steels (as defined by the *Harmonized Tariff Schedule of the United States* (HTSUS) Chapter 72, note 1 (f)), except steels classified as other alloy steels by reason of containing by weight 0.4 percent or more of lead, or 0.1 percent or more of bismuth, tellurium, or selenium. Also excluded are semi-finished steels and flat-rolled products. Most of the products covered in this investigation are provided for under subheadings 7213.20.00.00 and 7214.30.00.00 of the HTSUS. Small quantities of these products may also enter the United States under the following HTSUS subheadings: 7213.31.30.00, 60.00; 7213.39.00.30, 00.60, 00.90; 7214.40.00.10, 00.30, 00.50; 7214.50.00.10, 00.30, 00.50; 7214.60.00.10, 00.30, 00.50; and 7228.30.80.00. Although the HTSUS subheadings are provided for convenience and customs purposes, our description of the scope of this proceeding is dispositive.

Period of Investigation

The period of investigation (POI) is November 1, 1991, through April 30, 1992.

Such or Similar Comparisons

We have determined that all the products covered by this investigation constitute a single category of such or similar merchandise.

Fair Value Comparisons

To determine whether sales of the subject merchandise from France to the United States were made at less than fair value, we compared the United States price (USP) to the foreign market value (FMV), as specified in the "United States Price" and "Foreign Market Value" sections of this notice. As mentioned above, we used BIA as required by section 776(c) of the Act because Usinor did not provide adequate information in a timely manner for purposes of the preliminary determination. We determined that BIA was information submitted in the petition, as it was amended.

United States Price

We based USP on information provided in the petition. Petitioners provided U.S. prices based on quoted transaction prices for coil and cut-to-length products sold to U.S. customers on an F.O.B. port of entry basis and, for some customers, on a delivered basis. Petitioners adjusted the F.O.B. prices by deducting estimated costs for inland freight, foreign port and loading fees, ocean freight and insurance, customs duties, and U.S. terminal and unloading fees. In the case of the transaction prices quoted on a delivered basis, petitioners also deducted estimated costs for U.S. inland freight.

Foreign Market Value

We based FMV on constructed value information provided in the petition and the April 27, 1992, amendment to the petition. Petitioners alleged that the home-market prices as well as the third-country sales or offers of sales are at prices below the cost of production and, therefore, should be discarded in favor of constructed value. Accordingly, petitioners calculated an FMV on the basis of constructed value for each transaction listed in the amended petition.

Verification

As provided in section 776(b) of the Act, we will verify the information that we determine is acceptable for use in making our final determination.

Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the Customs Service to suspend liquidation of all entries of the subject merchandise from France that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a bond equal to the estimated preliminary dumping margins, as shown below. The suspension of liquidation will remain in effect until further notice.

Producer/manufacturer/exporter	Percentage [1]
Usinor Sacilor	64.55
All others	64.55

[1] Weighted-average margin percentage.

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Public Comment

In accordance with 19 CFR 353.38, case briefs or other written comments in

at least ten copies must be submitted to the Assistant Secretary for Import Administration no later than November 6, 1992, and for rebuttal briefs no later than November 13, 1992. In accordance with 19 CFR 353.38(b), we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the hearing will be held on November 17, 1992, at 9:30 a.m. at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

Interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, room B-099, within ten days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. In accordance with 19 CFR 353.38(b), oral presentations will be limited to issues raised in the briefs.

This determination is published pursuant to section 733(f) of the Act and 19 CFR 353.15(a)(4).

Dated: September 21, 1992.

Rolf Th. Lundberg,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

COMMODITY FUTURES TRADING COMMISSION

Proposed Amendments Relating to Certain CME Stock Index Futures Contracts

AGENCY: Commdity Futures Trading Commission.

ACTION: Notice of proposed contract market rule changes.

SUMMARY: The Chicago Mercantile Exchange (CME) has submitted proposed rule amendments for its S&P 500 Stock Price Index and S&P Midcap 400 Stock Price Index futures contracts and its proposed Russell 2000 Stock Price Index futures contract relating to modifications to the existing circuit breakers, which include price limit and trading halt provisions. One proposal would increase, for each affected stock index contract, the overall daily price limit and would establish new, larger price limits on the day after the relevant CME futures market is limit bid or offered. This proposal also would establish a new intermediate price decline limit for these contracts. Another proposal would provide that price limits for these stock index contracts would be based on the "implied settlement price" of the previous day, which is based on the closing value for the underlying index, if such implied settlement price is above or below the settlement price on the relevant CME stock index futures contract by a specified amount. In accordance with section 5a(12) of the Commodity Exchange Act and acting pursuant to the authority delegated by Commission Regulation 140.96, the Director of the Division of Economic Analysis (Division) on behalf of the Commission has determined that publication of the proposals is in the public interest and will assist the Commission in considering the views of interested persons. On behalf of the Commission, the Division is requesting comment on these proposals.

DATE: Comment must be received on or before October 28, 1992.

ADDRESS: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Reference should be made to the amendments to circuit breaker provisions of the CME U.S. stock index futures and option contracts.

FOR FURTHER INFORMATION CONTACT: Contact Stephen Sherrod, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, telephone 202-254-7303.

SUPPLEMENTARY INFORMATION: The Interim Report of the Working Group of Financial Markets dated May 1988 recommended that coordinated trading halts and reopenings be adopted by all domestic markets for U.S. equity and equity-related products as a means of dealing with large, rapid market declines that threaten to create panic conditions.[1] In broad outline, the Working Group recommended: (1) That stock index futures markets set downward price limits [2] at levels comparable to a 250-point Dow Jones Industrial Average (DJIA) decline below its previous day's closing value, (2) that broad-based stock index option markets establish either comparable price limits or procedures under which all trading in the index options will cease at levels comparable to a 250-point DJIA decline, and (3) that all U.S. markets for equity-related products halt trading for a one-hour period if the DJIA declines 250 points from its previous day's closing level. Under the Working Group's recommendations, after reopening from such a trading halt, similar price limit, halt, and reopening procedures would be used for DJIA declines of 400 points below its previous day's closing level, except that the halt would last two hours instead of one.

As noted, Working Group recommendations were for triggers based on 250 and 400 point DJIA declines. The Working Group stated that "the 250 and 400 point triggers and the comparable triggers for the stock index futures and options markets will be reviewed at least quarterly to determine if changes in index levels necessitate changes to these triggers in order to maintain percentages approximately equivalent to 12% and 20% [of the DJIA]."

In October 1988, the Commission approved price limit and trading halt proposals (i.e., circuit breakers) submitted by the futures exchanges in direct response to the recommendation of the Working Group. Coordinated provisions also in direct response to the recommendations of the working Group were approved by the Securities and Exchange Commission (SEC) for equity and equity-related markets under the SEC's jurisdiction. In June and December 1990, the Commission approved amendments to the CME's circuit breaker provisions for the S&P 500 futures contract.

In addition to the circuit breaker provisions noted above, the Commission also has approved for the CME an "initial price decline" limit of 12 points.[3] The initial price decline limit is effective for 30 minutes after the primary futures contract is first limit offered.[4] If trading

[1] On March 18, 1988, the Working Group on Financial Markets was established by Executive Order to provide a coordinating framework for consideration, resolution, recommendation; and action on the complex issues raised by the stock market break in October of 1987. The Working Group was charged with developing effective mechanisms to enhance investor confidence, to protect the quality and fairness of markets for all participants, and to preserve the continued orderliness, integrity, competitiveness, and efficiency of our nation's financial markets.

[2] A downward price limit (or price decline limit) is a price level below which trades cannot be executed while the limit is in effect.

[3] The Exchange also has opening price limits, applicable to both price increases and decreases, which would not be affected by the subject proposals.

[4] However, the initial price decline limit does not apply after 2:30 p.m. Chicago time.

is limit offered 30 minutes after the price decline limit is hit, trading is halted for two minutes and then reopened subject to the overall limit.

The existing limits for the S&P 500 and the other affected stock index futures—the S&P 400 index and the proposed Russell 2000 index —are stated in index points for the index underlying each respective futures market. The circuit breaker levels currently in effect for these contracts along with the proposed changes, in index points, are summarized below.

Futures market	Opening limit	Initial limit	Intermediate limit	Overall limit
Existing Limits				
S&P 500	5	12	NA	20
MidCap 400	2	4	NA	7
Russell 2000	3	6	NA	10
Proposed Limits				
S&P 500:				
Regular	5	12	20	30
Expanded	5	20	30	50
MidCap 400:				
Regular	2	4	8	12
Expanded	2	8	12	20
Russell 2000:				
Regular	3	6	10	15
Expanded	3	10	15	25

Under the CME's proposed amendments to the price limit levels,[5] the "regular" limits shown above would apply on most days; specifically, the initial, intermediate, and overall regular limits would be in effect on each day where the subject futures market was not limit bid or offered at the close on the previous day. The proposed initial, intermediate and overall "expanded" limits would apply only when the subject futures market was limit bid or offered at the close on the previous day. At current index levels, the proposed regular (expanded) price limits generally are comparable to DJIA movements of 40 (40) points for the opening limits, 95 (160) points for the initial limits, 160 (240) points for the intermediate limits, and 240 (400) points for the overall limits.

As with the existing initial limits, the newly proposed, intermediate limits represent price decline limits which would be in effect for a 30-minute period after the limit is hit.[6] If trading is limit offered at the end of the 30-minute period, trading in the affected futures contract will be halted for two minutes, and then trading will reopen subject to the applicable overall limit.

The CME also proposes to change the procedures for determining the base price used for setting the price limits noted above for the subject stock index futures contracts in certain instances. Under current rules, price limits are based on the settlement price on the subject futures for the previous day. Under the proposal, in those cases where on the previous day the subject future was limit bid or offered and the "implied market price" [7] for that prior day, based on the closing cash values of the relevant stock index, was above the limit bid, or below the limit offer, by a specified number of index points,[8] then the base price used for setting price limits on the next day will be such implied market price.

The CME has proposed to make the amendments effective for newly listed and existing contracts at the time of Commission approval. The current proposals do not change the specific procedures for the trading halt provisions of these contracts.[9]

In support of the proposals, the CME noted that:

> With the S&P Stock Price Index standing around 415 points, a daily limit of 20 points is less than a 5% move. While other have been few instances of limits being approached in the last two years, it is widely perceived that today's limit has a considerably greater chance of being hit than it did a few years ago * * *.
>
> The most significant risk comes from a cash move well beyond the CME limit. In those instances, firms would have to collect significant variation payments from customers, who may choose to have their positions liquidated instead. In a lock limit situation, such liquidations would not be possible. If the cash market changes by even 10%, it would be necessary to have multiple limit move days before these positions could be liquidated, posing significant financial risks to the clearing firms. By expanding the initial Daily Limit to 30 points and by expanding it further to 50 points after a limit day, the probability of multiple days without trading opportunities is greatly reduced.
>
> Another related feature of the rule changes is to change the Final [Daily] Settlement Price to the Implied [Market] Price whenever the cash index has moved by an extreme amount beyond the limit price * * *. By changing the settlement price from the limit to the Implied Market Price, the next day's limits will be based on the cash movement and not the limit price. This is another safeguard to minimize the potential for multiple limit move days without the opportunity to trade.
>
> The changes proposed by the CME are entirely consistent with the Brady Commission guidelines on circuit-breakers. In no instance would open trading be allowed beyond 30 S&P 500 points (approximately equal to 240 Dow Jones Industrial Average points) on the first day, or more than 50 S&P points (400 DJIA points) on subsequent days.

The Commission is requesting comment on the proposed changes to the circuit breaker provisions of the CME. In particular, the Commission requests comment on the following questions:

1. Are the proposed regular and expanded futures price limits appropriate as circuit breakers? It is noted that, at current index levels, the proposed regular (expanded) limits represent movements of about 3 (5) percent for the initial limits, 5(7) percent for the intermediate limits, and 7 (12) percent for the overall limits.

2. Under the proposal on the day after a CME overall limit price movement, once the expanded overall limits are in effect after the initial and intermediate price decline limits have lapsed, the subject CME futures contracts could decline more than a 250-point DJIA equivalent and continue to trade even though (a) the primary securities market has not yet declined by 250 points in the DJIA or (b) the primary securities market has been halted for one hour by a 250–point DJIA decline in that market or (c) the primary securities market has been halted for one hour and has been reopened. In this situation, the CME futures contracts would not halt until the primary securities market is halted (at either a 250 or 400 point DJIA decline) *and* CME futures are limit offered at a decline equivalent to 400 points in the DJIA.[10] The Commission requests comment on whether this expansion provision is acceptable.

3. Is it appropriate to use the implied market price, based on the closing values of the relevant cash index for the previous trading day, as the basis for setting futures price limits on the next day under the proposed conditions?

Copies of each of the proposed amendments will be available for inspection at the Office of the

---

[5] As shown in the table, for the Midcap 400 futures contact, the CME has proposed to adopt an expanded initial and regular intermediate price decline limit of 8 points, which is at variance with the existing overall limit of 7 points.

[6] As with the existing initial price decline limits, the proposed intermediate price decline limits would not apply after 2:30 p.m. Chicago time.

[7] The implied market price is the closing value of the underlying cash stock index, plus the difference of the futures settlement price less the cash index (not less than zero) on the last day for which the future was not limit bid or offered at the close.

[8] The number of index points specified in the CME's amended rules are 10 for the S&P 500, 3 for the S&P Midcap 400, and 5 for the Russell 2000.

[9] The CME trading halt provisions require the futures contracts to be limit offered before futures trading is halted.

[10] The original circuit breakers approved for the CME's stock index contracts in 1988 included maximum price limits equivalent to 400 points in the DJIA. However, such limits became effective only at the reopening of trading on the CME, which occurred after a one-hour trading halt on the primary securities market.

Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Copies of these proposed price limit and trading halt rules can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254–6314.

The materials submitted by the CME in support of the proposed amendments may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR 145 (1987)). Requests for copies should be made to the FOI, Privacy and Sunshine Act Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interest in submitted written data, views, or arguments on the proposed amendments should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581 by the specified date.

Issued in Washington, DC on September 22, 1992.

Gerald D. Gay,

Director.

BILLING CODE 6351–01–M

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title and Contract Clause: Child Annuitant's School Certification, DFAS-DE Form 2089.

Type of Request: New collection.

Average Burden Hours/Minutes Per Response: 12 minutes.

Responses Per Respondent: 1.

Number of Respondents: 1,800.

Annual Responses: 1,800.

Annual Burden Hours: 360.

Needs and Uses: This information is used to determine initial or continued eligibility for a Survivor Benefit Plan (SBP) or Retired Serviceman's Family Protection Plan (RSFPP) annuitant. Once the child annuitant has reached age 18, he/she must attend school full time in order to continue receiving the annuity.

Affected Public: Individuals or households, Non-profit institutions.

Frequency: Submitted after each school semester or other period in which school year is divided.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Mr. Edward C. Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer for DoD, room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce.

Written requests for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington, Virginia 22202–4302.

Dated: September 23, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92–23434 Filed 9–25–92; 8:45 am]

BILLING CODE 3810–01–M

Office of the Secretary

DOD Advisory Panel on Streamlining and Codifying Acquisition Laws; Meeting

AGENCY: Defense Systems Management College.

ACTION: Notice of meeting.

SUMMARY: Open to the public on October 22 and 23, 1992, starting at 8:30 a.m. at the Defense Systems Management College in Building 184 on Fort Belvoir, VA. The panel will hear presentations and recommendations by the various panel working groups on the statutes they have reviewed to date.

FOR FURTHER INFORMATION CONTACT: Linda Snellings at (703) 355–2665.

Dated: September 23, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92–23433 Filed 9–25–92; 8:45 am]

BILLING CODE 3810–01–M

Department of the Army

Office of the Secretary of the Army; Environmental Assessment for Base Realignment at Fort Carson, CO

AGENCY: United States Army, Department of Defense.

ACTION: Finding of no significant impact.

SUMMARY: The Secretary of Defense's Commission on Base Closure and Realignment recommended the realignment of the 10th Special Forces Group (Airborne) (10SFG(A)) from Fort Devens, Massachusetts, to Fort Carson, Colorado. The Defense Base Closure and Realignment (BRAC) Act of 1990, Public Law 101–510, endorsed the recommendations of the Commission and required implementation of the Commission's recommendations. An Environmental Assessment (EA) discussing possible impacts to the biological, historical, and socioeconomic environment of Fort Carson and the surrounding community has been prepared in accordance with the National Environmental Policy Act (NEPA) and the provisions of Army Regulation 200–2, which implements the Council on Environmental Quality Regulations at 40 CFR 1500. The EA is incorporated herein by reference. The requirements of the Endangered Species Act and the National Historic Preservation Act have been addressed.

The proposed action will involve the relocation of two special forces battalions from Fort Devens in 1995 into permanent facilities constructed at Fort Carson prior to the relocation. In addition to the proposed action, four other alternatives were considered including the temporary use of renovated facilities until permanent facilities can be constructed, permanent use of existing facilities without renovation, renovation of facilities for permanent occupancy, and renovation of facilities supplemented with limited construction. Three sites on Fort Carson were evaluated for construction of permanent facilities.

The construction of permanent facilities will not adversely impact air or water quality, ambient noise levels, sensitive biological resources, or other resources. Surveys were conducted to determine whether there are any archeological resources within the construction project area eligible for the National Register of Historic Places. No such resources were discovered. A report of these findings has been coordinated with the Colorado State Historic Preservation Office. Concurrence of no effect for the construction area was received from that office. In accordance with the BRAC Cultural Resources Programmatic Agreement and current Fort Carson and Pinon Canyon Maneuver Site land management practices, the 10SFG(A) will not conduct ground disturbing

exercises in training areas that have not been surveyed for archeological resources until such surveys have been carried out and the report findings and recommendations have been approved by the Colorado State Historic Preservation Officer.

Impacts on the natural environment will not be significant because of the nature of the 10SFG(A) training. The realignment action will not significantly increase the current amount or intensity of training at Fort Carson or the Pinon Canyon Maneuver Site, nor will it require the expansion of training facilities.

Existing utilities at Fort Carson can adequately support the increase in population associated with the realignment of the 10SFG(A) to Fort Carson. The construction activities will not significantly alter the availability of energy resources on the installation.

The realignment action will have a positive impact on El Paso County with respect to employment, population, business volume, and personal income. However, these increases will not alter the socioeconomic characteristics of the Fort Carson region and are not significant.

Based on an evaluation of the EA, it is determined that the anticipated environmental and socioeconomic impacts of the realignment of the 10SFG(A) to Fort Carson are not significant. An analysis of direct, indirect, and cumulative impacts indicates that the realignment action will not significantly affect the quality of the human environment. Therefore, an environmental impact statement will not be required.

SUPPLEMENTARY INFORMATION: There is a 30-day waiting period for the public prior to implementation.

ADDRESSES: A request for a copy of the EA and comments may be forwarded to Mr. Robert S. Nebel or Mrs. Patsy Freeman, Omaha District, U.S. Army Corps of Engineers, Planning Division, Omaha, Nebraska 68102.

FOR FURTHER INFORMATION CONTACT: Questions concerning this FNSI may be directed to Mr. Robert Nebel, (402) 221–4621 or Mrs. Patsy Freeman, (402) 221–3803.

Dated: September 21, 1992.

Lewis D. Walker,

Deputy Assistant Secretary of the Army (Environment, Safety and Occupational Health), OASA (I, L&E).

[FR Doc. 92–23383 Filed 9–25–92; 8:45 am]

BILLING CODE 3710–08–M

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

[Recommendation 92–7]

Training and Qualification

AGENCY: Defense Nuclear Facilities Safety Board.

ACTION: Notice; recommendation.

SUMMARY: The Defense Nuclear Facilities Safety Board (Board) has made a recommendation to the Secretary of Energy pursuant to 42 U.S.C. 2286a concerning Training and Qualification. The Board requests public comments on this recommendation.

DATES: Comments, data, views, or arguments concerning this recommendation are due on or before October 28, 1992.

ADDRESSES: Send comments, data, views or arguments concerning this recommendation to: Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW., suite 700, Washington, DC 2004.

FOR FURTHER INFORMATION CONTACT: Kenneth M. Pusateri or Carole J. Council, at the address above or telephone (202) 208–6400.

Dated: September 23, 1992.

John T. Conway,

Chairman.

[Recommendation 92–7]

Training and Qualification

Dated: September 22, 1992.

Since its inception, the Defense Nuclear Facilities Safety Board has emphasized that a well constructed and documented program for training and qualifying operations, maintenance, and technical support personnel and supervisors at defense nuclear facilities is an essential foundation of operations and maintenance and, hence, the safety and health of the public, including the facility workers. A substantial portion of the Board's efforts has been devoted to on-site observation and review of personnel and supervisor selection, training, qualification, certification and facility operation.

The Board recognizes and commends DOE's efforts to date to upgrade training programs at its defense facilities. While the Board applauds the effort expended in developing DOE Orders 5480.18A, *Accreditation of Performance-Based Training for Category A Reactors and Nuclear Facilities and 5480.20, Personnel Selection, Qualification, Training and Staffing Requirements at DOE Reactor and Non-Reactor Nuclear Facilities,* implementation of these Orders to date has been slow and the Board continues to find common deficiencies at most facilities it visits. DOE nuclear facility Maintenance and Operations (M&O) Contractors were required by DOE Order 5480.20 to submit implementation plans called Training Implementation Matrices (TIMs) for each nuclear facility by November 8, 1991. The Order does not contain a time requirement for DOE to approve the TIMs and, for the facilities reviewed by the Board and its staff, DOE has not approved the plans they have received to date.

Until the TIMs are approved, training at defense nuclear facilities is governed by more general requirements contained in DOE Orders on safety (DOE Order 5480.5 *Safety of Nuclear Facilities* and DQE Order 5480.6 *Safety of DOE-Owned Reactors)* that have been in effect since September 23, 1986. Despite the long standing requirements of these Orders, the contractors at the many different facilities evaluated by the Board have not yet, in our view, provided management attention and resources for training and qualification commensurate with the health and safety implications of their defense nuclear programs. Indications at each of these sites demonstrate weaknesses in contractor training programs that have potential negative safety consequences. For example:

—A primary measure of an effective training program is the level of knowledge of the personnel and supervisors. At almost all defense nuclear sites, there are numerous technical personnel and supervisors of defense nuclear activities who do not adequately understand many basic fundamentals of engineering, chemistry, nuclear physics, and radiation protection to the extent required to ensure safe operation or maintenance of the facility to which they are assigned.

—Written examinations at many sites often consist of unchallenging multiple choice and short answer questions which do not adequately assess operator knowledge. Additionally, written operator qualification exams do not effectively correlate fundamental engineering principles with job specific knowledge requirements. As a result, management may not have sufficient information to determine if technical personnel in a defense nuclear facility have achieved a level of expertise required to safely conduct their activities.

As stated in DOE Order 5480.20, Program Senior Officials are responsible for assuming "line management responsibility and accountability for reactor and non-reactor nuclear facility personnel qualification programs." The contractors' lack of effective implementation of DOE Orders concerning training is indicative of the need for more emphasis, direction and guidance on training by line management at DOE Headquarters and Field Offices. For example, the Department has been slow to extend the underlying principles of Board Recommendation 90–1 to other defense nuclear facilities. Recommendation 90–1 called for the development of an effective training program at Savannah River Site K-reactor. It is especially disturbing that despite the successful application of Recommendation 90–1 to K-reactor and the Replacement Tritium Facility, DOE has not improved training of corresponding technical personnel at some other Savannah River Site defense nuclear facilities.

Primarily as a result of assessments conducted by the Board's staff at the Hanford

Site, the Pantex Plant, the Savannah River Site non-reactor facilities, the Oak Ridge Y-12 Plant, and the Rocky Flats Plant, but also because of reviews conducted elsewhere in the defense nuclear facilities complex, the Board believes there is a need for DOE to take action to further strengthen training of technical personnel at defense nuclear facilities. While the benefits of training are felt in many ways, the recommendations below are to be seen for their positive effects on assuring public health and safety. Therefore, in keeping with the Board's statutory requirements and recognizing the priority DOE has placed on the facilities listed above, the Board recommends for these sites that:

1. The Department take timely action to expand senior management's involvement in implementing training programs at defense nuclear facilities and to enhance senior management's communication of the importance of effective training and qualification programs to all levels within relevant DOE and contractor defense nuclear facilities organizations, particularly within line organizations. With regard to operations, maintenance, and technical support personnel, the Department should determine what personnel, funding, organizational, or managerial strengthening actions are needed to (a) elevate the priority and importance of training and qualification programs to assure public health and safety; (b) communicate the importance of training and qualification from the highest level of management to all appropriate Department personnel; (c) expand personnel and supervisor training and qualification guidance and increase program resources to facilitate the rapid review, approval, and implementation of training and qualification programs; and (d) make other changes as are warranted.

2. Where it is found to be necessary, the Department strengthen organizational units responsible for training and qualification at the DOE Field Offices, DOE Area Offices, and contractor organizations responsible for defense nuclear facilities at these sites, especially to include the appropriate technical qualifications of the personnel assigned to defense nuclear activities. The infrastructure, responsibilities, and resources of the training and qualification programs of those organizations need to be strengthened to expedite implementation of existing and additional training and qualification requirements issued by DOE.

3. The Department accelerate efforts internal to DOE to improve training and qualification programs of operations, maintenance, and technical support personnel at defense nuclear facilities. An integral part of this effort should be an assessment of the roles and effectiveness of technical oversight groups to ensure that these groups' reviews, at all organizations and levels within the defense nuclear facilities complex, appropriately recognize the importance of training and qualification to public health and safety. The Department's program should also consider restructuring on-site technical oversight groups to ensure that training and qualification are afforded adequate attention and team members possess the technical expertise necessary to effectively evaluate training and qualification programs of operations, maintenance, and technical support personnel.

4. The Department and its contractors establish and implement measures to improve training and qualification programs of operations, maintenance, and technical support personnel at defense nuclear facilities that embody the principles applied at the Savannah River Site K-reactor in response to Board Recommendation 90-1. These measures, adjusted commensurate with the risk associated with operating each specific facility, should include consideration of elements such as:

a. Incorporation of appropriate applicable guidance on training and qualification comparable with trade, professional, and industry standards for reactor and non-reactor nuclear facilities. While the Board does not necessarily endorse all guidance contained in these standards, it believes they are important sources of information which can be productively used by DOE in identifying improvements for DOE's programs.

b. Identification of differences between current requirements and applicable trade, professional, and industry standards and implementation of supplemental measures necessary to compensate for the differences identified until training and qualification programs at defense nuclear facilities achieve a level at least equal to trade, professional and industry standards.

c. Extension of the performance-based training principles described in DOE Order 5480.18A to all defense nuclear facilities. Particularly the requirements to: (1) Determine the current level of knowledge of appropriate personnel, supervisors, and managers of technical activities by means of written, oral, and practical examinations covering job specific process knowledge requirements as well as fundamentals concepts required to perform a job in a manner that protects the safety of the worker and the public; (2) delineate the training necessary to ensure that these personnel achieve and maintain the qualifications of their respective positions; and (3) evaluate individuals' knowledge level and training curriculum to ensure that the training program effectively prepares these personnel to safely operate, maintain, or support the facility to which they are assigned.

d. Extension of current continuing training, retention testing, and periodic requalification programs to require these personnel to demonstrate continued improvement with increasing experience.

e. Maintenance of readily accessible, auditable records to identify required training and objectively verify training received by these personnel and supervisors including the degree of success achieved.

We believe it is essential that the Department and its contractors accomplish the above for each DOE defense nuclear facility. The facilities specifically identified in this Recommendation are those which the Board understands to be among those which have high priority within the Department and on which the Board has focused its attention.

John T. Conway,

Chairman.

Appendix—Transmittal Letter to the Secretary of Energy

Defense Nuclear Facilities Safety Board

625 Indiana Avenue NW, Suite 700, Washington, DC 20004, (202) 208-6400

September 22, 1992.

The Honorable James D. Watkins,
Secretary of Energy, Washington, DC 20585

Dear Mr. Secretary: On September 22, 1992, the Defense Nuclear Facilities Safety Board, in accordance with 42 U.S.C. 2286a(5), unanimously approved Recommendation 92-7 which is enclosed for your consideration. Recommendation 92-7 deals with Training and Qualification.

42 U.S.C. 2286d(a) requires the Board, after receipt by you, to promptly make this recommendation available to the public in the Department of Energy's regional public reading rooms. The Board believes the recommendation contains no information which is classified or otherwise restricted. To the extent this recommendation does not include information restricted by DOE under the Atomic Energy Act of 1954, 42 U.S.C. 2161-68, as amended, please arrange to have this recommendation promptly placed on file in your regional public reading rooms.

The Board will publish this recommendation in the Federal Register.

Sincerely,

John T. Conway,

Chairman.

Enclosure

BILLING CODE 6820-KD-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Application Filed With the Commission

September 22, 1992.

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection.

a. *Type of Application:* Conduit Exemption.

b. *Project No.:* 11315-001.

c. *Date filed:* September 8, 1992.

d. *Applicant:* BMB Enterprises, Inc.

e. *Name of Project:* Granite Creek.

f. *Location:* Within Granite Ranch, on the ranch's irrigation system which draws water from Granite Creek, in Juab County, Utah, T. 12., R. 17 W., Sections 17.

g. *Filed Pursuant to:* Federal Power Act 16 USC §§ 791(a)-825(r).

h. *Applicant Contact:* Mark. R. Hutchings, Ida-West Energy Company, P.O. Box 7867, Boise Idaho 83703, (208) 336–4254.

i. *FERC Contact:* Héctor M. Pérez at (202) 219–2843.

j. *Comment Date:* November 9, 1992.

k. *Description of Project:* The proposed project would consist of a powerhouse with a 350-megawatt generating unit at the end of the existing pipeline that discharges into the storage reservoir at the ranch. The project would have an estimated average annual generation of 1,485,000 megawatthours.

l. Under § 4.32(b)(7) of the Commission's regulations (18 CFR), if any resource agency, Indian Tribe, or person believes that the applicant should conduct an additional scientific study to form an adequate factual basis for a complete analysis of the application on its merits, they must file a request for the study with the Commission, not later than 60 days after the application is filed, and must serve a copy of the request on the applicant.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. ER92–838–000]

Commonwealth Edison Co.; Filing

September 17, 1992.

Take notice that on September 11, 1992, Commonwealth Edison Company (Edison) tendered for filing an Interchange Agreement, dated August 13, 1992, between Edison and Wabash Valley Power Association, Inc. (Wabash Valley). The Interchange Agreement provides for Edison to make Firm Power, Short Term Power, and General Purpose Energy available to Wanash Valley whenever mutually agreed upon.

Copies of this filing were served upon the Illinois Commerce Commission and Wabash Valley.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before September 30, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92–23400 Filed 9–25–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. ER92–834–000]

Northeast Utilities Service Company; Filing

September 17, 1992.

Take notice that on September 10, 1992, Northeast Utilities Service Company (NUSCO) on behalf of The Connecticut Light and Power Company (CL&P) tendered for filing an agreement for the sale to Braintree Electric Light Department (BELD) of unit capacity and associated energy from CL&P.

NUSCO requests that the Commission waive its standard notice periods and filing regulations to the extent necessary to permit the rate schedule change to become effective October 1, 1992.

NUSCO states that copies of this rate schedule have been mailed or delivered to each of the other party.

NUSCO further states that the filing is in accordance with Section 35 of the Commission's regulation.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before September 30, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

Office of Hearings and Appeals

Cases Filed During the Week of August 28 Through September 4, 1992

During the Week of August 28 through September 4, 1992, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

Dated: September 21, 1992.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of August 28 through September 4, 1992]

Date	Name and location of applicant	Case no.	Type of submission
Aug. 31, 1992	Arco/Fair Oil Company, Washington, DC	RR304–47	Request for modification/rescission in the Arco refund proceeding. *If granted:* The May 9, 1989 Decision and Order (RF304–2579) issued to Fair Oil Company would be modified regarding the firm's application for refund submitted in the Arco refund proceeding.
Sept 1, 1992	Gulf/Holloway Construction, Woodbridge, Virginia	RR300–199	Request for modification/rescission in the Gulf refund proceeding. *If granted:* The May 10, 1991 Decision and Order (RF300–11405) issued to Holloway Construction would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS—Continued

[Week of August 28 through September 4, 1992]

Date	Name and location of applicant	Case no.	Type of submission
Sept. 1, 1992	Gulf/Maxfield's Garage, Atlantic Beach, Florida	RR300-200	Request for modification/rescission in the Gulf refund proceeding. *If granted:* The July 1, 1992 Dismissal Letter (Case No. RF300-14765) issued to Maxfield's Garage would be modified regarding the firm's application for refund submitted in the Gulf refund proceeding.
Sept. 3, 1992	Shell/Kingman Truck Terminal, Las Vegas, Nevada.	RR315-3	Request for modification/rescission in the Shell refund proceeding. *If granted:* The April 23, 1992 Dismissal Letter (Case No. RF315-9988) issued to Kingman Truck Terminal would be modified regarding the firm's application for refund submitted in the Shell refund proceeding.
Sept. 4, 1992	Skadden, Arps, Slate, Meagher & Flom, Washington, DC.	LFA-0239	Appeal of an information request denial. *If granted:* The September 1, 1992 Freedom of Information Request Denial issued by the Management and Information Systems Office, Economic Regulatory Administration, would be rescinded, and Skadden, Arps, Slate, Meagher & Flom would receive access to 284 documents concerning communications between Chevron U.S.A., Inc. and the DOE, and between Cities Service Oil and Gas Corporation and the DOE.
Sept. 4, 1992	Wayne T. Long, Detroit, Michigan	LFA-0238	Appeal of an information request denial. *If granted:* The July 31, 1992 Freedom of Information Request Denial issued by the Office of Intergovernmental and External Affairs, Albuquerque Field Office, would be rescinded, and Wayne T. Long, President, Local 251, United Plant Guard Workers of America, would receive access to the personnel section of the contract between Allied-Signal Aerospace and the DOE.
Sept. 4, 1992	Reynolds Metals Company, Washington, DC	RR272-98	Request for modification/rescission in the Crude Oil Refund Proceeding. *If granted:* The August 1, 1991 Decision and Order (Case No. RF272-73969 & RF272-92645) issued to Reynolds Metals Company would be modified regarding the firm's application for refund submitted in the Crude Oil refund proceeding.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4513-7]

Office of Research and Development Ambient Air Monitoring Reference and Equivalent Methods; Equivalent Method and Reference Method Designations

Notice is hereby given that EPA, in accordance with 40 CFR part 53, has designated another equivalent method for the measurement of ambient concentrations of ozone and another reference method for the measurement of ambient concentrations of carbon monoxide.

The new equivalent method for ozone is an automated method (analyzer) which utilizes the measurement principle based on absorption of ultraviolet radiation by ozone at a wavelength of 254 nm. This new designated method is identified as follows:

EQOA-0992-087, "Advanced Pollution Instrumentation, Inc. Model 400 Ozone Analyzer," operated on any full scale range between 0-100 ppb and 0-1000 ppb, at any temperature in the range of 5 °C to 40 °C, with the dynamic zero and span adjustment features set to OFF, with a 5-micron TFE filter element installed in the rear-panel filter assembly, and with or without any of the following options: Zero/Span Valves, Internal Zero/Span (IZS), IZS Reference Adjustment, Rack-Mount with Slides, RS-232 with Status Outputs.

This method is available from Advanced Pollution Instrumentation Inc., 8815 Production Avenue, San Diego, California 92121-2219. A notice of receipt of application for this method appeared in the **Federal Register**, Volume 57, Number 115, June 15, 1992, page 28660.

The new reference method for carbon monoxide is an automated method (analyzer) which utilizes the measurement principle (non-dispersive infrared photometry) and calibration procedure specified in appendix C of 40 CFR part 50. This new designated method is identified as follows:

RFCA-0992-088, "Lear Siegler Measurement Controls Model ML 9830 Carbon Monoxide Analyzer," operated on the 0-50 ppm range, at any temperature in the range of 15 °C to 35 °C, with a 5-micron Teflon filter element installed in the filter assembly behind the secondary panel, the service switch on the secondary panel set to the IN position, with the following menu choices selected: Calibration: Manual; Filter type: Kalman; Over-ranging: Disabled: Pres/temp/flow/comp: ON; Span comp: Disabled;

with the 50 PIN I/O board installed on the rear panel configured at any of the following output range settings: Voltage, 10 V, 5 V, 1 V, 0.1 V, Current, 0-20 mA, 2-20 mA and 4-20 mA;

and with or without any of the following options: Valve Assembly for External Zero/Span (EZS), Rack Mount Assembly, Internal Floppy Disk Drive.

This method is available from Lear Siegler Measurement Controls Corporation, 74 Inverness Drive East, Englewood, CO 80112-5189. A notice of receipt of application for this method appeared in the **Federal Register**, Volume 57, Number 95, May 15, 1992, page 20824.

A test analyzer representative of each of these methods has been tested by the respective applicant, in accordance with the test procedures specified in 40 CFR part 53. After reviewing the results of these tests and other information submitted by the applicants, EPA has determined, in accordance with part 53, that these methods should be designated, respectively, as an equivalent method and a reference method. The information submitted by the applicants will be kept on file at EPA's Atmospheric Research and Exposure Assessment Laboratory, Research Triangle Park, North Carolina 27711 and will be available for inspection to the extent consistent with 40 CFR part 2 (EPA's regulations implementing the Freedom of Information Act).

As a designated reference or equivalent method, either of these methods is acceptable for use by States and other air monitoring agencies under the requirements of 40 CFR part 58, Ambient Air Quality Surveillance. For such purposes, the method must be used in strict accordance with the operation or instruction manual associated with the method and subject to any limitations (e.g., operating temperature range) specified in the applicable designation (see description of the methods above). Vendor modifications of a designated method used for purposes of part 58 are permitted only with prior approval of EPA, as provided in part 53. Provisions concerning modification of such methods by users are specified under section 2.8 of appendix C to 40 CFR part 58 (Modifications of Methods by Users).

In general, a designation applies to any analyzer which is identical to the analyzer described in the designation. In some cases, similar analyzers manufactured prior to the designation may be upgraded (e.g., by minor modification or by substitution of a new operation or instruction manual) so as to be identical to the designated method and thus achieve designated status at a modest cost. The manufacturer should

be consulted to determine the feasibility of such upgrading.

Part 53 requires that sellers of designated methods comply with certain conditions. These conditions are given in 40 CFR 53.9 and are summarized below:

(1) A copy of the approved operation or instruction manual must accompany the analyzer when it is delivered to the ultimate purchaser.

(2) The analyzer must not generate any unreasonable hazard to operators or to the environment.

(3) The analyzer must function within the limits of the performance specifications given in Table B–1 of part 53 for at least one year after delivery when maintained and operated in accordance with the operation manual.

(4) Any analyzer offered for sale as a reference or equivalent method must bear a label or sticker indicating that it has been designated as a reference or equivalent method in accordance with part 53.

(5) If such an analyzer has two or more selectable ranges, the label or sticker must be placed in close proximity to the range selector and indicate which range or ranges have been included in the reference or equivalent method designation.

(6) An applicant who offers analyzers for sale as reference or equivalent methods is required to maintain a list of ultimate purchasers of such analyzers and to notify them within 30 days if a reference or equivalent method designation applicable to the analyzer has been canceled or if adjustment of the analyzer is necessary under 40 CFR 53.11(b) to avoid a cancellation.

(7) An applicant who modifies an analyzer previously designated as a reference or equivalent method is not permitted to sell the analyzer (as modified) as a reference or equivalent method (although he may choose to sell it without such representation), nor to attach a label or sticker to the analyzer (as modified) under the provisions described above, until he has received notice under 40 CFR part 53.14(c) that the original designation or a new designation applies to the method as modified or until he has applied for and received notice under 40 CFR 53.8(b) of a new reference or equivalent method determination for the analyzer as modified.

Aside from occasional breakdowns or malfunctions, consistent or repeated noncompliance with any of these conditions should be reported to: Director, Atmospheric Research and Exposure Assessment Laboratory, Department B (MD–77), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Designation of these equivalent and reference methods will assist the States in establishing and operating their air quality surveillance systems under part 58. Technical questions concerning either method should be directed to the manufacturer. Additional information concerning this action may be obtained from Frank F. McElroy, Methods Research and Development Division (MD–77), Atmospheric Research and Exposure Assessment Laboratory, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, (919) 541–2622.

Erich W. Bretthauer,

Assistant Administrator for Research and Development.

Notice of Open Meeting of the National Advisory Council for Environmental Policy and Technology's Environmental Measurements and Chemical Accident Prevention Committee, Environmental Statistics Subcommittee

Under Public Law 92563 (The Federal Advisory Committee Act), EPA gives notice of a meeting of the Environmental Statistics Subcommittee of the Environmental Measurement/Chemical Accident Prevention Committee (EM/CAP). The EM/CAP Committee is a standing committee of the National Advisory Council for Environmental Policy and Technology (NACEPT), an advisory committee to the Administrator of the EPA. This meeting of the Environmental Statistics Subcommittee will be held on October 15, 1992 from 9 a.m. to 5 p.m. and October 16, 1992 from 9 a.m. to 3 p.m. at the National Governors' Association offices, 444 North Capitol Street, room 233–235, Washington, DC 20001–1572.The Environmental Statistics Subcommittee will discuss issues related to the development and use of environmental statistics and data. The governance and structure of a Center for Environmental Statistics at EPA will be a primary focus. Specific issues on the agenda include: building an analytical framework, supporting data collection and management, and outreach. EPA representatives will be present to discuss coordination with other governmental agencies, States and other organizations.

Members of the public interested in further information may contact David J. Graham, Designated Federal Official, Office of Cooperative Environmental Management, U.S. EPA (A–101 F6), 401 M Street, SW., Washington, DC 20460, (202) 260–9743.

Dated: September 21, 1992.

Abby J. Pirnie,

Director, Office of Cooperative Environmental Management.

National Meeting Agendas Subcommittee of the National Enforcement Training Institute (NETI) Advisory Council; Open Meeting

AGENCY: U.S. Environmental Protection Agency, Office of Enforcement.

ACTION: Meeting notice.

SUMMARY: The purpose of the meeting is to develop the Strategic Plan for the National Enforcement Training Institute.

The meeting is open to the public. Limited seating for interested members of the public is available on a first-come, first served basis.

DATES: October 13, 1992 from 9 a.m. to 5 p.m.

ADDRESSES: The meeting will be held in room 381 of the Hall of States located at 444 North Capitol Street, NE, in Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ms. Ellen C. Stough, Executive Director of NETI, Office of Enforcement, Mail Code LE–133, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460; telephone (202) 260–8776; telefax: (202) 260–7839.

Dated: September 24, 1992.

[FRL–4513–2]

Notice of Disclosure of Confidential Business Information Obtained Under the Comprehensive Environmental Response, Compensation and Liability Act to EPA Contractor Labat-Anderson, Inc.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; Request for comment.

SUMMARY: EPA hereby complies with the requirements of 40 CFR 2.301(h) for authorization to disclose to its contractor, Labat-Anderson, Inc.

(hereinafter "Labat-Anderson"), of Arlington, Virginia, Superfund confidential business information ("CBI") which has been submitted to EPA Region 9, Hazardous Waste Management Division, Office of Superfund Programs. Labat-Anderson's principal offices are located at 2200 Clarendon Boulevard, suite 900, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT: Betsy Curnow, Office of Superfund Programs, Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, CA 94105, (415) 744–2378.

NOTICE OF REQUIRED DETERMINATIONS, CONTRACT PROVISIONS AND OPPORTUNITY TO COMMENT: The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 ("CERCLA"), as amended, (commonly known as "Superfund") requires the establishment of an administrative record upon which the President shall base the selection of a response action. CERCLA also requires the maintenance of many other records, including those relevant to cost recovery. EPA has entered into a contract, No. 68–W9–0052, with Labat-Anderson, for management of these records. EPA Region 9 has determined that disclosure of CBI to Labat-Anderson employees is necessary in order that Labat-Anderson may carry out the work required by that contract with EPA. The contract complies with all requirements of 40 CFR 2.301(h)(2)(ii). EPA Region 9 will require that each Labat-Anderson employee sign a written agreement that he or she (1) will use the information only for the purpose of carrying out the work required by the contract, (2) shall refrain from disclosing the information to anyone other than EPA without the prior written approval of each affected business or of an EPA legal office, and (3) shall return to EPA all copies of the information (and any abstracts or extracts therefrom) upon request from the EPA program office, whenever the information (and any abstracts or extracts therefrom) upon request from the EPA program office, whenever the information is no longer required by Labat-Anderson for performance of the work required by the contract, or upon completion of the contract. These non-disclosure statements shall be maintained on file with the Region 9 Delivery Order Project Officer. Labat-Anderson employees will be trained on Superfund CBI requirements.

EPA hereby advises affected parties that they have ten working days to comment pursuant to 40 CFR 2.301(h)(2)(iii). Comments should be sent to: Environmental Protection Agency, Region 9, Elaine Yee (H–7–4), 75 Hawthorne Street, San Francisco, CA 94105.

Dated: September 16, 1992.

Jeff Zelikson,

Director, Hazardous Waste Management Division, EPA Region 9.

BILLING CODE 6560–50–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–957–DR]

Guam; Amendment to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

EFFECTIVE DATE: September 17, 1992.

SUMMARY: This notice amends the notice of a major disaster for the Territory of Guam (FEMA–957–DR), dated August 28, 1992, and related determinations.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3606.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated September 17, 1992, the President amended the cost-sharing arrangements concerning Federal funds provided under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), in a letter to Wallace E. Stickney, Director of the Federal Emergency Management Agency, as follows:

I have determined that the damage from Typhoon Omar in certain areas of the Territory of Guam which resulted in my declaration of a major disaster on August 28, 1992, is of sufficient severity and magnitude that special conditions are warranted regarding the customary cost-sharing arrangements concerning Federal funds provided under the Robert T. Stafford Disaster Relief and Emergency Assistance Act ("the Stafford Act"), for the Individual and Family Grant program and Public Assistance.

Therefore, I amend my declaration to authorize Federal funds for Public Assistance at 75 percent of total eligible costs up to $10 per capita. Eligible costs for Public Assistance exceeding $10 per capita will be funded at 95 percent of total eligible costs.

I further amend my declaration to authorize Federal funds for the Individual and Family Grant program at 100 percent of total eligible costs, under the provisions of the Insular Act.

Please notify the Governor of Guam and the Federal Coordinating Officer of this amendment to my major disaster declaration.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

Wallace E. Stickney,

Director.

BILLING CODE 6718–02–M

[FEMA–962–DR]

Indiana; Major Disaster and Related Determinations

AGENCY: Federal Emergency Agency (FEMA).

ACTION: Notice.

EFFECTIVE DATE: September 18, 1992.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Indiana (FEMA–962–DR), dated September 18, 1992, and related determinations.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Agency, Washington, DC 20472, (202) 646–3606.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated September 18, 1992, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), as follows:

I have determined that the damage in certain areas of the State of Indiana, resulting from severe storms, tornadoes, and flooding from June 16, 1992 to July 23, 1992, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act ("the Stafford Act"). I, therefore, declare that such a major disaster exists in the State of Indiana.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Public Assistance in the designated areas. Individual Assistance may be designated at a later date, if warranted. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance will be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management

Agency under Executive Order 12148, I hereby appoint Mr. David Skarosi of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of Indiana to have been affected adversely by this declared major disaster:

The counties of Adams, Dearborn, DeKalb, Delaware, Franklin, Grant, Jefferson, LaPorte, Madison, Marion, Miami, Noble, Ohio, Porter, and Switzerland for Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

Wallace E. Stickney,

Director.

[FEMA-3094-EM]

Rhode Island; Notice of an Emergency and Related Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

EFFECTIVE DATE: September 16, 1992.

SUMMARY: This is a notice of the Presidential declaration of an emergency for the State of Rhode Island (FEMA-3094-EM), dated September 16, 1992, and related determinations.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-3606.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated September 16, 1992, the President declared an emergency under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), as follows:

I have determined that the damage in certain areas of the State of Rhode Island, resulting from water contamination on August 3, 1992, and continuing is of sufficient severity and magnitude to warrant an emergency declaration under title V, section 501(a), of the Robert T. Stafford Disaster Relief and Emergency Assistance Act ("the Stafford Act"). I, therefore, declare that such an emergency exists in the State of Rhode Island.

You are authorized to coordinate all emergency relief efforts which have the purpose of alleviating the hardship and suffering caused by the emergency on the local population, and to provide appropriate assistance for required emergency measures, authorized under title V of the Stafford Act, to save lives, protect property and public health and safety, and lessen or avert the threat of a catastrophe in the designated areas.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal emergency assistance and administrative expenses. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act will be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Edward A. Thomas of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared emergency.

I do hereby determine the following areas of the State of Rhode Island to have been affected adversely by this declared emergency:

The Counties of Providence and Washington for required emergency measures taken.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

FEDERAL MARITIME COMMISSION

Compania Anonima Venezolana de Navegacion et al.; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC, Office of the Federal Maritime Commission, 800 North Capitol Street, NW., 9th Floor. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, on or before October 8, 1992. The

requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 203–011383–002.

Title: Venezuelan Discussion Agreement.

Parties:

Compania Anonima Venezolana de Navegacion

King Ocean Services de Venezuela, S.A.

Ocean Express Lines, Inc.

Venezuela Transport Line, Inc.

Synopsis: The proposed amendment revises the voting provisions of the Agreement to provide that any member line of a conference party to the Agreement may attend the participate in meetings of the Agreement. The parties have requested a shortened review period.

Agreement No.: 224–002810–010.

Title: Tampa Port Authority/ Harborside Refrigerated Services Terminal Agreement.

Parties:

Tampa Port Authority ("Port")

Harborside Refrigerated Services, Inc. ("Harborside").

Synopsis: The modification establishes a revised payment schedule under which Harborside will reimburse the Port for monies due under the Agreement.

Agreement No.: 224–003079–015.

Title: Tampa Port Authority/Eller & Company, Inc., Marine Terminal Agreement.

Parties:

Tampa Port Authority ("Port")

Eller & Company, Inc. ("Eller").

Synopsis: The modification reflects a revised payment schedule in which Eller will reimburse the Authority for monies due as provided for in the basic Agreement.

Agreement No.: 224–200417–003.

Title: Georgia Ports Authority/Hoegh Lines Terminal Agreement.

Parties:

Georgia Ports Authority

Hoegh Lines ("Hoegh").

Synopsis: The amendment modifies the Agreement to state that Hoegh's M-Class vessels are eligible for a dockage refund and that the Agreement's berth guarantee provisions do not apply to the Port of Brunswick.

Dated: September 23, 1992.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Federal Open Market Committee; Domestic Policy Directive of June 30-July 1, 1992

In accordance with § 271.5 of its rules regarding availability of information, there is set forth below the domestic policy directive issued by the Federal Open Market Committee at its meeting held on June 30-July 1, 1992.[1] The Directive was issued to the Federal Reserve Bank of New York as follows:

The information reviewed at this meeting continues to suggest that economic activity is expanding at a moderate pace. Total nonfarm payroll employment increased somewhat further in May, but a surge in job seekers led to a sizable rise in the civilian unemployment rate to 7.5 percent. Industrial production rose appreciably further in May, partly reflecting continued recovery in motor vehicle assemblies. Growth in consumer spending has slackened after a sharp advance earlier this year. Although sales of new homes declined in May, single-family housing starts rebounded to a level close to the first-quarter pace. Recent data on orders and shipments of nondefense capital goods indicate appreciable increases in outlays for business equipment, and the trend of building contracts points to some slowing of the decline in nonresidential construction. The nominal U.S. merchandise trade deficit increased in April and was substantially above its average rate in the first quarter. Incoming data on retail prices and labor costs suggest that inflation is slowing.

Most interest rates have changed little since the Committee meeting on May 19. In foreign exchange markets, the trade-weighted value of the dollar in terms of the other G-10 currencies declined further over the intermeeting period.

M2 and M3 changed little in May and appear to have contracted in June; both retail and large-denomination time deposits continued to run off rapidly. Through June, expansion of the two aggregates was somewhat below the lower ends of the ranges established by the Committee for the year.

The Federal Open Market Committee seeks monetary and financial conditions that will foster price stability and promote sustainable growth in output. In furtherance of these objectives, the Committee reaffirmed at this meeting the ranges it had established in February for growth of M2 and M3 of 2-1/2 to 6-1/2 percent and 1 to 5 percent respectively, measured from the fourth quarter of 1991 to the fourth quarter of 1992. The Committee anticipated that developments contributing to unusual velocity increases could persist in the second half of the year. The monitoring range for growth of total domestic nonfinancial debt also was maintained at 4-1/2 to 8-1/2 percent for the year. For 1993, the Committee on a tentative basis set the same ranges as in 1992 for growth of the monetary aggregates and debt, measured from the fourth quarter of 1992 to the fourth quarter of 1993. The behavior of the monetary aggregates will continue to be evaluated in the light of progress toward price level stability, movements in their velocities, and developments in the economy and financial markets.

In the implementation of policy for the immediate future, the Committee seeks to maintain the existing degree of pressure on reserve positions. In the context of the Committee's long-run objectives for price stability and sustainable economic growth, and giving careful consideration to economic, financial, and monetary developments, slightly greater reserve restraint might or slightly lesser reserve restraint would be acceptable in the intermeeting period. The contemplated reserve conditions are expected to be consistent with growth of M2 and M3 over the period from June through September at annual rates of about 2 and 1/2 percent, respectively.

By order of the Federal Open Market Committee, August 31, 1992.

Normand Bernard,

Deputy Secretary, Federal Open Market Committee.

[FR Doc. 92–23512 Filed 9–25–92; 8:45 am]

BILLING CODE 6210–01–F

[1] Copies of the Record of policy actions of the Committee for the meeting of June 30-July 1, 1992, are available upon request to The Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

First Union Corporation, et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the

question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than October 23, 1992.

A. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Senior Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. First Union Corporation, Charlotte, North Carolina; to acquire South Carolina Federal Corporation, Columbia, South Carolina, and thereby engage in owning and operating a savings and loan association pursuant to § 225.25(b)(9) of the Board's Regulation Y.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Story County Bancorporation, Jewell, Iowa; to acquire Viking Village Company, L.P., Jewell, Iowa, and thereby engage in providing housing for low and moderate income families pursuant to § 225.25(b)(6) of the Board's Regulation Y. These activities will be conducted in the State of Iowa.

C. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101 Market Street, San Francisco, California 94105:

1. Redwood Empire Bancorp, Santa Rosa, California; to acquire Lake Savings and Loan Association, Lakeport, California, and thereby engage in operating a savings association pursuant to § 225.25(b)(9) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, September 22, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

J.F. Justiss, et al.; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than October 19, 1992.

A. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. J.F. Justiss, III, Trust, to acquire an additional 2.96 percent for a total of 14.83 percent; Amy Williams Trust, to acquire 2.96 percent for a total of 4.74 percent; Adam Williams Trust, to acquire 2.96 percent, for a total of 4.74 percent; and Jennifer J. Williams, to acquire 2.96 percent for a total of 7.12 percent of the voting shares of JBI Financial Corporation, Jena, Louisiana, and thereby indirectly acquire Bank of Jena, Jena, Louisiana. All notificants are from Jena, Louisiana.

B. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101 Market Street, San Francisco, California 94105:

1. Chang Hwi Kim, Palos Verdes, California; to retain 10.98 percent of the voting shares of California Center Bank, Los Angeles, California.

Board of Governors of the Federal Reserve System, September 22, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Omnibank Corporation, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than October 23, 1992.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Omnibank Corporation, River Rouge, Michigan; to become a bank holding company by acquiring 89.78 percent of the voting shares of Omnibank, River Rouge, Michigan.

2. Peoples Mid-Illinois Corporation, and its wholly owned subsidiary, PMI Acquisition Corporation, both of Bloomington, Illinois; to acquire 100 percent of the voting shares of Lexington Bancshares, Inc., Lexington, Illinois, and thereby indirectly acquire Lexington Bank, Lexington, Illinois. In connection with this application, PMI has applied to become a bank holding company.

B. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. State First Financial Corporation, Texarkana, Arkansas; to acquire at least 90 percent of the voting shares of First National Bank of Nashville, Nashville, Arkansas.

C. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Minnesota Banc Holding Company, Plymouth, Minnesota; to acquire 100 percent of the voting shares of Citizens State Bank of Montgomery, Montgomery, Minnesota.

D. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. El Paso Bancshares, Inc., Monument, Colorado; to acquire 100

percent of the voting shares of Western Bank, Taos, New Mexico.

Board of Governors of the Federal Reserve System, September 22, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

U.S. Trust Corporation, et al.; Applications to Engage de novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 23, 1992.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. U.S. Trust Corporation, New York, New York; to engage *de novo* through its subsidiary, U.S. Trust Company of New Jersey, Princeton, New Jersey, in trust company activities, including activities of a fiduciary, investment advisory, agency and custodial nature pursuant to § 225.25(b)(3) and (b)(4) of the Board's Regulation Y.

B. Federal Reserve Bank of Philadelphia (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. CoreStates Financial Corp., Philadelphia, Pennsylvania; to acquire 31.01 percent of the voting shares of Electronic Payment Services, Inc., Wilmington, Delaware, and thereby engage in data processing activities pursuant to § 225.25(b)(7) of the Board's Regulation Y.

C. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. Banc One Corporation, Columbus, Ohio; to acquire 31.01 percent; PNC Financial Corporation, Pittsburgh, Pennsylvania, to acquire 31.01 percent; Society Corporation, Cleveland, Ohio, to acquire 6.97 percentof the voting shares of Electronic Payment Services, Inc., Philadelphia, Pennsylvania, and thereby engage in data processing activities pursuant to § 225.25(b)(7) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, September 22, 1992.

BILLING CODE 6210-01-F

FEDERAL TRADE COMMISSION

[Dkt. C-3399]

Automatic Data Processing, Inc., et al.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order prohibits, among other things, a New Jersey based company that sells computer software programs and its subsidiary from making misrepresentations concerning the advantages of financing purchases, and from selling or licensing software or printed materials the firm knows or should know are likely to be used to misrepresent comparative costs.

DATES: Complaint and Order issued August 27, 1992.[1]

FOR FURTHER INFORMATION CONTACT: John Lefevre, FTC/S-4429, Washington, DC 20580. (202) 326-3209.

SUPPLEMENTARY INFORMATION: On Tuesday, September 10, 1991, there was published in the **Federal Register**, 56 FR 46187, a proposed consent agreement with analysis In the Matter of Automatic Data Processing, Inc., et al., for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of the order.

Comments were filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered an order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

Donald S. Clark,

Secretary.

BILLING CODE 6750-01-M

[Dkt. C-3401]

BelAge Plastic Surgery Center, P.C., et al.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order prohibits, among other things, a Virginia-based plastic surgery center and its founder from misrepresenting the likelihood of risks or scarring, the length of the recovery period, the amount of pain, or the need for pain medication, following plastic or cosmetic surgery. In addition, the order requires a risk disclosure any time the respondents state that cosmetic or plastic surgery procedures are safe.

DATES: Complaint and Order issued September 8, 1992.[1]

Centers for Disease Control

Advisory Committee for Injury Prevention and Control; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act

(Pub. L. 92–463), the Centers for Disease Control (CDC) announces the following committee meeting:

NAME: Advisory Committee for Injury Prevention and Control (ACIPC).

TIMES AND DATES:

8 a.m.–5 p.m., October 26, 1992
8 a.m.–12 noon, October 27, 1992

PLACE: Terrace Garden Inn, 3405 Lenox Road, NE., Atlanta, Georgia 30326.

STATUS: Open to the public, limited only by the space available.

PURPOSE: The committee will continue to make recommendations on policy, strategy, objectives, and priorities including the balance and mix of intramural and extramural research; advise on the development of a national plan for injury prevention and control, the development of new technologies and their application; and review progress toward injury prevention and control.

MATTERS TO BE DISCUSSED: The committee will discuss recent grant awards; the extramural research planning process; the reorganization of the Division of Injury Control as the National Center for Injury Prevention and Control; the injury control report to Congress; the World Conference on Injury Control; the development of injury advisories; revision of grant announcements; and guidelines for traumatic brain injury surveillance.

Agenda items are subject to change as priorities dictate.

CONTACT PERSON FOR MORE INFORMATION: Richard J. Waxweiler, Ph.D., Acting Executive Secretary, ACIPC, National Center for Injury Prevention and Control, CDC, 4770 Buford Highway, NE., Mailstop F–41, Atlanta, Georgia 30341–3724, telephone 404/488–4031.

Dated: September 22, 1992.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160–18–M

Food and Drug Administration

[Docket No. 92N–0316]

Merck & Co., Inc.; Withdrawal of Approval of NADA

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of a new animal drug application (NADA) held by Merck & Co., Inc. The NADA provides for the use of a penicillin Type A article. The sponsor requested the withdrawal of approval of the NADA.

EFFECTIVE DATE: October 8, 1992.

FOR FURTHER INFORMATION CONTACT: Mohammad I. Sharar, Center for Veterinary Medicine (HFV–216), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–295–8749.

SUPPLEMENTARY INFORMATION: Merck Research Laboratories, Division of Merck & Co., Inc., Rahway, NJ 07065, is the sponsor of NADA 46–598, which provides for the use of Pro-Pen® Type A medicated article (penicillin G procaine). In its letter dated May 8, 1992, the sponsor requested the withdrawal of approval of the NADA.

Therefore, under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Veterinary Medicine (21 CFR 5.84), and in accordance with § 514.115 *Withdrawal of approval of applications* (21 CFR 514.115), notice is given that approval of NADA 46–598 and all supplements and amendments thereto is hereby withdrawn, effective on October 8, 1992.

Dated: September 18, 1992.

Gerald B. Guest,

Director, Center for Veterinary Medicine.

BILLING CODE 4160–01–F

[Docket No. 88F–0236]

Metrex Research Corp.; Withdrawal of Food Additive Petition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the withdrawal, without prejudice to a future filing, of a food additive petition (FAP 8B4050) proposing that the food additive regulations be amended to provide for the safe use in contact with food of an aqueous sanitizing solution containing sodium, calcium, or potassium hypochlorite; citric acid; sodium citrate; and α-[*para*-(1,1,3,3-tetramethylbutyl)phenyl]-ω-hydroxypoly(oxyethylene), containing 9 to 10 moles of ethylene oxide. The petition was withdrawn by Metrex Research Corp., which purchased Bionox Corp.

FOR FURTHER INFORMATION CONTACT: Richard H. White, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–254–9511.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of July 29, 1988 (53 FR 28699), FDA announced that a food additive petition (FAP 8B4050) had been filed by Bionox Corp., 6890 East Loma del Bribon, Tucson, AZ 85715. This petition proposed that § 178.1010 *Sanitizing solutions* (21 CFR 178.1010) be amended to provide for the safe use in contact with food of an aqueous sanitizing solution containing sodium, calcium, or potassium hypochlorite; citric acid; sodium citrate; and α-[*para*-(1,1,3,3-tetramethylbutyl)phenyl]-ω-hydroxypoly(oxyethylene), containing 9 to 10 moles of ethylene oxide. Metrex Research Corp., which purchased Bionox Corp., has now withdrawn the petition without prejudice to a future filing (21 CFR 171.7).

Dated: September 10, 1992.

Douglas L. Archer,

Acting Director, Center for Food Safety and Applied Nutrition.

[FR Doc. 92–23445 Filed 9–25–92; 8:45 am]

BILLING CODE 4160–01–F

Advisory Committee; Notice of Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meeting and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

MEETING: The following advisory committee meeting is announced:

Vaccines and Related Biological Products Advisory Committee

Date, time, and place. October 28 and 29, 1992, 8:30 a.m., Holiday Inn Silver Spring, International Ballroom, 8777 Georgia Ave., Silver Spring, MD.

Type of meeting and contact person. Open committee discussion, October 28, 1992, 8:30 a.m. to 5:30 p.m.; open public hearing, 5:30 p.m. to 6 p.m., unless public participation does not last that long; open public hearing, October 29, 1992, 8:30 a.m. to 9 a.m., unless public participation does not last that long; open committee discussion, 9 a.m. to 11 a.m.; closed committee deliberations, 11 a.m. to 12 m.; Anna J. Baldwin, Center

for Biologics Evaluation and Research (HFB–5), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20892, 301–295–8226.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of vaccines intended for use in the diagnosis, prevention, or treatment of human diseases.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before October 22, 1992, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. On October 28, 1992, the committee will discuss two DTP/Haemophilus b combination vaccines (Connaught Laboratories, Lederle Laboratories) and a Haemophilus b conjugate vaccine (Pasteur-Merieux). On October 29, 1992, the committee will discuss a vaccine for the prevention of typhoid fever (Pasteur-Merieux).

Closed committee deliberations. The committee will discuss trade secret and/or confidential commercial information relevant to pending investigational new drug applications. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (subpart C of 21 CFR part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

The agenda, the questions to be addressed by the committee, and a current list of committee members will be available at the meeting location on the day of the meeting.

Transcripts of the open portion of the meeting will be available from the Freedom of Information Office (HFI–35), Food and Drug Administration, rm. 12A–16, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, at a cost of 10 cents per page. The transcript may be viewed at the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857, approximately 15 working days after the meeting, between the hours of 9 a.m. and 4 p.m., Monday through Friday. Summary minutes of the open portion of the meeting will be available from the Freedom of Information Office (address above) beginning approximately 90 days after the meeting.

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (FACA) (5 U.S.C. app. 2, 10(d)), permits such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commercial or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instances not generally relevant to FDA matters.

Examples of portions of FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion, and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commercial or financial information submitted to the agency; consideration of matters involving investigatory files compiled for law enforcement purposes; and review of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements for a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, notably deliberative session to formulate advice and recommendations to the agency on matters that do not independently justify closing.

This notice is issued under section 10(a)(1) and (2) of the Federal Advisory Committee Act (5 U.S.C. app. 2), and FDA's regulations (21 CFR part 14) on advisory committees.

Dated: September 18, 1992.
David A. Kessler,
Commissioner of Food and Drugs.

BILLING CODE 4160-01-F

HEALTH AND HUMAN SERVICES

Health Care Financing Administration

Hearing; Reconsideration of Disapproval of Tennessee State Plan Amendment (SPA)

AGENCY: Health Care Financing Administration, HHS.

ACTION: Notice of hearing.

SUMMARY: This notice announces an administrative hearing on November 4, 1992, in room 510, 101 Marietta Street, Atlanta, Georgia to reconsider our decision to disapprove Tennessee SPA 91-42.

CLOSING DATE: Requests to participate in the hearing as a party must be received by the Docket Clerk by October 13, 1992.

FOR FURTHER INFORMATION CONTACT: Docket Clerk, HCFA Hearing Staff, 1849 Gwynn Oak Avenue, Meadowwood East Building, Groundfloor, Baltimore, Maryland 21207, Telephone: (410) 597-3013.

SUPPLEMENTARY INFORMATION: This notice announces an administrative hearing to reconsider our decision to disapprove Tennessee State plan amendment (SPA) number 91-42.

Section 1116 of the Social Security Act (the Act) and 42 CFR part 430 establish Department procedures that provide an administrative hearing for reconsideration of a disapproval of a State plan or plan amendment. The Health Care Financing Administration (HCFA) is required to publish a copy of the notice to a State Medicaid agency that informs the agency of the time and place of the hearing and the issues to be considered. If we subsequently notify the agency of additional issues that will be considered at the hearing, we will also publish that notice.

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with the requirements contained at 42 CFR 430.76(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the Hearing Officer before the hearing begins in accordance with the requirements contained at 42 CFR 430.76(c).

If the hearing is later rescheduled, the Hearing Officer will notify all participants.

Tennessee SPA 91-42 proposes to change the method for providing orthodontia services under the Early and Periodic Screening, Diagnosis and Treatment (EPSDT) program. Tennessee specifically proposes to cover orthodontia services for individuals age 21 and over who received prior approval for the orthodontia services under EPSDT before the age of 20 and ½. Tennessee does not cover orthodontia services for any other individuals age 21 or over.

The issue in this matter is whether the plan amendment meets the statutory requirements of sections 1902(a)(10)(B) and (c)(i)(II) of the Act and Federal regulations at 42 CFR 440.240.

Section 1902(a)(10)(B) of the Act requires States to provide medical assistance to any categorically needy recipient which is not less in amount, duration or scope than services available to a medically needy recipient. In addition, under sections 1902(a)(10)(B) and (C)(i)(II) of the Act and 42 CFR 440.240, a State must also provide services that are equal in amount, duration, and scope to all individuals who are categorically needy or who are members of the same covered medically needy group. HCFA believes Tennessee SPA 91-42 violates these provisions. Section (I) in the matter following section 1902(a)(10)(F) of the Act, indicates that certain services provided to individuals meeting prescribed age requirements, shall not be required to be available in the same amount, duration and scope to individuals of any other age. EPSDT services are one of these services.

There are two separate comparability issues in Tennessee's plan amendment. First, Tennessee is proposing to provide orthodontia services to only those individuals over age 21 who have previously received orthodontia services under the EPSDT program. By choosing to provide orthodontia services to only former EPSDT recipients, HCFA believes that Tennessee violates the statutory requirements. Tennessee would not be providing all individuals within an eligibility group the same amount, duration and scope of services since only a few categorically or medically needy individuals would be receiving orthodontia services, not the entire group. Additionally, Tennessee could potentially be providing services in amount, duration and scope to medically needy individuals in excess of the services available to its categorically needy individuals who never received EPSDT services. Once an individual reaches the age of 21 and becomes ineligible for EPSDT services, Tennessee cannot violate the rules of comparability because the individual was previously EPSDT eligible.

HCFA believes that this same issue arises with respect to the services or devices provided for under part 10, item (g) of the proposed plan amendment (Attachment 3.1.A.1). This section indicates that an individual nearing his or her 21st birthday who receives prior authorization for a service or device (other than orthodontia) may receive that service after the individual attains the age of 21 if prior authorization was granted within 15 days prior to the recipient's 21st birthday and if the service is completed within 10 days after the recipient attains the age of 21. It is not clear whether Tennessee is providing these services or devices as EPSDT services. However, HCFA believes that Tennessee is proposing to provide services to a few recipients who have attained the age of 21 in excess of services available to other eligible recipients who did not have the service or device prior authorized within Tennessee's timeframe. HCFA believes this also violates the rules of comparability.

Second, Tennessee is proposing in the SPA to use the arbitrary age of 20½ by which prior authorization must be acquired in order for Tennessee to provide orthodontia services under the EPSDT program beyond the age of 21. Tennessee states that the reason for this is to encourage recipients to request coverage in a reasonable time period before eligibility is expected to end. However, HCFA believes that this requirement also violates the rules of comparability. The age of 20½ is not related to any specific eligibility criteria. While the EPSDT individual who did receive prior authorization before the age of 20½ would continue to receive these services, an individual who did not receive prior authorization until after age 20½, through no fault of his or her own, would have orthodontia services terminated upon reaching the age of 21.

The proposed amendment also contains other limits under part 4.b. of the proposed plan amendment (Attachment 3.1.A.1). HCFA asked Tennessee to remove any arbitrary limits on services provided to EPSDT recipients or to include language which indicates that these are tentative limits which can be exceeded if additional services are determined to be medically necessary. The Omnibus Budget Reconciliation Act of 1989 added section 1905(r)(5) to the Act which requires States to provide all medically necessary services to EPSDT recipients under the age of 21 to correct or

ameliorate conditions discovered by screen, even if the service is not provided for in the State plan.

Tennessee indicates that these limits meet commonly accepted standards of medical practice but that the limits can be exceeded when medically necessary. However, SPA 91–42 does not contain this language. Additionally, Tennessee indicates that removal of these specific limits would make it possible and probable for recipients to "provider shop" or loan their eligibility cards to ineligible individuals since recipients could continue to receive services without having to justify excess utilization. HCFA believes this argument is not persuasive. The State makes the final determination of medical necessity, not a provider. In addition, the provider would not be entitled to reimbursement for any services determined to be unnecessary or performed on ineligible individuals. The State is allowed to require prior authorization as a utilization control to contain unnecessary expenditures, but HCFA believes that it may not set arbitrary limits on the amount of services.

The notice to Tennessee announcing an administrative hearing to reconsider the disapproval of its SPA reads as follows:

Mr. Manny Martins,
Assistant Commissioner, Department of Health and Environment, Bureau of Medicaid, 729 Church Street, Nashville, Tennessee 37219–5406.

Dear Mr. Martins: I am responding to your request for reconsideration of the decision to disapprove Tennessee State Plan Amendment (SPA) 91–42.

The issue in this matter is whether the plan amendment meets the statutory requirements of sections 1902(a)(10)(B) and (c)(i)(II) of the Social Security Act (the Act) and Federal regulations at 42 CFR 440.240.

Section 1902(a)(10)(B) of the Act requires States to provide medical assistance to any categorically needy recipient which is not less in amount, duration or scope than services available to a medically needy recipient. In addition, under sections 1902(a)(10)(B) and (C)(i)(II) of the Act and 42 CFR 440.240, a State must also provide services that are equal in amount, duration and scope to all individuals who are categorically needy or who are members of the same covered medically needy group.

I am scheduling a hearing on your request for reconsideration to be held on November 4, 1992, in Room 510, 101 Marietta Street, Atlanta, Georgia. If this date is not acceptable, we would be glad to set another date that is mutually agreeable to the parties. The hearing will be governed by the procedures prescribed at 42 CFR Part 430.

I am designating Mr. Stanley Krostar as the presiding officer. If these arrangements present any problems, please contact the Docket Clerk. In order to facilitate any communication which may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at the hearing. The Docket Clerk can be reached at (410) 597–3013.

Sincerely,

William Toby, Jr.,
Acting Deputy Administrator.

(Section 1116 of the Social Security Act (42 U.S.C. 1316); 42 CFR 430.18)

(Catalog of Federal Domestic Assistance Program No. 13.714, Medicaid Assistance Program)

Dated: September 18, 1992.

William Toby, Jr.,
Acting Deputy Administrator, Health Care Financing Administration.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Final Funding Priority for Grants for Area Health Education Centers Special Initiatives

The Health Resources and Services Administration (HRSA) announces the final funding priority for fiscal year (FY) 1993 for Grants for Area Health Education Centers Special Initiatives under the authority of section 781(a)(2), title VII of the Public Health Service (PHS) Act, as amended by the Health Professions Reauthorization Act of 1988, title VI of Public Law 100–607.

This program announcement is subject to the reauthorization of this legislative authority and to the appropriation of funds. The Administration's budget request for FY 1993 does not include funding for this program. Applicants are advised that this program announcement is a contingency action being taken to assure that should authority and funds become available for this purpose, they can be awarded in a timely fashion consistent with the needs of the program as well as to provide for even distribution of funds throughout the fiscal year. This notice regarding applications does not reflect any change in this policy.

Final Funding Priority for Fiscal Year 1993

A proposed funding priority was published in the **Federal Register** dated July 10, 1992, at 57 FR 30742 for public comment. No comments were received during the 30-day comment period. Therefore, as proposed, the priority will be retained as follows:

A funding priority will be given to applications which demonstrate the development or implementation of information dissemination systems with the capability to provide state-of-the-art information on clinical modalities, protocols, and other guidelines which can address emerging health issues such as substance abuse, clinical preventive services, infant mortality and geriatrics for primary care practitioners, including National Health Service Corps personnel.

If additional programmatic information is needed, please contact: Ms. Cherry Tsutsumida, Chief, Multidisciplinary Centers and Programs Branch, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, Room 4C–05, Rockville, Maryland 20857, Telephone: (301) 443–6817, FAX: (301) 443–8890.

This program is listed at 93.824 in the Catalog of Federal Domestic Assistance. It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR part 100).

Dated: September 22, 1992.

Robert G. Harmon,
Administrator.

Social Security Administration

Agency Forms Submitted to the Office of Management and Budget for Clearance

Normally on Fridays, the Social Security Administration publishes a list of information collection packages that have been submitted to the Office of Management and Budget (OMB) for clearance in compliance with Public Law 96–511, The Paperwork Reduction Act. The following clearance packages have been submitted to OMB since the last list was published in the **Federal Register** on Friday, September 11, 1992.

(Call Reports Clearance Officer on (410) 965–4149 for copies of package)

1. Medical Report (Individual With Childhood Impairment)—0960–0102. The information on form SSA–3827 is used by the Social Security Administration to determine whether or not an individual with a childhood impairment medically qualifies for benefits under the Social Security Act. The affected public consists of medical sources.

Number of Respondents: 12,000
Frequency of Response: 1
Average Burden Per Response: 30 minutes
Estimated Annual Burden: 6,000 hours

2. Medical Report on Adult (Child) With Allegation of Human Immunodeficiency Virus (HIV)

Infection—0960–0503. The information on forms SSA–4814 and SSA–4815 is used by the Social Security Administration to determine if an individual claiming to have HIV infection meets the requirements for presumptive disability benefits.

	SSA–4814	SSA–4815
Numbers of respondents	25,000	7,500
Frequency of response	1	1
Average burden per response	[1] 10	[1] 10
Estimated annual burden	[2] 4,167	[2] 1,250
Total annual burden	[2] 5,417	

[1] Minutes. [2] Hours.

OMB Desk Officer: Laura Oliven

Written comments and recommendations regarding these information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address:

OMB Reports Management Branch, New Executive Office Building, room 3208, Washington, DC 20503

Dated: September 22, 1992.

Judy Hasche,

Acting Reports Clearance Officer, Social Security Administration.

BILLING CODE 4190–29–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N–92–3514]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Angela Antonelli, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Kay F. Weaver, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708–0050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Ms. Weaver.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: September 18, 1992.

John T. Murphy,

Director, Information Resources Policy and Management Division.

Submission of Proposed Information Collection to OMB

Proposal: Statement of Taxes.

Office: Housing.

Description of the Need for the Information and its Proposed Use: Form HUD–434 will be used by the Department to record the necessary information pertaining to taxes to enable HUD to establish its tax records and to continue immediate payment of taxes. The form will also verify the taxes paid when the lender's claim is audited for insurance benefits.

Form Number: HUD–434.

Respondents: State or Local Government, Businesses or Other For-Profit and Federal Agencies or Employees.

Frequency of Submission: On Occasion.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Form HUD–434	433		1		.5		217

Total Estimated Burden Hours: 217.

Status: Extension.

Contact: Betty Belin, HUD, (202) 401–2168, Angela Antonelli, OMB, (202) 395–6880.

Dated: September 18, 1992.

[FR Doc. 92–23500 Filed 9–25–92; 8:45 am]

BILLING CODE 4210–01–M

Office of the Assistant Secretary for Housing-Federal Housing Commissioner

[Docket No. N–92–3513; FR–3340–N–01]

Debenture Recall of Certain FHA Debentures

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: This Notice announces a debenture recall of certain Federal Housing Administration debentures, in

accordance with authority provided in the National Housing Act.

FOR FURTHER INFORMATION CONTACT: Richard Keyser, room 9138, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 708–1591. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Pursuant to Section 207(j) of the National Housing Act, 12 U.S.C. 1713(j), and in accordance with HUD regulations at 24 CFR 207.259(e)(3), the Federal Housing Commissioner, with approval of the Secretary of the Treasury, announces the call of all Federal Housing Administration debentures with coupon rates of 7½ percent or higher, except for those debentures subject to "debenture lock agreements," that have been registered on the books of the Federal Reserve Bank of Philadelphia, and are, therefore, "outstanding" as of September 30, 1992. The date of the call is January 1, 1993. To insure timely payment, debentures should be presented to the Federal Reserve Bank of Philadelphia by December 1, 1992.

The debenture will be redeemed at par plus accrued interest. Interest will cease to accrue on the debentures as of the call date. Final interest on any called debentures will be paid with the principal at redemption. During the period from the dates of this notice to the call date, debentures that are subject to the call may not be used by the mortgagee for a special redemption purchase in payment of a mortgage insurance premium.

No transfer or denominational exchanges of debentures covered by the foregoing call will be made on the books maintained by the Treasury Department on or after October 1, 1992. This does not affect the right of the holder of a debenture to sell or assign the debenture on or after this date. Payment of final principal and interest due on January 1, 1993, will be made to the registered holder or assignee.

Instructions for the presentation and surrender of debentures for redemption will be provided to holders by the Department.

Dated: September 21, 1992.

James E. Schoenberger,

Associate General Deputy Assistant Secretary for Housing-Federal Housing Commissioner.

[FR Doc. 92–23501 Filed 9–25–92; 8:45 am]

BILLING CODE 4210-27-M

Office of the Assistant Secretary for Community Planning and Development

[Docket No. N–92–3511; FR–3338–N–01]

Report of the Federal Interagency Committee on Noise (FICON)

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice of availability of report.

SUMMARY: At the direction of the Environmental Protection Agency and the Federal Aviation Administration, the Federal Interagency Committee on Noise (FICON) was formed in December 1990, with a basic charter to review specific elements of the assessment of airports noise impacts contained in documents prepared pursuant to the National Environmental Policy Act (NEPA); to review the relationship of Federal Aviation Regulation (FAR) part 150 to NEPA; and to make recommendations regarding potential improvements. The FICON is composed of representatives of the Department of Transportation (Office of the Secretary and the Federal Aviation Administration), Defense, Justice, Veterans Affairs, and Housing and Urban Development; the Environmental Protection Agency; and the Council on Environmental Quality. The FICON has completed its charter and has issued its report, which contains policy recommendations and technical findings and conclusions. This notice of the availability of the FICON Report is being published separately by all FICON member agencies.

ADDRESSES: Any person may obtain a copy of the FICON Report by submitting a written request to: Spectrum Sciences and Software, Inc., 242 Vicki Leigh Road, Fort Walton Beach, FL 32548–1314. Any person may express his or her views on the FICON Report by submitting written comments to: Federal Aviation Administration, Office of Environment and Energy, AEE–300, 800 Independence Avenue, Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Mr. Joel Segal, Environmental Planning Division, Office of Environment and Energy, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410, telephone (202) 708–4225, or (202) 708–2565 (TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Background

The Federal Interagency Committee on Noise (FICON) was formed to review Federal policies that are used in the assessment of airport noise impacts. The FICON review focused primarily on:

- The manner in which noise impacts are determined, including whether aircraft noise impacts are fundamentally different from other transportation noise impacts;
- The manner in which noise impacts are described;
- The extent of impacts outside of Day-Night Average A-Weighted Sound Level (DNL) 65 decibels (dB) that should be reviewed in a National Environmental Policy Act (NEPA) document;
- The range of Federal Aviation Administration (FAA)-controlled mitigation options (e.g., noise abatement and flight track procedures) analyzed; and
- The relationship of the Federal Aviation Regulation (FAR) Part 150 process to the NEPA process, including ramifications to the NEPA process if they are separate, and exploration of the means by which the two processes can be handled to maximize benefits.

The FICON was organized into three subgroups to focus appropriately on the technical, legal, and policy issues associated with the assessment of airport noise impacts. The Technical Subgroup was tasked to review the body of science associated with methodologies and metrics for assessing airport noise impacts that have evolved since the 1980 meetings of the Federal Interagency Committee on Urban Noise (FICUN). The Policy Subgroup was tasked to review Federal policies that are used in the assessment of airport noise impacts. The Legal Subgroup reviewed the legal aspects of current and proposed Federal policies for assessing airport noise impacts. The Technical Subgroup's products were used as a basis for the policy findings, conclusions and recommendations in the Report.

FICON Report Conclusions

General

- There are no new descriptors or metrics of sufficient scientific standing to substitute for the present DNL cumulative noise exposure metric.
- The methodology employing DNL as the noise exposure metric and appropriate dose-relationships (primarily the Schultz curve for Percent Highly Annoyed (%HA)) to determine noise impact on populations is the proper one for civil and military aviation scenarios in the general vicinity of airports.

• Federal agencies generally conduct noise assessments at DNL levels of 65 dB and higher. For a variety of reasons, noise predictions and interpretations are frequently less reliable below DNL 65 dB. DNL prediction models tend to degrade in accuracy at large distances from the airport. Therefore, predictions of noise exposure and impact below DNL 65 dB should take the possibility of such inaccuracy into account.

• DNL is sometimes supplemented by other metrics on a case-by-case basis.

• Noise analyses should address impacts in the following areas: (1) Health and welfare; (2) environmental degradation/impact; and (3) land use planning.

• Complaints are an inadequate indicator of the full extent of noise effects on a population.

Health and Welfare

• The dose-effect relationship, as represented by DNL and %HA, remains the best available approach for analyzing overall health and welfare impacts for the vast majority of transportation noise analyses situations.

• The 10 dB nighttime penalty levied against noise during the 10 PM to 7 AM period is specifically designed to account for the intrusiveness of noise during this period and its potential impact on sleep. There are no new hard data that would justify a change in this penalty.

• If supplemental analysis for sleep disturbance is desired, an interim dose-response model developed by the AF Armstrong Laboratories may be used. Although this relationship is described in terms of Sound Exposure Level (SEL), single event metrics are of limited use in predicting and interpreting cumulative noise exposure impacts.

• Annoyance is a summary measure of the general adverse reaction of people to noise levels that cause speech interference; sleep disturbance; the desire for a tranquil environment; and the inability to use the telephone, radio, or television satisfactorily.

• No definitive evidence exists of nonauditory health effects from aircraft noise, particularly below DNL 70 dB.

• Long-Term Equivalent Sound Level $L_{eq(x)}$ (where X represents the time period of concern) or Time Above (TA) may be used for supplemental analysis of school and communications requirements indoor during specific hours.

• Public health and welfare effects below DNL 60 dB have not been established, but are assumed to decrease according to the decrease in %HA.

Environmental Degradation/Impact

• Under NEPA, environmental degradation might have to be assessed around airports even if there is no clear effect on public health and welfare. Other criteria might be appropriate.

• A 3 dB increase in the DNL environment represents a doubling of sound energy, and clearly is an indicator of the need for further analysis, although smaller increases may indicate similar need. In other words, the impact of a given incremental amount of change in noise levels depends, in part, upon the existing level of the noise environment.

• Recent technology and software advances in geographic information systems (GIS), noise methodology, and census data present an enhanced potential for detailed analysis of sound impacts on population and noise-sensitive areas. These technologies should be contained for use to determine noise impacts of present and proposed actions.

Land Use Planning

• DNL represents the accepted noise metric for input to compatible land use planning.

• For cumulative speech interference, Table 3–2, "Effects of Noise on People" (contained in the FICON Report, Volume II: Technical Report), provides a rough approximation of both outdoor and indoor predicted speech interference parameters for various levels of noise exposure as measured in DNL for residential land use only.

• There is a need for selective updating of land-use compatibility guidelines (including the Standard Land Use Coding Manual (SLUCM)), and for enhancing public understanding, through incentives and other programs, of the application and interpretation of guidelines.

Education of the Public

Education of the public should concentrate on the following frequently misunderstood issues:

•Environmental noise exposure is measured and described most generally by DNL. DNL should be defined clearly, and its significance and use should be explained clearly.

• The relation of DNL to %HA describes long-term community response to the overall sound environment (indices of health and welfare effects).

• Although the A-Weighted Maximum Sound Level for a single flyover is easily understood, it is useful only for analyzing short-term responses.

• Every change in the noise environment does not necessarily impact public health and welfare.

• Aircraft noise predictions below DNL 65 dB can be less accurate and should be interpreted with caution.

FICON Report Recommendations

• Continue use of the DNL metric as the principal means for describing long-term noise exposure to civil and military aircraft operations.

• Continue agency discretion in the use of supplemental noise analysis.

• Improve public understanding of the DNL, supplemental methodologies, and aircraft noise impacts.

• If screening analysis shows that noise sensitive areas will be at or above DNL 65 dB and will have an increase of DNL 1.5 dB or more, further analysis should be conducted of noise sensitive areas between DNL 60–65 dB having an increase of DNL 3 dB or more due to the proposed airport noise exposure.

• If the DNL 65 dB screening test calls for further analysis between DNL 60–65 dB, agency mitigation options should include noise sensitive areas between DNL 60–65 dB that are projected to have an increase of 3 dB or more as a result of the proposed airport noise exposure.

• If a FAR Part 150 program is included by the FAA as a NEPA mitigation measure, the FAA and the airport operator are responsible for ensuring that the commitment is carried out and the scope of the Part 150 study conforms to the scope of the NEPA noise analysis.

• Increase research on methodology development and on the impact of aircraft noise (R&D). To foster increased research, a standing Federal interagency committee should be established to assist agencies in providing adequate forums for discussions of public and private sector proposals identifying needed research and in encouraging the conduct of research in these areas. The following four initial R&D issues are recommended:

(i) Evaluate potential modifications to the 1980 FICUN land use compatibility table to improve its usefulness for planning for both routine land uses and noise-sensitive land uses.

(ii) Continue research into community reaction to aircraft noise, including sleep disturbance, speech interference, and nonauditory health effects of noise.

(iii) Investigative differences in perceptions of aircraft noise, ground transportation noise (highways and railroads), and general background noise.

(iv) Continue and expand research on the airport noise impacts of rotary-wing operations.

It is the FICON's belief that these recommendations will provide both immediate and long-term improvements in airport noise analysis. Federal interagency encouragement of a continuing review of airport noise analysis will provide a forum to address related public concerns.

While the FICON is seeking to achieve improved uniformity among Federal agencies in airport noise analysis, it must also recognize that agencies have differing legislative mandates and operating environments. These recommendations should be viewed as general guidance. Each Federal agency must determine how it can best use this guidance, supplementing it as appropriate to meet agency needs, within the framework of the NEPA requirements. The FICON Report does not address the adequacy of compliance with NEPA to date by the participating agencies, attempt to redefine thresholds of significance of impact under NEPA, nor modify the NEPA regulations or procedures of the agencies.

Public Review and Comment

Any person may express his or her views on the FICON Report by submitting written comments to: Federal Aviation Administration, Office of Environment and Energy, AEE-300, 800 Independence Avenue, Washington, DC 20591. Because the primary effect of the report's recommendations will be on the assessment of civil airport noise impacts for which the FAA is responsible, the FAA is serving as the focal point for the receipt of public comments. Copies of the written comments will be provided to all agencies participating in FICON.

The Department of Housing and Urban Development will review its procedures for evaluating airport noise impacts, if needed, based on the findings, conclusions, and recommendations in the report and any comments on the report. Any resulting change in regulations or procedures will be made through a separate agency procedure.

Authority: 42 U.S.C. 3535(d).

Dated: September 21, 1992.

Randall H. Erben,

Acting Assistant Secretary for Community Planning and Development.

BILLING CODE 4210-29-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NV-930-02-4212-11; N-53599]

Public Lands, Adjacent to Crescent Valley, Eureka County Nevada

ACTION: Notice.

SUMMARY: The following described public lands, adjacent to the Town of Crescent Valley, Eureka County, Nevada, have been examined and found suitable for classification for lease/purchase for recreation or public purposes under the provisions of the Recreation and Public Purposes Act of June 14, 1926, as amended (43 U.S.C. 869 et seq.). The lands would not be offered for lease/purchase until at least 60 days after the date of publication of this Notice in the **Federal Register**.

Mount Diablo Meridian, Nevada

T. 30 N., R. 48 E.,
Sec. 32, lots 17, 18, 25 thru 28.
Containing 26.37 acres, more or less.

The Eureka County Board of Commissioners has made application for the development of a fairground for the Town of Crescent Valley, Nevada. The lease/patent when issued, will be subject to the provisions of the Recreation and Public Purposes Act, and applicable regulations of the Secretary of the Interior, and will contain the following reservations to the United States:

1. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove such deposits from the same under application law and such regulations as the Secretary of the Interior may prescribe.

2. A right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.

And will be subject to:

1. A 10 ft. wide easement to Nevada Bell (N-46949) for buried telephone cable purposes.

2. A 400 ft. wide easement to Nevada Department of Transportation (NEV 044712) for state highway purposes.

Initially the lands would be leased, and after substantial development of the parcel may be purchased by the county under the special pricing program afforded to government entities.

The land is not required for any Federal purpose. The classification and subsequent lease/purchase are consistent with the Bureau's planning for the area.

Upon publication of this notice in the **Federal Register**, the above-described land will be segregated from all other forms of appropriation under the public land laws, including the general mining laws. The segregative effect shall terminate upon issuance of a patent or as specified in an opening order to be published in the **Federal Register**, whichever comes first.

Detailed information concerning this action is available for review at the Bureau of Land Management, Elko District, 3900 E. Idaho St., Elko, Nevada. For a period of 45 days from the date of publication of this Notice in the **Federal Register**, interested persons may submit comments regarding the proposed lease/purchase to the District Manager, Elko District Office, 3900 E. Idaho St., Elko, Nevada 89801. Any objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of timely objections, the classification of the lands described in this Notice will become effective 60 days from the date of publication in the **Federal Register**.

Dated: September 17, 1992.

Rodney Harris,

District Manager.

Montrose District Grazing Advisory Board Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given in accordance with 43 CFR Subpart 1784, that a meeting of the Montrose District Grazing Advisory Board will be held on October 6, 1992, in Montrose, Colorado.

DATE: A meeting is scheduled October 6, 1992.

FOR FURTHER INFORMATION CONTACT: Dave Kauffman, Bureau of Land Management, 2465 South Townsend, Montrose, Colorado, 81401, telephone (303) 249-7791.

SUPPLEMENTARY INFORMATION: The Board will convene at 10 a.m. on October 6, 1992, in the conference room at the Montrose District Office, Montrose, Colorado. Agenda items will include: minutes of the previous meeting, public presentations and requests, election results, range improvement project review, new Board project proposals, updates on current issues, and arrangements for the next meeting. The meeting will adjourn at 4 p.m.

The meeting is open to the public. Anyone wishing to make an oral statement must notify the District Manager prior to the meeting date. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Minutes of the board meeting will be maintained in the District Office and be available for public inspection and reproduction (during regular business hours) within thirty (30) days following the meeting.

Dated: September 17, 1992.

BILLING CODE 4310-JB-M

[CO-920-92-4111-15; COC9884]

Colorado; Proposed Reinstatement of Terminated Oil and Gas Lease

Under the provisions of Public Law 97-451, a petition for reinstatement of oil and gas lease COC9884, Moffat County, Colorado, was timely filed and was accompanied by all required rentals and royalties accruing from December 1, 1991, the date of termination.

No valid lease has been issued affecting the lands. The lessee has agreed to new lease terms for rentals and royalties at rates of $5 per acre and 16-2/3 percent, respectively. The lessee has paid the required $500 administrative fee for the lease and has reimbursed the Bureau of Land Management for the cost of this Federal Register notice.

Having met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Leasing Act of 1920, as amended, (30 U.S.C. 188 (d) and (e), the Bureau of Land Management is proposing to reinstate the lease effective December 1, 1991, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Questions concerning this notice may be directed to Joan Gilbert of the Colorado State Office at (303) 239-3783.

Dated: September 14, 1992.

Janet M. Budzilek,

Chief, Fluid Minerals Adjudication Section.

- Sec. 16;
- Sec. 17;
- Sec. 18: lots 5 to 29, inclusive;
- Sec. 19: lots 5 to 18, inclusive;
- Sec. 20;
- Sec. 21: N½;
- Sec. 23: N½NE¼, SW¼NE¼, E½NW¼;
- Sec. 24: N½, NE¼SW¼, N½SE¼, SW¼SE¼.

T. 19 S., R. 62 E.,
- Sec. 18: lots 1 to 4, inclusive, E½, E½W½;
- Sec. 19: lots 1 to 4, inclusive, E½, E½W½;
- Sec. 20.

Aggregating 7,534.27 acres (gross).

This parcel of land, situated in Clark County is being offered as a direct sale to the City of North Las Vegas and is not required for any federal purposes. The sale is consistent with the Bureau's planning system. The sale of this parcel would be in the public interest.

In the event of a sale, conveyance of the available mineral interests will occur simultaneously with the sale of the land. Acceptance of a direct sale offer will constitute an application for conveyance of those mineral interests. The applicant will be required to pay a $50.00 non-returnable filing fee for conveyance of the available mineral interests.

The patent, when issued, will contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.

2. Oil, gas, sodium, and potassium.

and will be subject to:

1. An easement for streets, roads and public utilities in accordance with the transportation plan for Clark County/ the City of North Las Vegas.

2. Those rights for railroad purposes which have been granted to the Los Angeles and Salt Lake Railroad Company by Permit No. CC-0360 under the Act of March 3, 1875, 18 Stat. 482, 43 U.S.C. 934-939.

3. Those rights for road purposes which have been granted to the Corps of Engineers by Permit No. Nev-045137 under the Act of January 13, 1916, 44 LD 513.

4. Those rights for power line purposes which have been granted to Nevada Power Company by Permit No. NEV-061985 and Nev-067348 under the Act of February 15, 1901, 31 Stat. 790, 43 U.S.C. 959.

5. Those rights for material site and road purposes which have been granted to the Nevada Department of Transportation by Permit No. N-32236 under the Act of August 27, 1958, 72 Stat. 916, 23 U.S.C. 317(A).

6. Those rights for power line purposes which have been granted to Nevada Power Company by Permit No. N-39815, N-42592 and N-49722 under the Act of October 21, 1976, 90 Stat. 2776, 43 U.S.C. 1761.

Publication of this notice if the **Federal Register** shall establish September 27, 1992 as the date the above described land will be segregated from all forms of appropriation under the public land laws, including the general mining laws. This segregation will terminate upon issuance of a patent or 270 days from the date of segregation, whichever occurs first.

Dated: September 11, 1992.

Ben F. Collins,

District Manager, Las Vegas District Office.

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget (OMB) for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). Copies of the proposed information collection requirement and related forms and explanatory material may be obtained by contacting the Service's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made directly to the Service Clearance Officer and the Office of Management and Budget, Paperwork Reduction Project (FWS 0002), Washington, DC 20503, telephone 202-395-7340.

Title: Estimate of Non-market Benefits of the Trinity River (California)

Instream Flows and Anadromous Fish Runs

OMB Approval Number: New information collection

Abstract: The decline of the Trinity River fishery resource was precipitated by the completion of the Trinity River division portion of the Central Valley Irrigation Project in 1963. Roughly 90 percent of the Trinity River stream flow was moved via conduits from the Trinity River to the Sacramento River. The consequent loss of aquatic habitat on the Trinity River led to drastic declines in salmon and steelhead production. The proposed survey will identify and quantify non-market social impacts of the decline in the fishery runs as well as the loss of regional jobs created by the sharp loss of Trinity River outdoor recreational opportunities. The estimation of the magnitude of the dollar losses and of the number of jobs lost will, in turn, facilitate comparison of the cultural and economic value of the fishery resource with the market value of the hydro-power and the crop production provided by the trans-basin water movements

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–626 (Preliminary)]

Pads for Woodwind Instrument Keys From Italy

AGENCY: United States International Trade Commission.

ACTION: Institution and scheduling of preliminary antidumping investigation.

SUMMARY: The Commission hereby gives notice of the institution of preliminary antidumping investigation No. 731–TA–626 (Preliminary) under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Italy of pads for woodwind instrument keys that are alleged to be sold in the United States at less than fair value.[1] The Commission must complete preliminary antidumping investigations in 45 days, or in this case by November 5, 1992.

For further information concerning the conduct of this investigation and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

EFFECTIVE DATE: September 21, 1992.

FOR FURTHER INFORMATION CONTACT: Woodley Timberlake (202–205–3188), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

SUPPLEMENTARY INFORMATION:

Background

This investigation is being instituted in response to a petition filed on September 21, 1992, by Prestini Musical Instruments Corporation, Nogales, AZ.

Participation in the Investigation and Public Service List

Persons (other than petitioners) wishing to participate in the investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in §§ 201.11 and 207.10 of the Commission's rules, not later than seven (7) days after publication of this notice in the **Federal Register**. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance.

[1] Pads for woodwind instrument keys are affixed to the keys of various woodwind instruments, e.g., saxophones, clarinets, oboes, and flutes. Such pads are provided for in subheading 9209.99.40 of the Harmonized Tariff Schedule of the United States (HTS).

Limited Disclosure of Business Proprietary Information (BPI) Under an Administrative Protective Order (APO) and BPI Service List

Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in this preliminary investigation available to authorized applicants under the APO issued in the investigation, provided that the application is made not later than seven (7) days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference

The Commission's Director of Operations has scheduled a conference in connection with this investigation for 9:30 a.m. on October 13, 1992, at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. Parties wishing to participate in the conference should contact Woodley Timberlake (202–205–3188) not later than October 9, 1992, to arrange for their appearance. Parties in support of the imposition of antidumping duties in this investigation and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the conference.

Written Submissions

As provided in §§ 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before October 16, 1992, a written brief containing information and arguments pertinent to the subject matter of the investigation. Parties may file written testimony in connection with their presentation at the conference no later than three (3) days before the conference. If briefs or written testimony contain BPI, they must conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to this investigation must be served on all other parties to the investigation (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.12 of the Commission's rules.

Issued: September 22, 1992.

By order of the Commission.

Paul R. Bardos,

Acting Secretary.

[332-336]

Probable Economic Effect of Extending a Tariff Rate Quota Under the United States-Canada Free-Trade Agreement

AGENCY: International Trade Commission.

ACTION: Institute of investigation.

SUMMARY: Following receipt on September 18, 1992, of a request from the U.S. Trade Representative (USTR), the Commission instituted investigation No. 332-336 under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)) to advise the President of its judgment as to the probable economic effect of modifying rule 18 of section XI of the rules in annex 301.2 of the United States-Canada Free Trade Agreement. This Rule contains annual quantitative limits (tariff rate quota) on U.S. imports from Canada of non-wool fabric and non-wool made-up textile articles that may receive the preferential rates of duty under the agreement for the period January 1, 1989-December 31, 1992, if such articles are woven or knitted in Canada from yarn produced or obtained in a third country and that meet other applicable conditions for preferred tariff treatment. According to the USTR, in discussions with representatives of the Government of Canada, the United States has agreed provisionally to extend this period to December 31, 1993. According to the USTR, this extension would provide continuity to similar provisions contained in the North American Free Trade Agreement.

The USTR asked that the Commission provide its advice not later than October 25, 1992.

EFFECTIVE DATE: September 23, 1992.

FOR FURTHER INFORMATION CONTACT: The Project Leader, Ms. Kim Freund (202-205-3456). Textiles and Apparel Division, Office of Industries, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436. For information on legal aspects of the investigation contact William Gearhart of the Commission's Office of the General Counsel (202-205-3091). The media should contact Edward Carroll, Acting Director, Office of Public Affairs (202-205-1819).

Hearing-impaired persons can obtain information on this study by contacting the Commission's TDD terminal on 202-205-1810.

Background

Section 202(d) of the United States-Canada Free-Trade Agreement Implementation Act authorizes the President, subject to the consultation and layover requirements of section 103 of the Act, to proclaim such modifications to the rules set forth in annex 301.2 of the agreement as may from time to time be agreed to by the United States and Canada. Section 103 of the Act requires, among other things, that the President obtain advice from the Commission.

Written Submissions

Interested persons are invited to submit written statements concerning the investigation. Written statements should be received by the close of business on October 7, 1992. Commercial or financial information which a submitter desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's Rules of Practice and Procedure (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. All submissions should be addressed to the Acting Secretary at the Commission's office in Washington, DC.

By order of the Commission.

Issued: September 24, 1992.

Paul R. Bardos,

Acting Secretary.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31618]

C&S Railroad Corporation Modified Rail Certificate; Revised Notice

On August 24, 1992, C&S Railroad Corporation (C&S) filed a notice for partial termination of its modified rail certificate of public convenience and necessity issued under 49 CFR 1150.23. By decision served April 18, 1990, in this proceeding, the Commission authorized C&S to operate over three rail lines as follows: (1) Between Packerton Junction, PA (milepost 0.0) and Haucks, PA (milepost 19.5), a distance of 19.5 miles [the Nesquehoning Branch]; (2) between East Mahanoy Junction, PA (milepost 103.0) and Lofty, PA (milepost 110.4), a distance of 7.4 miles [the Catawissa Branch]; and (3) between York Junction, PA (milepost 148.3) and Delano, PA (milepost 158.2), a distance of 9.9 miles [the Shimer Running Track].

C&S states that the Commission recently authorized another entity to acquire and operate the Catawissa Branch and the Shimer Running Track.[1] C&S intends to continue operating the Nesquehoning Branch. Therefore, by agreement with Carbon County and the Carbon County Railroad Commission, C&S is authorized to continue operating the rail line between Packerton Junction, PA (milepost 0.0), and Haucks, PA (milepost 19.5), a distance of 19.5 miles.

This notice must be served on the Association of American Railroads (Car Service Division), as agent of all railroads subscribing to the car-service and car-hire agreement, and on the American Short Line Railroad Association.

Dated: September 22, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree In United States v. Amsted Industries, Inc., d/b/a American Steel Foundries

In accordance with the policy of the Department of Justice, 28 CFR 50.7, notice is hereby given that a proposed Consent Decree in *United States of America* v. *Amsted Industries, Inc. d/b/a American Steel Foundries*, Civil Action No. C87-1284A, was lodged with the United States District Court for the Northern District of Ohio, on September 10, 1992. This action was brought pursuant to the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. 6901 *et seq.* The complaint alleged that Defendant Amsted violated certain requirements of RCRA and the regulations promulgated thereunder at its electric arc steel foundry in Alliance, Stark County, Ohio ("Alliance facility").

---

[1] Finance Docket No. 32075, *Reading Blue Mtn. & N. R. Co.—Acq. and Oper. Exemp.—Schulkill Co. Rail Trans. Auth.* (not printed), served July 15, 1992.

and at its disposal facility in Sebring, Mahoning County, Ohio ("Sebring facility").

Under the proposed Decree, Amsted would: (1) Develop and implement closure and post-closure plans for the Sebring facility; (2) develop and implement a RCRA groundwater monitoring program at the Sebring facility; (3) develop and implement a closure plan (and if necessary, a post-closure plan) for a "baghouse" area at the Alliance facility; and (4) comply with a number of generator, storage and disposal requirements at the Alliance facility. The Decree also requires Amsted to pay a civil penalty of $250,000.

The Department of Justice will receive comments on the proposed Consent Decree for a period of 30 days from the publication of this Notice. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, U.S. Department of Justice, Washington, DC 20530. All comments should refer to *United States* v. *Amsted Industries, Inc. d/b/a American Steel Foundries*, D.J. Ref. No. 90-7-1-397.

The proposed Consent Decree may be examined at the Office of the United States Attorney (Civil Division) for the Northern District of Ohio, 1404 E. Ninth St., suite 500, Cleveland, Ohio, 44114-1748 (216-363-3900); the Region V Office of the U.S. Environmental Protection Agency, 111 West Jackson Street, Third Floor, Chicago, Illinois 60604 (312-886-0556); and at the U.S. Department of Justice, Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue NW., Box 1097, Washington, DC 20004 (202-347-7829). A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section Document Center. In requesting a copy, please specify the documents required, together with a check payable to the "Consent Decree Library" for $9.75 ($0.25 per page reproduction costs).

John C. Cruden,

Chief, Environmental Enforcement Section, Environmental and Natural Resources Division.

BILLING CODE 4410-01-M

Consent Decree in Action Brought Under the Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a consent decree in *United States* v. *Hepworth, et al.*, Civil Action No. 91-0025-S-EJL, was lodged with the United States District Court for the District of Idaho on September 11, 1992. This Consent Decree resolves a Complaint filed by the United States against John Hepworth and John Lezamiz pursuant to section 113 of the Clean Air Act, 42 U.S.C. 7413.

The United States Department of Justice brought this action on behalf of the U.S. Environmental Protection Agency, seeking to recover a civil penalty against defendants Hepworth and Lezamiz for alleged violations of the Clean Air Act and the National Emission Standards for Hazardous Air Pollutants for asbestos ("the asbestos HESHAP") during the 1988 demolition of the Peterson building in downtown Twin Falls, Idaho. As part of the settlement in this case, defendant Hepworth and Lezamiz will pay the United States a civil penalty of $13,500 and will take adequate steps to ensure that future demolition and renovation operations of buildings they own will be conducted in compliance with the inspection, notification, and work practice requirements of the asbestos NESHAP.

The Department of Justice will accept written comments relating to this proposed Consent Decree for thirty (30) days from the date of publication of this notice. Please address comments to the Assistant Attorney General, Environment and Natural Resources Division, Department of Justice, P.O. Box 7611, Ben Franklin Station, Washington, DC 20044 and refer to *United States* v. *Hepworth, et al.*, DOJ number 90-5-2-1-1377.

Copies of the proposed Consent Decree may be examined at the Office of the United States Attorney, District of Idaho, 550 West Fort Street, Boise Idaho 83742, and at the U.S. Environmental Protection Agency, Office of the Regional Counsel, Region X, 1200 Sixth Avenue, Seattle, Washington, 98101. Copies of the proposed Consent Decree may also be obtained from the Consent Decree Library, 601 Pennsylvania Avenue, Box 1097, Washington, DC 20004, (202) 347-2072. A copy of the proposed Consent Decree may be obtained by mail or in person from the Consent Decree Library. When requesting a copy of the Consent Decree, please enclose a check in the amount of $3.75 (25 cents per page reproduction costs) payable to the Consent Decree Library.

John C. Cruden,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410-01-M

Notice of Lodging of Two Consent Decrees Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States* v. *Rohm and Haas Company, et al.*, Civil Action No 1:CV-92-1295 was lodged on September 16, 1992 with the United States District Court for the Middle District of Pennsylvania. The defendants in the action, Rohm and Haas Company and SmithKline Beecham Corporation, are respectively alleged to be a former owner and a successor-in-interest to a former owner of Whitmoyer Laboratories, Inc., the past and present owner of the Whitmoyer Laboratories Superfund Site in Jackson Township, Pennsylvania. The proposed consent decree requires the defendants to conduct certain cleanup activities at the Site under the oversight of the United States Environmental Protection Agency. The proposed consent decree also requires the payment of $250,000 to the Superfund in partial reimbursement of response costs incurred by the United States at the Site and obtains certain other relief.

Notice is hereby also given that a proposed consent decree in *United States* v. *Estate of Clarence W. Whitmoyer, Sr., et al.*, Civil Action No. 1:CV-92-1294 was lodged on September 16, 1992 with the United States District Court for the Middle District of Pennsylvania. The defendants in this action are the probate estate of the late Clarence W. Whitmoyer, Sr. and the probate estate's co-personal representatives sued in that capacity. Clarence W. Whitmoyer, Sr. is alleged to have been a corporate officer and director of Whitmoyer Laboratories, Inc. The proposed consent decree requires the payment of $2.9 million to the Superfund in partial reimbursement of response costs incurred by the United States at the Site and obtains certain other relief.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decrees. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should specifically refer to *United States* v. *Rohm and Haas Company, et al.*, D.J. reference #90-11-3-701, in the case of the first proposed consent decree, or

United States v. *Estate of Clarence W. Whitmoyer, Sr., et al.*, D.J. reference #90–11–2–505, in the case of the second proposed consent decree.

The proposed consent decrees may be examined at the Office of the United States Attorney for the Middle District of Pennsylvania, Suite 1162, Federal Building, 228 Walnut Street, Harrisburg, Pennsylvania 17108; the Region III Office of the Environmental Protection Agency, 841 Chestnut Building, Philadelphia, Pennsylvania 19107; and at the Consent Decree Library, 601 Pennsylvania Avenue NW., Box 1097, Washington, DC 20004, (202) 347–2072. A copy of the proposed consent decrees may be obtained in person or by mail from the Consent Decree Library. In requesting a copy of the proposed consent decree in *United States* v. *Rohm and Haas Company, et al.*, please enclose a check in the amount of $73.25 (25 cents per page reproduction costs), payable to the Consent Decree Library. In requesting a copy of the proposed consent decree in *United States* v. *Estate of Clarence W. Whitmoyer, Sr., et al.*, please enclose a check in the amount of $5.00 (25 cents per page reproduction costs), payable to the Consent Decree Library.

Roger Clegg,

Deputy Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410–01–M

Notice of Lodging of Consent Decree Pursuant to the Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, and pursuant to Section 113(g) of the Clean Air Act, 42 U.S.C. 7413(g), notice is hereby given that on August 5, 1992, a proposed Consent Decree in *United States* v. *Sharon Steel Corporation and Monessen, Inc.*, Civil Action No. 92–1724, was lodged with the United States District Court for the Western District of Pennsylvania. The Consent Decree concerns violations of the Clean Air Act, 42 U.S.C. 7401 *et seq.* ("the Act"), and National Emission Standard for Hazardous Pollutants for Benzene Emissions from Coke By-Product Recovery Plants, 40 CFR Part 61, Subpart L ("benzene coke NESHAP"), promulgated under Section 112(b) of the Act, as amended, 42 U.S.C. 7412, at Monessen's coke by-product plant located in Monessen, Pennsylvania.

The complaint alleges that the defendants failed to meet the NESHAP requirement that they install equipment designed to eliminate detectable levels of benzene emissions after Monessen's two-year waiver of compliance expired on September 15, 1991, and that the defendants have continued thereafter to operate the plant without complying with the benzene coke NESHAP.

The proposed Consent Decree requires the defendant to achieve compliance with the benzene coke NESHAP by October 13, 1992. The defendants are subject to stipulated penalties in the amount of $2,000 per day for any failure to meet this deadline. The consent decree also requires defendants to pay a civil penalty of $300,000 in nine installments over a two-year period, plus interest.

The Department of Justice will receive comments relating to the proposed Consent Decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Sharon Steel Corporation and Monessen, Inc.*, D.J. No. 90–5–2–1–1653.

The proposed Consent Decree may be examined at the office of the United States Attorney for the Western District of Pennsylvania, 633 U.S. Post Office and Courthouse, 7th Avenue and Grant Street, Pittsburgh, Pennsylvania 15219; the Region III Office of the U.S. Environmental Protection Agency, 841 Chestnut Building, Philadelphia, Pennsylvania 19107; and at the Consent Decree Library, 601 Pennsylvania Avenue, NW., Washington, DC 20044, 202–347–2072. A copy of the proposed Consent Decree may be obtained in person or by mail from the Consent Decree Library, 601 Pennsylvania Ave., NW., Box 1097, Washington, DC 20044. In requesting a copy, please refer to the referenced case and enclose a check payable to "Consent Decree Library" in the amount of $5.00 (25 cents per page reproduction costs).

Vicki A. O'Meara,

Acting Assistant Attorney General, Environment and Natural Resources Division.

[FR Doc. 92–23384 Filed 9–25–92; 8:45 am]

BILLING CODE 4410–01–M

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)

In accordance with Section 122(d)(2) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. 9622(d)(2), and Departmental policy, 28 CFR 50.7, 38 FR 19029 (July 17, 1973), notice is hereby given that on September 17, 1992 a proposed Consent Decree in *United States of America* v. *The Upjohn Company, et al.*, Civil Action No. 1:92–CV–659, was lodged with the United States District Court for the Western District of Michigan.

On September 17, 1992, the Complaint in this action was filed by the United States of America against The Upjohn Company, the City of Kalamazoo, the Charter Township of Oshtemo, and Kalamazoo County, Michigan, under sections 106 and 107 of CERCLA, 42 U.S.C. 9606 and 9607, seeking injunctive relief and reimbursement of costs incurred by the United States in response to a release or threatened release of hazardous substances from the West KL Avenue Landfill in Kalamazoo, Michigan.

Under the terms of the Consent Decree, the Defendants would implement the remedy selected by the U.S. Environmental Protection Agency (EPA), pay EPA oversight costs, and pay past costs of approximately $2 million. It is expected that some additional 200 parties in a related third-party action will join this settlement.

The Department of Justice will receive, for thirty (30) days from the date of publication of this notice, written comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, Department of Justice, P.O. Box 7611, Ben Franklin Station, Washington, DC 20044, and should refer to *United States* v. *The Upjohn Company, et al.*, D.O.J. Ref. No. 90–11–2–561.

The proposed Consent Decree may be examined at the office of the United States Attorney, Western District of Michigan, 110 Michigan Street NW., Grand Rapids, Michigan 49503; the Region V Office of the Environmental Protection Agency, 77 West Jackson Street, Chicago, Illinois 60604; and the Consent Decree Library, 601 Pennsylvania Ave., NW., Box 1097, Washington, DC 20004, (202) 347–2072. A copy of the proposed Consent Decree can be obtained in person or by mail from the Consent Decree Library. In requesting a copy, please enclose a check in the amount of either $42.25 for the Consent Decree with exhibits or $17.75 for the Consent Decree without the exhibits (25 cents per page

reproduction charge) payable to the Consent Decree Library.

Vicki A. O'Meara,

Acting Assistant Attorney General, Environmental Enforcement Section, Environment and Natural Resources Division, United States Department of Justice.

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to the Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, (38 FR 19029 March 29, 1984)), notice is hereby given that a proposed Consent Decree in *United States* v. *USS/KOBE Steel Company* was lodged with the United States District Court for the Northern District of Ohio on September 17, 1992. The proposed Consent Decree provides schedules and procedures for conducting pre-construction analyses and, if necessary, environmental reviews pursuant to the "Prevention of Significant Deterioration" and "New Source Review" provisions of the Clean Air Act and its implementing regulations. The proposed Consent Decree also provides for a civil penalty of $500,000 and a number of pollution control and pollution prevention measures.

The Department of Justice will receive, for thirty (30) days from the date of publication of this notice, written comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, U.S. Department of Justice, Washington, DC 20530 and should refer to *United States* v. *USS/KOBE Steel Company*, D.O.J. Ref. No. 90-5-2-1-1714.

The proposed Consent Decree may be examined at the Office of the United States Attorney, Suite 500, 1404 East Ninth Street, Cleveland, Ohio, 44114-1704; at the Region V office of the U.S. Environmental Protection Agency, 77 West Jackson Blvd., Chicago, Illinois, 60604; and at the Consent Decree Library, 601 Pennsylvania Avenue, NW., Washington, DC 20004 (202-347-2072). A copy of the proposed Consent Decree may be obtained in person or by mail from the Consent Decree Library, 601 Pennsylvania Avenue, NW., Box 1097, Washington, DC 20004. In requesting a copy, please enclose a check in the amount of $12.75 (25 cents per page reproduction charge) payable to Consent Decree Library.

Vicki A. O'Meara,

Acting Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

[Application No. D-9039, et al.]

Proposed Exemptions; PYCO ACE Operations Retirement Investment Plan, et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restriction of the Employee retirement income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or request for a hearing on the pending exemptions, unless otherwise stated in the Notice of Proposed Exemption, within 45 days from the date of publication of this Federal Register Notice. Comments and request for a hearing should state: (1) The name, address, and telephone number of the person making the comment or request, and (2) the nature of the person's interest in the exemption and the manner in which the person would be adversely affected by the exemption. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing.

ADDRESSES: All written comments and request for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Exemption Determinations, room N-5649, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. Attention: Application No. stated in each Notice of Proposed Exemption. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefits Administration, U.S. Department of Labor, room N-5507, 200 Constitution Avenue, NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of proposed exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of proposed exemption are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

PYCO ACE Operations Retirement Investment Plan (the Plan) Located in Baltimore, Maryland

[Application No. D-9039]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). If the exemption is granted the restrictions of sections 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the proposed cash sale (the Sale) by the Plan of Group Annuity Contract, No. GA-10,205 (the GAC) issued by Mutual Benefit Life Insurance

Company, Newark, New Jersey (Mutual Benefit) to PYCO ACE Operations, the sponsoring employer (the Employer) and a party in interest with respect to the Plan; provided that (1) the Sale is a one-time transaction for cash; (2) the Plan does not suffer any loss nor incur any expenses in the transaction; (3) the Plan receives no less than the fair market value of the GAC at the time of the Sale; and (4) the trustee of the Plan has determined that the proposed Sale is appropriate for the Plan and is in the best interests of the Plan and its participants and beneficiaries.

Summary of Facts and Representations

1. The Plan is a profit sharing plan with a cash or deferred compensation arrangement intended to meet the requirements of sections 401(a) and 401(k), respectively, of the Code. In the Plan, as of December 31, 1991, there were approximately 50 participants and total assets of approximately $197,624.57. The named fiduciary of the Plan is the Employer which performs its fiduciary duties through four individuals selected, two each, from the owners of the Employer. In addition, the Plan has a trustee (the Trustee), who is an officer of one of the corporations that owns the Employer. The Trustee's role is limited to that of custodian of assets of the Plan. The Trustee must see that the assets of the Plan are properly and legally held in trust as required by the Act. This responsibility entails overseeing the establishment and maintenance of the investment and disbursement accounts of the trust, and overseeing the procedures of those accounts. Currently, trust accounts are maintained with the Bank of Alexandria of Alexandria, Virginia to facilitate disbursements.

A third-party recordkeeper, Independent Plan Coordinators, Inc. of Alexandria, Virginia, has been delegated the responsibility for maintaining detailed individual accounts and records of investment elections for each participant in the Plan.

The Employer is a Maryland general partnership that is managed by four individuals (the Board of Control), which operates a cogeneration facility in Trona, California that produces and sells steam and electricity. The Employer is owned by two corporations that are general partners, with each partner possessing a 50 percent interest in both the capital and earnings interests of the partnership. One of the partners is COSI PYCO, Inc., a Maryland corporation, that is owned through various subsidiaries by Constellation Holdings, Inc., a Maryland corporation. Constellation Holdings, Inc. is wholly owned by the Baltimore Gas and Electric Company, a Maryland corporation, which is a state regulated utility company serving the city of Baltimore and all or a part of nine counties in Maryland. The second partner that owns the Employer is the Pyropower Operating Services Company, Inc., which is owned through various subsidiaries by A. Ahlstron Corporation, a corporation of Finland. This Finnish corporation is a multinational, diversified, privately-owned company which, through its subsidiaries, produces and delivers machinery, equipment, and systems for the pulp, paper, and power industries. A. Ahlstron Corporation and its subsidiaries also manufacture specialty papers, packing materials, cores and board, insulation materials, electrical accessories, and glassfibre.

2. The Plan authorizes the Employer to select and approve all investment vehicles that are offered to participants of the Plan. After the Employer, makes its selection of investment vehicles, the participants of the Plan make their own decisions as to which investment vehicles to invest the assets of their individual Plan accounts. From December 1, 1990, the effective date of the Plan, until June 28, 1991, all contributions made to the Plan were invested solely in 5 different investment accounts provided by the GAC issued by Mutual Benefit. At the direction of Plan participants, some of the funds invested in the GAC were placed in a Guaranteed Certificate Account that provides for yields of fixed rates of interest in a manner similar to that provided by a guaranteed investment contract.

When the Employer selected Mutual Benefit as the investment vehicle for the Plan, Mutual Benefit was rated "AA+" by Standard & Poors Rating (S&P Rating) and "A+" by A.M. Best (Best). On May 20, 1991, S&P Rating lowered its rating of Mutual Benefit to "A" and Best lowered its rating of Mutual Benefit to "A". As of July 25, 1992, S&P Rating suspended its rating of Mutual Benefit and Best downgraded its rating of Mutual Benefit to "NA–10, under state supervision."

These last changes of ratings made as of July 25, 1991, were precipitated by an order of the Superior Court of New Jersey (the Order), issued on July 16, 1991, that placed Mutual Benefit under the control of the Commissioner of Insurance of the State of New Jersey as Rehabilitator (the Rehabilitator). Under the terms of the Order, the holders of the GAC were prohibited from withdrawing their investments and are subject to future actions of the Rehabilitator.[1]

On July 17, 1991, the Employer decided to cease all future contributions to Mutual Benefit, including contributions accruing subsequent to the last contribution of June 28, 1991. Shortly thereafter, the Employer contracted with the American Funds Group to provide an investment vehicle for the Plan. All amounts withheld from Mutual Benefit, and all subsequent contributions to the Plan, have been invested in four mutual funds sponsored by the American Funds Group pursuant to the direction of the Plan participants. All fees charged by the American Funds Group in connection with establishing these new investment vehicles have been paid by the Employer.

On August 7, 1991, the Superior Court of New Jersey removed restrictions on withdrawals of pension deposits held by Mutual Benefit in "separate accounts." This court order of August 7, 1991, enabled the Employer to withdraw all investments under the GAC, except for the investments in the Guaranteed Certificate Account portion of the GAC. Those portions removed from the GAC were invested at the direction of the Plan participants, with the American Funds Group. As of December 31, 1991, the Plan investments in the Guaranteed Certificate Account of the GAC, together with credited interest, totalled $62,350.98, which constituted approximately 31.5 percent of the total assets of the Plan on that date.

3. The GAC matures on August 1, 1995, and the Employer represents that it is doubtful that the full amount of the Plan's investment in the Guaranteed Certificate Account of the GAC, and the interest credited thereto, will be released by Mutual Benefit at the date of maturity. The participants of the Plan have been informed of the situation and problems with respect to Mutual Benefit. In addition to being concerned about the current restrictions on the funds in the Guaranteed Certificate Account of the GAC (that is, restrictions for purposes of final distributions upon termination of employment, security for loans from the Plan, and changes in investment elections), the participants of the Plan are concerned that they may not recover the full investment in the GAC.

---

[1] The Department notes that the decision to offer Mutual Benefit as the investment vehicle is governed by the fiduciary responsibility requirements of Part 4, Subtitle B, Title I of the Act. In this regard, the Department herein is not proposing relief for any violations of Part 4 of the Act which may have arisen as a result of the acquisition and holding of the GAC issued by Mutual Benefit.

In order to eliminate the risks of continuing to hold the GAC for the participants of the Plan, and to allow assets currently invested under the GAC in the Guaranteed Certificate Account to be transferred to other investments through the American Funds Group, the Employer has proposed purchasing the GAC from the Plan for cash in the amount of the total face value of the Guaranteed Certificate Account, plus interest accrued at the contract rate of 8.75 percent through the date of the purchase. The face value of the Guaranteed Certificate Account is the total amount paid by the Plan to Mutual Benefit and invested in the Guaranteed Certificate Account, less any withdrawals previously made from the Guaranteed Certificate Account.

The Employer represents that the Plan will not incur any expenses from the Sale, and all expenses incurred from the Sale will be borne by the Employer.

The Employer also represents that there has been filed with the Internal Revenue Service a request for a closing agreement pursuant to the Internal Revenue Procedure 92–16 [2] The Employer represents that it does not intend to claim a tax deduction under section 404 of the Code for any part of the purchase price to be paid to the Plan.

4. The Trustee of the Plan is represented by the applicant to have undertaken the responsibility for determining, on behalf of the Plan participants, the adequacy of the proposed consideration for the Sale of the GAC to the Employer. It is also represented that the Trustee has reviewed and considered the Employer's proposal to purchase the GAC from the Plan and has determined that such purchase would be in the best interests of the participants and beneficiaries of the Plan. In this regard, the Trustee has determined that the proposed consideration to be given for the GAC, the face value of the Guaranteed Certificate Account, plus accrued interest, will equal or exceed the fair market value of the GAC, because of the financial instability of Mutual Benefit.

In order for the Trustee to determine the fair market value of the GAC, Krish Actuarial Consultants of Laurel, Maryland were employed to make an independent appraisal of the Guaranteed Certificate Account, remaining in the GAC. Mr. S. Krishnamurthy, FIA, ASA, and President of Krish Actuarial Consultants, represents that he is an Enrolled Actuary and is familiar with the requirements of the Department and the Internal Service for valuing pension plan assets. Mr. Krishnamurthy determined that the fair market value of the GAC, as of March 31, 1992, was not more than the face value (as defined above) plus accrued interest to date of Sale.

5. In summary, the applicant represents that the transaction satisfies the criteria of section 408(a) of the Act for the following reasons: (a) The Plan will receive cash for the GAC in the amount of the face value of the Guaranteed Certificate Account plus accrued interest as of the date of the Sale, which a qualified, independent appraiser has determined to be not less than the fair market value of the GAC; (b) the transaction will enable the Plan and its participants and beneficiaries to avoid any risk associated with the continued holding of the GAC, and will permit the redirecting of Plan assets to safer investments; (c) the Plan will not incur any expenses with respect to the proposed transaction; and (d) the Trustee has determined that the Sale at the proposed price is in the best interests of the participants and beneficiaries of the Plan.

FOR FURTHER INFORMATION CONTACT: Mr. C.E. Beaver of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Carmine P. Errico, M.D., IRA Rollover Trust (the IRA), Located in Jersey City, New Jersey

[Application No. D–9047]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, August 10, 1990). If the exemption is granted, the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed cash sale of a certain vacant lot (Lot 28.01) by the IRA to Lyn Errico, a disqualified person with respect to the IRA; provided that the IRA receives the greater of: (1) The fair market value of Lot 28.01 as determined at the time of the sale by an independent qualified appraiser; or (2) the initial acquisition cost of Lot 28.01 plus the aggregate holding costs incurred by the predecessor plan to the IRA and subsequently by the IRA since the initial acquisition of Lot 28.01; and further provided that the following conditions are satisfied: [3]

(a) The proposed sale will be one-time cash transaction; and

(b) The IRA will pay no expenses associated with the sale.

Summary of Facts and Representations

1. The IRA is an individual retirement account which was established October 26, 1989. Carmine P. Errico, M.D. (Dr. Errico) is the sponsor of the IRA. As of May 8, 1992, the IRA had total assets of $2,151,667. Dr. Errico's specialty is obstetrics and gynecology. He is an employee of Somerset OB/GYN Associates which is a professional association.

2. On July 12, 1985, the Carmine Errico, M.D. P.A. Defined Benefit Pension Plan (the Plan), the predecessor plan to the IRA, purchased Lot 28.01 for investment purposes from Joan A. Mehl, an unrelated third party, for a total cash consideration of $250,000. On the same date, Lyn Errico, the wife of Dr. Errico, purchased Lots 28 and 28.02 (collectively, the Lots) also from Joan A Mehl for a total of $100,000 in cash. Specifically, Lot 28 contains 5.63 acres, Lot 28.01 contains 7.5 acres and Lot 28.02 contains 3.19 acres. Lots 28 and 28.02 are contiguous and are adjacent on the east to Lot 28.01.

3. Subsequent to the purchase of Lot 28.01, the Plan was terminated and all of its assets were rolled over into the IRA between October 26, 1989 and November 20, 1989. On November 20, 1989, Lot 28.01 was rolled over into the IRA.[4] The applicant represents that Lot 28.01 has never been leased or used by a disqualified person while an asset of the Plan or the IRA. The applicant also notes that Lot 28.01 has never been encumbered by debt while held as an asset by either the Plan or the IRA. The Plan paid $10,750 in property taxes during the time it held Lot 28.01 as an asset, and the IRA paid property taxes in the aggregate amount of $18,908.91 for the period beginning January 1, 1990 to the present.

---

[2] Internal Revenue Procedure 92–16 provides for a temporary closing agreement program to settle certain tax liabilities that arise out of transactions between an employer-sponsor and the trust of a qualified defined contribution plan.

[3] Pursuant to CFR 2510.3–2(d), there is no jurisdiction with respect to the IRA under Title I of the Act. However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

[4] The Department expresses no opinion as to whether the Plan's acquisition and holding of Lot 28.01 until rollover into the IRA violated any provision of Part 4 of Title I of the Act. Nor is the Department expressing an opinion as to whether the holding of Lot 28.01 by the IRA was a prohibited transaction under section 4975(c)(1) (D) and (E) of the Code, and no relief is provided herein. The Department notes that section 408(a) of the Code provides that the term "individual retirement account" means a trust created or organized in the United States for the exclusive benefit of an individual or his beneficiaries.

4. Lyn Errico is proposing to purchase Lot 28.01 from the IRA in a one-time cash transaction. It is represented that the IRA will not incur any expenses as a result of the sale. In this regard, an appraisal of Lot 28.01 was performed, as of February 1, 1992, by Robert McNeely Vance (Mr. Vance), an independent qualified appraiser. Mr. Vance represents that Lot 28.01 is located in Clinton Township, Hunterdon County, New Jersey and consists of approximately 7.5 acres of vacant land. Mr. Vance relied on the direct sales comparison or the market approach and determined that, as of February 1, 1992, the fair market value of Lot 28.01 was $250,000. In a letter of April 23, 1992, Mr. Vance addressed the issues of: (1) Why Lot 28.01 did not appreciate in value since the initial acquisition; and (2) whether the adjacency of Lot 28.01 to Lots 28 and 28.02, which are owned by Lyn Errico, merits a premium above the fair market value to Lyn Errico as purchaser in the proposed transaction. Mr. Vance states that due to environmentally related regulations controlling development and use in wetland areas which were implemented since the initial acquisition, Lot 28.01 cannot be independently developed. Furthermore, because Lot 28.01 is bounded on the north and south by highways, on the west by fully developed properties, its only value would be to the owner of the adjacent Lots to the east, who is Lyn Errico. Therefore, the value of Lot 28.01 consists only of its ability to transfer development capacity to the adjacent lots, since it cannot be developed on its own. Because of these concerns, if Lot 28.01 were to be evaluated as if standing alone, on its own merits, Mr. Vance concludes that the fair market value would be nominal. Mr. Vance further stated that the fair market value of $250,000 is the maximum value for Lot 28.01 due to the fact that it cannot accommodate development within its own boundaries. As such, the value of $250,000 takes into consideration the fact that Lot 28.01 can only be used in conjunction with Lots 28 and 28.02 and thus includes the maximum premium value to the purchaser who also owns the adjacent Lots. However, because the aggregate holding costs combined with the initial acquisition cost of Lot 28.01 ($29,658.91 + $250,000 = $279,658.91) are greater than the current fair market value of Lot 28.01, the applicant has determined that the IRA will receive the greater of: (1) The fair market value of Lot 28.01 as determined at the time of the sale by an independent qualified appraiser; or (2) the initial acquisition costs for Lot 28.01 plus the aggregate holding costs incurred by the Plan and the IRA since the initial acquisition of Lot 28.01.

5. It is represented that the transaction is desirable for the IRA as the sale will increase the liquidity of the IRA's investment portfolio. The transaction is protective of the IRA because the fair market value of Lot 28.01 was determined by an independent qualified appraiser and the IRA in this transaction will receive the greater of: (1) the fair market value of Lot 28.01 as determined at the time of the sale by an independent qualified appraiser; or (2) the initial acquisition cost of Lot 28.01 plus the aggregate holding costs incurred by the Plan and subsequently by the IRA since the initial acquisition of Lot 28.01. It is also represented that the IRA would not be able to recoup the fair market value in an arm's-length sale because the value of Lot 28.01 is contingent on the two adjacent Lots which are owned by Lyn Errico.

6. In summary, the applicant represents that the transaction satisfies the statutory criteria of section 4975(c)(2) of the Code because:

(a) The proposed sale will be a one-time cash transaction;

(b) The IRA in this transaction will receive the greater of: (1) the fair market value of Lot 28.01 as determined at the time of the sale by an independent qualified appraiser; or (2) the initial acquisition cost of Lot 28.01 plus the aggregate holding costs incurred by the Plan and subsequently by the IRA since the initial acquisition of Lot 28.01;

(c) The IRA will pay no expenses associated with the sale;

(d) The sale will allow the IRA to liquidate its assets; and

(e) Dr. Errico as the sponsor of the IRA would be the only individual affected by the transaction.

Notice to Interested Persons

Because Dr. Errico is the sole participant of the IRA, it has been determined that there is no need to distribute the notice of proposed exemption to interested persons. Comments and requests for a hearing are due 30 days from the date of publication of this notice in the **Federal Register**.

[Application No. D-9053]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). If the exemption is granted, the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to: (1) the proposed sale by the individual accounts in the Plan of John L. Beauchamp, Jr. (the Beauchamp Account) and Rong Dad Ho (the Ho Account) of each Account's respective 50% share of a certain 91.4 acre parcel of land and the fruit crop grown thereon (Grove Property I) to John L. Beauchamp, Jr., M.D. (Dr. Beauchamp) and Rong Dad Ho, M.D. (Dr. Ho), respectively; (2) the proposed sale by the individual account in the Plan of Douglas M. Roy (the Roy Account) of a certain 39.4 acre parcel of land and the fruit crop thereon (Grove Property II) to Douglas M. Roy, M.D. (Dr. Roy); and (3) the proposed sale by the individual account in the Plan of Arnold J. Spanjers (the Spanjers Account; collectively, the Accounts) of a certain 74.3 acre parcel of land and the fruit crop thereon (Grove Property III) to Arnold J. Spanjers, M.D. (Dr. Spanjers), provided that the following conditions are met:

(a) Each sale is a one-time transaction for cash;

(b) Each Account receives an amount which is no less than the greater of either the fair market value of the land on the Grove Property owned by such Account as appraised on January 15, 1992, or the fair market value of such land on the date of sale as established by an independent appraisal;

(c) Each Account receives the fair market value of the fruit crop on the Grove Property owned by such Account as of the date of sale, as established by an independent appraisal;

(d) With respect to the Beauchamp Account and the Ho Account, such Accounts receive an amount, as described in (b) and (c) above, which reflects each Account's 50% ownership interest in Grove Property I; and

(e) The Accounts do not pay any commissions or other expenses associated with the transactions.

Summary of Facts and Representations

1. The Plan is a defined contribution plan which, as of December 31, 1991, had 49 participants and total assets of $14,801,260. The trustee of the Plan is Sun Bank, N.A. (the Bank), located in Orlando, Florida. The Bank is not the decision-maker for the investment of the Plan's assets involved in the subject transactions. The Plan allows for participants to direct the investment of assets held in their individual accounts. All of the Accounts are individually-directed accounts in accordance with the terms of the Plan. As of December 31, 1991, the total assets of each of the Accounts was as follows: (a) $1,031,093 for the Beauchamp Account; (b) $1,157,690 for the Ho Account; (c) $869,904 for the Roy Account; and (d) $1,804,382 for the Spanjers Account.

2. The Plan is sponsored by Radiology Consultants, P.A. (the Employer). The Employer is a Florida professional corporation that provides medical services in the field of radiology. The Employer is located at 306 Avenue C, NE., Winter Haven, Florida.

Dr. Beauchamp, Dr. Ho, Dr. Roy, and Dr. Spanjers (together, the Applicants) are all shareholders, directors and employees of the Employer.

3. The Grove Properties are parcels of land located in Hendry County, Florida, which are used for growing oranges. Grove Property I, a 91.4 acre parcel of land with 85.7 acres of bearing orange grove, is owned jointly by the Beauchamp Account and the Ho Account. Grove Property II, a 39.4 acre parcel of land with 36.9 acres of bearing orange grove, is owned by the Roy Account. Grove Property III, a 74.26 acre parcel of land with 69.1 acres of bearing orange grove, is owned by the Spanjers Account. The Bank, as trustee of the Plan, charges all expenses relating to the Grove Properties to the respective Accounts and credits all earnings, gains and losses from the Grove Properties to such Accounts.

The operation and maintenance of the Grove Properties is conducted by Cooperative Producers, Inc. (CPI). CPI handles the irrigation, planting and picking of the fruit on the Grove Properties, pursuant to service contracts with the Plan. The marketing and sales of the fruit on the Grove Properties is handled by Haines City Citrus Growers Association (Haines) for Grove Properties I and III and by Winter Haven Citrus Growers Association (Winter Haven) for Grove Property II. CPI, Haines and Winter Haven are all unrelated to the Employer and its affiliates. The Applicants state that at no time during the Plan's ownership of the Grove Properties have such properties been leased to, or used by, any party in interest with respect to the Plan. The Applicants and their affiliates do not own any property which is adjacent to the Grove Properties.

4. Grove Property I was purchased by the Plan, as an investment for the Beauchamp Account and the Ho Account pursuant to the investment directions of Drs. Beauchamp and Ho, respectively, on March 15, 1984 from Hickory Branch Groves, Inc. (Hickory Groves), an unrelated party, for $158,295. The Beauchamp and Ho Accounts each paid 50% of the purchase price for the property and each Account owns a 50% interest in the property. The Beauchamp and Ho Accounts had received a total of approximately $178,123 in income, and incurred a total of approximately $565,402 in operational expenses for Grove Property I, as of December 31, 1991. All income and expenses for Grove Property I have been shared equally by the Beauchamp and Ho Accounts.

Grove Property I was appraised on January 15, 1992 by Lloyd N. Race, SRA, an independent, qualified real estate appraiser in Winter Haven, Florida (the Appraiser), as having a fair market value of $1,200,000, as of December 21, 1991. The Appraiser states that the land on Grove Property I had a fair market value of $1,050,000 and the fruit had a fair market value of $150,000, as of such date.

5. Grove Property II was purchased by the Plan, as an investment for the Roy Account pursuant to the investment direction of Dr. Roy, on March 15, 1984 from Hickory Groves for $64,436.13. The Roy Account had received a total of approximately $54,104 in income, and incurred a total of approximately $275,512 in operational expenses for Grove Property II, as of December 31, 1991.

Grove Property II was appraised on January 15, 1992 by the Appraiser as having a fair market value of $460,000, as of December 21, 1991. The Appraiser states that the land on Grove Property II had a fair market value of $390,000 and the fruit had a fair market value of $70,000 as of such date.

6. Grove Property III was purchased by the Plan, as an investment for the Spanjers Account pursuant to the investment direction of Dr. Spanjers on March 15, 1984 from Hickory Groves for $189,744.43. The Spanjers Account had received a total of approximately $133,922 in income, and incurred a total of approximately $433,027 in operational expenses for Grove Property III, as of December 31, 1991.

Grove Property III was appraised on January 15, 1992 by the Appraiser as having a fair market value of $875,000, as of December 21, 1991. The Appraiser states that the land on Grove Property III had a fair market value of $740,000 and the fruit had a fair market value of $135,000, as of such date.

7. By letter dated May 15, 1992, the Appraiser represents that all appraisals made of the fruit value on the Grove Properties were based on the fruit crop's maturity as of the date of the appraisals. The Appraiser states that to the extent the fruit on the Grove Properties was not ready to be harvested, its value was discounted by the number of months remaining before it would be fully mature. The Appraiser's determination of the maturity of the fruit was made in accordance with the fruit maturity charts customarily used in the Florida citrus industry for fruit valuation. The price of the fruit was determined by the Appraiser based on the Florida Citrus Mutual Market News Bulletin (the Bulletin), an independent, third party source which provides current market price quotations for Florida citrus. However, the Appraiser states that because fruit prices fluctuate on a daily basis, each appraisal factored into the price quoted in the Bulletin a "stabilized price" or market average for such fruit prices in determining the fair market value of the fruit on the Grove Properties.

8. The Applicants state that the Grove Properties were purchased by the Accounts primarily for potential investment appreciation. However, the Applicants represent that the Grove Properties have not been profitable investments because of the operating expenses associated with the properties and the unrelated business taxable income incurred by the Accounts in connection with the properties. The Applicants also believe that the market value of the Grove Properties will decline in the near future due to substantial increases in imported citrus products which will adversely affect the prices for domestic citrus crops. In addition, the Grove Properties represent a significant percentage of the total assets of each of the Accounts (i.e. approximately 47% of the Beauchamp Account; 42% of the Ho Account; 53% of the Roy Account, and 48% of the Spanjers Account). Thus, the Applicants state that it would be in the best interests of the Accounts to sell the Grove Properties to enable the Accounts to diversify their investment portfolio and acquire other assets yielding a higher rate of return.

9. The Applicants represent that the market for citrus groves is currently depressed and that it is unlikely that the Accounts will be able to sell the Grove Properties to an unrelated party at a good price within a reasonable time. The Applicants propose to purchase the Grove Properties for cash at a price which is at least equal to the fair market value of the properties, as established by the Appraiser. The Applicants state that a sale of the Grove Properties by the Accounts at their fair market value at the present time will provide the Accounts with an amount which will exceed in each instance the acquisition and holding costs the Accounts have incurred for the Grove Properties. The Appraiser will update all appraisals of the Grove Properties prior to the proposed transactions to provide the most current market prices for the land and the fruit. The purchase price to be paid by the Applicants for the land on the Grove Properties in each instance will be equal to the greater of either (i) the fair market value of the land as currently appraised by the Appraiser, or (ii) the fair market value of the land as of the date of sale, as established by the Appraiser's updated appraisals. However, because of the volatility and fluctuation in the value of the fruit on the Grove Properties, the Applicants will purchase the fruit crop at a price equal to the fair market value of the fruit as of the date of sale, as established by the Appraiser based on the maturity of the fruit and current market prices for the fruit at the time of the transactions. The Appraiser will determine the fruit's maturity and current market price using the same valuation methodology which was used in the prior appraisals of the Grove Properties (see discussion in Item 7 above involving "stabilized price").

Neither the Plan nor the Accounts will not pay any commissions or other expenses for the proposed transactions.

10. In summary, the Applicants represent that the proposed transactions will meet the statutory criteria of section 408(a) of the Act because: (a) Each sale will be a one-time transaction for cash; (b) the Accounts will receive in each instance a price equal to the greater of either (i) the fair market value of the land on the Grove Properties as currently appraised by the Appraiser, or (ii) the fair market value of such land as of the date of sale, as established by the Appraiser's updated appraisal; (c) the Accounts will receive in each instance the fair market value of the fruit on the Grove Properties as of the date of sale, as established by the Appraiser based on the maturity of the fruit and the "stabilized price" methodology in determining the current market prices for the fruit; (d) no commissions or other expenses will be paid by either the Plan or the Accounts for the proposed transactions; and (e) the transactions will enable to Accounts to eliminate the expenses being incurred in connection the operation and maintenance of the Grove Properties as well as the taxes on unrelated business taxable income from the properties and will allow the Accounts to reinvest the proceeds in other investments yielding a greater return.

Notice to Interested Persons: because the Applicants are the only participants in the Plan to be affected by the proposed transactions, it has been determined that there is no need to distribute the notice of proposed exemption to interested persons. Comments and requests for a public hearing are due 30 days from the date of publication of this proposed exemption in the **Federal Register**.

First Citizens Bank and Trust Company And Adopting Companies Pension Plan (the Plan) Located in Raleigh, North Carolina

[Application No. D–8834]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). If the exemption is granted the restrictions of sections 406(a), 406(b)(1) and (b)(2), and 407(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to (1) the proposed continued holding by the Plan after December 31, 1992, of shares of common stock (the Stock) of First Citizens BancShares, Inc. (BancShares), the parent corporation of the sponsor of the Plan; and (2) the proposed acquisition, holding, and exercise by the Plan of a put option (the Put) with respect to the Stock; provided that the following conditions are satisfied:

(A) The Plan's interests for all purposes with respect to the Stock are represented by Wachovia Bank of North Carolina, N.A. (the Fiduciary) for the duration of the Plan's holding of any of the Stock;

(B) The Fiduciary will take whatever action is necessary to protect the Plan's rights, including, but not limited to the exercise of the Put, if the Fiduciary, in his sole discretion, determines that such exercise is appropriate;

(C) The Fiduciary retains the right under the Put to require Bancshares, at any time, to purchase some or all of the Stock from the Plan for the greater of (1) the Stock's fair market value as of December 31, 1992, or (2) the fair market value of the Stock as of the date of such sales;

(D) BancShares' obligations under the Put remain secured by an escrow account containing cash or U.S. government securities worth at least 25 percent of the fair market value of the Stock as of December 31, 1992, as long as the Plan continues to hold any shares of the Stock; and

(E) Additional shares of the Stock are not voluntarily acquired on behalf of the Plan unless such acquisition satisfies the requirements of sections 406(a)(1)(E), 407(a) and 408(e) of the Act.[5]

Summary of Facts and Representations

1. The Plan is a defined benefit pension plan sponsored by First Citizens Bank and Trust Company (the Bank), a North Carolina corporation with its principal place of business in Raleigh. The Bank serves as trustee of the Plan, which is also sponsored by the American Guaranty Insurance Company and the First Citizens Mortgage Company, each of which is a subsidiary of the Bank. The Bank is a subsidiary of BancShares, a Delaware public corporation. BancShares was incorporated on August 7, 1986, as successor to First Citizens Corporation (FCC), which was a bank holding company of which the Bank was the sole subsidiary. On October 21, 1986, FCC was merged into BancShares, which became the surviving corporation and the sole shareholder of the Bank.

2. As of December 31, 1990, BancShares had authorized 20 million shares of Class A Common Stock (Class A Stock), one dollar par value per share, of which 7,422,037 shares were outstanding, and 5 million shares of Class B Common Stock (Class B Stock), one dollar par value per share, of which 1,853,068 shares were outstanding. The Class A Stock is listed on the National Association of Securities Dealers Automated Quotation System (NASDAQ) national market system. The Class B Common Stock is not listed by

[5] An acquisition of Stock shall not be deemed to have occurred if the Plan acquires shares of the Stock as a result of a stock dividend or stock split.

NASDAQ and trades are privately consummated. The Bank represents that the total volume of trading in the Class A Stock during 1990 was 245,942 shares and that the total number of shares of the Class B Common Stock traded during 1990 was 15,866 shares.

3. As of September 16, 1991, the Plan owned 126,400 shares of Class A Stock (the Class A Shares) and 31,600 shares of Class B Stock (the Class B Shares). The Bank represents that the Plan acquired the Class A and Class B Shares (together, the Stock) prior to December 17, 1987 through a series of corporate reorganizations. As of December 31, 1991, the Plan had total assets of $97,851,075 and the Bank represents that the total fair market value of the Class A Shares and the Class B Shares was $3,476,000 and $869,000, respectively, constituting less than 5 percent of the assets of the Plan. The Bank represents that at the time of the Plan's acquisition of the Stock, and at all times thereafter, the Class A Shares and the Class B Shares each represented less than twenty five percent of the issued and outstanding stock of its respective class. As of December 31, 1990, 65.96 percent of the Class A Stock, and 67.50 percent of the Class B Stock, were beneficially owned by directors and executive officers of BancShares and the Bank.

Because directors and executive officers of the Plan sponsor and its sole shareholder own in excess of 50 percent of the Class A and Class B Stock, the Bank represents that the Plan's continued holding of the Stock beyond December 31, 1992 would be prohibited by section 406(a)(1)(E) of the Act, as a result of the failure to satisfy the definition of "qualifying employer security" contained in section 407(d)(5). The Bank is proposing that the Plan continue to hold the Stock after December 31, 1992, in addition to the Put which will enable the Plan to require the Bank to buy the Stock back from the Plan, and is requesting an exemption to permit such transactions under the terms and conditions described herein.

4. The interests of the Plan with respect to the Stock will be represented by an independent fiduciary, Wachovia Bank of North Carolina (the Fiduciary), appointed by the Bank, in its capacity as Plan trustee, pursuant to an agreement (the Agreement) which designates the Fiduciary as manager of the Plan's investment in the Stock. Under the Agreement, the Fiduciary has full investment discretion with respect to the Stock, including the authority to make all decisions regarding continued holding or disposition of the Stock, the voting of proxies, and the exercise of any conversion privilege, tender offer, or similar right relating to the Stock. The Fiduciary is authorized to direct that the Stock, or any portion thereof, be sold at any time that the Fiduciary determines to be in the best interest of the Plan, including the authority to require the Stock to be purchased by Bancshares in accordance with the terms of the Put, described herein. The Fiduciary is empowered to give such other directions to the Bank in its capacity as Plan trustee as are appropriate for the execution of the Fiduciary's duties under the Agreement. The Agreement specifies that the Fiduciary is an "investment manager" and a "fiduciary" with respect to the Plan under the Act and that such status will be maintained for the duration of the Agreement. The Agreement continues in effect until the Stock is no longer held by the Plan, although the Agreement is terminable with at least 30 days notice. In the event that such termination notice is given by either party while the Stock is still owned by the Plan, the Agreement provides that the termination will not be effective until a successor Fiduciary has been secured under circumstances approved by the Department.

5. The Bank, the Fiduciary, and BancShares have executed the Put, which is a put option agreement that grants the Fiduciary the right, on behalf of the Plan, to direct BancShares at any time to purchase all or any portion of the Stock from the Plan, subject only to the approval of the Federal Reserve Board.[6] The terms of the Put provide that it becomes effective on January 1, 1993. The Put requires the purchase price of the Stock, in the event of any exercise of the Put, to be greater of (a) the fair market value of the Stock as of the date of the closing of the purchase transaction, or (b) the fair market value of the Stock on December 31, 1992. The Put provides that for purposes of the purchase price of the Stock in the event of an exercise of the Put, the Stock's fair market value shall be determined by the Fiduciary pursuant to a valuation conducted as of the closing date of the purchase in accordance with section 3(18) of the Act.

6. The Bank, the Fiduciary, the Bancshares will execute an escrow agreement (the Escrow) establishing an escrow account to secure Bancshares' obligations under the Put, and the Escrow will be maintained for the duration of the Plan's ownership of any of the Stock. Upon exercise of the Put or in any sale of the Stock to a third party, if the Plan fails to receive as the consideration in such sale the full purchase price required under the Put, the proceeds of the escrow account may be transferred to the Plan to compensate the Plan with respect to any deficiency. The Escrow requires Bancshares to transfer to an escrow account a quantity of United States government securities (the Securities) with a total value of at least 25 percent of the fair market value of the Stock as of December 31, 1992. In the event the Plan reduces its holding of the Stock, the value of Securities held under the Escrow may be reduced, if the value of the Securities in Escrow is greater than 30 percent of the fair market value of the Stock still being held by the Plan, provided that the value of the Securities held under the Escrow remains no less than twenty five percent of the greater of (1) the current fair market value of the Stock, or (2) the fair market value of the Stock as of December 31, 1992, based on the number of shares of the Stock still being held by the Plan. The current fair market value of the Stock for purposes of the Escrow is to be determined as of the last day of each calendar year by the Bank, subject to approval of the Fiduciary, and the Fiduciary's determination shall control in the event of disagreement with the Bank. The Plan will have a lien against the assets in the Escrow, so that the Plan will have priority over all creditors of Bancshares with respect to those assets.

7. As a condition of the exemption proposed herein, the Bank agrees that the Plan shall not require any additional shares of Class A or Class B Stock, unless at the time of any such acquisition the requirements of section 406(a)(1)(E), 407(a) and 408(e) of the Act are satisfied without regard to the exemption proposed herein. The foregoing restriction would not apply to the Plan's receipt of additional Stock as a dividend or in connection with a stock split, merger, recapitalization or reorganization involving the Stock. The Bank represents that all future sales, if any, of the Stock by the Plan to a party in interest with respect to the Plan will satisfy the requirements of section 408(b)(12) of the Act.

[6] Bancshares represents that the Put provides for approval of the Federal Reserve Board (the FRB) because of (1) an FRB regulation requiring the bank holding company to obtain FRB approval before purchasing or redeeming its equity securities if the consideration therefore is equal to ten percent or more of the holding company's net worth, and (2) an FRB policy of requesting bank holding companies to consult with the FRB prior to any material redemption of securities. In the event the FRB were to deny approval of any exercise of the Put, the Plan would be protected by the Escrow, described in section 6 herein, from any failure to obtain, in a resulting sale of the Stock to a third party, the full purchase price required under the Put.

8. In summary, the applicant represents that the proposed transactions satisfy the criteria of section 408(a) of the Act for the following reasons: (1) The Stock represents less than five percent of the Plan's total assets; (2) At all times since acquisition by the Plan, the Stock has constituted less than twenty-five percent of all outstanding shares of each class of the Stock; (3) The interests of the Plan for all purposes related to the continued holding of the Stock are represented by the Fiduciary, which has full discretionary authority with respect the Plan's interests in the Stock and under the Put and Escrow; (4) The Put will enable the Fiduciary to require a sale of the Stock of BancShares at any time for no less than the greater of the Stock's fair market value (a) as of December 31, 1992, or (b) as of the date of such sale; (5) The Escrow will protect the Plan's right to receive the full fair market value of the Stock in any exercise of the Put; and (6) The Plan will not acquire additional share of the Stock if such acquisition would be in violation of the Act.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest of disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(b) of the act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan;

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 22nd day of September, 1992.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

BILLING CODE 4510–29–M

NUCLEAR REGULATORY COMMISSION

Proposed Generic Communication, NRC Generic Letter: Analog to Digital Replacements Under the 10 CFR 50.59 Rule

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed Generic Letter: Extension of comment period.

SUMMARY: On August 14, 1992, (57 FR 36680), the NRC published for public comment a proposed Generic Letter, "Analog to Digital Replacements Under the 10 CFR 50.59 Rule)." The comment period for this proposed Generic Letter was to have expired on September 14, 1992. In view of the importance of the proposed Generic Letter and the desirability of obtaining meaningful comments from interested parties, the NRC has decided to extend the comment period for an additional thirty days. The extended comment period now expires on October 14, 1992.

DATES: The comment period has been extended and now expires on October 14, 1992. Comments received after this date will be considered if it is practical to do so but the Commission is able to assure consideration only for comments received before this date.

ADDRESSES: Submit written comments to Chief, Rules and Directives Review Branch, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Written comments may also be delivered to room P–223, Phillips Buildings, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:14 p.m., Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, 2129 L Street, NW., (Lower level), Washington, DC.

FOR FURTHER INFORMATION CONTACT: Clyde Shiraki (301) 504–3101.

Dated at Rockville, Maryland, this 22nd day of September 1992.

For the Nuclear Regulatory Commission.

John N. Hannon,

Director, Project Directorate III–3, Division of Reactor Projects—III/IV/V, Office of Nuclear Reactor Regulation.

[FR Doc. 92–23444 Filed 9–25–92; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 040–08977 License No. STB–1526 EA 92–171]

Order Modifying License (Effective Immediately) and Demand for Information

In the Matter of Aircraft Components, Inc., Bradford, Connecticut.

I

Aircraft Components, Inc. (ACI) or (Licensee) is the holder of Source Material License No. STB–1526 (License) issued by the Nuclear Regulatory Commission (NRC or Commission) pursuant to 10 CFR part 40. The License authorizes the Licensee to possess, store, and precision-machine magnesium-thorium castings for aircraft components. The License also limits the Licensee's possession of radioactive material of natural thorium to 45 kilograms in the form of thorium oxide not exceeding 4% alloyed with magnesium. The License was originally issued on December 21, 1988, and is due to expire on January 31, 1994.

II

On August 26, 1992, an inspector from the NRC Region I office conducted an inspection at the Licensee's facility in Branford, Connecticut. The inspection was conducted to review the Licensee's activities to determine compliance with NRC requirements and to assure safe performance of those activities. At the outset of the inspection, the inspector questioned Mr. Michael V. Bruno, President and Radiation Safety Officer for the facility, concerning the amount of

thorium possessed by the Licensee on that date. Mr. Bruno estimated that the Licensee possessed approximately 71 kilograms of thorium. Since this amount was in excess of the limit authorized by the License, the inspector reviewed the Licensee's inventory records for the period between May 30, 1990, and the date of the inspection. Based upon that review, as well as information subsequently provided to the NRC by the Licensee, the NRC determined that the Licensee had, in fact, exceeded its possession limits for thorium throughout the period between June 30, 1989 and August 26, 1992. The largest amount of thorium possessed during that period was 306.5 kilograms on April 25, 1991. During that period, on at least one occasion (i.e., May 9, 1991) the Licensee possessed more than 200 kilograms of thorium in a dispersible form (i.e., a form that can be easily distributed creating widespread contamination).

The inspector questioned Mr. Bruno concerning his knowledge of whether the Licensee's possession limit was exceeded, and if so, the length of time it had been exceeded. Mr. Bruno indicated that he was aware that the limit had been exceeded for several months. The inspector then questioned Mr. Bruno as to why he did not seek and obtain a license amendment from the NRC to authorize possession of larger amounts of natural thorium. Mr. Bruno indicated that he did not seek a license amendment because he knew that to obtain such an amendment, the Licensee would first be required to provide financial assurance for decommissioning (which assures that the Licensee has adequate funds available for decommissioning of the facility). On September 11, 1992, Region I management, as well as representatives from the NRC's Office of the General Counsel, contacted Mr. Bruno by phone to verify the statements made to the inspector. Mr. Bruno confirmed his prior conversations with the inspector concerning why the violation occurred, and also indicated that he was aware, since June 1989, that the Licensee had exceeded the possession limit.

III

Condition B of License No. STB–1526 limits the Licensee's possession of thorium to 45 kilograms. Contrary to this requirement, from June 30, 1989 to August 26, 1992, the Licensee, at various times, possessed more than 45 kilograms of thorium. As set forth in Section II of this Order, the Licensee's President and Radiation Safety Officer was aware of the possession limit in License Condition 8, and was aware that the amount of thorium in the Licensee's possession exceeded that limit.

In addition, as required by 10 CFR 40.36, any licensee authorized to possess greater than 10 millicuries of source material (which equates to 45.5 kilograms of natural thorium) in a readily dispersible form shall submit, on or before July 27, 1990, a certification of financial assurance for decommissioning, or a decommissioning funding plan, in accordance with the criteria set forth therein. These requirements were developed to assure that licensees who possessed substantial quantities of readily dispersible material would have in place a financial mechanism that would assure protection of public health and safety by providing adequate funding for the ultimate decontamination and decommissioning of the facility. In its initial license application, dated October 21, 1988, ACI requested a possession limit of 500 kilograms of natural thorium. Since ACI had not provided the necessary financial assurance required by 10 CFR 40.36 in its license application, the NRC sent a letter to ACI on November 25, 1988, stating that the Licensee must submit a certification that financial assurance has been provided before the NRC could authorize possession of greater than 45 kilograms of thorium. ACI responded to the NRC, in a letter dated December 1, 1988, by changing its requested possession limit to 45 kilograms. In that December 1, 1988 letter, the requested authorization limit was changed "[d]ue to the fact that we [ACI] were not aware of the recent regulatory requirements to submit financial assurance in the amount of $150,000 * * * ."

IV

Based on the above, I conclude that Mr. Bruno, the Licensee's President and Radiation Safety Officer, intentionally violated NRC requirements in that he knew possession of natural thorium in amounts greater than 45 kilograms of natural thorium was contrary to the conditions of its License. Further, Mr. Bruno also intentionally failed to seek an amendment to the License authorizing possession of greater amounts because he wanted to avoid the cost of providing the required financial assurance for decommissioning to the NRC. Although the Licensee, subsequent to the inspection, reduced its inventory of natural thorium to an amount less than its licensed limit, the willful actions by the most senior person in the Licensee's organization raise serious questions concerning the willingness of the Licensee to comply with NRC regulatory requirements. Consequently, further action and information as described in sections V and VII is necessary in order to determine (1) whether NRC should have the requisite reasonable assurance that the Licensee's current operations can be conducted under License No. STB–1526 in compliance with the Commission's requirements, (2) whether, because of the Licensee's possession and use of material exceeding license limits, the site has been contaminated such that remedial measures are needed, and (3) whether the health and safety of the public, including the Licensee's employees, will be protected. Therefore, the public health, safety, and interest require that pending receipt and evaluation of that information the Licensee take the actions described below to determine the extent of contamination at the facility and the cost of its decommissioning. In light of the past possession of significantly more than 45 kilograms of natural thorium in dispersible form, it is necessary to provide evidence of financial assurance to complete decommissioning activities. Furthermore, pursuant to 10 CFR 2.202, I find that the significance of the willful conduct described above is such that the public health, safety, and interest require that this Order be immediately effective.

V

Accordingly, pursuant to sections 161b, 161c, 161i, 161o, 182 and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.202 and 10 CFR part 40, *It is hereby ordered, effective immediately, that:*

Within 30 days of the date of this Order, the Licensee shall:

1. Conduct a radiation survey of the premises in accordance with the guidance in the "Manual for Conducting Radiological Surveys in Support of License Termination", NUREG/CR 5849 (June 1992), where licensed activities were carried out or licensed materials were stored and submit a written report of the results of that survey as set forth in 10 CFR 40.42(c)(1)(v), to the NRC Regional Administrator, Region I. The survey is to be performed by an independent qualified health physicist.

2. Prepare and submit to the NRC Regional Administrator, Region I, a plan and schedule for NRC approval for decommissioning the facility for unrestricted use, together with a detailed cost estimate for completing the plan according to the schedule for releasing the facility for unrestricted use. The plan shall meet "Guidelines for Decontamination of Facilities and Equipment Prior to Release for Unrestricted Use or Termination of License for Byproduct Source, or Special Nuclear Material" July 1982, and Options 1 or 2 of "Disposal or Onsite Storage of Thorium or

Uranium Wastes from Past Operations", 46 FR 52061 (October 23, 1981).

3. Submit to the NRC Regional Administrator, Region I, a certification that financial assurance for completing the decommissioning activities described in the plan submitted pursuant to Paragraph 2 has been provided in the amount estimated pursuant to Paragraph 2. The certification shall use one of the methods described in 10 CFR 40.36(e). See Regulatory Guide 3.66 "Standard Format and Content of Financial Assurance Mechanisms for Decommissioning under 10 CFR parts 30, 40, 70, and 72" (July 1990). A copy of the executed financial instrument obtained to meet this certification requirement must also be sent to the NRC Regional Administrator, Region I.

The Regional Administrator, Region I, may, in writing, relax or rescind this order upon demonstration by the Licensee of good cause.

VI

In accordance with 10 CFR 2.202, the Licensee must, and any other person adversely affected by this Order may, submit an answer to this Order, and may request a hearing on this Order, within 20 days of the date of this Order. The answer may consent to this Order. Unless the answer consents to this Order, the answer shall, in writing and under oath or affirmation, specifically admit or deny each allegation or charge made in this Order and set forth the matters of fact and law on which the Licensee or other person adversely affected relies and the reasons as to why this Order should not have been issued. Any answer or request for a hearing shall be submitted to the Secretary, U.S. Nuclear Regulatory Commission, Attn: Chief, Docketing and Service Section, Washington, DC 20555. Copies also shall be sent to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555, to the Assistant General Counsel for Hearings and Enforcement at the same address, to the Regional Administrator, NRC Region I, 475 Allendale Road, King of Prussia, Pennsylvania 19406, and to the Licensee if the answer or hearing request is by a person other than the Licensee. If a person other than the Licensee requests a hearing, that person shall set forth with particularity the manner in which that person's interest is adversely affected by this Order and shall address the criteria set forth in 10 CFR 2.714(d).

If a hearing is requested by the Licensee or a person whose interest is adversely affected, the Commission will issue an Order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such hearing shall be whether this Order should be sustained.

Pursuant to 10 CFR 2.202(c)(2)(i), 57 FR 20194 (May 12, 1992), the Licensee, or any other person adversely affected by this Order, may, in addition to demanding a hearing, at the time the answer is filed or sooner, move the presiding officer to set aside the immediate effectiveness of the Order on the ground that the Order, including the need for immediate effectiveness, is not based on adequate evidence but on mere suspicion, unfounded allegations, or error.

In the absence of any request for hearing, the provisions specified in Section V above shall be final 20 days from the date of this Order without further order or proceedings. An answer or a request for hearing shall not stay the immediate effectiveness of this order.

VII

In addition to issuance of this Order Modifying License No. STB–1526, the Commission requires further information from the Licensee in order to determine whether the Commission can have reasonable assurance that in the future the Licensee will conduct its activities in accordance with the Commission's requirements and will not willfully violate those requirements.

Accordingly, pursuant to sections 161c, 161o, 182 and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.204 and 10 CFR 40.31(b), in order for the Commission to determine whether the License should be further modified, suspended, or revoked or other enforcement action taken, the Licensee is required to submit to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 within 30 days of the date of this Demand for Information, in writing and under oath or affirmation, a statement of why, in light of the willful violation of the requirements by the President and Radiation Safety Officer described above, (1) NRC should conclude that the Licensee and its employees will in the future comply with Commission requirements, (2) the Licensee should not be required to promptly decommission the facility for unrestricted use, and (3) License No. STB–1526 should not be revoked.

Copies should also be sent to the Assistant General Counsel for Hearings and Enforcement at the same address, and to the NRC Regional Administrator, Region I, 475 Allendale Road, King of Prussia, Pennsylvania 19406.

After reviewing your response, the NRC will determine whether decommissioning and revocation will be required or other enforcement action is necessary to ensure compliance with regulatory requirements.

Dated at Rockville, Maryland this 21st day of the September, 1992.

For The Nuclear Regulatory Commission.

Hugh L. Thompson, Jr.,

Deputy Executive Director for Nuclear Materials Safety, Safeguards, and Operations Support.

[FR Doc. 92–23442 Filed 9–25–92; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–446A]

Texas Utilities Electric Co.; No Significant Antitrust Changes and Time for Filing Requests for Reevaluation

The Director of the Office of Nuclear Reactor Regulation has made a finding in accordance with section 105c(2) of the Atomic Energy Act of 1954, as amended, that no significant (antitrust) changes in the licensee's activities or proposed activities have occurred subsequent to the antitrust operating license review of Unit 1 of the Comanche Peak Steam Electric Station by the Attorney General and the Commission. The finding is as follows:

Section 105c(2) of the Atomic Energy Act of 1954, as amended, provides for an antitrust review and an application for an operating license if the Commission determines that significant changes in the licensee's activities or proposed activities have occurred subsequent to the previous construction permit review. The Commission has delegated the authority to make the "significant change" determination to the Director, Office of Nuclear Reactor Regulation. Based upon the examination of the events since the issuance of the Comanche Peak Steam Electric Station, Unit 1 (Comanche Peak 1) operating license, to TU Electric Company, the staffs of the Inspection and Licensing Policy Branch, Office of Nuclear Reactor Regulation and the Office of the General Counsel, hereafter referred to as "staff," have jointly concluded, after consultation with the Department of Justice, that the changes that have occurred since the operating license review of Comanche Peak 1 are not of the nature to require a second antitrust review at the operating license stage of the application for Comanche Peak 2.

In reaching this conclusion, the staff considered the structure of the electric utility industry in northeastern and north central Texas, the events relevant to the Comanche Peak construction permit review, the antitrust settlement subsequent to the construction permit review and the Comanche Peak 1 operating license review.

The conclusion of the staff analysis is as follows:

In an effort to identify any changed activity on the part of the licensee, the staff requested updated Regulatory Guide 9.3 information in

December 1991. Notice of receipt of this information was published in the **Federal Register** and the staff received comments from two electric power cooperatives, Cap Rock Electric Cooperative, Inc. and Cajun Electric Power Cooperative, Inc.

The staff reviewed the comments from Cap Rock and Cajun and fully considered them in the context of the Commission's significant change review. The staff determined that the issues raised by Cap Rock addressed compliance or contractual matters, not licensing matters pertinent to the staff's § 105c(2) operating license significant change review. Moreover, the issues of concern to Cap Rock were being litigated in a manner that ultimately should resolve the concerns raised by Cap Rock. The staff determined that the concerns raised by Cajun in its comments to Regulatory Guide 9.3 were issues that should be addressed by the FERC, not the NRC, and that there was an ongoing forum at the FERC in which Cajun could seek redress from its concerns pursuant to participation in the Texas DC intertie.

TU Electric experienced changes in its business since the Comanche Peak 1 operating license review; however, the changed activity was in large part due to the changing electric bulk power industry and the role of power generators within this industry. The staff did not identify any changes in TU Electric's activities that would require a remedy by the NRC in this licensing action. None of the changes identified meet all three of the Commission's *Summer* criteria.

Section 105c(2) requires a formal antitrust review at the operating license stage only in the event of significant changes in the licensee's activities since the previous antitrust review. The NRC established criteria for identification of significant changes in its *Summer* decision and delegated the authority to make the significant change determination to the staff. The staff's analysis of the changes in the licensee's activities has not identified any changed activity that could be remedied in the Commission's licensing process as envisioned in *Summer*. Consequently, the staff recommends that no affirmative significant change determination be made pursuant to the application for an operating license for Unit 2 of the Comanche Peak Steam Electric Station.

Based upon the staff analysis, it is my finding that there have been no "significant changes" in the licensee's activities or proposed activities since the completion of the antitrust operating license review of Unit 1 of the Comanche Peak Steam Electric Station.

Signed on September 17, 1992 by Thomas E. Morley, Director of the Office of Nuclear Reactor Regulation.

Any person whose interest may be affected by this finding, may file, with full particulars, a request for reevaluation with the Director of the Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 within 30 days of the initial publication of this notice in the **Federal Register**. Requests for reevaluation of the no significant change determination shall be accepted after the date when the Director's finding becomes final, but before the issuance of the OL, only, if they contain new information, such as information about facts or events of antitrust significance that have occurred since the date, or information that could not reasonably have been submitted prior to that date.

Dated at Rockville, Maryland, the 21st day of September 1992.

For the Nuclear Regulatory Commission.

Anthony T. Gody,

Chief, Inspection and Licensing Policy Branch Program Management, Policy Development and Analysis Staff, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

Requests Under Review by Office of Management and Budget

Agency Clearance Officer: Kenneth A. Fogash, (202) 272-2142

Upon written request copies available from: Securities and Exchange Commission, Public Reference Branch, 450 Fifth Street, NW., Washington, DC 20549

Extension

Rule 17a-2, File No. 270-189
Rule 19d-3, File No. 270-245

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for extension of OMB approval the following rules under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*):

Rule 17a-2 (17 CFR 240.17a-2), which requires the manager of an underwriting syndicate to retain certain information relating to stabilizing purchases of a security being distributed. It is estimated that approximately 500 broker-dealers incur an average annual burden of one hour to comply with this rule.

Rule 19d-3 (17 CFR 240.19d-3), which prescribes the form and content of applications to the Commission for review of final disciplinary sanctions, denials of membership, participation, or association with a member, or prohibitions or limitations of access to services imposed by self-regulatory organizations. It is estimated that approximately 13 respondents incur an average burden of 18 hours to comply with this rule.

Direct general comments to Gary Waxman at the address below. Direct any comments concerning the accuracy of the estimated average burden hours for compliance with Securities and Exchange Commission rules and forms to Kenneth A. Fogash, Deputy Executive Director, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549, and Gary Waxman, Clearance Officer, Office of Management and Budget, New Executive Office Building, room 3208, Washington, DC 20503.

Dated: September 21, 1992.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 34-31208; File No. SR-CBOE-92-20]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to Reduced Transaction Charges for Certain Index Option Spread Transactions

September 22, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on September 2, 1992, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the CBOE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE has proposed to extend through October 15, 1992, a pilot program[1] which provides a 50% rebate on transaction and trade match fees for "box" [2] trades by public customers in

[1] The pilot program was first approved by the Commission on a three-month pilot basis, effective from July 1, 1991, through September 30, 1991. See Securities Exchange Act Release No. 29482 (July 24, 1991), 56 FR 36180. Since then, the pilot has been extended three times, first through December 31, 1991, then through March 31, 1992, and most recently through August 31, 1992. See Securities Exchange Act Release Nos. 30025 (December 3, 1991), 56 FR 64537, 30288 (January 27, 1992), 57 FR 4228, and 30857 (June 24, 1992), 57 FR 29543.

[2] The CBOE defines a "box trade" as a four-sided SPX option spread composed of (i) a long call and short put at one strike price and (ii) a short call and long put at a different strike price, where all four positions expire in the same month.

Standard & Poor's 500 Stock Index options ("SPX"), provided the "box" trade totals 500 or more contracts for the four sides of the trade. The text of the proposed rule change is available at the Office of the Secretary, CBOE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CBOE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The CBOE has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

(1) Purpose

The CBOE proposes to extend, through October 15, 1992, a pilot program which provides a 50% rebate on transaction and trade match fees for "box" [3] trades by public customers in SPX options, provided the "box" trade totals 500 or more contracts for the four sides of the trade. The rebate is available to member firms that provide the Exchange with documents evidencing transactions that meet the standards of the pilot program. At the end of each month, member firms must submit their rebate requests to the Exchange's Accounting Department.

(2) Basis

The Exchange believes that the proposed rule change is consistent with section 6(b) of the Act, in general, and furthers the objectives of section 6(b)(4), in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among its members and those persons associated with its members.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The CBOE does not believe that the proposed rule change will impose any burden on competition.

[3] *See supra* note 2 for the CBOE's definition of a "box" trade.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change establishes or changes a due, fee or other charge imposed by the Exchange, it has become effective pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of rule 19b–4 thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communication's relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to the file number in the caption above and should be submitted by October 19, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before October 14, 1992, written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–18963; 811–5575]

Advance America Funds, Inc.; Notice of Application

September 13, 1992.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: Advance America Funds, Inc. (formerly, Constitution Funds, Inc.).

RELEVANT ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on September 10, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on October 13, 1992, and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicant, 3410 South Galena Street, Denver, Colorado 80231.

FOR FURTHER INFORMATION CONTACT: Elaine M. Boggs, Staff Attorney, at (202) 272–3026, or Nancy M. Rappa, Branch Chief, at (202) 272–3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end, diversified management investment company that was organized as a corporation under the laws of Maryland. On June 2, 1988, applicant filed a registration statement pursuant to section 8(b) of the Act. A registration statement under the Securities Act of 1933 was filed on June 2, 1988. The registration statement was declared effective and the initial public offering commenced on October 19, 1988.

2. On June 25, 1991, applicant's board of directors approved a reorganization plan under which all the assets of applicant's four series, U.S. Government Fund ("US Government"), Tax-Free Income Fund ("Tax-Free"), Strategic Income Fund ("Strategic"), and Equity Income Fund ("Equity"), would be exchanged for shares of Oppenheimer U.S. Government Trust ("OUSGT"), Oppenheimer Tax-Free Bond Fund ("OTFBF"), Oppenheimer Strategic Income Fund ("OSIF"), and Oppenheimer Equity Income Fund ("OEIF"), respectively. After a prospectus and proxy statement on Form N–14 filed in connection with the reorganization was declared effective by the Commission, applicant mailed proxy materials to its shareholders. At a meeting held on October 17, 1991, applicant's shareholders approved the merger.

3. On October 18, 1991, the net assets of applicant were transferred to the assets of OUSGT, OTFBF, OSIF, and OEIF and shareholders of applicant became shareholders of OUSGT, OTFBF, OSIF, and OEIF. In essence, a shareholder of applicant who voted shares in favor of the reorganization elected to redeem his shares (at net asset value which was calculated after subtracting a cash reserve retained by each series for the payment of expenses and liabilities) and reinvest the proceeds in shares of the corresponding fund at no sales charge and without recognizing taxable gain or loss for Federal income tax purposes.

4. Expenses incurred in connection with the merger were split between applicant and the funds into which they merged. Reorganization expenses paid by US Government, Tax-Free, Strategic, and Equity totalled $17,093, $18,215, $12,384, and $15,065, respectively. Liabilities of applicant were accrued and have been paid by each series.

5. There are no securityholders to whom distributions in complete liquidation of their interests have not been made. Applicant has no debts or other liabilities that remain outstanding.

Applicant is not a party to any litigation or administrative proceeding.

6. Articles of dissolution were filed in Maryland on August 31, 1992. Applicant will effect its dissolution in Maryland after receiving the order requested.

7. Applicant is not now engaged, nor does it propose to engage, in any business activities other than those necessary for the winding up of its affairs.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[Rel. No. IC-18964; 812-8044]

Broad Street Trust, et al.; Application

September 18, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for an Order under the Investment Company Act of 1940 (the "Act").

APPLICANTS: Broad Street Trust; Daily Money Fund; Fidelity Franklin Street Trust; Fidelity Beacon Street Trust; Fidelity California Municipal Trust; Fidelity California Municipal Trust II; Fidelity Capital Trust; Fidelity Cash Reserves; Fidelity Charles Street Trust; Fidelity Commonwealth Trust; Fidelity Congress Street Fund; Fidelity Contrafund; Fidelity Corporate Recovery Fund; Fidelity Court Street Trust; Fidelity Court Street Trust II; Daily Tax-Exempt Money Fund; Fidelity Destiny Portfolios; Fidelity Deutsche Mark Performance Portfolio, L.P.; Fidelity Devonshire Trust; Fidelity Exchange Fund; Fidelity Financial Trust; Fidelity Fixed-Income Trust; Fidelity Fund; Fidelity Government Securities Fund; Fidelity Income Fund; Fidelity Institutional Cash Portfolios; Fidelity Institutional Trust; Fidelity Investment Trust; Fidelity Limited Term Municipals; Fidelity Magellan Fund; Fidelity Massachusetts Municipal Trust; Fidelity Money Market Trust; Fidelity Mt. Vernon Street Trust; Fidelity Municipal Trust; Fidelity Municipal Trust II; Fidelity New York Municipal Trust; Fidelity New York Municipal Trust II; Fidelity Puritan Trust; Fidelity Securities Fund; Fidelity Select Portfolios; Fidelity Special Situations Fund; Fidelity Sterling Performance Portfolio, L.P.; Fidelity Summer Street Trust; Fidelity Trend Fund; Fidelity Union Street Trust; Fidelity Union Street Trust II; Fidelity U.S. Investments Bond Fund, L.P.; Fidelity U.S. Investments—Government Securities Fund, L.P.; Fidelity Yen Performance Portfolio, L.P.; Fidelity Income Trust; Institutional Investors Trust; Fidelity Diversified Trust; Fidelity Investment Series; Fidelity Securities Trust; Spartan U.S. Treasury Money Market Fund; Fidelity Oliver Street Trust; Variable Insurance Product Fund; Variable Insurance Products Fund II; Zero Coupon Bond Fund; Fidelity Institutional Tax-Exempt Cash Portfolios; and Fidelity Management & Research Company ("FMR").

RELEVANT ACT SECTION: Section 45(a).

SUMMARY OF APPLICATION: Applicants seek an order pursuant to section 45(a) of the Act declaring that public disclosure of sections II through V of a report concerning the Fidelity Group of Funds Interfund Lending Facility Design, dated May 31, 1992, is neither necessary nor appropriate in the public interest or for the protection of investors.

FILING DATE: The application was filed on August 13, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on October 13, 1992, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicants, 82 Devonshire Street, Boston, Massachusetts 02109.

FOR FURTHER INFORMATION CONTACT: Nicholas D. Thomas, Staff Attorney, at (202) 504-2263, or Elizabeth G. Osterman, Branch Chief, at (202) 272-3016 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Pubic Reference Branch.

Applicants' Representations

1. Each applicant investment company ("Fund") is a business trust formed under the laws of Massachusetts or Delaware or a partnership under the laws of Delaware. Each Fund has entered or will enter into a management or advisory and service contract with FMR. The principal underwriter for each of the Funds is or will be Fidelity Distributors Corporation.

2. On January 11, 1990, the SEC issued an order under sections 6(c) and 17(b) of the Act granting the Funds and FMR exemptions from the provisions of sections 12(d)(1), 17(a)(1), 17(a)(3), 17(d), 18(f), and 21(b) of the Act, and rule 17d-1 thereunder, to enable the Funds and FMR to establish a facility through which Funds having uninvested cash could, under certain circumstances, loan that cash to Funds seeking to borrow cash on a temporary basis (the "Interfund Lending Facility" or "Facility"). Daily Money Fund, Investment Company Act Release Nos. 17257 (Dec. 8, 1989) (notice) and 17303 (Jan. 11, 1990) (order).

3. As a condition to the January 11, 1990, order, FMR and the Funds agreed to prepare and submit to the Funds' boards of directors or general partners an initial special report on the design of the Interfund Lending Facility, including a report by their independent public accountants. FMR and the Funds further agreed that, following review of the initial report, the next Fund required to file its Form N-SAR would file the initial report as an exhibit and the other Funds would incorporate the initial report by reference in their next Form N-SAR filings. In satisfaction of the above condition, Fidelity Select Portfolios designated the initial report as an exhibit to its Form N-SAR for the period ending April 30, 1990, and the other Funds incorporated the initial report by reference into their next Form N-SARs. FMR and the Funds requested and received confidential treatment under section 45(a) of the Act for the initial report. Investment Company Act Release Nos. 17771 (Oct. 2, 1990) (notice) and 17827 (Oct. 30, 1990) (order).

4. As a further condition to the January 11, 1990, order, the Funds and FMR agreed that on the first and second anniversary of the commencement of operations of the Interfund Lending Facility, they would submit to the SEC an annual report on the "Design of a System and Certain Compliance Tests," that would include an opinion of the Funds' independent public accountant as to the sufficiency of the operation and control procedures of the Interfund Lending Facility. In satisfaction of the first anniversary portion of this condition, Fidelity Cash Reserves designated the first annual report as an exhibit to its Form N-SAR for the period ending May 31, 1991, and the other

Funds incorporated the annual report by reference as exhibits to their next Forms N–SAR. On July 31, 1991, the Funds requested an order pursuant to section 45(a) of the Act granting confidential treatment to the first annual report. This request was granted by the SEC by order dated November 6, 1991 (Investment Company Act Release No. 18399).

5. In final satisfaction of the condition to the January 11, 1990, order, Fidelity Cash Reserves has designated the second annual report (the "Confidential Report") as an exhibit to its Form N–SAR for the period ending May 31, 1992, and the other Funds will incorporate the Confidential Report by reference as exhibits in their Forms N–SAR next filed. Applicants now request an order under section 45(a) of the Act that would grant confidential treatment to the Confidential Report.

6. Section I of the Confidential Report describes in general terms the SEC's order authorizing the Interfund Lending Facility and the contents of the Confidential Report. Much of this material previously has been made public, and applicants do not request confidential treatment of section I.

7. Section II provides a general overview of the operation of the Facility, and describes the objectives and use of the Facility. It outlines the Facility's primary activities and describes the operational responsibilities of each group within FMR or the Funds to the Facility.

8. Section III summarizes the management and operational control objectives and the procedures for the Facility. For each identified control objective, it identifies the associated procedures required at each step to accomplish such objective, as well as the managerial, legal, and operational approvals required.

9. Section IV describes in more detail the management control procedures used to assure compliance with each of the control objectives. It describes in greater detail than sections II and III the legal and managerial approvals required, the documentation necessary, and the parties responsible for carrying out each step.

10. Section V discusses the scope of the testing performed on the management and operational procedures described in section IV.

11. The Confidential Report has been and continues to be maintained by the Funds on a strictly confidential, non-public, need-to-know basis.

12. The Funds generated the Confidential Report within the last year. As a result, the Confidential Report reflects current methods and capabilities of management and control.

Applicants' Legal Analysis

1. Section 45(a) of the Act provides that the information contained in any application filed with the SEC under the Act shall be made available to the public, unless and except insofar as the SEC finds that public disclosure is neither necessary nor appropriate in the public interest or for the protection of investors.

2. Applicants state that public disclosure of the Confidential Report is not necessary to inform shareholders and potential investors in the Funds of the material facts regarding the Funds' participation in the Interfund Lending Facility. Each Fund participating in the Interfund Lending Facility has added disclosures to its prospectus concerning the Interfund Lending Facility and the Fund's participation therein.

3. The Freedom of Information Act, 5 U.S.C. 552, provides various exceptions to the general rule that all information provided to or generated by the government should be made available to the public.[1] One such exception is for "trade secrets and commercial or financial information obtained from a person and privileged or confidential." 5 U.S.C. 552(b)(4).

4. Applicants state that the information contained in the Confidential Report fits within the above-mentioned exception because it has been obtained from a person, is both commercial and financial in nature, and is, and has been treated as, confidential.

5. Applicants state that because they are engaged in a highly competitive business, they would likely lose an important competitive advantage as a result of the disclosure of the information contained in the Confidential Report. The Interfund Lending Facility allows both borrowing and lending Funds to obtain a higher return for shareholders than they could obtain in the absence of such a facility. The Funds and FMR believe that no other investment company group has yet undertaken to develop operational and control procedures to establish a lending program similar to the Interfund Lending Facility. The Confidential Report documents each of the steps necessary to establish such a system, and thus would enable other investment company complexes to develop such a system in a much shorter time and with far greater confidence in its soundness than they might have absent the Confidential Report.

6. Applicants believe the Confidential Report would be extraordinarily useful to their major competitors. The Confidential Report as a whole would provide competitors a blueprint for the establishment and monitoring of an interfund lending facility. Operation of the Facility is highly complex. The development of the Facility required FMR to review its entire system to identify problems that might occur in the operation of the Facility, develop controls to help insure that such problems would not occur, develop procedures to implement such controls, develop computer and manual techniques for carrying out those procedures, and instruct the relevant personnel in how to carry them out. This process required in excess of twelve months and involved numerous meeting of FMR staff, as well as input from the Fund's auditors, counsel, and custodians.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92–23409 Filed 9–25–92; 8:45 am]

BILLING CODE 8010–01–M

[1] The Division of Investment Management recognizes that any order granting the confidential treatment requested by applicants will be issued under section 45(a) only, and that any such order will not be dispositive of any Freedom of Information Act request filed by a third party.

[Rel. No. IC–18965; 811–4954]

Fortius II Fund, Inc; Notice of Application

September 18, 1992.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "1940 Act").

APPLICANT: Fortius II Fund, Inc.

RELEVANT 1940 ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company under the 1940 Act.

FILING DATE: The application on Form N–8F was filed on September 10, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on October 13, 1992, and should be

accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicant, 575 Fifth Avenue, 17th Floor, New York, NY 10017.

FOR FURTHER INFORMATION CONTACT: Felice R. Foundos, Staff Attorney, (202) 272–2190, or Barry D. Miller, Senior Special Counsel, (202) 272–3023 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end, non-diversified management company organized as a corporation under the laws of the State of Maryland. On March 13, 1987, applicant filed a registration statement pursuant to section 8(b) of the 1940 Act. On that date, applicant also filed a registration statement pursuant to the Securities Act of 1933. The registration statement never became effective and applicant never commenced a public offering of its shares.

2. Applicant was formed because of a beneficial tax treatment which has since expired. On August 10, 1990, applicant's sole shareholder and board of director's authorized the dissolution of applicant.

3. Pursuant to the liquidation, the securities held in applicant's portfolio were sold at competitive bid in the market to brokers who were primary government securities dealers. Because applicant's portfolio consisted solely of fixed income securities, no brokerage commissions were incurred.

4. On September 17, 1990, applicant's shareholder redeemed its shares and received a final distribution of $26,565,969 representing the net asset value of applicant.

5. As of the date of the application, the applicant had no assets, debts or liabilities, and was not a party to any litigation or administrative proceeding.

6. Applicant is neither engaged in nor proposes to engage in any business activities other than those necessary for the winding up of its affairs.

7. On October 18, 1991, applicant filed Articles of Dissolution dissolving its corporate existence in Maryland.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92–23412 Filed 9–25–92; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 35–25637; International Series Release No. 459]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

September 18, 1992.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by October 13, 1992 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

PSI Resources, Inc., et al. (31–890)

PSI Resources, Inc. ("PSI Resources"), an Indiana public-utility holding company exempt from registration under section 3(a)(1) of the Act pursuant to rule 2, 1000 East Main Street, Plainfield, Indiana 46168, and its wholly owned Indiana subsidiary companies, PSI Argentina, Inc. ("PSI Argentina") and Costanera Power Corporation ("CPC"), have filed an application in connection with the proposed acquisition of an additional interest in Central Costanera S.A. ("Costanera"), an Argentine electric power generating company.[1] The application requests an unqualified order of exemption pursuant to section 3(b) of the Act for PSI Argentina, CPC, Costanera, and Argelec, a newly organized Argentine company.

PSI Resources' wholly owned public-utility subsidiary company, PSI Energy, Inc. ("PSI Energy"), generates, transmits and sells electric power in Indiana. PSI Energy and PSI Resources reported operating revenues in 1991 of approximately $1.1198 billion and $1.1223 billion, respectively.

PSI Resources currently has a 2.994% ownership interest in Costanera through an international consortium ("Consortium") that has acquired 60% of the voting securities of the Argentine utility.[2] The Consortium members have organized Argelec to hold the 60% interest in Costanera. When the individual Consortium members transfer their shares in Costanera to Argelec, they will have the following voting interests in Argelec: Endesa (50.01%), Enersis/Chilectra (20%), PC/Sade (25%), and PSI Resources (through CPC) (4.99%). PSI Resources has an option under the Consortium Agreement to acquire additional interests in Costanera, by acquiring up to a total of 10% of the shares of Argelec.[3]

---

[1] Costanera's primary asset is a generating facility consisting of seven gas and oil fired generating units and related equipment, having a total installed capacity of 1,260 megawatts.

[2] The initial acquisition by PSI Resources of less than a 5% interest did not require prior Commission approval under section 9(a)(2).

The other Consortium members, and their respective interests in Costanera are Empresa Nacional de Electricidad, S.A. ("Endesa") (30.006%), Enersis, S.A. and Distribuidora Chilectra Metropolitana, S.A. ("Enersis/Chilectra") (together 12%), Perez Companc, S.A.C.F.I.M.F.A. and Sade, S.A.C.C.I.F.I.M. ("PC/Sade") (together 15%). Entergy Corporation ("Entergy"), a registered holding company, has an option to acquire an ownership interest of up to approximately 6%. See *Entergy Corporation*, Holding Co. Act Release Nos. 25579 and 25607 (July 10, 1992 and August 14, 1992). Endesa will be the operator of the Costanera facility although, in the future, PSI Argentina or CPC may provide technical or operating services.

PSI Resources is also part of a consortium that recently submitted a successful bid to acquire 51% of the voting securities of a newly formed Argentine electric distribution company, Edesur, S.A. See *PSI Resources*, HCAR 25570 (July 2, 1992).

[3] In the event that Entergy and/or PSI Resources exercise their respective options, in whole or in part, the interests of Endesa and PC/Sade will be decreased accordingly.

Should the Consortium members determine not to use Argelec as an investment vehicle to hold the 60% Costanera interest, PSI Resources, through CPC, would acquire the additional shares of Costanera directly, thereby increasing its equity interest in Costanera from 2.994% to approximately 6%.

PSI Resources currently has invested approximately $4.5 million for the purchase of its 2.994% equity interest in Costanera. In addition, PSI Resources has made a loan of approximately $4 million to Costanera. Upon CPC's exercise of the option, this investment will increase by approximately $4.5 million. The application states that the maximum level of investment should not exceed $20 million.

PSI Resources intends to fund the acquisition of the additional interest in Costanera through a short-term revolving loan agreement ("Loan Agreement") with one or more financial institutions ("Lenders"). In connection with the Loan Agreement, the Lenders have required PSI Resources and PSI Energy to enter into an intercompany agreement which provides that in the event a restructuring of the holding company system is required whereby PSI Resources becomes a subsidiary of PSI Energy, and PSI Resources is then unable to repay borrowings under the Loan Agreement, PSI Energy will directly support PSI Resources' obligations under the Loan Agreement out of its available earned surplus or net profits. Other than this financial arrangement and the personnel commitment described below, there will be no transactions or financial commitments between PSI Argentina, CPC, Argelec and Costanera, on the one hand, and PSI Energy, on the other hand.

The application states that neither PSI Resources nor PSI Argentina will assume any of Costanera's liabilities. In addition, PSI Resources anticipates that only a small number of employees will be involved in providing technical and training services to Costanera, and that none of PSI Energy's senior management will be assigned on a full-time or long-term basis to such tasks. To the extent that employees of PSI Energy provide any services in connection with the Argentine operations, the time and cost of such employees will be allocated in accordance with accounting procedures already in place and subject to review by the Indiana Utility Regulatory Commission ("IURC").

As a result of the acquisition of Costanera, Argelec, CPC, PSI Argentina and PSI Resources will each be a "holding company" within the meaning of section 2(a)(7) with respect to Costanera, and Costanera will be a direct or indirect "subsidiary company" of each within the meaning of section 2(a)(8).

Applicants request orders of exemption under section 3(b) for Costanera, Argelec, CPC and PSI Argentina. The application states that none of Costanera, Argelec, CPC and PSI Argentina will derive a material part of its income, directly or indirectly, from sources within the United States, nor will any company operate, or have any subsidiary company that operates, as a public-utility company in the United States. The application also states that, if unqualified exemptions are granted, Argelec, CPC and PSI Argentina will rely upon rule 10(a)(1) to provide an exemption insofar as each is a holding company; and PSI Resources will rely on rule 11(b)(1) to provide an exemption from the approval requirements of sections 9(a)(2) and 10 to which it would otherwise be subject.

If unqualified orders of exemption under section 3(b) are not granted, the application requests orders under section 3(a)(5) exempting PSI Argentina, CPC and Argelec from all provisions of the Act, except section 9(a)(2).

The applicants estimate, based on a 6% interest in Costanera's revenues for 1990, that PSI Resources's pro forma share of such revenues will be approximately $9–10 million (or less than 1% of each of PSI Resources' and PSI Energy's gross revenues in 1991). PSI Resources states that it will continue to qualify as an exempt holding company under section 3(a)(1) after the acquisition.

Applicants have informed the IURC of the proposed transactions and will provide a letter from the IURC stating that the proposed activities do not require its prior approval.

Northeast Utilities, et al. (70–7966)

Northeast Utilities ("NU"), 107 Selden Street, Berlin, Connecticut, 06037–1616, registered holding company, and its wholly owned subsidiary, Charter Oak Energy, Inc. ("COE"), 107 Selden Street, Berlin, Connecticut, 06037–1616, have filed an application-declaration, under sections 6(a), 7, 9(a), 10 and 12(b) of the Act and Rule 45 thereunder.

By order dated May 17, 1989 (HCAR No. 24893) ("1989 Order"), the Commission authorized NU to establish COE in order to invest and participate in qualifying cogeneration facilities located throughout the nation and in qualifying small power production facilities located in the service territories of NU and the New England Power Pool. The 1989 Order also authorized NU to invest in COE up to $7.5 million per year through December 31, 1992 for purposes of financing preliminary development and administrative costs. By order dated January 29, 1992, (HCAR No. 25461) ("1992 Order"), the Commission expanded the authorization it had granted to NU in the 1989 Order to authorize COE to explore the potential for investment and participation in independent power production facilities ("IPP Facilities"). The 1992 Order specified, however, that COE was not to invest in, or participate in the construction of, IPP facilities without further Commission approval.

NU and COE now request authorization, through December 31, 1992, to establish a wholly owned subsidiary and for that subsidiary to engage in preliminary development of qualifying small power production facilities and qualifying cogeneration facilities ("Qualifying Facilities") and in IPP Facilities. NU and COE intend to incorporate COE Development Corp. ("COE Development") in Connecticut to pursue the preliminary development of Qualifying Facilities and IPP Facilities. NU and COE propose to establish COE Development to engage in such preliminary development in order to isolate the risks and potential liabilities that could arise in such activities.

COE proposes to acquire 100 shares of common stock ($1.00 par value) issued by COE Development for $10,000. COE also proposes to invest in COE Development up to $4.5 million in 1992, which funds COE will acquire pursuant to the 1992 Order.[4] COE proposes to provide the $4.5 million to COE Development through (1) additional acquisitions of capital stock, (2) capital contributions, (3) open account advances, and (4) subordinated loans. The advances and loans would be at an interest rate based on the cost of funds to NU itself but in no case in excess of the prime rate at a bank designated by NU. The term of such advances and loans would not be in excess of one year.

The application-declaration indicates that COE Development will engage in preliminary development activities in part with services directly provided by Northeast Utilities Service Company. In addition, the application-declaration states that no COE company, subsidiary, or affiliate will invest in, or participate in the construction of, IPP facilities without further Commission approval.

Allegheny Power System, Inc. (70–8046)

The Potomac Edison Company ("Potomac Edison"), 10435 Downsville Pike, Hagerstown Maryland 21740, and Monongahela Power Company ("Monongahela"), 1310 Fairmont Avenue, Fairmont, West Virgina 26554, both electric public-utility subsidiary companies of Allegheny Power System, Inc., a registered holding company, have filed an application-declaration under

[4] The combined spending of COE and COE Development in 1992 would not exceed $7.5 million.

sections 9(a), 10 and 12(c) of the Act and Rule 42(a) thereunder.

By orders dated May 5, 1970 (HCAR No. 16712), April 21, 1970 (HCAR No. 16688), April 30, 1970 (HCAR No. 16711) and June 8, 1976 (HCAR 19565), the Commission authorized Monongahela to issue and sell 50,000 shares of Series F preferred stock, par value $100 ("Series F") and Potomac Edison to issue and sell 50,000 shares of Series E preferred stock, par value $100 ("Series E") and 150,000 shares of Series H preferred stock, par value $100 ("Series H").

Monongahela is now proposing to redeem all 50,000 shares of its Series F, with a dividend rate of $9.64. The current optional redemption price of the Series F is $103.88 per share.

Potomac Edison is also proposing to redeem all 50,000 shares of its Series E, with a dividend rate of $9.40. The current optional redemption price of the Series E is $103.97 per share. Potomac Edison further proposes to redeem all 150,000 shares of its Series H, with a dividend rate of $9.64. The current optional redemption price of the Series H is $103.88 per share.

Monongahela and Potomac Edison propose to effect the redemptions without the issuance of senior securities or additional common equity, thereby partially reducing the equity portion of their respective capitalization.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Investment Company Act Rel. No. 18969; 811-6507]

Public Funding Portfolios, Inc.; Proposed Deregistration

September 22, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Proposed Deregistration under the Investment Company Act of 1940 ("Act").

RELEVANT ACT SECTION: Section 8(f).

SUMMARY: Pursuant to delegated authority, the SEC proposes to declare by order, on its own motion, that Public Funding Portfolios, Inc. (the "Fund") has ceased to be investment company under the Act.

HEARING OR NOTIFICATION OF HEARING: An order of deregistration will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary. Hearing requests should be received by the SEC by 5:30 p.m. on October 19, 1992. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request such notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: James E. Anderson, Law Clerk, at (202) 272-7027, or C. David Messman, Branch Chief, at (202) 272-3018 (Division of Investment Management, Office of Investment Company Regulation).

STATEMENT OF FACTS: The following is a summary of information regarding the Fund.

1. The Fund is an open-end non-diversified management company organized as a Maryland corporation. The Fund registered as an investment company under the Act and filed a registration statement under the Securities Act of 1933 on December 19, 1991. The registration statement did not become effective.

2. The SEC filed a complaint against the Fund in the United States District Court for the Central District of California on March 17, 1992.[1] The complaint alleged, among other things, that the Fund: (a) Violated section 13(a)(3) of the Act by acquiring assets in violation of the Fund's investment policies and restrictions; (b) violated section 17(f) of and rule 17f-2 under the Act by failing to keep its assets with a proper custodian; (c) violated section 17(g) of the Act by failing to obtain a fidelity bond; (d) violated rule 22c-1 under the Act by selling, redeeming, or repurchasing redeemable securities issued by a registered investment company at prices other than those based on the current net asset value of each security, and (e) violated section 31 of the Act by failing to keep proper books and records. The complaint also alleged that the Fund's investment adviser, Public Funding Group, Inc. (the "Adviser"), and its president, V. Thayne Whipple II, committed fraud in the offer or sale of securities in violation of section 17(a) of the Securities Act of 1933, and in connection with the purchase or sale of securities in violation of section 10(b) of the Securities Exchange Act of 1934, and with aiding and abetting the Fund in committing the violations set forth above.

[1] Securities and Exchange Commission v. Public Funding Group, Inc., *et al.*, Civil Action No. 92 1646 (C.D. Cal. filed March 17, 1992).

3. The complaint alleged the following facts. The Fund distributed its securities solely in exchange for portfolio assets. By mid-February 1992, the Fund claimed to have 24 shareholders and total assets of approximately $40 million. The portfolio assets consisted of common sock and "commercial paper" notes. None of the stock held by the Fund was traded on any U.S. stock exchange, nor were any bid or ask prices listed for them during the Fund's existence. None of the commercial paper was rated by any commercially available rating service. All of the "commercial paper" was in fact merely promissory notes that had been signed and presented to the Fund in exchange for Fund shares. Nevertheless, the Adviser calculated the value of the portfolio assets at their face amounts, thus grossly overstating the Fund's total asset value. The Fund accepted the stock and notes in exchange for Fund shares in order to allow the use of the Fund's shares by the shareholders as collateral for loans from brokerage firms. To facilitate the use of the Fund's shares as collateral, the Adviser arranged to have the daily net asset values of the Fund's shares reported to the National Association of Securities Dealers, Inc. for public quotation. Subsequently, the Fund shareholders attempted to use the Fund shares as collateral for approximately $18.6 million of margin loans from broker-dealers.

4. On March 31, 1992, the Fund, the Adviser, and Whipple consented to the entry of a judgment and permanent injunction against them. In addition to enjoining them from future violations of the securities laws as set forth in the complaint, the judgment required that the Fund be dissolved by returning the portfolio securities to the shareholders who originally exchanged such securities for shares of the Fund.

5. All of the portfolio securities except shares of IT BK Group of Companies, Inc. ("IT Bank") and Sonnergie, Inc. ("Sonnergie") were returned to the persons and entities that exchanged them for shares of the Fund. The Fund shareholders who had exchanged the securities of these two companies did not respond to letters or repeated telephone calls seeking instructions on where to send the IT Bank and Sonnergie stock certificates. When the Fund's president attempted to transfer the shares back to the Fund's shareholders through IT Bank's and Sonnergie's transfer agent, he was informed that the transfer agent records for IT Bank and Sonnergie had been sent to Italy and Germany, respectively.

6. On September 1, 1992, the Fund deposited the stock certificates of IT Bank and Sonnergie with the United States District Court for the Central District of California. Each of the remaining thirteen shareholders was mailed a notice stating that their shares of IT Bank and Sonnergie had been deposited with the court. The Fund has no remaining assets and is enjoined from engaging in any further business activities.

7. Section 8(f) of the Act allows the Commission to deregister an investment company on its own motion if it finds that the company has ceased to be an investment company.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF STATE

[Public Notice 1703]

Advisory Committee to the United States Section International Commission for the Conservation of Atlantic Tunas Partially Closed Meeting

The Advisory Committee to the United States Section International Commission for the Conservation of Atlantic Tunas (ICCAT) will meet on October 19, 1992, at the National Oceanic and Atmospheric Administration, National Marine Fisheries Service (NMFS), Second Floor Conference Room, Silver Spring Metro Center Building 2, 1335 East-West Highway, Silver Spring, Maryland. The session will be open to the interested public and will begin at 9:30 am. The Committee will review the decisions reached at the 1991 ICCAT meetings, highlight on-going scientific preparations, and identify outstanding issues for the 1992 annual ICCAT meeting.

The Advisory Committee will also meet in closed session from 9:30 a.m. to 5 p.m. on October 20, 1992. The session will not be open to the public inasmuch as the discussion will involve classified matters pertaining to the United States negotiating position to be taken at the upcoming ICCAT annual meeting in Madrid, Spain, November 9–13, 1992. The members of the Advisory Committee will examine various options for the U.S. negotiating position at the November meeting, and these considerations must necessarily involve a review of classified materials. Accordingly, the determination has been made to close this portion of the meeting pursuant to section 10(d) of the Federal Advisory Committee Act, 5 U.S.C. App. 1 and 5 U.S.C. 552(c)(1) and (c)(9).

Requests for further information on the meeting should be directed to Mr. Brian S. Hallman, Deputy Director, Office of Fisheries Affairs (OES/OFA), room 5806, U.S. Department of State, Washington, DC 20520-7818. Mr. Hallman can be reached by telephone on (202) 647-2335 or by FAX on (202) 647-1106.

Dated: September 15, 1992.

David A. Colson,

Deputy Assistant Secretary, Oceans and Fisheries Affairs.

BILLING CODE 4910-62-M

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended September 18, 1992

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under subpart Q of

the Department of Transportation's Procedural Regulations (see 14 CFR 302.1701 et. seq.). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 48356.

Date filed: September 17, 1992.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 15, 1992.

Description: Application of Euro Pacific Air, Inc., pursuant to section 401(d) of the Act and subpart Q of the Regulations, applies for a certificate of public convenience and necessity authorizing it to engage in interstate and overseas charter air transportation of persons, property, and mail.

Docket Number: 48357.

Date filed: September 17, 1992.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 15, 1992.

Description: Application of Euro Pacific Air, Inc., pursuant to section 401(d) of the Act and subpart Q of the Regulations applies for a certificate of public convenience and necessity authorizing it to engage in foreign charter air transportation of persons, property, and mail between a point or points in the United States, its territories and possessions (including the District of Columbia) and a point or points outside thereof.

Docket Number: 45185.

Date filed: September 15, 1992.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 13, 1992.

Description: Application of Continental Airlines, Inc. pursuant to section 401 of the Act and subpart Q of the Regulations, applies for renewal of the Newark-London authority in its Route 383 certificate for a period of five years.

Docket Number: 47708.

Date filed: September 17, 1992.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 1, 1992.

Description: Amendment No. 3 to the Application of American Airlines, Inc., pursuant to section 401 of the Act and subpart Q of the Regulations, requests authority to engage in foreign air transportation of persons, property, and mail between a point or points in the United States and point or points in Venezuela.

Phyllis T. Kaylor,

Chief, Documentary Services Division.

BILLING CODE 4910-62-M

Federal Aviation Administration

[Summary Notice No. PE-92-27]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before October 19, 1992.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rule Docket (AGC-10), Petition Docket No. _____, 800 Independence Avenue, SW., Washington, DC 20591.

The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-10), room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-3132.

FOR FURTHER INFORMATION CONTACT: Mr. C. Nick Spithas, Office of Rulemaking (ARM-1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-9704.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of part 11 of the Federal Aviation Regulations (14 CFR part 11).

Issued in Washington, DC, on September 21, 1992.

Denise D. Castaldo,

Manager, Program Management Staff.

Petitions for Exemption

Docket No.: 13203.
Petitioner: Boeing.
Sections of the FAR Affected: 14 CFR 25.807(c) (1) and (5); 25.809(f)(1); 25.813(b).
Description of Relief Sought: To amend Exemption No. 1870D to permit the carriage of up to six persons on the upper deck of Model 747-400F airplanes having an all-cargo main deck configuration.

Docket No.: 26152.
Petitioner: Sierra Academy of Aeronautics.
Sections of the FAR Affected: 14 CFR part 141, appendix F, paragraphs (C)(III)(a)(2) (i) and (ii).
Description of Relief Sought: To extend Exemption No. 5245 which allows Sierra Academy of Aeronautics to graduate students from its FAA approved Commercial Helicopter Pilot training course with 80 hours of flight instruction in helicopters and 70 hours of directed solo training in helicopters.

Docket No.: 26942.
Petitioner: Precision Airlines.
Sections of the FAR Affected: 14 CFR 135.180(a).
Description of Relief Sought: To allow Precision Airlines to phase in a Traffic Avoidance Collision System (TCAS) implementation program over a 3-year period starting in 1995 rather than having all required TCAS equipment installed by February 9, 1995. Precision proposes the following schedule: 30 percent compliance by February 9, 1995; another 30 percent compliance by February 9, 1996; and the remaining 40 percent compliance by February 9, 1997.

Docket No.: 26971.
Petitioner: United Airlines.
Sections of the FAR Affected: 14 CFR 121.314.
Description of Relief Sought: The petitioner requests a partial exemption from § 121.314 of the FAR, Amendment 121-202. In specific, the petitioner seeks to extend the compliance date to April 20, 1993, for completing re-repairs of contoured liners.

Dispositions of Petitions

Docket No.: 17145.
Petitioner: United Airlines.

Sections of the FAR Affected: 14 CFR 121.665 and 121.697(a) and (b).
Description of Relief Sought/ Disposition: To extend Exemption No. 2466, as amended, which permits United Airlines to use computerized load manifests which bear the printed name and position of the person responsible for loading the aircraft.

Grant, July 28, 1992, Exemption No. 2466H

Docket No.: 26482.
Petitioner: United Parcel Service.
Sections of the FAR Affected: 14 CFR 121.358.
Description of Relief Sought/ Disposition: To allow United Parcel Service until June 30, 1995, to install either an approved airborne windshear warning and flight guidance system, an approved airborne windshear warning and flight guidance system, an approved airborne detection and avoidance system, or an approved combination of the systems (windshear equipment) in 18 Douglas DC–8 aircraft.

Grant, September 9, 1992, Exemption No. 5520

Docket No.: 26582.
Petitioner: Air Transport Association of America.
Sections of the FAR Affected: 14 CFR 61.3(a) and (c), 61.29(c), 63.3(a), 63.16(d), and 121.383(a)(2).
Description of Relief Sought/ Disposition: To permit the establishment of special procedures that would enable an operator to issue to its flight crewmembers, on a temporary basis, confirmation of any required crewmember certificate based upon information contained in the operator's approved record system. This procedure would serve in lieu of the FAA telegraphic certificate confirmation provided for in §§ 61.29(c) and 63.16(d) in those situations for which there is insufficient time for the airman to obtain certificate confirmation from the FAA prior to operating a scheduled flight.

Partial Grant, July 24, 1992, Exemption No. 5487

Docket No.: 26692.
Petitioner: America West Airlines, Inc. and BT Commercial Corporation.
Sections of the FAR Affected: 14 CFR 93.217 and 93.223.
Description of Relief Sought/ Disposition: To extend Exemption No. 5340A which allows BT Commercial Corporation (BT) to hold and America West Airlines, Inc. to continue to operate seven slots at O'Hare International Airport (O'Hare) and two slots at J.F.K. International Airport (J.F.K.). America West Airlines, Inc. transferred its seven slots at Chicago's O'Hare and two slots at New York's J.F.K. to BT as part of debtor-in-possession financing. BT leased those slots back to America West to operate. Under Exemption No. 5340A, these slots were not subject to the withdrawal provisions of the slot regulations, with the exception of the use-or-lose provisions of § 93.227 of the FAR. America West currently operates the subject slots in full compliance with this regulation.

Grant, September 9, 1992, Exemption No. 5518

Docket No.: 26734.
Petitioner: Sierra Industries, Inc.
Sections of the FAR Affected: 14 CFR 91.9(a) and 91.531(a)(1) and (2).
Description of Relief Sought/ Disposition: To permit Sierra Industries, Inc., and the operators of its Cessna Citation 500 models (for Serial Nos. 0001 through 0349 only) that are equipped with STC No. SA8176SW and either STC Nos. SA 2172NM or SA645NW to be operated by one pilot without a second-in-command.

Grant, September 9, 1992, Exemption No. 5517

Docket No.: 26784.
Petitioner: Florida Aerial Advertising.
Sections of the FAR Affected: 14 CFR 45.29(b)(1).
Description of Relief Sought/ Disposition: To allow for the use of smaller aircraft nationality and registration markings in place of the 12-inch high markings required by the regulations.

Denial Grant, September 14, 1992, Exemption No. 5521

Docket No.: 26919.
Petitioner: Kalamazoo Aviation History Museum.
Sections of the FAR Affected: 14 CFR part 45.
Description of Relief Sought/ Disposition: To operate the museum's Ford Trimotor, model number 5-AT-C, serial number 58, with 3-inch high nationality and registration marks located on each side of the fuselage under leading edge of the horizontal stabilizer.

Grant, September 11, 1992, Exemption No. 5521

[FR Doc. 92–23484 Filed 9–25–92; 8:45 am]
BILLING CODE 4910–13–M

Federal Highway Administration

Supplemental Environmental Impact Statement; Howard County, MD

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that a supplement to a final environmental impact statement will be prepared for the proposed highway project in Howard County, Maryland.

FOR FURTHER INFORMATION CONTACT: Mr. David Lawton, Planning, Research, Environment and Safety Engineer, Federal Highway Administration, The Rotunda—suite 220, 711 West 40th Street, Baltimore, Maryland 21211.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Maryland State Highway Administration and Howard County, will prepare a supplement to final environmental impact statement number FHWA-MD-EIS–87–04–F, dated July 12, 1989, for the proposed action involving the extension of Maryland Route 100, on new location, from west of Maryland Route 104 in Howard County to Interstate Route 95 in Howard County, Maryland a distance of approximately three (3) miles. This supplemental document is being developed as a result of proposed alignment shifts, to minimize and avoid wetland impacts, in corridors not previously evaluated in the 1989 FEIS.

Improvements to the corridor are considered necessary to provide for the existing and projected traffic demand. The purpose of Maryland Route 100 is to provide a controlled access east-west highway that will relieve congestion of the existing roadway network, and to provide a safe and efficient highway link that will move people, goods, and services more quickly and directly.

The alternatives under consideration include (1) taking no action and (2) constructing a six-lane divided, limited access highway on new location connecting U.S. 29 to I–95. Incorporated into and studied with the various build alternatives will be design variation of grade, alignment and structures.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies, and to private organizations and citizens who have previously expressed or are known to have interest

in this proposal. A public hearing will be held in the fall of 1992. Public notice will be given of the time and place of the hearing.

The draft supplemental EIS will be available for public and agency review and comment prior to the public hearing. No formal scoping meeting will be held.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties.

Comments or questions concerning this proposed actions and the EIS should be directed to the FHWA at the address provided above.

BILLING CODE 4910-22-M

National Highway Traffic Safety Administration

Denial of Motor Vehicle Petition

This notice sets forth the reason for the denial of a petition submitted to the National Highway Traffic Safety Administration (NHTSA) under section 124 of the National Traffic and Motor Vehicle Safety Act of 1966, as amended (15 U.S.C. 1381 *et seq.*).

Dr. Alan Morris, petitioned the agency on May 14, 1992, to "investigate the emergency release of motorized shoulder belts" in all vehicles equipped with automatic shoulder belts. The petition alleged that, during the course of an accident, the release buckle, which is made of plastic, can disintegrate as a result of an occupant's head striking the buckle, thereby releasing the shoulder belt. The petitioner implies that if such an event were to occur, the occupant would be exposed to excessive contact with the vehicle's interior components (e.g., the steering wheel, windshield, and dashboard) and increased potential for ejection, such as in a rollover accident. Dr. Morris also raised a concern about obscuration of vision and head impact caused by the location of the buckle release.

The agency has construed his request for an investigation as both a petition to conduct an investigation to determine whether a safety defect exists and a petition to commence a proceeding to determine whether rulemaking is appropriate regarding alleged problems with the emergency release of motorized shoulder belts.

As the basis of the petition, Dr. Morris reported a rollover accident involving a 1991 Ford Escort. The vehicle went off the road and rolled over one time. According to Dr. Morris the right front passenger struck her head on the emergency release buckle, causing the buckle to disintegrate and release the automatic shoulder belt. During a telephone conversion, Dr. Morris informed the agency that the occupant, who was ejected from the vehicle, sustained serious injuries. The occupant did not use the manual lap belt.

The location of the buckle release in the Escort is typical of vehicles equipped with a motorized automatic shoulder belt having an emergency release buckle. The buckle release is near the side of the front seat occupant's head when the belt is in use. The location of the safety belt buckle release anchorage is an important design consideration in ensuring performance of the belt system. The buckle in these vehicles is in a zone that could be contacted by the occupant's head during a violent crash, especially a rollover. Failure to use a lap belt may allow additional movement of the upper body (and head), thereby increasing the chance of head contact with various portions of the interior of the vehicle, including the buckle release, during such crashes.

The agency encourages full use of the vehicle's seat belt system. No matter what kind of automatic system the vehicle has, if it has a manual lap belt, it must be buckled for maximum protection. Occupants must use the complete system the manufacturer installed in the car and they must follow the instructions listed in the owner's manual.

To assess whether there have been instances of a buckle release due to occupant contact, the agency searched its real-world accident files that would contain such information. This search revealed no records indicating a buckle releasing during an accident in vehicles with automatic shoulder belts.

NHTSA estimates that there were over 5.3 million registered vehicles equipped with automatic shoulder belts which have emergency release buckles in the United States as of September 1, 1991. Out of these 5.3 million plus vehicles on the road, NHTSA's computerized consumer compliant system does not contain any instance, except for the petitioner's where occupant contact with the buckle during an accident allegedly caused the buckle to break and the shoulder belt to disengage. Further, NHTSA is not aware of any complaints of automatic shoulder belt buckle breakage, regardless of what might have caused the breakage.

A review of the agency's testing for compliance with Federal Motor Vehicle Safety Standard No. 208, "Occupant Crash Protection," revealed no buckle failure or belt release due to head contact with the emergency release buckle. Further, in the agency's consumer information program concerning vehicle crashworthiness, the New Care Assessment Program (NCAP), there were no reports of buckle release. In one NCAP test of a 1992 vehicle, the test dummy's head contacted the buckle release when the dummy rebounded back towards the seat after its initial forward motion. However, the buckle was not damaged and remained engaged.

Concerning visual obscuration, NHTSA has received two consumer complaints alleging visual obscuration to the side in vehicles with automatic shoulder belts. However, neither reported that an accident occurred as a result of the problem. Based on very few complaints reported and no accidents, the alleged visual obscuration caused by the emergency release buckle does not appear to present a significant safety risk.

Since no evidence of a safety-related defect trend was discovered on either of the issues included in Dr. Morris' petition, further commitment of resources does not appear to be warranted.

With respect to the petition concerning rulemaking, for the reasons cited above, it was also concluded that there is not a reasonable possibility that any amendments to NHTSA's safety standards would be issued at the conclusion of a regulatory proceeding. Therefore, the petition is denied in its entirety.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review.

Dated: September 21, 1992.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545-0152.
Form Number: IRS Form 3115.
Type of Review: Revision.
Title: Application for Change in Accounting Method.
Description: Form 3115 is used by taxpayers who wish to change their method of computing their taxable income. The form is used by the IRS to determine if electing taxpayers have met the requirements and are able to change to the method requested.
Respondents: Individuals or households, Farms, Businesses or other for-profit.
Estimated Number of Respondents/Recordkeepers: 6,400.

ESTIMATED BURDEN HOURS PER RESPONDENT/RECORDKEEPER

Form and recordkeeping	Learning about the law or the form	Preparing and sending the form to IRS
3115 19 hours, 51 minutes	3 hours, 38 minutes	5 hours, 20 minutes.
A 23 hours, 12 minutes	1 hour, 58 minutes	3 hours, 38 minutes.
B 4 hours, 16 minutes	1 hour, 4 minutes	2 hours, 23 minutes.
C 26 hours, 33 minutes	3 hours, 11 minutes	3 hours, 45 minutes.
D 14 hours, 21 minutes	2 hours, 41 minutes	3 hours, 2 minutes.

Frequency of Response: Annually.
Estimated Total Reporting Burden: 357,335 hours.
OMB Number: 1545-1277.
Form Number: IRS Form 1040-TEL.
Type of Review: Revision.
Title: Telefile Income Tax Return for Single Filers With No Dependents.
Description: State of Ohio 1040EZ filers will have the option of filing Form 1040-TEL, in which they will enter their tax information on a Touch-Tone telephone. IRS will use the information collected to figure the filer's tax, and refund or balance due.
Respondents: Individuals or households.
Estimated Number of Respondents/Recordkeepers: 200,000.
Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping	7 minutes.
Learning about the law or the form.	7 minutes.
Preparing the form	17 minutes.
TeleFile phone call, and copying, assembling and sending the form to the IRS.	27 minutes.

Frequency of Response: Annually.
Estimated Total Reporting Burden: 142,025 hours.

BILLING CODE 4830–01–M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

[Docket No. 301–87]

Modification of Determination of Action Pursuant to Section 301 Concerning Canadian Exports of Softwood Lumber; Opportunity for Comment

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of modification pursuant to section 307(a)(1)(C) of the Trade Act of 1974, as amended (Trade Act), of action concerning Canadian exports of softwood lumber; and opportunity for interested persons affected by the modification to submit written comments.

SUMMARY: On October 4, 1991, the United States Trade Representative (USTR) determined, pursuant to section 301 of the Trade Act, that certain Canadian government acts, policies, and practices relating to the termination of the Memorandum of Understanding on Trade in Softwood Lumber (MOU) are unreasonable and burden or restrict United States commerce (56 FR 50738, corrected by 56 FR 58944). After determining that action was appropriate, USTR directed the Customs Service to (1) withhold liquidation of entries of softwood lumber from Canada after October 4, 1991; (2) require importers to post bonds to cover potential 301 duties with respect to those entries; and (3) assess 301 duties upon entries from each province at the lower of the MOU rate or the subsidy rate found by the Department of Commerce (Commerce) in its parallel countervailing duty investigation. USTR expressly conditioned the assessment of 301 duties upon the issuance by both Commerce and the International Trade Commission (ITC) of affirmative final determinations in the countervailing duty investigation.

Commerce and the ITC have issued affirmative determinations, thus satisfying the conditions for the imposition of 301 duties upon the entries covered by the 301 determination (*i.e.*, entries after October 4, 1991 and before March 12, 1992, the date of Commerce's preliminary determination). In its final determination, Commerce found that imports of certain softwood lumber products from Canada were receiving countervailable subsidies of 6.51 percent *ad valorem*. This rate is applicable to all provinces and territories covered by the investigation. Because British Columbia was not subject to an export tax under the MOU, the Customs Service may liquidate entries of softwood lumber from that province without the assessment of any 301 duties. In addition, 15 companies were excluded from the countervailing duty order. The Customs Service may liquidate entries of softwood lumber from these companies without the assessment of any 301 duties.

Canada, several provinces, and the United States and Canadian industries have requested review of the Commerce and ITC determinations pursuant to chapter 19 of the Canada-United States Free Trade Agreement (CFTA). To allow for the completion of chapter 19 review, USTR has modified its 301 determination pursuant to section 307(a)(1)(C) of the Trade Act. Specifically, USTR has directed the Customs Service to notify importers of record of softwood lumber from the provinces and territories subject to a 301 duty (*i.e.*, Alberta, Manitoba, Ontario, Quebec, Saskatchewan, the Northwest Territories, and the Yukon Territory) during the period covered by the 301 determination that (1) they may request extension of liquidation pursuant to 19 U.S.C. 1504(b)(3) pending the conclusion of Chapter 19 review proceedings; (2) any request based upon the binational panel proceedings will be considered for good cause; and (3) any entries extended pursuant to such a request will be assessed 301 duties in accordance with the outcome of chapter 19 review proceedings (*i.e.*, at the lower of the applicable MOU rate or the Commerce rate at the conclusion of chapter 19 review proceedings).

DATES: The Customs Service will notify the affected importers of record as soon as possible and will extend the liquidation of particular entries upon receipt of any request pursuant to 19 U.S.C. 1504(b)(3) from the importer of record. The Customs Service will liquidate any affected entry for which no request has been received within one year of the date of entry at the lower of the 6.51 percent rate found by Commerce or the applicable MOU rate. Interested persons affected by the modification of action may submit written comments by October 30, 1992.

ADDRESSES: Office of the United States Trade Representative, room 223, 600 17th Street, NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: David Weiss, Deputy Assistant United States Trade Representative for North American Affairs, (202) 395–5663; or Timothy Reif, Associate General Counsel (202) 395–6800.

SUPPLEMENTARY INFORMATION: On June 5, 1986, in response to a petition filed on behalf of the United States industry, Commerce initiated a countervailing duty investigation regarding softwood lumber products from Canada. On October 22, 1986, following the issuance of a preliminary determination of injury by the ITC, Commerce published a preliminary determination estimating that subsidies of 15 percent *ad valorem* were being provided to Canadian producers of certain softwood lumber products.

On December 30, 1986, the United States and Canada signed the MOU, in which Canada agreed to impose a 15 percent export charge on certain softwood lumber products. The MOU provided, among other things, that the original charge could be reduced or eliminated with respect to lumber exported from provinces that instituted replacement measures increasing stumpage or other charges on the harvest of timber. In return for Canada's recommitments in the MOU (and the

Administration's use of section 301, as described below), the United States lumber industry withdrew its petition and commerce terminated the countervailing duty investigation.

On the same date, the President took action pursuant to section 301 of the Trade Act to ensure that the objectives and commitments of the MOU were fulfilled (52 FR 231, 233). In particular, the President determined that the inability of the Government of Canada to collect export charges during an interim period following the signing of the MOU constituted a burden and restriction upon United States commerce. Accordingly, the President proclaimed an increase in rates of duty on softwood lumber products from Canada until the export charge required by the MOU became effective.

On September 3, 1991, the Government of Canada announced that it would terminate the MOU in 30 days. Thus, as of October 4, 1991, Canada terminated the MOU and ceased collecting export charges on softwood lumber products. Consequently, the United States, which in December 1986 had terminated its countervailing duty investigation in reliance upon Canada's undertakings in the MOU, was denied the offset that had been provided by Canadian export charges against possible injurious Canadian subsidies.

On October 4, 1991, in response to Canada's termination of the MOU, Commerce initiated a new countervailing duty investigation. Because of the limited notice provided by Canada prior to termination of the MOU, and the length of time required to complete a preliminary subsidy investigation, Commerce was unable to impose interim protective measures during the period between the termination of the MOU and the issuance of a new preliminary determination, which, if affirmative, would require importers to post bonds or cash deposits to cover estimated countervailing duties.

Also on October 4, 1991, USTR determined that Canada's acts, policies, and practices in terminating the MOU were unreasonable and burdened or restricted United States commerce. USTR further determined that action was appropriate pursuant to section 304 (1) To restore and maintain the *status quo* pending the issuance of the preliminary countervailing duty determination; and (2) if warranted, to impose duties to offset the effects of any subsidies found in that investigation. These determinations were made at the specific direction of the President, after consultations with the Government of Canada failed to result in a mutually satisfactory solution.

In the 301 determination, USTR instructed the Customs Service to withhold liquidation of Canadian lumber entered between the termination of the MOU and the issuance of Commerce's preliminary determination. USTR also instructed the Customs Service to assess 301 duties on the entries covered by the 301 determination if Commerce and the ITC issued final affirmative determinations in the countervailing duty investigation. Any 301 duties were to be based upon the lower of the MOU rate or the rate determined in the countervailing duty investigation.

On March 12, 1992, Commerce issued its preliminary determination, and the interim measures imposed pursuant to the countervailing duty law superseded those imposed pursuant to section 301. Both Commerce and the ITC subsequently issued final affirmative determinations. Thus, the preconditions for the assessment of 301 duties have been satisfied.

In its final determination, Commerce found that imports of certain softwood lumber products from Canada were receiving countervailable subsidies of 6.51 percent *ad valorem*. This rate is applicable to all provinces and territories covered by the investigation. As noted previously, the 301 determination directed Customs to assess 301 duties at the lower of the provincial rates applicable under the MOU or those found by commerce in the countervailing duty investigation. Because British Columbia was not subject to an export charge under the MOU, entries of softwood lumber from that province may be liquidated without the assessment of any 301 duties. In addition, 15 companies were excluded from the countervailing duty order. The Customs Service may liquidate entries of softwood lumber from these companies without the assessment of any 301 duties.

Exports of softwood lumber from the remaining provinces (*i.e.*, Alberta, Manitoba, Ontario, Quebec, Saskatchewan, the Northwest Territories, and the Yukon Territory) were subject to an export charge under the MOU. Under the MOU, Quebec's export tax rate was 6.2 percent *ad valorem* through October 31, 1991, and 3.1 percent *ad valorem* thereafter. Alberta, Manitoba, Ontario, Saskatchewan, the Northwest Territories and the Yukon Territory were subject to the full 15 percent *ad valorem* export tax throughout the MOU period. Thus, in the absence of any modification to the 301 determination, entries from these provinces during the period covered by the 301 determination would be assessed 301 duties at the lower of the 6.51 percent *ad valorem* found by Commerce or the applicable rate under the MOU.

The Government of Canada, various provinces, and the Canadian lumber industry have requested review of the Commerce and ITC determinations pursuant to chapter 19 of the CFTA. Additionally, the United States industry has challenged Commerce's determination, contending that it understates the level of Canadian subsidies. The chapter 19 proceedings could result in an increase or decrease in the amount of countervailing duties imposed upon the entries covered by that investigation.

Accordingly, USTR has modified its 301 determination pursuant to section 307 of the Trade Act to allow for the completion of chapter 19 proceedings. Section 307(a)(1)(C) authorizes the USTR to modify any action, subject to the specific direction, if any, of the President with respect to such action, that is being taken pursuant to section 301 if such action is no longer appropriate. After consulting with representatives of the domestic industry and the Government of Canada, USTR has decided that the 301 determination should be modified to allow for the extension of liquidation of entries covered by the 301 determination that could be affected by the chapter 19 proceedings.

Specifically, USTR has directed the Customs Service to notify importers of record of softwood lumber during the period covered by the 301 determination (*i.e.*, October 4, 1991 through March 12, 1992) that (1) they may request extension of liquidation pursuant to 19 U.S.C. 1504(b)(3) pending the outcome of chapter 19 proceedings; (2) any request based upon the pendency of chapter 19 proceedings will be considered for good cause; and (3) any entries extended pursuant to such a request will be assessed 301 duties in accordance with the outcome of chapter 19 proceedings (*i.e.*, at the lower of the applicable MOU rate or the Commerce rate at the conclusion of chapter 19 proceedings). Importers shall be informed that the results of the chapter 19 proceedings may be to increase, decrease, or eliminate the 301 duty to be assessed and that the proceedings may take a year or more to complete.

Opportunity for Comment

Section 307(a)(2) requires USTR to provide an opportunity for comment by interested persons affected by a

modification of action concerning the effects of the modification and whether the modification is appropriate. Accordingly, all interested persons affected by this modification may submit written comments concerning the modification. USTR will consider any comments submitted by such persons in determining whether any further modifications may be necessary.

Comments must be filed in accordance with the requirements set forth in 15 CFR 2006.8(b). Comments must be in English and provided in twenty copies to: Chairman, Section 301 Committee, room 223, USTR, 600 17th Street NW., Washington, DC 20506. All comments should be submitted by October 30, 1992.

Comments will be placed in a file (Docket No. 301–87) open to public inspection pursuant to 15 CFR 2006.13 except for confidential business information exempt from public inspection in accordance with 15 CFR 2006.15. Confidential business information submitted in accordance with 15 CFR 2006.15 must be clearly marked "Business Confidential" in a contrasting color ink at the top of each page on each of the 20 copies, and must be accompanied by a nonconfidential summary of the confidential information. The nonconfidential summary shall be placed in the docket, which is open to public inspection.

Jeanne E. Davidson,

Chairman, Section 301 Committee.

BILLING CODE 3190–01–M

DEPARTMENT OF VETERANS AFFAIRS

Information Collection Under OMB Review

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

The Department of Veterans Affairs has submitted to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). This document lists the following information: (1) The title of the information collection, and the Department form number(s), if applicable; (2) a description of the need and its use; (3) who will be required or asked to respond; (4) an estimate of the total annual reporting hours, and recordkeeping burden, if applicable; (5) the estimated average burden hours per respondent; (6) the frequency of response; and (7) an estimated number of respondents.

ADDRESSES: Copies of the proposed information collection and supporting documents may be obtained from Ann Bickoff, Veterans Health Administration (161B3), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420 (202) 535–7407.

Comments and questions about the items on the list should be directed to VA's OMB Desk Officer, Joseph Lackey, NEOB, room 3002, Washington, DC 20503, (202) 395–7316. Do not send requests for benefits to this address.

DATES: Comments on the information collection should be directed to the OMB Desk Officer on or before October 28, 1992.

Dated: September 11, 1992.

By direction of the Secretary.

Donald R. Howell,

Chief, Information Management Division.

New Collection

1. Epidemiological, Clinical, and Psychosocial Study of Post-Traumatic Stress Disorders Among Selected Ethno-Cultural Minority Vietnam Era and Theater Veterans VA Form 10–20933A, B and C.

2. The purpose of this study is to determine the prevalence for Post-Traumatic Stress Disorders (PTSD) among Native Hawaiian and Japanese Americans era and theater veterans; the patterns of PTSD expression and experience; and the perception and evaluation of the treatments received for PTSD and non-PTSD, as well as the barriers to seeking and obtaining care.

3. Individuals or households.

4. 5,180 hours.

5. 5 hours.

6. Non-recurring.

7. 1,036 respondents.

BILLING CODE 8320–01–M

Advisory Committee on Cemeteries and Memorials; Meeting

Pursuant to the Federal Advisory Committee Act, 5 U.S.C. appendix, the Department of Veterans Affairs gives notice that a meeting of the Advisory Committee on Cemeteries and Memorials, authorized by 38 U.S.C. 2401, will be held on October 20, 1992.

The First Session of the meeting will begin at 8 a.m. in the Shoreway Acres Inn, Shore Street, Falmouth, Massachusetts 02541. Items to be discussed include, but are not limited to, expansion plans, the state cemetery grant program, memorialization and eligibility policy. The meeting will be open to the public up to the seating capacity, which is about 20 persons. The Second Session of the meeting will begin at 2 p.m. at the Massachusetts National Cemetery, Bourne, Massachusetts 02532. This session will be open to the public. Those wishing to attend should contact Mr. Terry Glaser, Special Assistant to the Director, National Cemetery System, [phone (202) 535–7819] not later than 12 noon, EDT October 13, 1992.

Any interested person may attend, appear before, or file a statement with the Committee. Individuals wishing to appear before the Committee should write to the Director, National Cemetery System (40) at 810 Vermont Avenue, NW., Washington, DC 20420. In any such letters, the writers must fully identify themselves and state the organization or association or person they represent. Letters should indicate the subject matter they want to discuss. Oral presentations will be limited to 10 minutes in duration. Those wishing to submit written statements to the Committee must also mail or otherwise deliver them to the Director, National Cemetery System.

Letters and written statements as discussed above must be mailed or delivered in time to reach the Director, National Cemetery System by 12 noon EDT October 13, 1992. Oral statements will be heard only between 11:30 a.m. and 12 noon, October 20, 1992.

Dated: September 21, 1992.

By Direction of the Secretary.

Diane H. Landis,

Committee Management Officer.

BILLING CODE 8320–01–M

Advisory Committee on Women Veterans; Meeting

The Department of Veterans Affairs gives notice under Pub. L. 92–463 that a

subcommittee meeting of the Advisory Committee on Women Veterans will be held on October 9, 1992, room 322, 1825 K Street, NW., Washington, DC. The purpose of the subcommittee meeting is to review the research protocol for the Study of Reproductive Health Outcomes Among Women Vietnam Veterans. The subcommittee will address such issues as study design, questionnaire design and feasibility of the main study.

The subcommittee will convene on October 9 from 10 a.m. to 3 p.m. and all sessions will be open to the public up to the seating capacity of the room. Because this capacity is limited, it will be necessary for those wishing to attend to contact Barbara Brandau, Committee Coordinator, Department of Veterans Affairs (phone 202/535-7571) prior to October 2, 1992.

Dated: September 21, 1992.

Vol. 57, No. 188
Monday, September 28, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

DEPARTMENT OF ENERGY

FEDERAL ENERGY REGULATORY COMMISSION

Notice of Closed Meeting

The following notice of meeting is published pursuant to Section 3(a) of the Government in the Sunshine Act (Pub. L. No. 94-409), 5 U.S.C. 552b:

DATE AND TIME: September 30, 1992, 9:00 a.m.

PLACE: 825 North Capitol Street, NE., Room 9306, Washington, D.C. 20426.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

(1) Northwest Pipeline Corporation, Docket Nos. IN90-1-000, CP89-304-000 and CP89-305-000.

(2) Indicated Shippers v. El Paso Natural Gas Company, Docket Nos. CP91-732-000 and CP88-332-010.

CONTACT PERSON FOR MORE INFORMATION: Lois D. Cashell, Secretary, Telephone (202) 208-0400.

Dated: September 23, 1992.

Lois D. Cashell,

Secretary.

Corrections

Federal Register
Vol. 57, No. 188
Monday, September 28, 1992

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1145

[Ex parte No. 394 (Sub-No.10)]

Railroad Rates on Recyclables; Exemptions

Correction

In proposed rule document 92–21663 beginning on page 41122, in the issue of Wednesday September 9, 1992, make the following correction:

§ 1145.9 [Corrected]

1. On page 41123, in the second column, in § 1145.9, in the section heading "[Amended]" should read "Exemptions".

BILLING CODE 1505–01–D

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 92–AGL–6]

Proposed Alteration to VOR Federal Airways; MI

Correction

In proposed rule document 92–19732 beginning on page 37491 in the issue of Wednesday, August 19, 1992, make the following correction:

§ 71.1 [Corrected]

1. On page 37492, in the second column, under § 71.1, in the second paragraph, under V–116, in the seventh line, "890°" should read "089°"

2. On the same page, in the same column under V–221, in the fourth line, "225°" should read "255°".

Part II

Department of the Interior

Fish and Wildlife Service

50 CFR Part 20

Migratory Bird Hunting; Late Seasons and Bag and Possession Limits for Certain Migratory Game Birds; Final Rule

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

RIN 1018-AA24

Migratory Bird Hunting; Late Seasons and Bag and Possession Limits for Certain Migratory Game Birds

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule prescribes the hunting seasons, hours, areas, and daily bag and possession limits for general waterfowl seasons and those early seasons for which States previously deferred selection. Taking of migratory birds is prohibited unless specifically provided for by annual regulations. This rule will permit taking of designated species during the 1992–93 season.

EFFECTIVE DATE: September 28, 1992.

FOR FURTHER INFORMATION CONTACT: Thomas J. Dwyer, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, room 634—Arlington Square, Washington, DC 20240, (703) 358–1714.

SUPPLEMENTARY INFORMATION:

Regulations Schedule for 1992

On May 8, 1992, the Service published for public comment in the **Federal Register** (57 FR 19865) a proposal to amend 50 CFR part 20, with comment periods ending July 20, 1992, for early-season proposals and August 31, 1992, for late-season proposals. On June 19, 1992, the Service published for public comment a second document (57 FR 27672) which provided supplemental proposals for early- and late-season migratory bird hunting regulations frameworks. On June 25, 1992, a public hearing was held in Washington, DC, as announced in the May 8 and June 19 **Federal Registers** to review the status of migratory shore and upland game birds. Proposed hunting regulations were discussed for these species and for other early seasons. On July 10, 1992, the Service published in the **Federal Register** (57 FR 30884) a third document in the series of proposed, supplemental, and final rulemaking documents which dealt specifically with proposed early-season frameworks for the 1992–93 season. On August 6, 1992, a public hearing was held in Washington, DC, as announced in the **Federal Registers** of May 8, June 19, and July 10, 1992, to review the status of waterfowl. Proposed hunting regulations were discussed for these late seasons. On August 21, 1992, the Service published a fourth document (57 FR 38202) containing final frameworks for early migratory bird hunting seasons from which wildlife conservation agency officials from the States, Puerto Rico, and the Virgin Islands selected early-season hunting dates, hours, areas, and limits for 1992–93. The fifth document in the series, published August 21, 1992 (57 FR 38215), dealt specifically with proposed frameworks for the 1992–93 late-season migratory bird hunting regulations. On August 27, 1992, the Service published in the **Federal Register** (57 FR 39072) a sixth document consisting of a final rule amending subpart K of title 50 CFR part 20 to set hunting seasons, hours, areas, and limits for early seasons.

On September 22, 1992, the Service published a seventh document in the **Federal Register** (57 FR 43856), final late-season frameworks for migratory game bird hunting regulations, from which State wildlife conservation agency officials selected late-season hunting dates, hours, areas, and limits for 1992–93. The final rule described here is the eighth in a series of proposed, supplemental, and final rulemaking documents for migratory game bird hunting regulations and deals specifically with amending subpart K of 50 CFR part 20 to set hunting seasons, hours, areas, and limits for species subject to late-season regulations and those early-seasons that were previously deferred.

NEPA Consideration

NEPA considerations are covered by the programmatic document, "Final Supplemental Environmental Impact Statement: Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FSES 88-14)," filed with EPA on June 9, 1988. Notice of Availability was published in the **Federal Register** on June 16, 1988 (53 FR 22582). The Service's Record of Decision was published on August 18, 1988 (53 FR 31341). However, this programmatic document does not prescribe year-specific regulations; those are developed annually. The annual regulations and options were considered in the Environmental Assessment, "Waterfowl Hunting Regulations for 1992." Copies of these documents are available from the Service at the address indicated under the caption **ADDRESSES**.

Endangered Species Act Consideration

On July 2, 1992, the Division of Endangered Species concluded that the proposed action is not likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of their critical habitats. Hunting regulations are designed, among other things, to remove or alleviate chances of conflict between seasons for migratory game birds and the protection and conservation of endangered and threatened species and their habitats. The Service's biological opinions resulting from its consultation under section 7 are considered public documents and are available for inspection in the Division of Endangered Species and the Office of Migratory Bird Management.

Regulatory Flexibility Act; Executive Orders 12291, 12612, 12630, and 12778; and the Paperwork Reduction Act

In the May 8 **Federal Register**, the Service reported measures it had undertaken to comply with requirements of the Regulatory Flexibility Act and Executive Order 12291. These included preparing a Determination of Effects and an updated Final Regulatory Impact Analysis, and publishing a summary of the latter. These regulations have been determined to be major under Executive Order 12291 and they have a significant economic impact on substantial numbers of small entities under the Regulatory Flexibility Act. It has been determined that these rules will not involve the taking of any constitutionally protected property rights, under Executive Order 12630, and will not have any significant federalism effects, under Executive Order 12612. The Department of the Interior has certified to the Office of Management and Budget that these proposed regulations meet the applicable standards provided in sections 2(a) and 2(b)(2) of Executive Order 12778. These determinations are detailed in the aforementioned documents which are available upon request from the Office of Migratory Bird Management at the address indicated under the caption **ADDRESSES**. These regulations contain no information collections subject to Office of Management and Budget review under the Paperwork Reduction Act of 1980.

Memorandum of Law

The Service published its Memorandum of Law, required by section 4 of Executive Order 12291, in the **Federal Register** dated August 21, 1992 (57 FR 38202).

Authorship

The primary authors of this rule are David F. Caithamer and William O. Vogel, Office of Migratory Bird Management.

Regulations Promulgation

The rulemaking process for migratory game bird hunting must, by its nature, operate under severe time constraints. However, the Service intends that the public be given the greatest possible opportunity to comment on the regulations. Thus, when the preliminary proposed rulemaking was published, the Service established what it believed were the longest periods possible for public comment. In doing this, the Service recognized that when the comment period closed time would be of the essence. That is, if there were a delay in the effective date of these regulations after this final rulemaking, the States would have insufficient time to establish and publicize the necessary regulations and procedures to implement their decisions. The Service therefore finds that "good cause" exists, within the terms of 5 U.S.C. 553(d)(3) of the Administrative Procedure Act, and these regulations will, therefore, take effect immediately upon publication.

Accordingly, with each State conservation agency having had an opportunity to participate in selecting the hunting seasons desired for its State on those species of migratory birds for which open seasons are now to be prescribed, and consideration having been given to all other relevant matters presented, certain sections of title 50, chapter I, subchapter B, part 20, subpart K, are hereby amended as set forth below.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Reporting and recordkeeping requirements, Transportation, Wildlife.

Dated: September 23, 1992.

Mike Hayden,

Assistant Secretary for Fish and Wildlife and Parks.

PART 20—[AMENDED]

For the reasons set out in the preamble, title 50, chapter I, subchapter B, part 20, subpart K is amended as follows.

1. The authority citation for part 20 is revised to read as follows:

Authority: Migratory Bird Treaty Act of July 3, 1918, as amended, (16 U.S.C. 703–711), and the Fish and Wildlife Improvement Act of November 8, 1978, as amended, (16 U.S.C. 712).

BILLING CODE 4310-55-F

Note - The following annual regulations provided for by §§20.104, 20.105, 20.106, 20.107, and 20.109 of 50 CFR part 20 will not appear in the Code of Federal Regulations because of their seasonal nature.

2. Section 20.104 is amended as follows:

§20.104 Seasons, limits, and shooting hours for rails, woodcock, and common snipe.

Subject to the applicable provisions of the preceding sections of this part, areas open to hunting, respective open seasons (dates inclusive), shooting and hawking hours, and daily bag and possession limits for the species designated in this section are prescribed as follows:

Shooting and hawking hours are one-half hour before sunrise until sunset, except as otherwise restricted by State regulations. Area descriptions were published in the Federal Register on August 21, 1992, (57 FR 38202) and September 22, 1992, (57 FR 43856).

CHECK STATE REGULATIONS FOR ADDITIONAL RESTRICTIONS, INCLUDING AREA DESCRIPTIONS.

NOTE: The following seasons are in addition to the seasons published previously in the August 27, 1992, Federal Register (57 FR 39072).

	Rails (Sora & Virginia)	Rails (Clapper & King)	Woodcock	Common Snipe

. . . . .				

(1) The bag and possession limits for sora and Virginia rails apply singly or in the aggregate of these species.
(2) All bag and possession limits for clapper and king rails apply singly or in the aggregate of the two species and, unless otherwise specified, the limits are in addition to the limits on sora and Virginia rails in all States. In Connecticut, Delaware, Maryland, New Jersey, and Rhode Island, the limits for clapper and king rails are 10 daily and 20 in possession.
(3) In States of the Atlantic Flyway, the woodcock bag limit is 3 daily and 6 in possession.

* * * * *

(10) In New Mexico, the rail limits are 10 daily and 10 in possession.

* * * * *

(13) In Arizona, Ashurst Lake in Unit 5B is closed to common snipe hunting.

3. Section 20.105 paragraph (a) is amended, paragraph (b) is revised, and paragraph (e) is added to read as follows:

§20.105 Seasons, limits, and shooting hours for waterfowl, coots, and gallinules.

Subject to the applicable provisions of the preceding sections of this part, areas open to hunting, respective open seasons (dates inclusive), shooting and hawking hours, and daily bag and possession limits for the species designated in this section are prescribed as follows:

Shooting and hawking hours are one-half hour before sunrise until sunset, except as otherwise restricted by State regulations. Area descriptions were published in the Federal Register on August 21, 1992, (57 FR 38202) and September 22, 1992, (57 FR 43856).

CHECK STATE REGULATIONS FOR ADDITIONAL RESTRICTIONS AND DELINEATIONS OF GEOGRAPHICAL AREAS. SPECIAL RESTRICTIONS MAY APPLY ON FEDERAL AND STATE PUBLIC HUNTING AREAS AND FEDERAL INDIAN RESERVATIONS.

(a) Common Moorhens and Purple Gallinules
(Atlantic, Mississippi, and Central Flyways)

NOTE: The following seasons are in addition to the seasons published previously in the August 27, 1992, Federal Register (57 FR 39072). The zones named in this paragraph are the same as those used for setting duck seasons.

South Carolina	Oct. 6-Jan. 20	7	14
Virginia	Oct. 6-Jan. 20	7	14

Note: Notwithstanding the provisions of this Part 20, the shooting of crippled waterfowl from a motorboat under power will be permitted in Maine, Massachusetts, New Hampshire, Rhode Island, Connecticut, New York, Delaware, Virginia and Maryland in those areas described, delineated, and designated in their respective hunting regulations as special sea duck hunting areas.

(c) Waterfowl, Coots, and Pacific-Flyway Seasons for Common Moorhens and Purple Gallinules

ATLANTIC FLYWAY

Definitions

The Atlantic Flyway: Includes Connecticut, Delaware, Florida, Georgia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, and West Virginia.

Light Geese: Includes lesser snow (including blue) geese, greater snow geese, and Ross' geese.

Dark Geese: Includes Canada geese, white-fronted geese, and brant.

Flywaywide Restrictions

Duck Limits: The daily bag limit may include no more than 1 female mallard, 1 pintail, 1 black duck, 1 mottled duck, 2 wood ducks, 2 redheads, and 1 fulvous tree duck. The possession limit is twice the daily bag limit.

Canvasbacks: All areas of the Flyway are closed to canvasback hunting.

Harlequin Ducks: All areas of the Flyway are closed to harlequin duck hunting.

Merganser Limits: The merganser limits include no more than 1 hooded merganser daily and 2 in possession

(1) In Connecticut, the season is closed for black ducks during October 17 through October 24 in the North Zone and on October 17 in the South Zone.
(2) In Maryland, the daily bag limit may include no more than 1 redhead; and the black duck season is closed October 16 through October 17.
(3) In Pennsylvania, the special season will only be held along portions of the Susquehanna and Juniata Rivers. See State regulations for details.
(4) In South Carolina, the bag limit of 3 may include no more than 1 female mallard or 1 black duck or 1 mottled duck.
(5) In Vermont, a permit is required for the Dead Creek Goose Management Area in the town of Addison.

MISSISSIPPI FLYWAY

Definitions

The Mississippi Flyway: Includes Alabama, Arkansas, Illinois, Indiana, Iowa, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Ohio, Tennessee, and Wisconsin.

Light Geese: Includes lesser snow (including blue) geese, greater snow geese, and Ross' geese.

Dark Geese: Includes Canada geese, white-fronted geese, and brant.

Flywaywide Restrictions

Duck Limits: The daily bag limit may include no more than 2 mallards (no more than 1 of which may be a female), 1 black duck, 1 pintail, 2 wood ducks, and 1 redhead. The possession limit is twice the daily bag limit.

Canvasbacks: All areas of the Flyway are closed to canvasback hunting.

Merganser Limits: The merganser limits include no more than 1 hooded merganser daily and 2 in possession.

(1) Geese taken in Illinois and Missouri and in the Kentucky counties of Ballard, Hickman, Fulton, and Carlisle may not be transported, shipped or delivered for transportation or shipment by common carrier, the Postal Service, or by any person except as the personal baggage of licensed waterfowl hunters, provided that no hunter shall possess or transport more than the legally-prescribed possession limit of geese. Geese possessed or transported by persons other than the taker must be labeled with the name and address of the taker and the date taken.

(2) Harvests of Canada geese will be limited as follows:

Illinois:
- Southern Illinois Quota Zone - 39,500
- Rend Lake Quota Zone - 11,850
- Remainder of State - 27,650

Indiana:
- Posey County - 6,000
- Remainder of State - 13,000

Kentucky:
- Western Zone:
  - Ballard Reporting Area - 14,560
  - Henderson/Union Reporting Area - 4,260
  - Remainder of Western Zone - 3,580

Michigan:
- Allegan County Goose Management Unit - 5,000
- Muskegon Wastewater Goose Management Unit - 1,000
- Saginaw County Goose Management Unit - 4,000
- Tuscola/Huron Goose Management Unit - 2,000
- Remainder of State - 42,600

Minnesota: Lac qui Parle Zone - 6,000

Missouri: Swan Lake Zone - 10,000

Tennessee:
- Northwest Zone:
  - Reelfoot Subzone - 6,200
  - Remainder of Northwest Zone - 2,700
- Southwest Zone - 500

Wisconsin:
- Horicon Zone - 49,500
- Collins Zone - 1,700
- Exterior Zone - 20,000

When it has been determined that the quota of Canada geese allotted to the Southern Illinois Quota Zone, the Rend Lake Quota Zone in Illinois, the Swan Lake Zone in Missouri, Posey County in Indiana, the Lac qui Parle Zone in Minnesota, the Ballard and Henderson/Union Reporting Areas in Kentucky, the Reelfoot Subzone in Tennessee, and the Allegan County, Muskegon Wastewater, Fish Point, and Saginaw County Goose Management Units in Michigan, will have been filled, the season for taking Canada geese in the respective area will be closed by either the Director upon giving public notice through local information media at least 48 hours in advance of the time and date of closing or by the State through State regulations with such notice and time (not less than 48 hours) as they deem necessary.

(3) In Indiana, in Lagrange and Steuben Counties and on the Jasper-Pulaski and Kankakee Fish and Wildlife Areas, the bag and possession limits for Canada geese shall be 1 and 2, respectively.

(4) In Louisiana, in the Southwest Zone, during the experimental Canada goose season, the daily bag limit is 2 Canada and white-fronted geese in the aggregate, no more than 1 of which may be a Canada goose. The possession limit is twice the daily bag limit. A special permit is required by the State.

(5) In Michigan, the seasons for white-fronted geese, light geese, and brant are concurrent with the seasons for Canada geese, except in the Southern Michigan Goose Management Unit, where the January 9 through February 7 special season is for Canada geese only.

(6) In Minnesota, the daily bag limit is 15 and the possession limit is 30, coots, moorhens, and gallinules in the aggregate.

(7) In Ohio, in the Pymatuning Area, the restrictions of the duck bag limit for Pennsylvania apply.

(8) In Ohio, in the Lake Erie and Northeast SJBP Zones, the Canada goose limits are 1 daily and 2 in possession.

(9) In Tennessee, see State regulations for permit requirements and additional restrictions.

CENTRAL FLYWAY

Definitions

The Central Flyway: Includes Colorado (east of the Continental Divide), Kansas, Montana (Blaine, Carbon, Fergus, Judith Basin, Stillwater, Sweetgrass, Wheatland, and all counties east thereof), Nebraska, New Mexico (east of the Continental Divide except that the Jicarilla Apache Indian Reservation is in the Pacific Flyway), North Dakota, Oklahoma, South Dakota, Texas, and Wyoming (east of the Continental Divide).

Geese: Includes all species of geese and brant.

Dark Geese: Includes Canada geese, white-fronted geese, and brant.

Light Geese: Includes lesser snow (including blue) geese, greater snow geese, and Ross' geese.

Flywaywide Restrictions

Duck Limits: The daily bag limit may include no more than 2 mallards (no more than 1 of which may be a female), 1 mottled duck, 1 pintail, 1 redhead, and 2 wood ducks. The possession limit is twice the daily bag limit. In the High Plains Mallard Management Unit, the daily bag limit may include 3 drake mallards.

Canvasbacks. All areas of the Flyway are closed to canvasback hunting.

Merganser Limits: The merganser limits include no more than 1 hooded merganser daily and 2 in possession.

Point System--Ducks and Mergansers: The daily bag limit is reached when the point value of the last bird taken added to the sum of the point values of the other birds already taken during that day reaches or exceeds 100 points. The possession limit is the maximum number of birds of species and sex which could have legally been taken in 2 days.

The point values assigned to the species and sexes are as follows:

100 points	50 points	35 points
Female mallard	Male mallard (Low Plains)	Male mallard (High Plains)
Mottled duck	Wood duck	All other permitted species of ducks and mergansers
Pintail		
Redhead		
Hooded merganser		

States selecting the point system bag limits on designated species are listed in the table below.

	Season Dates	Limits Bag	Limits Possession
Wyoming (cont.) Light Geese	Oct. 3-Dec. 31	5	10

(1) In Colorado, in the South Park and San Luis Valley Units, the bag limit is 2 dark and light geese in the aggregate. The possession limit is twice the daily bag limit.
(2) In Kansas, in the High Plains Mallard Management Unit, the daily bag limit may include no more than 2 mallards and the possession limit may include no more than 4 mallards.
(3) In Kansas, exceptions to the dark goose season are as follows: Marais des Cygne Valley Unit, South Flint Hills Unit, Central Flint Hills Unit, and Southeast Unit - Season dates are December 19, 1992 through January 10, 1993. Dark goose permits issued by the Kansas Department of Wildlife and Parks are required. The permit must be signed, dated, and affixed to the leg of the goose immediately following the kill and before moving the carcass from the site of the kill. The permit must remain attached to the goose until prepared for consumption. A permit may not be transferred to another person nor may a permit be carried by someone in the absence of the individual to whom the permit has been issued. In the Marais des Cygne Valley Unit, unlimited permits are available, with a maximum of two permits per individual and one goose per permit. Shooting hours in this unit shall be one-half hour before sunrise to 1:00 p.m. There are 400 permits available in the South Flint Hills Unit, 250 permits available in the Central Flint Hills Unit, and 200 permits available in the Southeast Unit with a maximum of one permit per individual per Unit and one goose per permit.
(4) In New Mexico, the season for dark geese is closed in Sandoval, Sierra, Valencia, Sorocco, and Bernalillo Counties.

PACIFIC FLYWAY

Definitions

The Pacific Flyway: Includes the States of Arizona, California, Colorado (west of the Continental Divide), Idaho, Montana (including and to the west of Hill, Chouteau, Cascade, Meagher, and Park Counties), Nevada, New Mexico (the Jicarilla Apache Indian Reservation and west of the Continental Divide), Oregon, Utah, Washington, and Wyoming (west of the Continental Divide including the Great Divide Basin).

Light Geese: Includes lesser snow (including blue) geese, greater snow geese, and Ross' geese.

Dark Geese: Includes Canada geese, white-fronted geese, emperor geese, and brant.

Flywaywide Restrictions

Duck and Merganser Limits: Daily bag limits for ducks (including mergansers) may include no more than 3 mallards but only 1 female mallard, 1 pintail, and either 2 redheads or 2 canvasbacks, or 1 of each. The possession limit is twice the daily bag limit.

Goose Limits:

Aleutian Canada Geese: The season is closed throughout the Flyway.

Cackling Canada Geese: The season is closed in California, Oregon, and Washington.

Light Geese and Dark Geese: Unless otherwise noted, seasons and limits for light geese are either singly or in the aggregate; and seasons and limits for dark geese are either singly or in the aggregate, except in Washington, Oregon, and California where there are separate seasons and limits on brant.

Coots and Common Moorhen Limits: Daily bag and possession limits are 25 in the aggregate for the two species.

(1) In Arizona, the daily limit may include no more than either 1 female mallard or 1 Mexican-like duck, but not both, and not more than 2 female mallards, 2 Mexican-like ducks, or 1 of each, may be in possession.
(2) In Arizona, in Yuma County, La Paz County, Game Management Units (Units) 13B, 15, and that portion of Unit 16 lying within Mohave County, the bag and possession limit is 2 and 4 for Canada geese and 3 and 6 for light geese, respectively.
(3) In California, the dark goose limits may be expanded to 2 per day and 4 in possession provided they are Canada geese.
(4) State permit is required.
(5) In Idaho, the season on light geese is closed in Fremont and Teton Counties.
(6) In Montana, check State regulations for special seasons/exceptions in Freezeout Lake WMA; Canyon Ferry, Flathead, Deer Lodge County, and Missoula County.
(7) In Nevada, there is no open season on light geese in Ruby Valley within Elko and White Pine Counties, White River Valley of Nye County, and Pahranagat Valley of Lincoln County.
(8) In New Mexico, the bag limit for ducks may include no more than 1 redhead and 1 canvasback.
(9) In Oregon, the Northwest Area is closed to all goose hunting, except for the special permit goose season on designated portions of the special permit goose area from November 14 to January 17. See State regulations for specific boundary descriptions, times, days, and other conditions of the special permit season.
(10) In Oregon, in Klamath, Lake, and Harney Counties, the white-fronted goose season does not open until October 24 and the dark goose limits may contain not more than 2 white-fronted geese per day. Possession limits are separate for dark and light geese.
(11) In Utah, the Washington County season is for Canada geese only.
(12) In Washington, in State Goose Area 1, hunting is only on Saturdays, Sundays, Wednesdays, and certain holidays. In State Goose Area 2, hunting is only on Saturdays, Sundays, Tuesdays, Wednesdays, and certain holidays. See State regulations for details.
(13) In Washington, bag limits are 2 geese per day and 4 in possession. See State regulations for specific conditions of permit hunts and closures for Canada geese.
(14) In Washington, brant may be hunted in Skagit, Pacific, and Whatcom Counties only; and only on December 5, 6, 8, 9, 10, 12, 13, 15, 17, 19, and 20.

4. Section 20.106 is amended as follows:

§20.106 Seasons, limits, and shooting hours for sandhill cranes.

Subject to the applicable provisions of the preceding sections of this part, areas open to hunting, respective open seasons (dates inclusive), shooting and hawking hours, and daily bag and possession limits on the species designated in this section are as follows:

Shooting and Hawking hours are one-half hour before sunrise until sunset, except as otherwise restricted by State regulations. Area descriptions were published in the August 21, 1992, Federal Register (57 FR 38202).

CHECK STATE REGULATIONS FOR ADDITIONAL RESTRICTIONS, INCLUDING AREA DESCRIPTIONS.

Note: The following seasons are in addition to the seasons published previously in the August 27, 1992, Federal Register (57 FR 39072)

	Season Dates	Limits	
		Bag	Possession
CENTRAL FLYWAY			
Oklahoma (1)	Oct. 17-Jan. 17	3	6
Texas (1)			
Zone A	Nov. 14-Feb. 14	3	6
Zone B	Dec. 5-Feb. 14	3	6
Zone C	Jan. 2-Feb. 7	3	6

(1) Each hunter participating in a regular sandhill crane hunting season must obtain and carry in his possession while hunting sandhill cranes a valid Federal sandhill crane hunting permit available without cost from conservation agencies in the States where crane hunting seasons are allowed. The permit must be displayed to any authorized law enforcement official upon request.

5. Section 20.107 is revised to read as follows.

§20.107 Seasons, limits, and shooting hours for tundra (whistling) swans.

Subject to the applicable provisions of the preceding sections of this part, areas open to hunting, respective open seasons (dates inclusive), shooting and hawking hours, and daily bag and possession limits on the species designated in this section are as follows:

Shooting hours are one-half hour before sunrise until sunset, except as otherwise restricted by State regulations. Area descriptions were published in the September 22, 1992, Federal Register (57 FR 43856).

CHECK STATE REGULATIONS FOR ADDITIONAL RESTRICTIONS, INCLUDING AREA DESCRIPTIONS.

NOTE: Successful permittees must immediately validate their harvest by that method required in State regulations.

Utah	Oct. 3-Jan. 3	State Permit Only	

8. Section 20.109 is revised to read as follows:

§20.109 Extended seasons, limits, and hours for taking migratory game birds by falconry.

Subject to the applicable provisions of the preceding sections of this part, areas open to hunting, respective open seasons (dates inclusive), hawking hours, and daily bag and possession limits for the species designated in this section are prescribed as follows:

Hawking hours are one-half hour before sunrise until sunset except as otherwise restricted by State regulations. Area descriptions were published in the Federal Register on August 21, 1992, (57 FR 38202) and September 22, 1992, (57 FR 43856).

CHECK STATE REGULATIONS FOR ADDITIONAL RESTRICTIONS, INCLUDING AREA DESCRIPTIONS.

Daily bag limit	3 migratory game birds, singly or in the aggregate
Possession limit	6 migratory game birds, singly or in the aggregate

These limits apply to falconry during both regular hunting seasons and extended falconry seasons – unless further restricted by State regulations. The falconry bag and possession limits are not in addition to regular season limits. Unless otherwise specified, extended falconry for ducks does not include sea ducks within the special sea duck areas. Only extended falconry seasons are shown below. Many States permit falconry during the gun seasons. Please consult State regulations for details.

For ducks, mergansers, coots, geese, and some moorhen seasons; additional season days occurring after September 30 will be published with the late-season selections. Some States have deferred selections. Consult late-season regulations for further information.

Title 3—

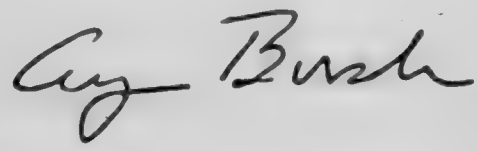
The President

Memorandum of September 25, 1992

Memorandum for the Secretary of Transportation [and] the United States Trade Representative

Pursuant to section 6 of the Bus Regulatory Reform Act of 1982, 49 U.S.C. 10922(*l*)(1) and (2), I hereby extend for an additional 2 years both the moratorium imposed by that section and all actions taken by me or my predecessor under that section on the issuance of certificates or permits to motor carriers domiciled in, or owned or controlled by persons of, a contiguous foreign country. This action preserves the *status quo* and will maintain the moratorium through September 19, 1994, unless earlier revoked or modified.

This memorandum shall be published in the **Federal Register**.



THE WHITE HOUSE,
Washington, September 25, 1992.

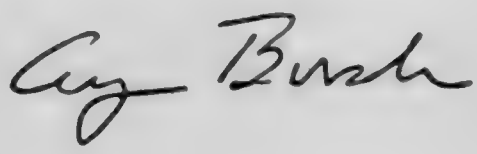
Notice of September 25, 1992

Continuation of Emergency Regarding Export Control Regulations

On September 30, 1990, consistent with the authority provided me under the International Emergency Economic Powers Act (50 U.S.C. 1701, *et seq.*), I issued Executive Order No. 12730. In that order, I declared a national emergency with respect to the unusual and extraordinary threat to the national security, foreign policy, and economy of the United States in light of the expiration of the Export Administration Act of 1979, as amended (50 U.S.C. App. 2401, *et seq.*). Because the Export Administration Act has not been renewed by the Congress, the national emergency declared on September 30, 1990, and extended on September 26, 1991, must continue in effect beyond September 30, 1992. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing the national emergency in order to deal with the threat posed by the unrestricted access of foreign parties to United States goods, technology, and technical data and by the existence of certain boycott practices of foreign nations.

This notice shall be published in the **Federal Register** and transmitted to the Congress.



THE WHITE HOUSE,
Washington, September 25, 1992.

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List September 11, 1992

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $620.00 domestic, $155.00 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250-7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at **(202) 783-3238** from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to **(202) 512-2233**.

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[3] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec. 31, 1991. The CFR volume issued January 1 1987, should be retained.

[5] No amendments to this volume were promulgated during the period Apr. 1, 1990 to Mar. 31, 1991. The CFR volume issued April 1, 1990, should be retained.

[6] No amendments to this volume were promulgated during the period Apr. 1, 1991 to Mar. 30, 1992. The CFR volume issued April 1, 1991, should be retained.

[7] No amendments to this volume were promulgated during the period July 1, 1989 to June 30, 1992. The CFR volume issued July 1, 1989, should be retained.

[8] No amendments to this volume were promulgated during the period July 1, 1990 to June 30, 1991. The CFR volume issued July 1, 1990, should be retained.

[9] No amendments to this volume were promulgated during the period July 1, 1991 to June 30, 1992. The CFR volume issued July 1, 1991, should be retained.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

Rules and Regulations

Federal Register
Vol. 57, No. 189
Tuesday, September 29, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

10 CFR Part 1706

[Docket No. RM-92-1]

Rules Governing Organizational and Consultant Conflicts of Interest

AGENCY: Defense Nuclear Facilities Safety Board.

ACTION: Final rule.

SUMMARY: The Defense Nuclear Facilities Safety Board (Board) is issuing final regulations establishing the guidelines, requirements and procedures that the Board will follow to identify and avoid or mitigate conflicts of interests and potential conflicts of interests by those providing assistance to the Board under contracts with the Board. Organizational and consultant conflicts of interest should be avoided and, if they cannot be avoided, should be mitigated. The rules also cover arrangements for obtaining the expert services of personnel working for the National Laboratories under the cognizance of the Department of Energy.

EFFECTIVE DATE: October 29, 1992.

FOR FURTHER INFORMATION CONTACT: Robert M. Andersen, General Counsel, 625 Indiana Avenue NW., suite 700, Washington, DC 20004, telephone (202) 208-6387.

SUPPLEMENTARY INFORMATION:

I. Background

The Board is comprised of "* * * respected experts in the field of nuclear safety with a demonstrated competence and knowledge relevant to the independent investigative and oversight functions of the Board." (42 U.S.C. 2286(b)(1).) In fulfilling its statutory responsibilities, the Board utilizes the expert judgment of its members in making determinations related to public health and safety at defense nuclear facilities. In addition to its staff, the Board finds it necessary, from time to time, to seek assistance from outside sources, particularly where expertise in specialized technical fields is involved. The independent technical capability inherent in the Board provides an important check against contractor work being improperly influenced by an organizational or consultant conflict of interest (OCI). Nevertheless, it is important for the Board to be aware of and make judgments respecting potential conflicts of interests of its offerors and contractors.

On July 14, 1992, the Board published for comment its proposed regulations for identifying, evaluating and resolving organizational and consultant conflicts of interest. A 30-day comment period was provided. The Board received one set of comments, which it has carefully considered. The Board has made some clarifying modifications to the proposed rule in response to one of the comments.

II. Board Consideration of Comments

Contractors Doing Other Business With the Department of Energy ("DOE")

The commenters objected to what they characterized as the broad exclusion of all contractors or subcontractors doing business with DOE, as not being in the best interests of the Board. The comment was based on language in Section II of the Notice of Proposed Rulemaking, "Summary of the Provisions of the Proposed Rule", that "anyone engaged in performing work or services under a DOE contract or subcontract, particularly one relating to a defense nuclear facility, will be assumed to have a potential conflict of interest in regard to potential assistance to the Board." The commenters believe that this language suggests that Board will exclude all contractors with DOE contracts, even though, in the view of the commenters, this group of contractors presumably contains the best source of experts for the Board. The commenters also assert that the proposed regulation does not appear to contain as broad an exclusion as the Summary suggests, so that they find an inconsistency between the Summary and certain sections of the proposed regulation. The commenters propose that a simple notification requirement for DOE contractors, combined with a limitation of conflicts to related contracts, should be sufficient for the Board's purpose without excluding a broad category of subject matter experts.

The Board has carefully considered this comment, but does not agree with the commenters that the regulation "excludes" from consideration any contractor who has dealings with DOE. In the Board's view, however, where a contractor performing work under contract for the Department of Energy is financially dependent on those contracts, the objectivity of the contractor performing contract work for the Board could be impaired, even if the DOE contracts do not relate to defense nuclear facilities. Whether an actual conflict of interest does or might exist is a question of fact that depends on the particular circumstances. Because of the nature of the Board's statutory duties with respect to oversight of DOE's defense nuclear facilities, it is imperative that the Board receive objective advice from the experts it engages, and that the public perceive these experts as impartial. Accordingly, the Board believes that it must have the ability to examine each situation where a contractor is doing business with DOE to establish whether in fact there is an actual or potential conflict of interest.

The fact that the Board will give close scrutiny to cases where an offeror is also a DOE contractor does not mean, however, that in each such case the offeror will be disqualified on account of an OCI. The universe of qualified experts from whom the Board can seek services is small, and because of the specialized nature of the expertise, many of the experts whom the Board might wish to use also do business with DOE. To automatically disqualify all of those experts would deprive the Board of the assistance that it needs to carry out its responsibilities. Thus, where the Board determines that there is an OCI that cannot be avoided, the Board must weigh the possible harms that the existence of an OCI could cause in the particular situation against the usefulness and importance of the expertise that the particular contractor can furnish, the prospects of finding that expertise in a contractor who has no OCI, and the possibilities of mitigating the OCI. Moreover, in some cases the Board may conclude that in fact there is no actual or potential OCI.

Furthermore, the Board does not find an inconsistency between the Summary of the proposed rule and the text of the proposed regulation. Although § 1706.5(a)(2) of the proposed rule only precludes the evaluation of products or services offered or provided to DOE by an offeror, § 1706.7(a) requires the Board to disqualify any offeror with an actual or potential OCI that cannot be avoided, unless the OCI is waived by the Board. As explained above, in the Board's view, an offeror's contractual relationships with DOE may represent an OCI with respect to services to be performed for the Board, even if those services would be in areas unrelated to the work performed for DOE. Consequently, under § 1706.7, such an offeror might be disqualified from a contract award if the Board concluded that an OCI existed and could not be avoided, and that it was not in the best interests of the Government for the Board to waive that OCI.

Nonetheless, in order to clarify what the commenters found ambiguous or inconsistent in the Notice of Proposed Rulemaking, the Board has added an additional subparagraph to § 1706.5(a), specifically stating that contracts will generally not be awarded to an offeror for any services (other than those described in subparagraphs (1) or (2) of § 1706.5(a)) covered by the regulation where the Board has determined, pursuant to § 1706.7, that an actual or potential OCI exists and cannot be avoided, but the Board does not waive that OCI. The caption of § 1706.5(a) has also been changed to reflect the additional text.

Contractor Use of Non-Public Information

The commenters also question the time limitations in § 1706.5(e), which prohibits the release of certain information that is not publicly available by contractors with access to internal Board information. Section 1706.5(e)(2) would preclude contractors with such access from using such information for unsolicited proposals for one year after it is made public, and in competing for new work for six months after such information is made public. The commenters believe that such time limitations exceed what is necessary to protect the interests of the Government, since, in view of the commenters, there is no competitive advantage to a contractor once all contractors have the same public information.

In the view of the Board, however, a contractor who has had access to non-public information may indeed continue to have a competitive advantage for some period of time after the information has become public, until enough time has elapsed for other persons to acquire and absorb that information. Clearly, a contractor who had valuable information for several months before a response to a Request for Proposals was due would have an advantage in preparing a proposal over someone who obtained access to the information only one week before the due date. Similarly, in the case of unsolicited proposals, a contractor who has had access to relevant non-public information may be able to develop a unique or innovative proposal for the Government using that information, which someone without access to the information would not likely conceive of or develop. As the Government can accept unsolicited proposals without competitive bidding, earlier access to information by one contractor than another could constitute a preemptive competitive advantage.

Thus, the Board believes that it is appropriate to prevent contractors from using non-public information to which they have had access by virtue of contracts with the Board for some specified period of time after public availability. The Board views the one-year and six-months time limitation as reasonable. The Nuclear Regulatory Commission and the Department of Energy have both utilized the one-year and six-months periods with respect to use of previously non-public information by their contractors.

List of Subjects in 10 CFR Part 1706

Government procurement.

Accordingly, chapter XVII of title 10 of the Code of Federal Regulations is amended by adding a new part 1706 to read as follows:

PART 1706—ORGANIZATIONAL AND CONSULTANT CONFLICTS OF INTERESTS

Sec.

1706.1 Scope; statement of policy.
1706.2 Definitions.
1706.3 Applicability.
1706.4 Head of the contracting activity.
1706.5 General rules.
1706.6 Solicitation provisions.
1706.7 Procedures.
1706.8 Waiver.
1706.9 Examples.
1706.10 Remedies.
1706.11 Organizational conflicts of interest certificate—Advisory or assistance services.

Authority: 42 U.S.C. 2286b(c).

§ 1706.1 Scope; statement of policy.

(a) *Scope.* This part sets forth the guidelines, requirements, and procedures the Defense Nuclear Facilities Safety Board will follow in determining whether a contractor or offeror has an organizational or consultant conflict of interest (OCI) and in avoiding, neutralizing, or mitigating OCIs.

(b) *Policy.* It is the policy of the Board to identify and then avoid or mitigate organizational and consultant conflicts of interest. Normally, the Board will not award contracts to offerors who have OCIs and will terminate contracts where OCIs are identified following contract award. In exceptional circumstances, the Board reserves the right to waive conflicts of interest if it determines that such action is in the best interests of the Government, pursuant to § 1706.8, and to take such mitigating measures as it deems appropriate pursuant to such section.

§ 1706.2 Definitions.

Advisory or assistance services means services acquired by contract to advise or assist the Board, whether with respect to its internal functions or its oversight of defense nuclear facilities, or otherwise to support or improve policy development or decisionmaking by the Board, or management or administration of the Board, or to support or improve the operation of the Board's management systems. Such services may take the form of the provision of information, advice, reports, opinions, alternatives, conclusions, recommendations, training, direct assistance, or performance of site visits, technical reviews, investigation of health and safety practices or other appropriate services.

Affiliates means associated business concerns or individuals if, directly or indirectly, either one controls or can control the other or a third party controls or can control both.

Board means, as the context requires, the Defense Nuclear Facilities Safety Board, its Chairman, or any other officer of the Defense Nuclear Facilities Safety Board to whom the appropriate delegation has been made under 42 U.S.C. 2286(c)(3).

Contract means any contract, agreement, or other arrangement with the Board, except as provided in § 1706.3.

Contractor means any person, firm, unincorporated association, joint venture, co-sponsor, partnership, corporation, or other entity, or any group of one or more of the foregoing, which is a party to a contract with the Board, and the affiliates and successors in interest of such party. The term "contractor" also includes the chief executive and directors of a party to a contract with

the Board, the key personnel of such party identified in the contract, and current or proposed consultants or subcontractors to such party. The term "contractor" shall also include consultants engaged directly by the Board through the use of a contract.

Defense nuclear facility means any United States Department of Energy (DOE) defense nuclear facility, as defined in 42 U.S.C. 2286g, subject to the Board's oversight.

Evaluation activities means activities that involve evaluation of some aspect of defense nuclear facilities.

Mitigating means, with respect to an organizational or consultant conflict of interest, reducing or counteracting the effects of such a conflict of interest on the Board, but without eliminating or avoiding the conflict of interest.

National Laboratories means laboratories operated by educational institutions or business entities under management and operating contracts with DOE.

Offeror means any person, firm, unincorporated association, joint venture, partnership, corporation, or other entity, or any group of one or more of the foregoing, submitting a bid or proposal to the Board, solicited, unsolicited or otherwise invited by the Board, to obtain a contract, and the affiliates and successors in interest of such a bidder or proposer. The term "offeror" also includes the chief executive and directors of such a bidder or proposer, the key personnel of a bidder or proposer identified in the bid or proposal, and proposed consultants or subcontractors to such bidder or proposer.

Organizational or consultant conflict of interest means that, because of other past, present, or future planned activities or relationships, an offeror or contractor is unable, or potentially unable, to render impartial assistance or advice to the Board, or the objectivity of such offeror or contractor in performing contract work for the Board is or might be otherwise impaired, or such offeror or contractor has or would have an unfair competitive advantage. The term "organizational or consultant conflict of interest" shall include, but not be limited to, actions or situations that would preclude the award or extension of a contract under, or would be prohibited by, § 1706.5.

Potential organizational or consultant conflict of interest means a factual situation that indicates or suggests that an actual organizational or consultant conflict of interest may exist or arise from award of a proposed contract or from continuation of an existing contract. The term is used to signify those situations that merit conflicts review prior to contract award or that must be reported to the contracting officer for conflicts review if they arise during contract performance.

Research means any scientific, engineering, or other technical work involving theoretical analysis, exploration, or experimentation.

Subcontractor means any subcontractor of any tier which performs work under a prime contract with the Board.

Task order contract means a Board contract that contains a broad scope of work but does not authorize the contractor to perform specific tasks within that broad scope until the contracting officer issues task orders.

Unfair competitive advantage means an advantage obtained by an offeror or contractor to the Board by virtue of the relationship of the offeror or contractor with the Board or access to information not available to other offerors or contractors, and recognized in appropriate legal precedent as unfair.

In determining the meaning of any provision of this part, unless the context indicates otherwise, the singular includes the plural; the plural includes the singular; the present tense includes the future tense; and words of one gender include the other gender.

§ 1706.3 Applicability.

(a) *General applicability.* This part applies to contractors and offerors only, except as otherwise herein provided. This part shall be incorporated by reference and made a part of all Board contracts in excess of the small purchases threshold, except as provided in the last sentence of this § 1706.3(a). In addition, if determined appropriate by the contracting officer for the Board, this part may be incorporated by reference and made a part of Board contracts below the small purchases threshold, except as provided in the last sentence of this § 1706.3(a). This part does not apply to the acquisition of services, including, without limitation, consulting services, through the personnel appointment process or to Board agreements with other federal government agencies, but shall apply to Board agreements with the management and operating contractors (and subcontractors and consultants thereto) of the National Laboratories.

(b) *Subcontractors and consultants.* The requirements of this part shall also apply to subcontractors and consultants proposed for, or working on, a Board contract, in each case where the amount of the subcontract or consultant agreement under which such subcontractor or consultant is or will be working is expected to exceed $10,000, and in each other case where the contracting officer for the Board deems it appropriate to make the requirements of this part applicable to a subcontractor or consultant proposed for, or working on, a Board contract. The certificates or disclosures submitted by offerors or contractors pursuant to this part shall include certificates or disclosures from all subcontractors and consultant to contractor or offerors in those cases where this part applies by its terms to such subcontractors or consultants or has been applied to such persons by the contracting officer. Contractors and offerors shall assure that contract clauses giving effect to this § 1706.3(b), satisfactory to the contracting officer, are included in subcontracts and consultant agreements of any tier involving performance of work under a prime contract covered by this subpart.

§ 1706.4 Head of the contracting activity.

The head of the contracting activity for the Board shall be the General Manager.

§ 1706.5 General rules.

(a) *Award of Contracts.* Contracts shall generally not be awarded to an offeror.

(1) For any services where the award would result in the offeror evaluating products or services it has provided to the Board, is then providing to the Board, or is then offering to provide for the Board;

(2) For evaluation activities or research related to the Board's oversight of defense nuclear facilities, where the award would result in the offeror evaluating products or services it has provided, is then providing, or is then offering to provide to DOE or to contractors or subcontractors for defense nuclear facilities; or

(3) For any other services (the acquisition of which is otherwise covered by this part), where the Board has determined, pursuant to § 1706.7, that an actual or potential OCI exists and cannot be avoided, and the Board does not waive that OCI paragraphs (a)(1) and (2) of this section also apply when award would result in evaluation of products or services of another entity where the offeror has been, is, or would be substantially involved in the development of the product or performance of the service, or has other substantial involvement regarding the product or services.

(b) *Subsequent related contracts.* (1) A Board contractor under a Board contract shall normally be ineligible to participate in Board contracts or

subcontracts that stem directly from the contractor's performance of work under a previous Board contract, where the Board determines that an OCI would exist because:

(i) The expectation of receiving the subsequent contract is likely to diminish the contractor's capacity to give impartial assistance and advice, or otherwise result in a biased work product; or

(ii) An offeror on the subsequent contract would have an unfair competitive advantage of virtue of having performed the first contract.

(2) If a contractor under a Board contract prepares a complete or essentially complete statement of work or specifications in the performance of a contract, the contractor shall be ineligible to perform or participate in the initial contractual effort that is based on such statement of work or specifications. The contractor shall not incorporate its products or services in such statement of work or specifications.

(c) *National Laboratory personnel.* The Board may engage personnel of the National Laboratories who have expertise needed by the Board in the performance of its oversight responsibilities, provided that prior to each such engagement, the Board determines either:

(1) That the nature of work performed by such personnel for DOE does not pose actual or potential OCIs with respect to the particular work covered by the Board contract; or

(2) That such engagement is in the Government's best interests and that a waiver should be granted pursuant to § 1706.8. In all cases involving National Laboratory personnel, notice of the circumstances of the contract, stating the rationale for use of the personnel, shall be published in the **Federal Register**.

(d) *Work for others.* During the term of any Board contract, the contractor may not enter into consulting or other contractual arrangements with other persons or entities, the result of which could give rise to an OCI with respect to the work being performed under the contract. The prime contractor shall ensure that all of its employees, subcontractors, and consultants under the contract abide by this paragraph. If the contractor has reason to believe that any proposed arrangement with other persons or entities may involve an actual or potential OCI, it shall promptly inform the Board in writing of all pertinent facts regarding such proposed arrangement. In the case of task order contracts, this paragraph applies, subject to § 1706.7(c), only to specific ongoing tasks that the contracting officer authorizes the contractor to perform.

(e) *Contractor protection of Board information that is not publicly available.* If the contractor in the performance of a Board contract obtains access to information, such as Board plans, policies, reports, studies, or financial plans, or internal data protected by the Privacy Act (5 U.S.C. 552a), proprietary information, or any other data which has not been released to the public, the contractor shall not:

(1) Use such information for any private purpose until the information has been released or is otherwise made available to the public;

(2) Compete for work for the Board based on such information for a period of six months after either the contract has been completed or such information has been released or otherwise made available to the public, whichever occurs first, or submit an unsolicited proposal to the Government based on such information until one year after such information is released or otherwise made available to the public, unless a waiver permitting such action has been granted pursuant to § 1706.8; or

(3) Release the information without prior written approval of the contracting officer, unless such information has previously been released or otherwise made available to the public by the Board.

§ 1706.6 Solicitation provisions.

(a) *Advisory or assistance services.* There shall be included in all formal Board solicitations for advisory or assistance services where the contract amount is expected to exceed $25,000 (or the then applicable small purchases threshold), a provision requiring a certificate representing whether award of the contract to the offeror would present actual or potential OCIs. Apparent successful offerors will be required to submit such certificates, but the Board may also require such a certificate to be submitted in other circumstances, such as:

(1) Where the contracting officer has identified certain offerors who have passed an initial screening and has determined that it is appropriate to request the identified offerors to file the certificate in order to expedite the award process; or

(2) In the case of modifications for additional effort under Board contracts, except those issued under the "changes" clause. If a certificate has been previously submitted with regard to the contract being modified, only an updating of such statement shall be required for a contract modification. In addition, if determined appropriate by the contracting officer for the Board, such certificates may be required in connection with any other contracts subject to this subpart or in which this part has been incorporated by reference

(b) *Marketing consultant services.* There shall further be included in all Board solicitations, except sealed bids, where the contract amount is expected to exceed $200,000, a provision requiring an organizational conflicts of interest certificate from any marketing consultants engaged by an offeror in support of the preparation or submission of an offer for a Board contract by that offeror.

§ 1706.7 Procedures.

(a) *Pre-award disclosure and resolution of OCIs.* If a certificate under § 1706.6 indicates, or the Board otherwise learns, that actual or potential OCIs could be, or would appear to be, created by contract award to a particular offeror, the Board shall afford the affected offeror an opportunity to provide in writing all relevant facts bearing on the certificate. If the Board thereafter determines that an actual or potential OCI exists, one of the following actions shall ultimately be taken:

(1) Disqualify the offeror;

(2) Include in the contract appropriate terms and conditions which avoid the conflict, in which case no waiver is required; or

(3) Make a finding that it is in the best interests of the Government to seek award of the contract under the waiver provisions of § 1706.8, and, where reasonably possible, include contract terms and conditions or take other measures which mitigate such conflicts.

(b) *Post-award disclosure and resolution of OCIs.* (1) If, after contract award, the contractor discovers actual or potential OCIs with respect to the contract, it shall make an immediate and full disclosure in writing to the contracting officer. This statement shall include a description of the action that the contractor has taken or proposes to avoid or mitigate such conflicts.

(2) If a disclosure under this section indicates, or the Board otherwise learns, that actual or potential OCIs exist, the Board may afford the contractor an opportunity to provide all relevant facts bearing upon the problem. If at any time the Board determines that an actual or potential OCI exists, one of the following actions shall ultimately be taken:

(i) Terminate the contract, or, in the case of a task order contract, terminate the particular task;

(ii) Insist on appropriate contract terms and conditions which avoid the OCIs, in which case no waiver is required; or

(iii) Make a finding that it is in the best interests of the Government to permit the contractor to continue to perform the contract (or task) under the waiver provisions of § 1706.8, and, where reasonably possible, insist on appropriate contract terms and conditions or take other measures which mitigate the OCIs.

(c) *Task order contracts.* (1) Because a task order contract generally entails a broad scope of work, apparent successful offerors shall be required to identify in their certificates filed in accordance with § 1706.6 any actual or potential OCIs that come within the full scope of the contract. The Board may decline to award a task order contract to an offerer based upon such information or it may decline to approve performance of a particular task by the contractor if an actual or potential OCI is subsequently identified with respect to that particular task. The Board may also take the other actions identified in § 1706.7(a) to avoid or mitigate such conflicts.

(2) Contractors performing task order contracts for the Board shall disclose to the contracting officer any new work for others they propose to undertake that may present an actual or potential OCI with regard to the performance of any work under the full scope of the Board contract. Such disclosure shall be made at least 15 days prior to the submission of a bid or proposal for the new work. The disclosure shall include the statement of work and any other information necessary to describe fully the proposed work and contemplated relationship.

(3) If the Board has issued a task order or a letter request for proposal under the contract with a contractor who has disclosed to the contracting officer that it proposes to undertake new work for persons other than the Board as described in § 1706.7(c)(2), for services in the same technical area and/or at the same defense nuclear facility that is the subject of the proposed new work (including overlap based upon generic work performed for others by the contractor), the Board shall inform the contractor that entering into a contract for the new work may result in termination by the Board of the task order contract, if the Board determines that such work would give rise to an OCI and the Board does not grant a waiver.

(d) *Decisions on OCIs.* The contracting officer shall make recommendations to the General manager regarding disqualification or actions to be taken by the Board to avoid or mitigate any actual or potential OCI.

(1) The General Manager shall have the authority to approve, modify, or disapprove such recommendations regarding avoidance of an actual or potential OCI. If an offeror or contractor disagrees with the actions approved by the General Manager and requests review of the action, the Chairman shall make the decision on the actions to be taken by the Board.

(2) Any recommended action respecting the best interests of the Government and mitigation measures to be taken with respect to an actual or potential OCI must be approved by the Chairman in conjunction with the decision to grant a waiver pursuant to § 1706.8, and any recommended action to terminate a contract or a particular task on account of an actual or potential OCI must be approved by the Chairman.

(3) Decisions on OCIs by the General Manager or the Chairman shall be made with the advice of the Office of the General Counsel.

§ 1706.8 Waiver.

(a) *Waiver of OCIs.* The need for a waiver of any OCI in connection with the award or continuation of specific contracts may be identified either by the contracting officer for the Board or other Board employee or by a written request filed by an offeror or contractor with the contracting officer. The request may be combined with the certificate or disclosure required under §§ 1706.6 or 1706.7, or with additional statements filed under § 1706.7 regarding matters raised in the certificate or disclosure. The contracting officer shall review all of the relevant facts brought to his attention and shall bring the matter to the General Manager, who shall make a written recommendation to the Chairman of the Board regarding whether a waiver should be granted for a contract award or for continuation of an existing contract.

(b) *Criteria for Waiver of OCIs.* (1) The Chairman is authorized to waive any OCI (and the corresponding provision of § 1706.5 where applicable) upon a determination that awarding or extending the particular contract, or not terminating the particular contract, would be in the best interests of the Government. Issuance of a waiver shall ordinarily be limited to those situations in which:

(i) The work to be performed under contract is vital to the Board program;

(ii) The work cannot be satisfactorily performed except by a contractor or offeror whose interests give rise to a question of OCI; and

(iii) Contractual and/or technical review and supervision methods can be employed by the Board to mitigate the conflict.

(2) The Chairman is also authorized to waive any OCI (and the corresponding provision of § 1706.5 where applicable), without regard to the foregoing factors, if the Chairman determines, notwithstanding the existence of the OCI, that it is in best interests of the Government to award or extend the particular contract, or not to terminate it, without compliance with § 1706.8(b)(1).

(c) *Waiver of Rules or Procedures.* The Chairman is also authorized to waive any rules or procedures contained in this part upon a determination that application of the rules or procedures in a particular situation would not be in the best interests of the Government. Any request for such a waiver must be in writing and shall describe the basis for the waiver.

(d) *Office of General Counsel.* Waivers of OCIs or of any rule or procedure contained in this part shall be made after consultation with the Office of General Counsel.

(e) *Federal Register.* Except as otherwise provided in § 1706.8(c), notice of each waiver granted under this section shall be published in the **Federal Register** with an explanation of the basis for the waiver. In the discretion of the Board, notices of instances of avoidance of OCIs may also be published in the **Federal Register**.

§ 1706.9 Examples.

The examples in this section illustrate situations in which questions concerning OCIs may arise. The examples are not all inclusive, but are intended to provide offerors and contractors with guidance on how this subpart will be applied.

(a) *Circumstances*—(1) *Facts.* A Board contractor for technical assistance in the review of a safety aspect of a particular defense nuclear facility proposes to use the services of an expert who also serves on an oversight committee for a contractor of other defense nuclear facilities.

(2) *Guidance.* Assuming the work of the oversight committee has no direct or indirect relationship with the work at the facility that is the subject of the Board's contract, there would not be an OCI associated with the use of this expert in the performance of the Board contract.

(b) *Circumstances*—(1) *Facts.* A Board contractor studying the potential for a chemical explosion in waste tanks at a

defense nuclear facility advises the Board that it has been offered a contract with DOE to study the chemical composition of the waste in the same tanks.

(2) *Guidance.* The contractor would be advised that accepting the DOE contract would result in termination of its performance under its contract with the Board.

(c) *Circumstances*—(1) *Facts.* The Board issues a task order under an existing contract for the evaluation of the adequacy of fire protection systems at a defense nuclear facility. The contractor then advises the Board that it is considering making an offer on a solicitation by DOE to evaluate the same matter.

(2) *Guidance.* The contractor would be advised that entering into a contract with DOE on the solicitation could result in the contract with the Board being terminated.

(d) *Circumstances*—(1) *Facts.* A firm responding to a formal Board solicitation for technical assistance provides information regarding a contract it currently has with DOE. The effort under the DOE contract is for technical assistance work at DOE facilities not subject to Board oversight and outside its jurisdiction.

(2) *Guidance.* The Board would analyze the work being performed for DOE to ensure no potential or actual conflict of interest would be created through award of the Board contract. Should the Board determine that no potential or actual conflict of interest exists, the contractor would be eligible for award. If the Board determines that a potential or actual conflict of interest would arise through a contract award, it may disqualify the firm or, if the Board determines that such action is in the best interests of the Government, the Board may waive the conflict or the rules and procedures and proceed with the award.

(e) *Circumstances*—(1) *Facts.* The Board discovers that a firm competing for a contract has a number of existing agreements with DOE in technical areas which are unrelated to the Board's oversight authority. While these contracts may not represent a potential or actual conflict of interest regarding the substance of the technical effort, their total value constitutes a significant portion of the firm's gross revenues.

(2) *Guidance.* A conflict of interest may exist due to the firm's substantial pecuniary dependence upon DOE. Consequently, the Board may question the likelihood that the contractor would provide unbiased opinions, conclusions, and work products because of this extensive financial relationship. The Board will review and consider the extent of the firm's financial dependence on DOE, the nature of the proposed Board contract, the need by the Board for the services and expertise to be provided by the firm and the availability of such services and expertise elsewhere, and whether the likelihood of the firm's providing objective technical evaluations and opinions to the Board could be influenced in view of its DOE relationship. Based on this analysis, the Board may either determine that there is no conflict and make the award, waive the conflict if one is identified and establish procedures to mitigate it where possible, or disqualify the offeror.

(f) *Circumstances*—(1) *Facts.* The Board discovers that a firm competing for a contract has a substantial business relationship in technical areas unrelated to the Board's oversight authority with a contractor operating a defense nuclear facility under a DOE contract. Similar to the situation described in paragraph (e) of this section, the total value of the contracts with the DOE contractor constitutes more than half of the firm's gross revenues, even though those contracts do not represent a potential or actual conflict of interest regarding any of the particular matters to be covered by the contract with the Board.

(2) *Guidance.* The firm's substantial financial and business dependence upon the DOE contractor may give rise to a conflict of interest, in that the likelihood of the firm's rendering impartial, objective assistance or advice to the Board may be impaired by its extensive financial relationship with the DOE contractor. In this situation, the Board will review and consider the nature of the proposed Board contract, the need by the Board for the services and expertise to be provided by the firm and the availability of such services and expertise elsewhere. The Board will also review and consider the extent of the firm's financial dependence on the DOE contractor and whether the firm would be impartial and objective in providing technical evaluation and opinions to the Board, especially on matters in which the DOE contractor is involved, notwithstanding the relationship with the DOE contractor. Based on this analysis, the Board may determine that there is no actual conflict of interest and make the award. Alternatively, if the Board identifies a conflict that cannot be avoided, the Board may determine to waive the conflict in the best interests of the United States, with or without the establishment of procedures to mitigate the conflict, or it may disqualify the offeror.

§ 1706.10 Remedies.

The refusal to provide the certificate, or upon request of the contracting officer the additional written statement, required by §§ 1706.6 and 1706.7 in connection with an award shall result in disqualification of the offeror for that award. The nondisclosure or misrepresentation of any relevant information may also result in the disqualification of the offeror for that award. If such nondisclosure or misrepresentation by an offeror or contractor is discovered or occurs after award, or in the event of breach of any of the restrictions contained in this subpart, the Board may terminate the contract for convenience or default, and the offeror or contractor may also be disqualified by the Board from consideration for subsequent Board contracts and be subject to such other remedial actions as provided by law or the contract.

§ 1706.11 Organizational conflicts of interest certificate—Advisory or assistance services.

As prescribed in or permitted by § 1706.6(a), insert the following provision in Board solicitations:

Organizational and Consultant Conflicts of Interest Certificate—Advisory and Assistance Services (Oct. 1990)

(a) An organizational or consultant conflict of interest means that because of other activities or relationships with other persons, a person is unable or potentially unable to render impartial assistance or advice to the Government, or the person's objectivity in performing the contract work is or might be otherwise impaired, or a person has an unfair competitive advantage.

(b) In order to comply with the Office of Federal Procurement Policy Letter 89–1, Conflict of Interest Policies Applicable to Consultants, the offeror shall provide the certificate described in paragraph (c) of this provision.

(c) The certificate must contain the following:

(1) Name of the agency and the number of the solicitation in question.

(2) The name, address, telephone number, and federal taxpayer identification number of the offeror.

(3) A description of the nature of the services rendered by or to be rendered on the instant contract.

(4) The name, address, and telephone number of the client or clients, a description of the services rendered to the previous client(s), and the name of a responsible officer or employee of the offeror who is knowledgeable about the services rendered to each client, if, in

the 12* months preceding the date of the certification, services were rendered to the Government or any other client (including a foreign government or person) respecting the same subject matter as the instant solicitation, or directly relating to such subject matter. The agency and contract number under which the services were rendered must also be included, if applicable.

(5) A statement that the person who signs the certificate has made inquiry and that, to the best of his or her knowledge and belief, no actual or potential conflict of interest or unfair competitive advantage exists with respect to the advisory or assistance services to be provided in connection with the instant contract, or that any actual or potential conflict of interest or unfair competitive advantage that does or may exist with respect to the contract in question has been communicated in writing to the contracting officer or his or her representative; and

(6) The signature, name, employer's name, address, and telephone number of the person who signed the certificate.

(d) Persons required to certify but who fail to do so may be determined to be nonresponsible. Misrepresentation of any fact may result in suspension or debarment, as well as penalties associated with false certifications or such other provisions provided for by law or regulation.

[End of provision]

* If approved by the head of the contracting activity, this period may be increased up to 36 months.

Dated: September 23, 1992.

John T. Conway,

Chairman.

BILLING CODE 6820-KD-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 92-ANM-16]

Amended Transition Area; Lewiston, ID

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the transition area at Lewiston, Idaho, to provide additional controlled airspace to accommodate the holding pattern for the VOR/DME-B approach for the Lewiston-Nez Perce County Airport, Lewiston, Idaho. This action will accurately define controlled airspace for pilot reference.

EFFECTIVE DATE: 0901 UTC, December 10, 1992.

FOR FURTHER INFORMATION CONTACT: Robert L. Brown, ANM-535, Federal Aviation Administration, Docket No. 92-ANM-16, 1601 Lind Avenue SW., Renton, WA 98055-4056, Telephone: (206) 227-2535.

SUPPLEMENTARY INFORMATION:

History

On July 23, 1992, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to provide additional controlled airspace for Lewiston, Idaho, (57 FR 32749).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. The coordinates in the proposal were North American Datum 27; however, the coordinates in the final rule have been updated to North American Datum 83. In addition, distances are expressed in nautical miles. Otherwise, the rule is adopted as proposed. Transition areas are published in § 71.181 of Handbook 7400.7 effective November 1, 1991, which is incorporated by reference in 14 CFR 71.1. The transition area listed in this document will be published subsequently in the Handbook.

The Rule

This amendment to part 71 of the Federal Aviation Regulations provides additional controlled airspace to accommodate the holding pattern for the VOR/DME-B approach for the Lewiston-Nez Perce County Airport, Lewiston, Idaho. The transition area will be depicted on aeronautical charts for pilot reference.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Incorporation by reference, Transition area.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 71 of the Federal Aviation Regulations (14 CFR part 71) is amended as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. App. 1348(a), 1354(a), 1510; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7, Compilation of Regulations, published April 30, 1991, and effective November 1, 1991 is amended as follows:

Section 71.181 Designation

* * * * *

ANM ID TA Lewiston, ID [Revised]

That airspace extending upward from 700 feet above the surface within an area bounded by a line beginning at lat. 46°29'25"N., long. 117°34'09"W.; east to lat. 46°30'45"N., long. 117°00'49"W.; north to lat. 46°34'25"N., long. 117°04'44"W.; then via the arc of a 14.4 nautical mile radius centered on the Lewiston VOR/DME (lat. 46°22'54"N., long. 116°52'11"W.); to lat. 46°27'00"N., long., 116°32'09"W.; east to lat. 46°25'30"N., long., 116°26'03"W.; south to lat. 46°13'20"N., long., 116°30'04"W.; west to lat. 46°14'33"N., long., 116°35'15"W.; then via the arc of a 14.4 nautical mile radius centered on the Lewiston VOR/DME; to lat 46°09'00"N., long., 116°46'54"W.; north to lat. 46°17'00"N., long., 116°49'14"W.; west to lat. 46°18'05"N., long., 117°00'15"W.; west to lat. 46°17'42"N., long., 117°22'04"W.; south to lat. 46°10'30"N., long., 117°28'24"W.; west to lat. 46°12'00"N., long., 117°35'44"W.; north to point of beginning; that airspace extending upward from 1200 feet above the surface, within an area bounded by a line beginning at lat. 46°00'00"N., long., 116°00'04"W., to lat. 46°00'00"N., long., 116°23'04"W., to lat. 45°39'00"N., long., 116°10'03"W., to lat. 45°30'00"N., long., 116°14'03"W., to lat. 45°23'00"N., long., 116°21'03"W., to lat. 45°25'00"N., long. 116°34'04"W., to lat. 45°30'00"N., long. 116°46'04"W., to lat. 46°00'00"N., long. 116°56'04"W.; thence west along lat. 46°00'00"N., to the Walla Walla VOR/DME (lat. 46°05'13"N., long. 118°17'33"W) 16.6 nautical mile radius, thence north along the 16.6 nautical mile radius until intercepting V536, thence east along V536 to long. 116°00'00"W.; thence south along long. 116°00'00"W., to lat. 46°00'00"N. to beginning.

14 CFR Part 71

[Airspace Docket No. 92-AEA-05]

Alteration of Transition Area; Dover, DE

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This notice revises the legal description of the Dover, DE, 700 foot Transition Area to incorporate a name change of the Kenton VORTAC to the Smyrna VORTAC. Additionally, minor technical revisions are being incorporated into the description to reflect the actual geographic locations of all airports in this area. This action establishes that amount of controlled airspace deemed necessary by the FAA to contain aircraft operating under instrument flight rules.

EFFECTIVE DATE: 0901 U.T.C. December 10, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Curtis L. Brewington, Designated Airspace Specialist, System Management Branch, AEA-530, F.A.A. Eastern Region, Fitzgerald Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553-0857.

SUPPLEMENTARY INFORMATION:

History

On May 12, 1992, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise the 700 foot Transition Area established at Dover, DE, due to a name change for an air navigational aid contained in the description (57 FR 22186). The proposed action would update all names contained in the legal description and revises the geographic location of all airports contained in the description.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments on the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. The coordinates for this airspace docket are based on North American Datum 83. Transition Areas are published in § 71.161 of FAA Handbook 7400.7 effective November 1, 1991, which is incorporated by reference in 14 CFR 71.1. The Dover, DE, Transition Area listed in this document will be published subsequently in the Handbook.

The Rule

This amendment to part 71 of the Federal Aviation Regulations revises the Dover, DE, 700 foot Transition Area due to a name change for a navigational facility. This action also updates the geographical location of all airports contained in the description based on North American Datum 83.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Incorporation by reference, Transition areas.

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. App. 1348(a), 1354(a), 1510; E.O. 10854; 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7, Compilation of Regulations, published April 30, 1991, and effective November 1, 1991, is amended as follows:

Section 71.181 Designation

* * * * *

AEA DE TA Dover, DE [Revised]

Dover AFB, DE (lat. 39°07′ 48″N., long. 75°27′59″W.)

Dover TACAN (lat. 39°07′57″N., long. 75°28′03″W.)

Smyrna VORTAC (lat. 39°13′54″N., long. 75°30′57″W.)

Delaware Airpark, DE (lat. 39°13′06″N., long. 75°35′47″W.)

That airspace extending upward from 700 feet above the surface within a 7.9-mile radius of Dover AFB and within 3.1 miles each side of the Dover TACAN 177° radial extending from the 7.9-mile radius to 9.2 miles south of the TACAN and within 3.1 miles each side of the Dover TACAN 133° radial extending from the 7.9-mile radius to 9.2 miles southeast of the TACAN and within a 6.3-mile radius of the Delaware Airpark and within 5.7 miles north and 4 miles south of the Smyrna VORTAC 078° and 258° radials extending from the 6.3-mile radius of Delaware Airpark to 10 miles east of the VORTAC.

14 CFR Part 71

[Airspace Docket No. 91-AEA-10]

Alteration of Transition Area; Dunkirk, NY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This notice modifies the existing 700 foot Transition Area at Dunkirk, NY, by enlarging that portion to the southwest of the Chautauqua County/Dunkirk Airport, Dunkirk, NY, to accommodate a new instrument approach procedure to Runway 6 at the airport. This action revises that amount of controlled airspace deemed necessary to contain aircraft operating under instrument flight rules. Additionally, the airport name and geographic location are being updated to reflect current designations.

EFFECTIVE DATE: 0901 U.T.C. December 10, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Curtis L. Brewington, Designated Airspace Specialist, System Management Branch, AEA-530, F.A.A. Eastern Region, Fitzgerald Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553-0857.

SUPPLEMENTARY INFORMATION:

History

On April 9, 1992, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise the 700 foot Transition Area established at Dunkirk, NY, by enlarging that portion to the southwest due to the establishment of a new instrument approach procedure to Runway 6 at the

Chautauqua County/Dunkirk Airport, Dunkirk, NY (57 FR 15265). Subsequent corrections to the original notice were issued on May 22, 1992 (57 FR 24412). The proposed action would revise that amount of airspace deemed necessary by the FAA to contain aircraft operating under instrument flight rules in controlled airspace.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Transition Areas are published in section 71.171 of FAA Handbook 7400.7 effective November 1, 1991, which is incorporated by reference in 14 CFR 71.1. The Dunkirk, NY, Transition Area listed in this document will be published subsequently in the Handbook.

The Rule

This amendment to part 71 of the Federal Aviation Regulations revises the 700 foot Transition Area established at Dunkirk, NY, due to the development of an instrument approach procedure to Runway 6 at the Chautauqua County/ Dunkirk Airport, Dunkirk, NY. The coordinates for this airspace docket are based on North American Datum 1983.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

14 CFR Part 71

[Airspace Docket No 92–ANM–18]

Removal of VOR Federal Airway V–349; WA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; amendment.

SUMMARY: This action amends the final rule that removed Federal Airway V–349 located in the vicinity of Bellingham, WA. The Bellingham VHF Omnidirectional Range (VOR) navigational signal between Seattle, WA, and Bellingham has deteriorated to the point where the minimum en route altitude (MEA) had to be raised from 5,400 feet mean sea level (MSL) to 10,000 feet MSL; therefore, the airway was removed. However, at Canada's request the 4-nautical-mile segment between Bellingham and the United States/ Canadian Border will be retained. This action reinstates that segment of V–349.

EFFECTIVE DATE: 0901 UTC, October 15, 1992.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Obstruction Evaluation Branch (ATP–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Rules and Procedures Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–9250.

SUPPLEMENTARY INFORMATION:

History

Federal Register Document 92–19990, Airspace Docket No. 92–ANM–18, published on August 21, 1992 (57 FR 37878), removed Federal Airway V–349. At Canada's request, the 4-nautical-mile segment of V–349, between Bellingham and the United States/Canadian Border, will be retained. This action reinstates that segment of V–349. Domestic VOR Federal Airways are published in section 71.123 of Handbook 7400.7 effective November 1, 1991, which is incorporated by reference in 14 CFR 71.1. The Domestic VOR Federal airway listed in this document will be published subsequently in the Handbook.

The Rule

This amendment to part 71 of the Federal Aviation regulations reinstates the 4-nautical-mile segment of Federal Airway V–349, which was inadvertently removed, between Bellingham and the Untied States/Canadian Border. Accordingly, since this action is merely a technical amendment in which the public is not particularly interested, notice and public procedure under 5 U.S.C. 553(b) are unnecessary. Furthermore, because the final rule that removed Federal Airway V–349 becomes effective October 15, 1992, and because there is an immediate need to incorporated the segment of V–349 between Bellingham and the United States/Canadian Border onto the next chart to avoid pilot confusion, I find that good cause exists, pursuant to 5 U.S.C. 553(d), for making this amendment effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; and (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

BILLING CODE 4910–13–M

DEPARTMENT OF INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 925

Missouri Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule; approval of amendment.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) is announcing approval of a proposed amendment, with certain exceptions, submitted by the State of Missouri as a modification to its permanent regulatory program (hereinafter referred to as the Missouri program) approved under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This amendment was submitted to OSM on October 10, 1990, and pertains to: Prime farmlands, signs and markers, topsoil, hydrologic balance, air resources, explosives, excess spoil, coal waste, backfilling and grading, postmining land use, roads and other transportation facilities, revegetation, prohibitions and limitations on mining, coal exploration, requirements for legal, financial, and compliance information, requirements for information on environmental resources, requirements for operation and reclamation plans, review and approval of permit applications, bond requirements, duration and release of reclamation liability, permit revocation, bond forfeiture and authorization to expend reclamation fund monies, definitions, inspection and enforcement, penalty assessment, applicability and general requirements, and revegetation success guidelines. The amendment is intended to revise the State program to be consistent with the corresponding Federal standards, incorporate the additional flexibility afforded by the revised Federal regulations, and improve operational efficiency.

EFFECTIVE DATE: September 29, 1992.

FOR FURTHER INFORMATION CONTACT: Jerry R. Ennis, Telephone: (816) 374–6405.

SUPPLEMENTARY INFORMATION:

I. Background on the Missouri Program

On November 21, 1980, the Secretary of the Interior conditionally approved the Missouri program. General background information on the Missouri program, including the Secretary's findings, the disposition of comments, and the program can be found in the November 21, 1980, **Federal Register** (45 FR 77017). Subsequent actions concerning Missouri's program and program amendments can be found at 30 CFR 925.10, 925.12, 925.15, and 925.16.

II. Submission of Amendment

On October 10, 1990, Missouri submitted to OSM a proposed program amendment (Administrative Record No. MO–519). The proposed amendment consists of revisions to: 10 CSR 40–3.010/3.170, Signs and Markers for Surface and Underground Operations; 10 CSR 40–3.030/3.190, Requirements for Topsoil Removal, Storage, and Redistribution at Surface and Underground Operations; 10 CSR 40–3.040/3.200, Requirements for Protection of the Hydrologic Balance at Surface and Underground Operations; 10 CSR 40–3.050/3.210, Requirements for the Use of Explosives at Surface and Underground Operations; 10 CSR 40–3.060/3.220, Requirements for the Disposal of Excess Spoil at Surface and Underground Operations; 10 CSR 40–3.080/3.230, Requirements for the Disposal of Coal Processing Waste at Surface and Underground Operations; 10 CSR 40–3.250, Requirements for the Protection of Fish, Wildlife, and Related Environmental Values and Protection Against Slides and Other Damage; 10 CSR 40–3.110/3.260, Backfilling and Grading Requirements for Surface and Underground Operations; 10 CSR 40–3.120/3.270, Revegetation Requirements for Surface and Underground Operations; 10 CSR 40–3.130/3.300, Postmining Land Use Requirements at Surface and Underground Operations; 10 CSR 40–3.140/3.290, Road and Other Transportation Requirements for Surface and Underground Operations; 10 CSR 40–4.030, Operations on Prime Farmland; 10 CSR 40–5.010, Prohibitions and Limitations on Mining in Certain Areas; 10 CSR 40–6.010, General Requirements for Permits, Permit Applications, and Coal Exploration; 10 CSR 40–6.020, General Requirements for Coal Exploration Permits; 10 CSR 40–6.030/6.100, Surface and Underground Mining Permit Applications—Minimum Requirements for Legal, Financial, Compliance, and Related Information; 10 CSR 40–6.040/6.110, Surface and Underground Mining Permit Applications—Minimum Requirements for Information on Environmental Resources; 10 CSR 40–6.050/6.120, Surface and Underground Mining Permit Application—Minimum Requirements for Reclamation and Operations Plan; 10 CSR 40–6.060, Requirements for Permits for Special Categories of Surface Coal Mining and Reclamation Operations; 10 CSR 40–6.070, Review, Public Participation, and Approval of Permit Applications and Permit Terms and Conditions; 10 CSR 40–7.011, Bond Requirements; 10 CSR 40–7.021, Duration and Release of Reclamation Liability; 10 CSR 40–7.031, Permit Revocation, Bond Forfeiture, and Authorization to Expend Reclamation Fund Monies; 10 CSR 40–8.010, Definitions; 10 CSR 40–8.030, Permanent Program Inspection and Enforcement; 10 CSR 40–8.040, Penalty Assessment; 10 CSR 40–8.070, Applicability and General Requirements; and Phase III Liability Release Guidelines.

The amendment currently proposed by Missouri responds to five 30 CFR 732.17(d) notifications sent by the Director of OSM: (1) A June 11, 1986, notification known as "Regulatory Reform I," (Administrative Record No. MO–295); (2) a November 3, 1988, notification known as "Regulatory Reform II," (Administrative Record No.

MO–406); (3) a November 6, 1989, notification known as "Regulatory Reform III," (Administrative Record No. MO–478); (4) a May 11, 1989, notification that addresses ownership and control, and permit rescission issues (Administrative Record No. MO–434); and (5) a February 7, 1990, notification regarding coal extraction incidental to the extraction of other minerals as set forth in section 701(28) of SMCRA (Administrative Record No. MO–495). It also addresses previous rulemaking that was not submitted to OSM for program amendment approval and various rulemaking needed to strengthen Missouri's program.

In this submittal Missouri is also addressing State program provisions that were affirmatively disapproved and as codified at 30 CFR 925.10, and certain required program amendments that the Director placed on the Missouri program and as codified in the Federal regulations at 30 CFR 925.16. The State has also submitted several rules on its own initiative to strengthen its program.

OSM published a notice in the November 1, 1990, **Federal Register** (55 FR 46076), announcing receipt of the proposed amendment and in the same notice opened the public comment period and provided opportunity for a public hearing on the substantive adequacy of the amendment (Administrative Record No. MO–526). The public comment period closed on December 3, 1990. A public hearing was not held because no one requested an opportunity to testify.

In a February 20, 1991, letter (Administrative Record No. MO–530) OSM notified Missouri of numerous concerns it had with the proposed regulations. Missouri responded to OSM in a February 28, 1991, letter (Administrative Record No. MO–531) stating, in part, that they did not intend to submit additional materials.

III. Director's Findings

The Director finds in accordance with SMCRA and 30 CFR 732.15 and 732.17, that Missouri's amendment, with certain exceptions, as submitted by Missouri on October 10, 1990, meets the requirements of SMCRA and 30 CFR chapter VII as discussed below.

1. Required Program Amendments

Missouri's October 10, 1990, proposed program amendment addresses required program amendments that were placed on the Missouri program in past rulemaking actions. The Director finds that the following proposed State regulations satisfies the required program amendments and is approving them [the codified required amendments at 30 CFR 925.16 are indicated in brackets with the corresponding Federal rulemaking action]: 10 CSR 40–3.040(6)(T) and 3.200(6)(T), concerning quarterly examination of impoundments not meeting the criteria of 30 CFR 77.216(a) [30 CFR 925.16(f)(2) January 3, 1991, (56 FR 190)]; 10 CSR 40–3.040(10)(G) and (I) and 3.200(10)(G) and (I), concerning the requirement that all dams and embankments be inspected and be certified as being constructed and maintained as designed in accordance with the approved plan and regulation requirements [30 CFR 925.16(f)(3) and (4) January 3, 1991, (56 FR 190)]; 10 CSR 40–3.050(6)(C) and 3.210(6)(C), concerning the need for blasting records to contain the certification number of each individual conducting a blast [30 CFR 925.16(l)(4) June 16, 1988, (53 FR 22475)]; 10 CSR 40–3.060(1)(H) and 3.220(1)(H), concerning the requirement that excess spoil that is acid- or toxic-forming or combustible, be adequately covered with non-acid or non-toxic noncombustible material, or treated, in accordance with 10 CSR 40–3.040 [30 CFR 925.16(f)(5) January 3, 1991, (56 FR 190)]; 10 CSR 3.250(1)(B), concerning underground mining activity that is likely to jeopardize the continued existence of endangered or threatened species [30 CFR 925.16(e)(1) January 3, 1991 (56 FR 190)]; 10 CSR 404.030(4)(A), concerning the need for all affected property owners' consent for the creation of water bodies on prime farmlands [30 CFR 925.16(n)(1) December 11, 1989, (54 FR 50744)]; 10 CSR 40–5.010(2)(C), concerning the requirements for areas where mining is prohibited or limited [30 CFR 925.16(c)(2) July 6, 1990, (55 FR 27811)]; 10 CSR 40–6.040(5)(A), concerning the requirements for a description of the areal and structural geology including cross-sections, maps, and plans, etc. [30 CFR 925.16(c)(3) July 6, 1990, (55 FR 27811)]; 10 CSR 40–6.040(11)(E) and 6.110(11)(E), concerning surface and underground mine operations site-specific fish and wildlife resource information needs [30 CFR 925.16(b)(2) June 5, 1990, (55 FR 22907) and 30 CFR 925.16(c)(7) July 6, 1990, (55 FR 27811)]; 10 CSR 40–6.040(11)(F) and 6.110(11)(F), concerning the regulatory authority's responsibility to make wildlife resources information available to the U.S. Fish and Wildlife Service [30 CFR 925.16(c)(6) July 6, 1990, (55 FR 27811)]; 10 CSR 40–6.050(7)(B)1 and 6.120(12)(B)1, concerning the fish and wildlife plan requirements to be based upon the best technology currently available [30 CFR 925.16(b)(3) June 5, 1990, (55 FR 22907)]; 10 CSR 40–6.050(9)(C)5 and 6.120(5)(C), concerning supplemental hydrology information requirements [30 CFR 925.16(c)(5) July 6, 1990, (55 FR 27811)]; 10 CSR 40–6.060(4)(A), concerning criteria for permit revision and renewal, single continuous mining pits, and single continuous surface coal mining operations, when prime farmlands are involved [30 CFR 925.16(c)(1) July 6, 1990, (55 FR 27811)]; 10 CSR 40–6.070(8)(L), concerning the need for a written finding when approving a long-term intensive agricultural postmining land use [30 CFR 925.16(n)(2) December 11, 1989, (54 FR 50744]; 10 CSR 40–6.110(5)(A) and (B), concerning underground mining general geology description and test boring requirements [30 CFR 925.16(c)(4) July 6, 1990, (55 FR 27811)]; and 10 CSR 40–7.011(5)(D)2.D., concerning the requirement that audits be based on generally acceptable accounting principles [30 CFR 925.16(g)(17) May 8, 1991, (56 FR 21281)].

Accordingly, the Director is removing the required program amendments as identified above from the Missouri program and as codified at 30 CFR 925.16.

2. Missouri Regulations That Are Substantively the Same as Federal Regulations

Missouri proposes revisions to the following regulations that are substantive in nature and contain language substantially the same as the corresponding Federal regulations [counterpart Federal regulations are in brackets]: Sediment pond storage and dewatering, 10 CSR 40–3.040(6)(B), and 3.200(6)(B) [30 CFR 816.46(c)(1)(iii)(A) and 817.46(c)(1)(iii)(A)]; Covering coal seams, acid- and toxic-forming materials and combustible materials, 10 CSR 40–3.110(3)(A)1. and 3.260(3)(A)1. [30 CFR 816.102(f) and 817.102(f)]; Quick growing cover and limited exception for cropland post-mining land use, 10 CSR 3.120(1)(D) and (E) and 3.270(1)(D) and (E), [30 CFR 816.111 (c) and (d) and 817.111 (c) and (d)]; Revegetation success liability, 10 CSR 40–3.120(6)(B)1 and 3.270(6)(B)1,[30 CFR 816.116(c)(1) and 817.116(c)(1)]; Revegetation success standards for previously disturbed areas, 10 CSR 40–3.120(6)(B)2.I. and 3.270(6)(B)2.I. [30 CFR 816.116(b)(5) and 817.116(b)(5); Ground cover to achieve the postmining land use, 10 CSR 40–3.120(7)(C)3.C. and 3.290(7)(C)3.C. [30 CFR 816.116(b)(3)(iii) and 817.116(b)(3)(iii)]; Revegetation success, 10 CSR 40–3.120(8)(A) 5, 6, 7, and 8 and 3.270(8)(A) 5, 6, 7, and 8 [30 CFR 816.116(c)(2) and 817.116(c)(2)]; As built certification for Class I and II roads, 10 CSR 40–3.140 (1)(D)1. and (8)(D)1. and 3.290 (1)(D)1. and (8)(D)1. [30 CFR

816.151(a) and 817.151(a); 1.3 safety factor for road embankments, 10 CSR 40–3.140 (3)(D)9. and (10)(D)9. and 3.290 (3)(D)9. and (10)(D)9. [30 CFR 816.151(b) and 817.151(b)]; Roads maintained to meet performance standards, 10 CSR 40–3.140 (6)(D), (13) (D), and (20) (D) and 3.290 (6)(D), (13)(D), and (20)(D) [30 CFR 816.150(e)(1) and 817.150(e)(1)]; Control or prevent erosion, siltation and air pollution for roads, 10 CSR 40–3.140(8)(A) and (15)(A) and 3.290 (1)(A), (8)(A), and (15)(A) [30 CFR 816.150(b)(1) and 817.150(b)(1)]; Road damaged by catastrophic event, 10 CSR 40–3.140 (13)(C) and (20)(C) and 3.290 (13)(C) and (20)(C) [30 CFR 816.150(e)(2) and 817.150(e)(2)]; Public parks and historic places, 10 CSR 40–5.010(3)(F)1. [30 CFR 761.12(f)(1)]; Definition of owned or controlled, 10 CSR 40–6.010(2)(E) [30 CFR 773.5]; Exploration map and narrative, 10 CSR 40–6.020 (2)(B)3, (3)(B)3, and (5) [30 CFR 772.11(b) (3) and 772.12 (b)(3) and (b)(5)]; Concerning commercial use or sale of coal extracted during coal exploration operations, 10 CSR 40–6.020(5) [30 CFR 772.14 (a) and (b)]; Permit application information on ownership and control, 10 CSR 40–6.030(1) (A), (C), (D), and (H) and 6.100(1) (A), (C), (D), and (H) [30 CFR 778.13 (a), (b), (c), (d), and (i)]; Update and correction of violations, 10 CSR 40–6.030(2)(D) and 6.100(2)(D) [30 CFR 778.14(d)]; Fish and Wildlife Service information request, 10 CSD 6.040(11)(F) [30 CFR 780.16(c)] ; Fish and wildlife plan requirements, 10 CSR 40–6.050(7) (A), (B)1., (B)2., (C)1., (C)3. and 6.120(12) (A), (B)1., (C)1., and (C)3. [30 CFR 780.16 (a) (2)(i), (2)(ii), (b), (b)(1), and 784.16 (a) (2) (i), (2)(ii), (b), and (b)(1)]; Impoundment design compliance, 10 CSR 40–6.050(11)(C) and 6.120(7)(C) [30 CFR 780.25(c)(1) and 784.16(c)(1)]; Stream fords and crossing design and schedules for removal and certification of Class I, II, and III roads, 10 CSR 6.050(17)(A) 1 through 9 and 6.120(15)(A) 1 through 9 [30 CFR 780.37(a) and 784.24(a)]; Support facilities, 10 CSR 40–6.050(18) and 6.120(16) [30 CFR 780.38 and 784.30]; Ownership and control requirements, 10 CSR 40–6.070 (7) (F), (G), and (8)(I) [30 CFR 773.15(b)(2), (b)(3), and (e)]; Permit approval and denial actions, 10 CSR 40–6.070 (10)(B)1.A. and (10)(E)2. [30 CFR 773.11(a) and 773.19(b)]; Improvidently issued permits and rescission, 10 CSR 40–6.070 (11)(A) 2., 3., and (11)(B) [30 CFR 773.20 (b), (c), and 773.21]; Follow up information requirements for a cessation order, 10 CSR 40–6.070(13)(E) [30 CFR 773.17(i)]; Independent bonding increments, 10 CSR 40–7.011(3)(C) [30 CFR 800.11(b) (4)]; Full cost bond amounts, 10 CSR 40–7.011(4)(E) [30 CFR 800.14(b)]; Definitions of adjacent areas, pasture, prime farmland, woodland, water, and undeveloped land, 10 CSR 40–8.010(1)(A) 4. and 51. B, D, I, and J [30 CFR 701.5]; Notify owner and controllers of cessation order, 10 CSR 40–8.030(6)(G) [30 CFR 843.11(g)]; and Informal conference review, 10 CSR 40–8.040(8)(A) [30 CFR 845.18(a)].

The Director therefore finds that these proposed revisions to Missouri's regulations are no less effective than the corresponding Federal regulations and is approving them.

3. Signs and Markers

At 10 CSR 40–3.010(5) and 40–3.170(5), Missouri proposes to add the requirement that where the permit area is bonded incrementally, the area bonded shall be clearly marked before the beginning of surface mining activities. The Federal counterpart regulations that provide for signs and markers at 30 CFR 816.11 and 817.11 do not specifically require that incrementally bonded areas be marked. However, the Director finds that Missouri's proposed requirement will assist in the administration of its program and is not inconsistent with or no less effective than the Federal program requirements. The Director is approving the proposed change.

4. Requirements for Topsoil Removal, Storage, and Redistribution

At 10 CSR 40–3.030(1)(C) and 3.190(1)(C), Missouri proposes to add the requirement that "[t]opsoil and subsoils to be saved under section (2) of this rule shall be removed twenty-five feet (25') in advance of mining, unless otherwise stated in the permit." The Federal regulations that address the timing of topsoil and subsoil removal at 30 CFR 816.22(a)(4) and 817.22(a)(4) do not specifically require removal 25 feet in advance of mining. However, the Director finds that Missouri's proposed requirement will assist in the administration of its program and is not inconsistent with or no less effective than the Federal program requirements. The Director is approving the proposed change.

5. Water Quality Standards and Effluent Limitations, General Limitations

Missouri proposes to revise its rules at 10 CSR 40–3.040(2)(A)1 and 3.200(2)(A)1 to require that all surface drainage from the disturbed area shall be passed through a sedimentation pond, to additionally allow that, "* * * areas that are in the process of topsoil placement and revegetation will not be required to meet total suspended solids effluent limitations."

In a United States Court of Appeals for the District of Columbia action, *In re: Surface Min. Regulation Litigation*, 627 F.2d 1346 (D.C. Cir 1980), the court ruled that where there was an overlap of regulation between SMCRA and the Clean Water Act (CWA), 33 U.S.C. 1251–1387, the provisions of the CWA must "control so as to afford consistent effluent standards nationwide." Missouri's proposal would provide an exemption from the requirement to comply with a particular parameter of effluent limitations in certain situations. SMCRA and the Federal regulations place a general requirement that effluent limitation be met. The specific elements required in meeting effluent limitations would come under the control of the CWA and implementing regulations at 40 CFR part 434 administered by the U.S. Environmental Protection Agency (EPA). In a letter dated July 29, 1991, (Administrative Record No. MO–540), EPA concurred that Missouri's proposed amendment can be implemented consistent with the CWA. Therefore, the Director is approving Missouri's proposed change based upon this concurrence. However, before Missouri can enforce the waiver in meeting total suspended solids of the effluent limitation requirements, the existing permits obtained under the CWA should be reviewed and revised if necessary in order to allow implementation of this new rule requirement.

6. Certification of Stream Channel Diversions

At 10 CSR 40–3.040(4)(B)3. and 3.200(4)(B)3., the Missouri regulations requires that the design and construction of stream channel diversions be certified by a professional engineer. It proposes to add that diversions also be certified as meeting the performance standards of this rule.

The Federal regulations at 30 CFR 816.43(b)(4) and 817.43(b)(4) provide for the same requirements but additionally require the certification of any design criteria set by the regulatory authority. Missouri's proposal does not require certification of regulatory authority design criteria. Missouri is therefore required to further amend its program to provide for this certification.

In a January 3, 1991, rulemaking action (56 FR 190) at 30 CFR 925.16(f)(1), a required program amendment was placed on the Missouri program to correct the above deficiencies. The Director finds that Missouri's proposed change satisfies this required program amendment to the extent that diversions

must be certified as meeting the performance standards. Therefore the required amendment will be modified to reflect this situation.

7. Maintenance of Sedimentation Ponds

At 10 CSR 40–3.040(6)(C) and 3.200(6)(C), Missouri proposes to delete language that defines theoretical detention time and the conditions when approval may be given for a detention time of less than 10 hours. It would retain the requirement that "Sedimentation ponds shall provide the required theoretical detention time for the water inflow or runoff entering the pond from a ten (10-year, twenty four (24)-hour precipitation event (design event)." The Federal regulations at 30 CFR 816.46(c)(1)(iii)(C) and 817.46(c)(1)(iii)(C) also require retention of a 10-year, 24-hour precipitation event but additionally would allow the ability to "treat" rather than "contain" the water and to provide a design based on a lesser event if approved by the regulatory authority. Since adoption of the additional flexibility afforded in the Federal regulations is discretionary to the regulatory authority, the Director finds that Missouri's option not to adopt the more flexible language of the Federal regulations does not render its program to be less effective and is approving the proposed deletions.

8. Dewatering Device

At 10 CSR 40–3.040(6)(D) and 3.200(6)(D), Missouri provides requirements for dewatering of sedimentation ponds. The requirement states "[T]he water storage resulting from inflow shall be removed by a nonclogging dewatering device that has been designed, constructed, and maintained in accordance with subsection (6)(C) of this rule or a conduit spillway approved in the permit and plan. The dewatering device shall not be located at a lower elevation than the maximum elevation of the sedimentation storage volume." Missouri is proposing to add the phrase "* * * that has been designed, constructed, and maintained in accordance with subsection (6)(C) of this rule * * *." Subsection (6)(C) of the State rule requires that sedimentation ponds be designed to provide a theoretical detention time to hold the runoff entering from a 10-year, 24-hour precipitation event (design event).

The counterpart Federal regulations for nonclogging dewatering device at 30 CFR 816.46(c)(1)(iii)(D) and 817.46(c)(1)(iii)(D) require it to be adequate to maintain a detention time that will allow the effluent from ponds to meet State and Federal effluent limitations. Additionally the Federal regulations at 30 CFR 816.46(c)(1)(iii)(C) and 817.46(c)(1)(iii)(C) requires a detention time to hold a 10-year, 24-hour precipitation event as is required at (6)(C) of the Missouri regulations.

The Missouri rule requirements at 10 CSR 40–3.040(6)(D) and 3.200(6)(D) do not specifically require a detention time that would allow State and Federal effluent standards to be met. However, at 10 CSR 40–3.040(2)(B) and 3.200(2)(B), the Missouri regulations require that water discharged from disturbed areas must be in compliance with all applicable State and Federal water quality laws and regulations.

Therefore, the Director finds that Missouri's proposed changes at 10 CSR 40–3.040(6)(D) and 3.200(6)(D) along with its other rule requirements combine to provide for no less effective than requirements of the Federal regulations at 30 CFR 816.46(c)(1)(iii) (C) and (D) and 817.46(c)(1)(iii) (C) and (D), and is approving the change.

9. Sedimentation Pond Storage

At 10 CSR 40–3.040(6)(H) and 3.200(6)(H), Missouri proposes to delete the requirement to remove sediment from sediment ponds when the volume of sediment accumulates to 60 percent of the design sediment storage volume. In addition, Missouri proposes to delete language regarding the circumstances under which an operator may provide additional sediment storage for sediment and/or water above the required design standard. Missouri's rule, as modified, would simply require that sediment shall be removed from sedimentation ponds.

The Federal regulations at 30 CFR 816.46(c)(iii)(F) and 817.46(c)(iii)(F), require that sediment ponds shall "[b]e designed, constructed, and maintained to * * * provide periodic sediment removal sufficient to maintain adequate volume for the design event."

The Director is approving Missouri's proposed amendment but is requiring the State to further amend its rule to require that sediment ponds be designed, constructed, and maintained to provide periodic sediment removal sufficient to maintain adequate volume for the design event.

10. Sediment Pond Removal

At 10 CSR 40–3.040(6)(U) and 3.200(6)(U), Missouri requires that sediment ponds shall not be removed until the disturbed area has been restored and the revegetation requirements of 10 CSR 40–3.120 and 3.270 are met and the drainage entering the pond has met the applicable State and Federal water quality requirements of the receiving stream.

These requirements are substantively the same as the March 13, 1979, Federal regulation requirements at 30 CFR 816.46(u) and 817.46(u). However, in a September 28, 1983, rulemaking, OSM modified those regulations and now require, at 30 CFR 816.46(b)(5) and 817.46(b)(5), that siltation structures shall be maintained until removal is authorized by the regulatory authority and the disturbed area has been stabilized and revegetated. In no case shall the structure be removed sooner than 2 years after the last augmented seeding. As discussed in the preamble to the Federal regulations (48 FR 43956, 44040, September 28, 1983) and in response to a commenter who questioned the 2-year period based on one study in eastern Kentucky, OSM stated:

> While it is true that the two-year standard is based on one study, the study data represents a sufficient base on which to establish a minimum requirement for retention of a siltation structure during the reclamation period of mining. The regulatory authority will need to consider site-specific characteristics in order to decide whether, and for how long the structures must be retained past the two-year period.

Based on the above, the Director is requiring Missouri to further amend its rules at 10 CSR 40–3.040(6)(U) and 3.200(6)(U) to include the requirement that siltation structures shall be maintained until removal is authorized by the regulatory authority and that in no case shall the structures be removed sooner than 2 years after the last augmented seeding in accordance with 30 CFR 816.46(b)(5) and 817.46(b)(5).

11. Sedimentation Pond Design Standards

At 10 CSR 40–3.040(6)(Q) and 3.200(6)(Q) Missouri proposes to modify its regulation that determines design requirements for sedimentation ponds in accordance with the size of the structure by adding "open channel" to the phrase "crest of the *open channel* emergency spillway" and continue with "* * * unless the emergency spillway is a pipe, whereupon it is measured to the lowest point in the top of the embankment, * * *" The Federal counterpart regulations at 30 CFR 816.46(c) and 817.46(c) do not contain the specific language proposed by Missouri, but instead refer, in part, to the Mine Safety and Health Administration (MSHA) standards in the Federal regulations at 30 CFR 77.216(a) to determine sedimentation pond design. The standards in 30 CFR 77.216(a) do not

contain specific language that address pipes being used instead of emergency spillways. It instead provides for an acre-feet storage volume criteria determined by embankment height or crest of an emergency spillway (elevation). However, since Missouri's criteria uses spillway channel elevation or, if an emergency spillway pipe is used, then the lowest point of the top of the embankment must be considered, Missouri's criteria results in the same test for storage volume as required by the Federal regulations.

The Director finds that Missouri's proposed regulations are no less effective than the Federal requirements and is approving the proposed change.

12. Quarterly Examination of Impoundments

At 10 CSR 40–3.040(6)(T) and 3.200(6)(T), Missouri proposes to require quarterly inspection of impoundments that do not meet the criteria of 30 CFR 77.261(a). The counterpart Federal regulations at 30 CFR 816.49(a)(11) and 817.49(a)(11) require quarterly inspections for impoundments that do not meet the criteria of 30 CFR 77.216(a). Missouri's rule would appear to be no less effective than the Federal regulation, however Missouri has incorrectly cited its reference to 30 CFR 77.216(a) as "30 CFR 77.261(a)." The Director finds that the incorrect reference does not render the Missouri proposal less effective than the Federal requirements and is approving the proposed change. However, with this notice the Director is notifying Missouri of the reference error and the need to correct this citation error at 10 CSR 40–3.040(6)(T) and 40–3.200(6)(T) from 30 CFR 77.261(a) to 30 CFR 77.216(a).

13. Certification Reports for Dams and Embankments

At 10 CSR 3.040(10)(I) and 3.200(10)(I), Missouri proposes to require that certification reports for all dams and embankments shall be provided certifying that the impoundment has been constructed and maintained as designed and in accordance with the approved plan and this chapter. Five specific statement requirements are then listed which must be included in the report.

Federal regulations at 30 CFR 816.49(a)(10)(iii) and 817.49(a)(10)(iii) provide for the same requirements. However, the Federal regulations additionally require that the certification report include discussion of any appearance of instability, structural weakness, or other hazardous condition.

The Director is approving Missouri's proposed rule change with the requirement that Missouri further amend its rule to provide that certification reports include discussion of any appearance of instability, structural weakness, or other hazardous condition in a manner consistent with the Federal regulations.

14. Disposal of Excess Spoil

At 10 CSR 40–3.060(1)(A), Missouri proposes to modify its general requirements for disposal of excess spoil by adding the requirement that such spoil shall be hauled or conveyed to and placed in designated disposal areas within a permit area "within a time approved by the Director in the permit and plan." The counterpart Federal regulation at 30 CFR 816.71(a) does not contain this provision. However, the Director finds that Missouri's additional requirement will provide for more effective administration of its program and is not inconsistent with the Federal program requirements. The Director is approving the proposed change.

15. Waste Bank Subdrainage Systems

At 10 CSR 40–3.080(3)(A) and 3.230(3)(A), Missouri proposes to change its existing regulatory requirements regarding water control measures necessary in connection with the disposal of coal processing waste. Specifically, Missouri is amending its regulations to allow an operator to forego the usual requirement for a subdrainage system for a coal processing waste bank if the operator can demonstrate to the director that "* * * a subdrainage system is not required to ensure the structural integrity of the coal processing waste bank and the protection of the surface and ground water quality in the immediate vicinity of the disposal area * * *."

The counterpart Federal regulations at 30 CFR 816.81–816.83 and 817.81–817.83 do not specifically provide a mechanism whereby an operator can forego the requirements for a subdrainage system for coal processing waste bank. Instead, the Federal requirements, that apply to the disposal of coal mine waste in general (the term "coal mine waste," as used in the Federal regulations, includes underground development waste, as well as coal processing waste), simply outline the circumstances under which a subdrainage system is required. Specifically, the Federal regulations require coal mine waste refuse piles to include underdrains, as well as diversions, "* * * as necessary to control erosion, prevent water infiltration into the disposal facility and ensure stability * * *" whenever the disposal area "contains springs, natural or manmade watercourses, or wet weather seeps * * *."

Thus, in order to be no less effective than the Federal requirements, the Missouri program must require an underdrain system for coal mine waste refuse piles whenever the disposal area contains springs, natural or manmade watercourses, or wet weather seeps. The Missouri program does contain similar requirements for surface mining at 10 CSR 40–3.060(1)(M) and for underground mining at 10 CSR 40–3.220(1)(N). These provisions of the Missouri program specifically apply to the disposal of excess spoil, but are made applicable to the disposal of coal processing waste by cross-references at 10 CSR 40–3.080(4)(B) (surface mining) and at 10 CSR 40–3.230(4)(B) (underground mining). Therefore, under the Missouri program an underdrain system is always required if the disposal area contains springs, natural or manmade watercourses or wet weather seeps. In other words, under such conditions, it would be impossible for an operator to make a satisfactory demonstration that a subdrainage system was not necessary. Accordingly, the Director finds that Missouri's proposed amendments at 10 CSR 40–3.080(3)(A) and 10 CSR 3.230(3)(A) do not render the Missouri program less effective than the Federal requirements and is approving the proposed changes.

16. Noncoal Waste Disposal Requirements

At 10 CSR 40–3.080(8)(B), Missouri is proposing revisions to its rule for disposal of noncoal waste. These would require: (1) Such waste disposal to be in accordance with Revised Statutes of Missouri (RSMo) 260.200 through 260.430 and other Federal, State, and local law applicable to such disposal; (2) disposal of noncoal waste in the permit area shall be so designated in the permit; (3) these sites shall be designed and constructed with appropriate water barriers on the bottom and sides; (4) waste shall be routinely compacted and covered to prevent combustion and wind borne waste; (5) upon completion, a minimum of 2 feet of soil cover shall be placed over the site, slopes stabilized and revegetated in accordance with 10 CSR 40–3.270 (Revegetation requirements for underground operations); and (5) the operations shall be conducted in accordance with all local, State, and Federal requirements.

The counterpart Federal regulations at 30 CFR 816.89(b) place the same substantive requirements but in addition require that disposal sites in the permit area be designed and constructed to

ensure that leachate and drainage from the noncoal mine waste area do not degrade surface or underground water. Missouri's proposed rule would require sites to be designed with appropriate water barriers on the bottom and sides of the designated sites. "Appropriate water barriers" would not necessarily ensure that water is not degraded. However, at 10 CSR 40–3.080(8)(A), the Missouri rule requires that placement and storage (of noncoal waste) shall ensure that leachate and surface run off do not degrade surface water or ground water. Therefore, the combined Missouri rule requirements will provide for the same protection to surface and underground water as required by the Federal regulations.

The Missouri rule also requires waste disposal to be in accordance with applicable requirements of RSMo 260.200 through 260.430. These State statutes provide requirements for solid waste management.

The Director finds that Missouri's proposed rule at 10 CSR 40–3.080(8)(B), that provides requirements for noncoal waste disposal are no less effective than the Federal regulation requirements at 30 CFR 816.89(b) and is approving the change.

With this rule notice, the Director is notifying Missouri of a citation error and the need to correct this error. The Missouri rule references 10 CSR 40–3.270 (Revegetation requirements for underground operations) as the revegetation standard to be met. The citation should read 10 CSR 40–3.120 that provides revegetation standards for surface operations.

17. Disposal of Hazardous Noncoal Waste

Missouri proposes at 10 CSR 40–3.080(8)(D) and 40–3.230(8)(D) the requirement that "[a]ny noncoal mine waste defined as 'hazardous' under Section 3001 of the Resource Conservation and Recovery Act (RCRA) (Pub. L. 94–580, as amended) and 40 CFR part 261 shall be handled in accordance with the requirements of subtitle C of RCRA and any implementing regulations." Missouri's proposed requirement is identical to that of the corresponding Federal regulation adopted on September 26, 1983 (48 FR 43994, 44006), at 30 CFR 816.89(d) and 817.89(d). However, these Federal regulations were suspended on November 20, 1986 (51 FR 41952, 41962), to implement the decision of the U.S. District Court for the District of Columbia in *In re: Permanent Surface Min. Regulation Litigation* 620 F. Supp. 1519, 1538 (D.D.C. 1985). The court remanded these rules because OSM failed to comply with the public notice and public comment requirements of the Administrative Procedures Act in promulgation of these Federal regulations.

OSM subsequently deleted 30 CFR 816.89(d) and 817.89(d) (56 FR 65612, 65635–65636, December 17, 1991). In deleting these rules, OSM reasoned that Congress had assigned permitting, inspection, and enforcement responsibilities under RCRA to the EPA and that SMCRA did not require OSM or the State regulatory authorities to assume such responsibilities (56 FR 65612, 65623, December 17, 1991). It was further reasoned that Congress would not appropriate funds to OSM or State regulatory authorities for this task (*Id.*). With the deletion of this requirement, OSM stated that it would continue "consistent with its jurisdiction under the Act, to coordinate its regulatory program with EPA to facilitate the implementation of RCRA regulations." (56 FR 65612, 65624, December 17, 1991). However, OSM's action does not prohibit or prevent a State regulatory authority from choosing to assume such responsibilities in coordination with EPA. Under 30 CFR 730.11(b) States are allowed to enact provisions for which no corresponding provisions are contained in the Federal regulations or SMCRA.

Because there is no Federal counterpart to the proposed 10 CSR 40–3.080(8)(D) and 40–3.230(8)(D), OSM evaluated Missouri's proposal based upon its consistency with section 515(b)(14) of SMCRA. Section 515(b)(14) of SMCRA generally requires that all debris, acid-forming materials, toxic materials, or materials constituting a fire hazard are to be treated or buried and compacted or otherwise disposed of in a manner designed to prevent contamination of ground or surface waters. Because Missouri's proposed regulations provide for the handling and disposal of "hazardous" noncoal mine wastes in a manner designed to prevent contamination of ground or surface waters, i.e., pursuant to the provision of subtitle C of RCRA, the Director finds that Missouri's proposed regulations are not inconsistent with section 515(b)(14) of SMCRA and is approving the proposed regulations.

18. Protection of Air Resources

At 10 CSR 40–3.090 and 3.240 of their performance standards, Missouri proposes to delete specific requirements for the protection of air resources and add in their place "The surface coal mining and reclamation operations shall comply with all applicable State and Federal air pollution control laws."

The Federal regulations at 30 CFR 816.95 and 817.95 provide:

> (a) All exposed surface areas shall be protected and stabilized to effectively control erosion and air pollution attendant to erosion.

The Director finds that the State's proposed rule deletion and addition is not inconsistent with the requirements of counterpart Federal regulations at 30 CFR 816.95 and 817.95 and is approving the proposed changes. However, Missouri is required to further amend its program to provide performance standards that address air quality in a manner no less effective than the Federal regulation requirements.

19. Range or Pasture Land Revegetation Requirements

At 10 CSR 40–3.120(5) and 3.270(5), Missouri proposes to amend its regulations dealing with revegetation requirements for grazing for the land uses of range land and pasture land. Those regulations presently require that, where the approved postmining land use is range or pasture land, the reclaimed land must be used for livestock grazing at a grazing capacity approved in the permit and plan approximately equal to that for similar nonmined lands, for at least 2 full years of liability required under subsection (6)(B) of this rule. As amended, the regulations would no longer require that the land always be used for livestock grazing. Instead, under the amended regulations, the reclaimed land could be "* * * used in another manner, as approved, which will determine the productive capacity approved in the permit and plan approximately equal to that for similar nonmined lands."

The Federal regulations at 30 CFR 816.116(b)(1) and 817.116(b)(1) require "For areas developed for use as grazing land and pasture land the ground cover and production of the living plants on the revegetated area shall be at least equal to that of a reference area or such other success standards approved by the regulatory authority".

Missouri's existing rule language at 10 CSR 40–3.120(5) and 3.270(5) is substantively the same as a suspended and removed Federal regulation 30 CFR 816.115 and 817.115 (August 4, 1980, 45 FR 51549), that limited an operator, who proposed range or pasture land as postmining land use, to actually use the land for grazing during the last 2 years of bond liability in order to obtain bond release with no other option available to meet revegetation success standards. The current Federal regulations were promulgated on September 2, 1983. In

that rulemaking preamble (48 FR 40140, 40148), OSM stated "Use of a reference area or other appropriate standard is also possible. OSM's adoption of this position is not meant to preclude States from either allowing or requiring grazing of reclaimed pasture and range land." Since Missouri's proposed rule would allow for actual grazing or other options for the operator to meet revegetation success standards, its rule is no less effective than the Federal regulation requirements.

Missouri's proposed rule would further allow the land uses of range and pasture to be "* * * used in another manner which will determine productive capacity approved in the permit and plan approximately equal to that for similar nonmined lands." In the September 2, 1983, preamble and in response to a comment concerning range land productivity, the point was made that productivity should consider the pounds of beef (or equivalent) that may be produced per animal unit of area. Further, equal quantities of forage are not always a true reflection of range or grazing land productivity. Measures of revegetation success should take into account the nutritional value of the forage when determining whether productivity has been restored (48 FR 40140, 40148, September 2, 1983). Therefore, Missouri's proposed requirement that would allow productive capacity to be determination in another manner, is not inconsistent with the Federal regulation requirements.

At 10 CSR 40–3.120(5) and 3.270(5) Missouri uses the term "range land" as a type of land use. However, Missouri does not define range land and is proposing to delete their definition for grazing land. The Federal regulations do not define "range land" as a land use category. The Federal definition of "grazing land" is, however, intended to encompass range land use (see 44 FR 14933, March 13, 1979). In deleting its term "grazing land," Missouri has removed a comparable relationship to the Federal regulation for "range land" land use consideration. Additionally Missouri is proposing to amend its definition for pasture land use at 10 CSR 40–8.010(1)(A)51.B to:

> land used primarily for the long term production of adapted, domesticated, forage plants to be grazed by livestock or cut and cured for livestock feed. Land used for facilities in support of pasture land or land occasionally cut for hay which is adjacent to or an integral part of these operations is also included.

As proposed, the definition of pasture land will be the only land use definition in which the term grazing is incorporated in the Missouri program. Since Missouri does not define range land use, it is unclear what this use would involve as well as what revegetation success standards would apply. Missouri must either define this term or remove reference to it throughout its program.

Based on the discussion above, the Director finds Missouri's proposed language at 10 CSR 40–3.120(5) and 3.270(5) is no less effective than the Federal regulations requirements at 30 CFR 816.116(b)(1) and 817.116(b)(1) and is approving the proposed change. However, Missouri is required to amend its program to either remove or define the term "range land use."

20. Phase III Bond Liability Release Guidelines

In this proposed amendment Missouri submitted Phase III Liability Release Guidelines for the following land uses: prime farmland, cropland, pasture land, woodland, wildlife habitat, industrial/commercial, residential, and recreational. The guideline documents are intended to supplement Missouri's surface and underground revegetation requirements at 10 CSR 40–3.120 and 3.270 and meet the Federal regulation requirements at 30 CFR 816.116(a) (1) & (2) and 817.116(a) (1) & (2).

A review of the guideline documents by OSM identified numerous issues that were identified in OSM's February 20, 1991, letter to the State (Administrative Record No. MO–530). As discussed in this letter, the proposed guideline documents are less effective than the Federal program requirements. The Director is not approving the guideline documents for reasons stated in OSM's February 20, 1991, letter, and is retaining a required program amendment to provide for revegetation success guidelines that was placed on the Missouri program at 30 CFR 925.16(a) in a June 5, 1990, rulemaking action (55 FR 22907).

21. Specific Standards for Postmining Land Uses

At 10 CSR 40–3.120(6)(B)2.A through H and 3.270(6)(B)2.A through H, the State proposes for each category of land use that applicable revegetation success measurements shall be performed in accordance with the criteria contained in the Phase III Liability Release Guidelines adopted by the Land Reclamation Commission in June, 1990. As stated in Finding No. 20, the revegetation success policy documents (guideline documents) proposed are less effective than the Federal program. The Director therefore, is not approving the proposed reference to the policy documents since they are not being approved and are found to be less effective than the Federal program.

22. Vegetation Ground Cover at 70-Percent

At 10 CSR 40–3.120(6)(B)2.A, D, and G and 40–3.270(6)(B)2.A, D, and G, the State proposes for areas to be developed for woodland, wildlife habitat, or recreation land use, a ground cover success standard of 70-percent density. Additionally, Missouri's approved regulations at 10 CSR 40–3.120(6)(B)3. and 3.270(6)(D) require that vegetative ground cover shall not be less than that required to achieve the approved postmining land use. The Federal regulations at 30 CFR 816.116(b)(3)(iii) and 817.116(b)(3)(iii) require that "Vegetative ground cover shall not be less than that required to achieve the approved postmining land use." While Missouri's proposed vegetative ground cover standard of 70-percent density may be acceptable, it has not demonstrated that this standard will in all cases achieve the approved post mining land use as required by the referenced Federal regulations and counterpart State rules.

The Director cannot determine if Missouri's proposed standard for ground cover meeting a 70-percent density, is consistent with and no less effective than its standards at 10 CSR 40–3.120(6)(B)3 and 3.270(6)(D) and the Federal requirements and therefore is not approving the provision. Missouri is required to substantiate its basis for its 70-percent density standard or otherwise amend its program to be no less effective than the Federal regulation requirements of 30 CFR 816.116(b)(3) and 817.116(b)(3) in regards to setting standards for success.

23. Specific Standards for Industrial/Commercial and Residential Land Uses

At 10 CSR 40–3.120(6)(B)2.B and 10 CSR 40–3.270(6)(B)2.B, the State proposes to require that "In areas to be developed for industrial/commercial land use less than two (2) years after regrading is completed, the ground cover shall not be less than required to control erosion. If the area is not developed for industrial/commercial use within two (2) years of regrading, ground cover must have a density of seventy percent (70%), at a ninety (90%) statistical confidence level and not be less than that required to control erosion." Additionally the proposed rule references Phase III release guidelines for industrial/commercial land uses.

At 10 CSR 40–3.120(6)(B)2.H and 10 CSR 40–3.270(6)(B) 2.H, the State

proposes to require that "For areas to be developed for residential land use less than 2 years after regrading is completed, the vegetative ground cover shall not be less than required to control erosion. If the area is not developed for residential use within 2 years of regrading, ground cover must be equal to a density of 70-percent, at a 90-percent statistical confidence level." Additionally the above proposed rule references Phase III release guidelines for public services land use.

The Federal regulations at 30 CFR 816.116(b)(4) and 817.116(b)(4) require "For areas to be developed for industrial, commercial, or residential use less than 2 years after regrading is completed, the vegetative ground cover shall not be less than that required to control erosion."

Missouri's proposed rules at 10 CSR 40–3.120(6)(B)2.B and 10 CSR 40–3.270(6)(B)2.B require that at a minimum the vegetative ground cover shall not be less than that required to control erosion regardless of whether the area will be developed for industrial/commercial land use within the 2 years after regrading. Missouri's proposed rules at 10 CSR 40–3.120(6)(B)2.H and 10 CSR 40–3.270(6)(B)2.H require that at a minimum the vegetative ground cover shall not be less than that required to control erosion if the area will be developed for residential land use within 2 years after regrading. If the area will not be so developed within 2 years after regrading, however, Missouri's proposed rule would impose a 70-percent ground cover density test.

The Director finds the proposed rules, to the extent that they require ground cover to control erosion in areas to be developed in less than 2 years for industrial, commercial, and residential land uses, are no less effective than the Federal regulation requirements. Also, the requirement to control erosion for industrial/commercial land uses even if the land is not so developed upon 2 years after regrading provides additional clarification that the erosion control standard continues to apply should these uses take longer than 2 years to be developed. The Director is approving these proposed rule changes. However, the 70-percent ground cover requirement is less effective than the Federal requirements (see finding 22), also, the Phase III guideline document referred to in the proposed rules has not been approved (see Finding 20).

24. Standards of Success for Woodland, Wildlife Habitat, and Recreational Land Uses

At 10 CSR 40–3.120(6)(B)2.A, D, and G and 40–3.270(6)(B)2.A, D, and G, Missouri proposes success standards for woodland, wildlife, and recreational land uses. In general, the State would require that success in revegetation shall be determined on the basis of ground cover and tree and shrub count, or stocking, or in the case of wildlife habitat, half-shrub stocking. The success standard for ground cover would be acceptable if a ground cover density of 70-percent is achieved for wildlife and recreational land uses. The success standard for tree and shrub stocking rate shall be determined on a specific permit basis with consultation and approval of the Missouri Department of Conservation.

Missouri's proposed rules lack counterpart requirements to the Federal regulations at 30 CFR 816.116(b)(3) (i) and (iii) and 817.816(b)(3) (i) and (iii) that provide for minimum stocking and planting arrangements to be specified on the basis of local and regional conditions and that vegetative ground cover not be less than that required to achieve the approved postmining land use. However, at 10 CSR 40–3.120(7) (C)2. and (C)3.C. and at 3.270(7) (C)2. and (C)3.C., are standards for tree and shrub stocking for woodland, wildlife, and recreational land uses, where the above Federal regulation requirements are provided. Therefore, Missouri's proposed rules that provide standards for success for woodland, wildlife, and recreational land uses when viewed in combination with its tree and shrub stocking standards, provide requirements that are no less effective than the Federal regulations at 30 CFR 816.116(b)(3) and 817.116(b)(3).

Missouri's proposed rules set a ground cover standard of 70-percent density and tree or shrub stocking for wildlife and recreational land uses. The 70-percent ground cover standard has previously been found to be less effective than the Federal regulation requirements.

The Director is approving Missouri's proposed changes at 10 CSR 40–3.120(6) (B)2.A, D, and G and 40–3.270(6) (B)2.A, D, and G, with the exception of the 70-percent ground cover standard for the reasons discussed at Finding 22 of this notice.

25. Specific Revegetation Standards for Pasture Land Use

At 10 CSR 40–3.120(6)(B)2.E and 40–3.270(6)(B)2.E, the State proposes that "Ground cover and production shall be considered acceptable if they are at least ninety percent (90%) of the approved success standard * * *. The success standard for ground cover shall be ninety percent (90%) density."

The Federal regulations at 30 CFR 816.116 and 817.116 require:

(a) Success of revegetation shall be judged on the effectiveness of the vegetation for the approved postmining land use, the extent of cover compared to the cover occurring in natural vegetation of the area, and the general requirements of Section 816.111.

(1) For areas developed for use as grazing land or pasture land, the ground cover and production of living plants on the revegetated area shall be at least equal to that of a reference area or such other success standards approved by the regulatory authority.

The State has not shown that the proposed vegetative ground cover density standard of 90-percent will in all cases achieve the postmining land use and that ground cover success will be judged on the extent of cover compared to the cover occurring in natural vegetation of the area. Therefore, the Director finds that the proposed State standard for pasture is less effective than the Federal regulations and is not approving the proposed change. Missouri is required to substantiate its basis for the 90-percent cover standard or otherwise amend its program to be no less effective than the Federal regulation requirements at 30 CFR 816.116 (a) and (b) and 817.116(a) and (b) when setting success standards.

26. Tree and Shrub Stocking for Woodland, Wildlife Habitat, and Recreation Land Uses

a. Minimum Stocking and Planting Arrangements

At 10 CSR 40–3.120(7) (C)2. and 3–270(7) (C)2., Missouri requires that minimum stocking and planting arrangements shall be based on local and regional conditions and on recommendations from the Missouri Department of Conservation (MDOC). It proposes to modify this rule by removing "and on recommendations" and in place require "after consultation and approval" by MDOC.

The Federal regulations at 30 CFR 816.116(b)(3)(i) and 817.116(b)(3)(i) require that minimum stocking and planting arrangements be established after consultation with and approval by the State agencies responsible for administration of forestry and wildlife programs. Therefore, Missouri's proposed modification is no less effective than the Federal program requirements. However, Missouri's current rule also requires that in establishing the stocking density for trees, shrubs, half-shrubs, and ground cover, the revegetated area shall approximate the stocking and ground cover on the reference area and that the

stocking of live woody plants shall be equal to or greater than 90-percent of the stocking of woody plants of the same life form on the reference area. The use of reference areas with regard to tree and shrub stocking standards is not prohibited by the Federal regulations so long as the reference area reflects the stocking and planting arrangements established in consultation with and approved by appropriate State agencies. Since Missouri does require approval by the MDOC, the Director is approving the State's use of reference areas to establish stocking of trees, shrubs, half-shrubs, and woody plants for woodland, wildlife habitat, and recreational land uses.

b. Revegetation Success for Bond Release

At 10 CSR 40–3.120(7)(C)3.A. and 3.270(7)(C)3.A., Missouri currently requires that the revegetation standard for woody plants on the revegetated site be equal to or greater than 90-percent of the stocking of live woody plants of the same life form of the approved reference area with 80-percent statistical confidence. Missouri proposes to revise its rule to change from an 80-percent statistical confidence to a 90-percent statistical confidence and add the requirement that at the time of bond release, at least 80-percent of the trees and shrubs used to determine success shall have been in place for 60-percent of the applicable minimum period. The Federal regulations at 30 CFR 816.116(b)(3)(ii) and 817.116(b)(3)(ii), also require that 80-percent of the trees and shrubs used to determine success to be in place 60-percent of the applicable minimum period. Missouri's proposed requirements are no less effective than the Federal requirements for bond release and the Director is approving the proposed change.

27. Removal of Sedimentation Ponds and Diversions

At 10 CSR 40–3.120(8)(A)4 and 3.270(8)(A)4, Missouri proposes to modify its regulations that address reclamation of sediment ponds and diversions. As amended, the regulations require, among other things, that sediment ponds and diversions that are no longer needed for control of sediment shall be graded, topsoiled, and seeded within 18 months after approval of the phase II liability release of "all disturbed areas within the watershed they serve."

The Federal regulations at 30 CFR 816.46(b)(5) and 817.46(b)(5) require "Siltation structures shall be maintained until removal is authorized by the regulatory authority and the disturbed area has been stabilized and revegetated. In no case shall the structure be removed sooner than 2 years after the last augmented seeding." The Federal regulation at 30 CFR 800.40(c)(2) requires at the completion of phase II "No part of the bond or deposit shall be released under this paragraph so long as the lands to which the release is applicable are contributing suspended solids to stream flow or runoff outside the permit area in excess of the requirements set by section 515(b)(10) of the Act and by subchapter K of this chapter." Federal regulations at 30 CFR 816.43(a)(3) and 817.43(a)(3) require "Temporary diversions shall be removed when no longer needed to achieve the purpose for which they were authorized. The land shall be restored in accordance with this part. Before diversions are removed, downstream water-treatment facilities previously protected by the diversion shall be modified or removed, as necessary, to prevent overtopping or failure of the facilities." Federal regulations at 30 CFR 816.56 and 817.56 address rehabilitation of sedimentation ponds, diversions, impoundments, and treatment facilities before abandoning a permit or seeking bond release.

The Federal regulations do not provide for the specific time frame requirement of 18 months for removal and reclamation of sediment ponds and diversions upon approval of phase II bond liability release, as proposed by Missouri. However, since Missouri's approved program contains similar requirements to the above cited Federal regulations, and since those counterpart regulations must be met for "all disturbed areas within the watershed they serve" before the removal of siltation structures could take place, the Director finds that Missouri's proposed modification adds clarity to the administration of its program and is not inconsistent with the Federal program requirements and is approving the proposed change.

28. Extension for Meeting Revegetation Success

At 10 CSR 40–3.120(8)(A)9 and 3.270(8)(A)9, Missouri proposes to add the requirement that, if ground cover and tree and shrub density revegetation success is not demonstrated by the end of the 5 year responsibility period, then the period shall be extended year by year until the revegetation success standards are met. The Federal regulations at 30 CFR 816.116(c)(2) and 817.116(c)(2) are silent on the extension of the responsibility period in order to allow an operator to prove meeting revegetation success. However, the Federal regulations do set a revegetation success responsibility period of not less than 5 full years after any augmentative procedure except for a husbandry practice that is approved by the regulatory authority and OSM. The Missouri rules at 10 CSR 40–3.120(8)(B)1 and 3.270(8)(B)1. also provide these same requirements. Thus, under the Missouri program, an operator who engages in augmentative practices must restart the full 5 year responsibility period and cannot take advantage of the year-by-year extension provision. The Director, therefore, finds that Missouri's proposed rule is not inconsistent with and no less effective than the Federal program requirements and is approving the proposed change.

29. Postmining Land Use on Previously Mined Land

At 10 CSR 40–3.130(2)(A) and 3.300(2)(A), Missouri requires that the postmining land use for land previously mined and not reclaimed be judged on the basis of the uses which it was capable of supporting prior to any mining or a higher or better use that can be achieved. The State proposes to change the phrase "a higher or better" use to "the highest and best" use. It also proposes to add the requirement that the highest and best use must be compatible with the surrounding area and "does not require the disturbance of areas previously unaffected by mining."

The Federal regulations at 30 CFR 816.133(b) and 817.133(b) requires that postmining land use for previously mined land not reclaimed be judged on the basis of the land use that existed prior to mining. If the land cannot be reclaimed to the use that existed prior to mining, then the postmining land use would be judged on the basis of the highest and best use that can be achieved which is compatible with the surrounding area and does not require the disturbance of areas previously unaffected by mining. The Missouri rule differs from the Federal requirement in that it would: (1) Base postmining land use on the uses the land was capable of supporting prior to any mining rather than a single use that existed prior to mining and (2) allow the option of providing uses it was capable of supporting or the highest and best use that can be achieved, whereas the Federal regulations do not allow highest and best use that can be achieved unless it is first established that the existing use prior to mining cannot be achieved.

Missouri's requirement to base the postmining use on the uses the land was capable of supporting prior to mining, in

effect poses the same standard as required on land that has not been previously mined. Its option "or the highest and best use that can be achieved" will assure that postmining land use on previously mined land that has not been reclaimed will be optimized to the extent possible.

The Director finds Missouri's proposed rules at 10 CSR 40–3.130(2)(A) and 3.300(2)(A) are no less effective than the Federal regulation requirements at 30 CFR 816.133(b) and 817.133(b) and is approving the changes.

30. Public Facilities Land Use

At 10 CSR 40–3.130(3)(C) and 3.300(3)(C), Missouri proposes to amend its requirements regarding the approval of alternative postmining land uses. Specifically, Missouri proposes to change the requirement regarding public facilities. As amended, the regulations at 10 CSR 40–3.130(3)(C) and 3.300(3)(C) require that "for public facilities, the operator demonstrates a reasonable likelihood of sustaining higher or better use." The Federal regulations at 30 CFR 816.133 and 817.133 do not provide for this specific requirement regarding public facilities. However, at 816.133(c)(1) and 817.133(c) (1), the Federal regulations do require that "[t]here is a reasonable likelihood for achievement of" a proposed alternative postmining land use before it can be approved. The Federal requirement applies to all alternative postmining land uses and is not limited to public facilities. The Missouri program contains a similar requirement at 10 CSR 40–3.130(3)(B) and 3.300(3)(B). Those provisions require, among other things, that specific plans must be prepared and submitted to the director of the Missouri program that show the feasibility of the proposed alternative postmining land use. Since other areas of Missouri's regulations at 10 CSR 40–3.130 and 3.300 require similar criteria to those set forth in the Federal regulations, the proposed provision does not render the Missouri program less effective than the Federal regulation requirements. The Director is approving Missouri's proposed change.

31. Commitment to Cropland Use

At 10 CSR 40–3.130(3)(I) and 40–3.300(3)(I), Missouri proposes to amend its requirements regarding approval of an alternative postmining land use where the proposal is to change a premining land use of range, fish and wildlife habitat, forest land, hayland or pasture to a postmining land use of cropland. Specifically, Missouri proposes to delete the need for a written commitment by the operator, landowner, or land manager to provide sufficient crop management after release of performance bonds to assure that the postmining cropland land use remains practical and reasonable.

The Federal regulations at 30 CFR 816.133(c) and 817.133(c) require consultation with the landowner or land management agency having jurisdiction over the lands before approval by the regulatory authority of an alternative postmining land use. Missouri's removal of the language "that the proposed postmining cropland land use remains practical and reasonable" corresponds to 30 CFR 816.133(c)(3)(i) and 817.133(c)(3)(i) "the use will not be impracticable and unreasonable." Missouri's program provides for such provision at 10 CSR 40–3.130(3) and 40–3.300(3), thus the criteria for alternative land uses at 30 CFR 816.133(c) and 817.133(c) must be met. Additionally, at Section 515(b)(2) of SMCRA, is a requirement that the regulatory authority issue a written finding approving a long-term, intensive, agricultural postmining land use as part of the mining and reclamation plan. The Missouri program also has this requirement at 10 CSR 40–6.070(8)(L). Thus, deletion for the need of a written commitment by the operator, landowner, or land manager to provide sufficient crop management after the release of performance bond, does not hinder Missouri's ability to make written findings for long term intensive agricultural postmining land use in accordance with 10 CSR 40–6.070(8)(L).

Since Missouri's regulations at 10 CSR 40–3.130, 40–3.300, and 40–6.070(8)(L) require additional justification similar to the Federal requirements for the alternative land use, as a cropland land use, the Director finds that Missouri's proposed deletion does not render its program any less effective than the Federal program requirements and is approving the deletion.

32. Roads—Class 1—General

At 10 CSR 40–3.140(1)(A), Missouri proposes to add requirements for its class I roads to control " * * * or prevent erosion; siltation; the air pollution attendant to erosion, including road dust as well as dust occurring on other exposed Class I road surfaces, by measures such as vegetating, watering, using chemical or other dust suppressants, or otherwise stabilizing all exposed Class I road surfaces in accordance with current, prudent engineering practices; and water pollution and damage to public or private property." The Federal regulations at 30 CFR 816.150(b)(1) provide for the same requirements with one exception. The Federal regulations require control and prevention of air pollution attendant to erosion from not only road dust but from dust occurring on all exposed surfaces. The proposed State rule requires control only on exposed road surfaces for Class I roads and is therefore more limiting and may not include all other surfaces exposed in connection with construction, use, reconstruction, maintenance, or reclamation of the road.

The Director finds the proposed State regulation is no less effective than the Federal regulations with the exception that it limits "dust control" to only "exposed road surfaces." The Director is approving Missouri's proposed rule but is requiring the State to further amend its rule to require that dust control include "other exposed surfaces."

33. Covering Coal and Acid- and Toxic-Forming Materials

At 10 CSR 40–3.260(3)(A)1, the State proposes to require that "[e]xposed coal seams, acid- and toxic-forming materials and combustible materials exposed, used, or produced during mining shall be adequately covered with nontoxic and noncombustible material, or treated, to control the impact on surface and ground water in accordance with 10 CSR 40–3.040, to prevent sustained combustion and to minimize adverse effects on plant growth and the approved post-mining land use." The counterpart Federal regulation at 30 CFR 817.71(e)(5) provides for substantively similar requirements. It is noted however, that the State has incorrectly cited its own surface mining regulations. The citation given as 10 CSR 40–3.040 should be 10 CSR 40–3.200 in order to apply to the underground mining requirements for protection of the hydrologic balance.

The Director finds that the incorrect cross-reference does not render the proposed rule less effective than the Federal regulations and is approving it. However, with this rule notice, the Director is notifying Missouri of the reference error at 10 CSR 40–3.260(3)(A)1 and the need to correct the citation error from 10 CSR 40–3.040 to 10 CSR 40–3.200.

34. Prime Farmland Reference Crop Selection

At 10 CSR 40–4.030(7)(B)6, Missouri proposes to delete existing language that addresses prime farmland crop reference selection and replace it with:

> The reference crop on which restoration of soil productivity is proven shall be selected from the crops most commonly produced on the surrounding prime farmland. Where row

crops are the dominant crops grown on prime farmland in the area, the row crop requiring the greatest rooting depth shall be chosen as one of the reference crops for one of the (3) three years. If hay is the most commonly grown crop, then the second most commonly grown crop will be used. In the other two (2) years, other commonly grown crops on prime farmland within the county will be used."

The counterpart Federal regulations at 30 CFR 823.15(b) (3) and (6) provide for the same general requirements. However, the Federal regulations do not require substitution of the second most commonly grown crop for hay. Nor do the Federal regulations provide that the crop with the greatest rooting depth need only be used for 1 year of the 3 year productivity test. The May 12, 1983, preamble to the Federal regulations on prime farmland (48 FR 21446, 21459 and 21460) clarified that the use of hay crops in rotation with row crops could be used for proving soil productivity and therefore more than one reference row crop or hay crop could be used for the 3 year proof period. Based on the above, the Director finds that Missouri's proposed revision of its rule is no less effective than the Federal regulation requirements and is approving the proposed change.

35. Definition of "Valid Existing Rights"

At 10 CSR 40–5.010(1)(A), Missouri proposes to modify its definition of "valid existing rights" (VER). At subsection (1)(A)1, the definition now reads

(A) [VER] means—
1. Except for haul roads,
A. Those property rights in existence on August 3, 1977, that were created by a legally binding conveyance, lease, deed, contract, or other document which authorizes the applicant to produce coal by a surface coal mining operation; and
B. The person proposing to conduct surface coal mining on such lands either—
(I) Had been validly issued on or before August 3, 1977, all state and federal permits necessary to conduct such operations on those lands; or * * *.

At subsection (1)(A)1.A., the State proposes to delete the phrase "which authorizes the applicant to produce coal by a surface coal mining operation" and in its place add "legally binding under Missouri statutes and Missouri case law entitling one to mine coal in this state."

Additionally, at subsection (1)(A)1.B.(I), Missouri proposes to revise the provision to read:

On or before August 3, 1977, had been validly issued or made a good faith effort to obtain all state and federal permits necessary to conduct such operations on those lands; or * * *.

OSM first defined VER in its original promulgation of permanent program regulations on March 13, 1979. See 44 FR 14991–14996, 15342. The existing Missouri definition for VER is virtually identical to OSM's original definition for the term. OSM's original definition for VER was judicially challenged and was subsequently remanded by the United States District Court for the District of Columbia. See In Re: Permanent Surface Mining Regulation Litigation, 14 ERC 1083, 1090–1092 (D.D.C. 1980). The court indicated that "a good faith attempt to obtain all permits before the August 3, 1977, cut-off date should suffice for meeting the all permits test." *Id.* at 1091. To comply with the court's 1980 opinion, OSM suspended the definition of VER only insofar as it required all permits to have been obtained prior to August 3, 1977, in order to establish VER (45 FR 51547, 51548, August 4, 1980). The 1980 suspension notice stated that, pending further rulemaking, OSM would interpret the regulation as including the court's suggestion that a good faith effort to obtain all permits would establish VER.

Thereafter, on September 14, 1983, OSM promulgated a new definition for VER, which relied upon a general "takings" standard (48 FR 41312). The 1983 VER definition, however, was also remanded by the United States District Court for the District of Columbia. See In Re: Permanent Surface Mining Regulation Litigation, 22 ERC 1557 (D.D.C. 1985). The court found that the promulgation of the 1983 VER definition violated requirements of the Administrative Procedure Act, 5 U.S.C. 553–706, and remanded the definition to the Secretary for proper notice and comment. *Id.* at 1564.

On July 18, 1991, OSM published notice of a proposed rulemaking to define VER (56 FR 33152). To date, however, OSM has not promulgated a new VER definition. Thus, in order to make a determination of whether the proposed Missouri definition of VER is legally sufficient, OSM must compare the proposed Missouri definition with SMCRA's provisions for VER. Section 522(e) of SMCRA prohibits or limits surface coal mining operations on or near certain private, Federal and other public lands, subject to VER and except for those operations which existed on August 3, 1977. SMCRA does not define "VER," but the legislative history indicates that the VER provision was included to avoid takings of property without just compensation in violation of the Fifth Amendment of the United States Constitution. As outlined above, OSM has promulgated two different definitions for VER, neither of which survived judicial challenge.

Missouri's proposed definition is very similar to OSM's 1979 definition, as modified by the United States District Court for the District of Columbia. That is, under the Missouri definition, as revised, VER is determined, not upon a general "takings" test, but upon a more mechanical test which considers whether the applicant had property rights in existence on August 3, 1977, and additionally, considers whether the applicant had obtained all permits necessary to conduct surface coal mining operations on the lands. The proposed Missouri definition, as revised, allows an applicant to meet the "all permits" test if the applicant had made a good faith effort to obtain all necessary permits prior to August 3, 1977. Thus, the proposed Missouri definition is consistent with the 1980 court opinion. Accordingly, the Director finds that the proposed Missouri definition is not inconsistent with SMCRA, as interpreted by the United States District Court for the District of Columbia. The Director is approving the proposed definition of VER. Once OSM finally promulgates a new VER definition, if necessary, it will notify Missouri of any required amendments to the Missouri program in accordance with 30 CFR part 732.

36. Definition of "Public Road" for Areas Unsuitable for Mining

At 10 CSR 40–5.010(1)(J), Missouri proposes to define a public road to mean "any thoroughfare open to the public which has been, and is being used by the public for vehicular travel; which has been designated as a public road pursuant to the laws of the jurisdiction in which it is located; which is maintained with public funds in a manner similar to other public roads of the same classification within the jurisdiction and which meets road construction standards for other public roads of the same classification in the local jurisdiction."

Missouri's definition of a public road is similar to the Federal definition at 30 CFR 761.5 with one exception. The Federal definition additionally contains the provision "for which there is substantial (more than incidental) public use." Missouri's lack of this requirement will result in the potential for more roads being designated as public roads than might have been under the Federal definition.

The Federal regulation at 30 CFR 730.11(b) provides that any State law or regulation that allows for more stringent land use and environmental controls shall not be construed to be inconsistent with SMCRA. Therefore, the Director

finds that Missouri's proposed amendment is not inconsistent with the Federal program and is approving Missouri's proposed change.

37. Identification of Interests: Violation Information Format

At 10 CSR 40–6.030(1)(I) and 40–6.100(1)(I), Missouri proposes to require that ownership and control and violation information be submitted in a format prescribed by the director of the Missouri Land Reclamation Commission. The Federal regulation at 30 CFR 778.13(j) require that a permit applicant submit the information in a format prescribed by OSM. As discussed in the preamble (54 FR 8982, 8985, March 2, 1989), a format prescribed by OSM is necessary to insure data accuracy and consistency on a nationwide basis, for OSM's "Applicant Violator System." The Director finds that the proposed State rule at 10 CSR 40–6.030(1)(I) and 6.100(1)(I) would allow a State format that is less effective than the Federal requirements and is not approving the proposed regulation. Missouri is required to amend its program to be no less effective than Federal requirements.

38. Compliance Information

At 10 CSR 40–6.030(2)(C) and 6.100(2)(C), Missouri requires an operator to list violations of any law, rule of the United States or of any State law, rule enacted pursuant to Federal law, rule, or any provision of the act pertaining to air or water environmental protection.

The counterpart Federal regulation at 30 CFR 778.14(c), requires a similar listing of violations with one exception. The Federal regulations include any violation of SMCRA, regardless of whether the violation pertains to air or water environmental protection. Missouri retains the phrase "or of any provision of the act" immediately before the phrase "pertaining to air or water environmental protection" (see emphasis above). At 10 CSR 40–8.010(1)(A)3, Missouri defines "Act" to mean SMCRA. The Director notes that the term Act, as used in 30 CFR 778.14(c) and section 510(c) of SMCRA includes SMCRA, its implementing Federal regulations, and all State and Federal programs approved under SMCRA. See 48 FR 44389, September 28, 1983. Thus, the Director interprets Missouri's use of the term Act at proposed 10 CSR 40–6.030(2)(C) and 6.100(2)(C) to have the same meaning. Missouri's proposed rule appears to limit any violation of SMCRA to those pertaining to air or water quality environmental protection.

The Missouri regulation is more limiting than the Federal regulations with regard to violations that need to be listed and therefore, the Director is not approving it. Missouri is required to amend its regulation in a manner that is no less effective than the Federal regulation requirement.

39. Certification of Roads

At 10 CSR 40–6.050(17)(B) and 6.120(15)(B), Missouri proposes to require that Class I and II road plans and drawings be certified by a qualified registered professional engineer or a qualified registered professional land surveyor. The Federal regulations at 30 CFR 780.37(b) and 784.24(b) provide for the same general requirement. However, before the Director can approve certification by a land surveyor, Missouri must submit proof of the ability for a land surveyor to carry out such design activity under State law, 53 FR 45190, 45196 (November 8, 1988). The Director is approving Missouri's proposed rule as no less effective than the Federal requirements except for the provisions that allows land surveyors to also prepare and certify plans and drawings.

40. Prime Farmland

At 10 CSR 40–6.060(4)(E)5, Missouri proposes to add a requirement that "The aggregate total prime farmland acreage has not decreased from that which existed prior to mining." The Federal regulations at 30 CFR 785.17(e)(5) contains this same requirement, but additionally requires that "Water bodies, if any, to be constructed during mining and reclamation operations must be located within the postreclamation nonprime farmland portions of the permit area. The creation of any such water bodies must be approved by the regulatory authority and the consent of all affected property owners within the permit must be obtained."

At 10 CSR 40–4.030, the Missouri rule provides requirements for "Operations on Prime Farmland." Specifically, (4)(A) of that rule requires approval of water bodies by the Missouri Land Reclamation Commission and the consent of all affected property owners within the permit area. The rule also requires that the water bodies will not result in an aggregate loss of prime farmland. Therefore, the Missouri rules, in combination, are no less effective than requirements of the Federal regulation and the Director is approving the proposed change at 10 CSR 40–6.060(4)(E)5.

41. Definition of Irreparable Damage

At 10 CSR 40–6.070(1)(B), Missouri proposes to modify its definition of "irreparable damage to the environment." That term is now defined as "any damage to the environment that cannot be or has not been corrected by actions of the applicant." Missouri proposes to amend the definition by deleting the phrase "or has not been."

The Federal regulation definition of the same term at 30 CFR 701.5 does not contain the phrase "or has not been" and provides for essentially the same requirements with the exception that the Federal definition limits consideration of damage to the environment to damage that is in violation of the Act, the regulatory program, or this chapter. Since Missouri's definition does not limit the consideration of environmental damage to only those incidents that are in violation of their Act or regulatory program, the State is more inclusive in what it would consider needs to be addressed as a violation. The Director therefore finds that Missouri's definition is not inconsistent with and no less effective than the Federal requirement and is approving Missouri's proposed change.

42. Review of Violations in Permit Applications

At 10 CSR 40–6.070(7)(C) and (7)(C)2., Missouri proposes to add new requirements that address the counterpart Federal regulation requirements for the review of violations prior to issuing a permit at 30 CFR 773.15 (b)(1) and (b)(1)(ii). The language proposed by Missouri is substantively the same as the Federal language including its requirement at (7)(C) that states "[I]n the absence of a failure-to-abate cessation order, the regulatory authority may presume that a notice of violation issued pursuant to 10 CSR 40–8.030(7) or under a federal or state program has been or is being corrected to the satisfaction of the agency with jurisdiction over the violation, * * *" and at (7)(C)2. that states "* * * and is presently pursuing in good faith, a direct administrative or judicial appeal to contest the validity of the current violation." The presumption that a notice of violation is being abated was an issue in *National Wildlife Federation* v. *Lujan*, Civ. Nos. 88–3117, *et seq.* (consolidated, D.D.C. filed October 27, 1988). During that proceeding, the Secretary of the Interior expressed the intention to reconsider the issue of whether, in the absence of a failure-to-abate cessation order, the regulatory authority may presume that a notice of

violation has been or is being corrected, as set forth in the Federal regulation (Memorandum of Points and Authorities In Support of the Federal Defendants' Cross-Motion For Summary Judgment and In Opposition to Plaintiffs' Motions For Summary Judgment, pp. 89–90). The Director is approving Missouri' s proposed rule at 10 CSR 40–6.070(7)(C) and (7)(C)2., however, pending final resolution of the reconsideration currently being pursued by the Secretary regarding the Federal regulation at 30 CFR 773.15(b)(1), the Director defers action on that portion of Missouri's proposed regulation at 10 CSR 40–6.070(7)(C) that addresses the presumption discussed above.

43. Improvidently Issued Permits

At 10 CSR 40–6.070(11), (A) and (B), Missouri proposes to add regulations that address improvidently issued permits. The proposed requirements are substantively the same as the Federal regulation requirements at 30 CFR 773.20 and 773.21 with one exception. Missouri proposes to add a regulation at subsection (11) (A) 1 to require that "[w]here the director improvidently issued a surface coal mining and reclamation permit, he or she shall review the circumstances under which the permit was issued * * *" The Federal regulation at 30 CFR 773.20(a) requires the regulatory authority to review the circumstances under which a permit was issued whenever the regulatory authority "has reason to believe that it improvidently issued a surface coal mining and reclamation permit." The "reason to believe" standard does not require review of all permits on a regular basis but only a particular permit if there is reason to believe it was improvidently issued, as outlined in the April 28, 1989, **Federal Register** (54 FR 18437, 18439). The State must conduct the applicable review whenever it has "reason to believe," or it discovers, that a permit has been improvidently issued.

The Director finds that the proposed regulations at 10 CSR 40–6.070(11) (A) and (B), are no less effective than the Federal counterpart regulations at 30 CFR 773.20 and 773.21 and is approving the proposed changes. However, Missouri is required to further amend 10 CSR 40–6.070(11)(A) to incorporate the "reason to believe" standard as the triggering event which requires the regulatory authority to review the circumstances under which a permit was issued.

44. Fish and Wildlife Information—Underground Mining

At 10 CSR 40–6.110(11)(A) and 6.120(12)(A), Missouri proposes to add the requirements that fish and wildlife information and the enhancement plan will be consistent with the Endangered Species Act of 1973 as amended as well as the Missouri statute at RSMo section 444.855.2(17), that requires control or prevention of damage to fish and wildlife in access road locations, and the Missouri rule at 10 CSR 40–3.040(17), that addresses sedimentation pond postmining rehabilitation; and 10 CSR 40–3.100, that provides performance standards and enhancement for fish and wildlife.

The Federal regulation at 30 CFR 784.21(a) also requires that these same general considerations be afforded. However, the Federal regulation additionally requires identification of those species or habitats protected by similar State statutes. In this same rulemaking effort Missouri is proposing to add at 10 CSR 40–6.100(11)(E)1. (fish and wildlife resource information requirements), the requirement that "* * * site specific resources contain those species or habitats protected by Missouri as listed in the current publication of Rare and Endangered Species of Missouri * * *." Additionally, the fish and wildlife plan requirements at 10 CSR 40–6.120 (12)(C), references the need to consider information obtained per 10 CSR 40–6.110(11) as well as the Missouri Natural Features Inventory, therefore, appropriate consideration should be afforded to species or habitats protected by State statutes.

The Director finds that Missouri's proposed changes are no less effective than the Federal program requirements and is approving the proposed change. Also with this rule notice the Director is notifying Missouri of the apparent reference error to 10 CSR 40–3.040(17), that addresses sedimentation pond rehabilitation, while the correct reference would appear to be 10 CSR 40–3.040(18) that addresses stream buffer zone requirements.

45. Self-bond Financial Information

At 10 CSR 40–7.011(5)(D)2.C. (II) and (III) Missouri proposes to change its requirement of current assets to current liabilities ratio's for self-bond tangible net worth and fixed assets from "one to two (1:2 times)" to "1.2 times (1.2:1)" and greater. The Federal regulations at 30 CFR 800.23(b)(3) (ii) and (iii) requires the same identical ratio.

The Director is approving Missouri's proposed change as being no less effective than the Federal requirements. The change also satisfies, in part, a required program amendment placed on Missouri's program at 30 CFR 925.16(g)(16) in a May 8, 1991, rulemaking action (56 FR 21281). That required amendment will be modified to reflect the above change.

46. Self-bond Indemnity Agreements

At 10 CSR 40–7.011(5)(D)5. A., B., and C., Missouri proposes to add language to its self-bond indemnity agreement requirements. Specifically at (5)(D)5.A., the requirement that the indemnity agreement shall be executed by all persons and parties who are bound by it, including the "corporate guarantor," has been changed to read a "parent corporate guarantor." This language change makes the State rule at 10 CSR 40–7.011(5)(D)5.A. identical to the counterpart Federal regulation at 30 CFR 800.23(e)(1).

The same State rule subpart continues with the requirement that if the applicant is a partnership, joint venture, or syndicate the agreement shall bind such partner or party who has a beneficial interest directly or indirectly in the applicant. Missouri proposes to change the word such to the. Federal regulations at 30 CFR 800.23(e)(3) contains identical language except the word each partner or party is used instead of such or the.

At (5)(D)5.B. Missouri then requires that "corporations applying for a self-bond *or* corporations guaranteeing a permit's self-bond shall submit an indemnity agreement * * *" (emphasis added). Federal counterpart regulations at 800.23(e)(2) require that corporations applying for a self-bond *and* parent and nonparent corporations guaranteeing an applicants self-bond shall both submit an indemnity agreement. The combination of Missouri's proposed change at (5)(D)5.A. and existing rule at (5)(D)5.B., appear to provide a potential conflict in the State requirements as to who needs to submit an indemnity agreement. The State rules do not specifically insure corporations applying for a self-bond *and* parent and non-parent corporations guaranteeing an applicant's self-bond will both submit an indemnity agreement, as is required by the Federal regulations.

Missouri also proposes changes at (5)(D)5. B. and C. that would require an affidavit be submitted with the indemnity agreement attesting to its validity under applicable Federal and State laws; that the applicant, parent, or nonparent corporate guarantor be required to complete the approved reclamation plan or pay the regulatory

authority to complete the reclamation plan; and that the indemnity agreement shall operate as a judgment when under forfeiture.

The above added requirements to the Missouri program satisfy, in part, a required program amendment that was placed on the Missouri program at 30 CFR 925.16(g)(18) in a May 8, 1991, rulemaking action (56 FR 21299). The Director is approving the changes proposed by Missouri with the exception of, who is required to execute and submit an indemnity agreement, as discussed above. Missouri is required to amend its rule to provide for no less effective requirements than the Federal regulations at 30 CFR 800.23(e). The required program amendment at 30 CFR 925.16(g)(18) will be modified to reflect this decision.

47. Bond Requirements

At 10 CSR 40–7.011(5)(D)8, Missouri proposes to add the requirement that "immediate compliance with 10 CSR 40–3.150(4)" be taken when a cessation order is issued for failure to replace a self-bond in the event the criteria for self-bonding under the Missouri program are no longer satisfied due to a change in the financial conditions of the permittee or a third party guarantor. The State regulation at 10 CSR 40–3.150(4) requires that persons who cease operations reclaim all affected areas in accordance with the approved permit and plan.

The Federal regulations at 30 CFR 800.23(g) provide that if, at any time during the period when a self-bond is posted, the financial conditions of the applicant, parent or nonparent corporate guarantor change so that the criteria for self-bonding are no longer satisfied, the permittee must notify the regulatory authority immediately. In addition, the permittee must post an alternate form of bond in the same amount as the self-bond within 90 days. Finally, 30 CFR 800.23(g) provides that, if the permittee fails to post an alternate form of bond within 90 days, then the provisions of 30 CFR 800.16(e) shall apply. The Federal regulations at 30 CFR 800.16(e), in turn, require, among other things, that mining activities cease and that reclamation activities begin immediately, if an adequate replacement bond is not posted within 90 days.

The proposed State provision is substantively similar to the Federal provisions, with one exception. The Federal regulations at 30 CFR 800.16(e)(2) specifically provide that "[m]ining operations shall not resume until the regulatory authority has determined that an acceptable bond has been posted." The Director finds that Missouri's proposed change at 10 CSR 40–7.011(5)(D)8 is no less effective than the Federal regulation requirements since reclamation must begin immediately upon the issuance of a cessation order and is approving the proposed change. However, the Director is requiring Missouri to further amend 10 CSR 40–7.011(5)(D)8 to include the requirement that, once a cessation order has been issued under the regulations, mining operations shall not resume until the regulatory authority has determined that an acceptable bond has been posted.

48. Duration of Phase III Bond Liability

The State proposes at 10 CSR 40–7.021(1)(B)2 (previously subsection (1)(B)(3)), to require that the permittee may, on areas under Phase III liability or the 5 year responsibility period, use certain normal husbandry practices without causing the Phase III liability period or the 5 year responsibility period to be extended, if the permittee can demonstrate that: (1) Discontinuance of these measures after the liability period expires will not reduce the probability of permanent revegetation success; (2) the practices are normal husbandry practices within the region on unmined lands having land uses similar to the approved postmining land use of the area; and (3) the practices are necessary to prevent exploitation, destruction, or neglect of the resource and to maintain the prescribed level of use or productivity.

The State proposal goes on to specify certain practices that are deemed "normal husbandry practices." They include: application of pesticides; application of soil amendments equal to, or less than that recommended by the high management yield goals of the U.S. Soil Conservation Service, U.S.D.A.; subsoiling which occurs less than 2 feet below the surface and which does not remove the vegetation from the surface; burning; overseeding to maintain the approved composition of the stand; and tree planting and tree pruning. In addition, the State proposal provides that the repair of rill and gullies shall not cause the Phase III liability period to be extended when rill and gullies develop after the initiation of Phase III liability period and when the repair is restricted to the filling, grading and reseeding of the eroded portion of the area.

The Federal regulations at 30 CFR 816.116(c)(4) and 817.116(c)(4) provide that the regulatory authority may approve selective husbandry practices, excluding augmented seeding, fertilization, or irrigation, provided it obtains prior approval from the Director in accordance with 30 CFR 732.17. The preamble for these Federal regulations (53 FR 34636, 34641 (September 7, 1988) provides that OSM will consider, on a practice-by-practice basis, the administrative record supporting each practice proposed by the regulatory authority as normal husbandry practices.

In the present amendment, Missouri has specified certain practices that it considers to be normal husbandry practices, but has not provided any supporting evidence to substantiate the use of each practice on a "practice-by-practice" basis. The regulatory authority is expected to demonstrate: (1) That the practice is the usual or expected state, form, amount, or degree of management performed habitually or customarily to prevent exploitation, destruction, or neglect of the resource and maintain a prescribed level of use or productivity of similar unmined lands; and (2) that the proposed practice is not an augmentative practice prohibited by section 515(b)(20) of SMCRA (53 FR 34636, 34641, September 7, 1988). Missouri has not made the required demonstration with regard to any of the specific practices, including the repair of rills and gullies, proposed in this amendment as normal husbandry practices.

The Director finds the proposed rules to be less effective than the Federal program and is not approving them. Missouri is required to demonstrate that each practice proposed, including rill and gully repair, is a normal husbandry practice and obtain OSM's approval before it can allow such practice to occur without restarting the liability period.

49. Phase I Bond Release Qualification

At 10 CSR 40–7.021(2)(A), Missouri proposes to add the requirement that "drainage control" must be completed, along with backfilling and grading, topsoiling, and initial seeding of the disturbed area, for an area to qualify for Phase I bond release. The Federal regulations at 30 CFR 800.40(c)(1) also requires, among other things, that drainage control be in place prior to Phase I bond release. The Director is therefore approving the proposed change. In a May 8, 1991, rulemaking action (56 FR 21281, 21294), the Director deferred a decision regarding Missouri's lack of drainage control requirement for its Phase I bond release. The Director now finds that with the addition of the requirement for drainage control, Missouri has satisfied the concern expressed in that rulemaking action.

50. Criteria and Schedule for Release of Reclamation Liability

At 10 CSR 40–7.021(2)(B)1. Missouri proposes to delete the provision that would allow an alternative erosion control practice as approved by the State director. Missouri also proposes to add a requirement that no further augmentation of the vegetation is necessary before an area qualifies for release of Phase II liability. Thus, as amended, 10 CSR 40–7.021(2)(B)1 would provide as follows:

An area shall qualify for release of Phase II liability when—

1. A permanent vegetative cover sufficient to control erosion is in place and no further augmentation of the vegetation is necessary

* * *

The Federal regulations at 30 CFR 800.40(c)(2) do not allow for an alternative erosion control practice, instead they require that no bond shall be released so long as the lands to which the release would be applicable are contributing suspended solids to stream flow or runoff outside the permit area in excess of that required by the Act. Missouri's deletion of the alternative erosion control practice removes a discretionary provision not allowable under the Federal regulation.

Additionally the Federal regulations at 30 CFR 816.116(c)(1) and 817.116(c)[1] allow the period of extended responsibility for successful revegetation to begin after the last year of augmented seeding, fertilization, irrigation, or other work. This is the equivalent of the phase II bond release requirement. Therefore, the State's proposed language as a requirement for phase II bond release that "* * * no further augmentation of the vegetation is necessary," is not inconsistent with the Federal program requirements.

The Director is therefore approving the proposed deletion and added language changes to the Missouri regulation.

51. Termination of Jurisdiction

At 10 CSR 40–7.021(2)(B) 5 and 6, Missouri proposes to add new regulations that would provide when the State could terminate jurisdiction over a reclaimed site. The proposed language is substantively the same as the counterpart Federal regulation at 30 CFR 700.11(d).

The U.S. District Court for the District of Columbia found that the Federal regulations at 30 CFR 700.11(d) were contrary to sections 521 (a)(1) and (a)(2) of SMCRA (*National Wildlife Federation* v. *Lujan*, 31 ERC 2034 D.D.C. 1990). More specifically, the court interpreted sections 521 (a)(1) and (a)(2) as imposing an ongoing duty upon the Secretary of the Interior to correct violations of SMCRA. Accordingly, the court remanded the Federal regulations at 30 CFR 700.11(d) to the Secretary to be withdrawn or revised.

In response to the court's decision, OSM suspended the above Federal regulation on June 3, 1991 (56 FR 25086). This decision was appealed and the suspended rule was upheld by the U.S. Court of Appeals for the District of Columbia Circuit in *National Wildlife Federation* v. *Lujan*, 950 F.2d. 765 (D.C. Cir. 1991). The reinstatement of this rule was published in the Federal Register on April 10, 1992, and was effective on May 11, 1992 (57 FR 12461, 12463).

Missouri's rules proposed at 10 CSR 40–7.021(2)(B) 5. and 6. are substantively the same as the reinstated Federal rule. The Director therefore finds Missouri's proposed rules to be no less effective than the Federal rule at 30 CFR 700.11(d) and is approving them. However, Missouri has located this language under the phase II bond release requirements. The location of this proposed language leads to possible misinterpretation of the requirements for a phase II bond release and when termination of jurisdiction including written determinations are relevant. Therefore, the Director is requiring Missouri to relocate this language to an appropriate location in its regulations to clarify the intent of this language.

52. Bond Forfeiture

The proposed State rule at 10 CSR 40–7.031(3)(B), concerning bond forfeiture, contains requirements similar to the counterpart Federal regulations at 30 CFR 800.50(a)(2), with the exception that 30 CFR 800.50(a)(2)(ii) requires that, "except where the regulatory authority may approve partial release authorized under 30 CFR 800.40, no surety liability shall be released until successful completion of all reclamation under the terms of the permit including the applicable liability periods of 30 CFR 800.13."

The Director finds the proposed State rule to be no less effective than the Federal regulation and is approving the proposed changes. However, Missouri is required to further amend its regulation to provide for the requirements of 30 CFR 800.50(a)(2)(ii).

53. Definition "Prime Farmland"

At 10 CSR 40–8.010(1)(A)51.C. the State proposes to include the following definition of prime farmland as a category of land use: "Prime farmland means an area which has been historically used for crop production, as defined previously, and which has prime farmland soils as defined by the United States Department of Agriculture, Soil Conservation Service in 7 CFR part 657."

The State's definition is similar to the Federal definition of prime farmland at 30 CFR 701.5. At 10 CSR 40–8.010(1)(A)13. Missouri also defines "Historically used for cropland" in a manner similar to the Federal definition. The combination of the 2 definitions are no less effective than the Federal requirements. The Director is approving Missouri's proposed definition.

54. Definition of "Mine Plan Area"

At 10 CSR 40–8.010(1)(A)53. Missouri proposes to modify its definition of "mine plan area" to mean "the same as a permit area." In In re: Permanent Surface Mining Regulation Litigation, 14 ERC 1097, 1083, (D.D.C. 1980) the definition of "mine plan area" was remanded and use of the term suspended in the Federal regulations at parts 779, 780, 783, and 784. In a subsequent rulemaking action (August 4, 1980 (45 FR 51547, 51550)), OSM suspended the definition of the term "mine plan area" at 30 CFR 701.5 and clarified that the term "mine plan area" as used in parts 779, 780, 783, and 784 will be interpreted to mean "permit area." Although, the term mine plan area is no longer defined in the Federal regulations, the Director finds that Missouri's proposed definition is not inconsistent with the Federal program requirements and is approving the change.

55. Definition of "Dry Bulk Density"

At 10 CSR 40–8.010(1)(A)54., Missouri proposes to delete its definition of dry bulk density that is identical to the Federal regulation definition of "moist bulk density." The Federal regulations do not define dry bulk density and the moist bulk density term is no longer used in the Federal regulation. This term was used originally at 30 CFR 823.14(c), as a requirement to be met in soil replacement for prime farmland soils. In a May 12, 1983, rulemaking (48 FR 21446, 21457) the issue of soil compaction and use of bulk density for measurement of the soil compaction was discussed. It was concluded that the Soil Conservation Service (SCS) within each State will determine what constitutes proper compaction and whether or not bulk density will be the measure of soil density. In doing so, the term moist bulk density was removed from the regulations and instead, soil compaction and densities were used. The Federal definition of moist bulk density however, was retained in the Federal regulations at 30 CFR 701.5.

In view of the above, the Director finds that Missouri's deletion of the definition of dry bulk density at 10 CSR 40–8.010(1)(A)54. that is defined the same as the Federal term moist bulk density, does not render its program to be any less effective than the Federal program since moist bulk density is no longer specifically required in the prime farmland replacement criteria or anywhere else in the Federal regulations.

56. Definition of "Previously Mined Area"

At 10 CSR 40–8.010(1)(A)71, Missouri proposes to modify a previously proposed definition of previously mined area by deleting the phrase "surface coal mining law" and in its place adding "Act" so it now reads "land previously mined or disturbed to facilitate mining on which there were no surface coal mining operations subject to the standards of the Act."

The Federal regulations at 30 CFR 701.5 define previously mined areas in a similar manner. However, in the case of *National Wildlife Federation* v. *Lujan*, 733 F. Supp. 419 (D.D.C. 1990) the court remanded the definition of "previously mined area" to the Secretary as being inconsistent with SMCRA to the extent that it would (1) preclude the possibility that the date used to determine "previously" could be other than August 3, 1977; and (2) preclude the possibility that sites, once mined and fully reclaimed under State laws preceding SMCRA, could be subsequently remined and reclaimed to a lower standard. As discussed at length in a previous rulemaking action of this proposed rule (55 FR 45603, 45605, October 30, 1990), OSM has not suspended the definition. OSM may not, because of the court's remand, use the existing Federal definition in evaluating the sufficiency of Missouri's definition, but instead must base its evaluation upon consistency with the court's decision. As found before, the Director finds Missouri's proposed definition to be inconsistent with SMCRA as interpreted by the court, and is not approving it to the extent that it (1) provides or could be interpreted as providing that the reference date for "previously mined" is any date other than August 3, 1977, or (2) allow or could be interpreted as allowing lands which have once been fully and satisfactorily reclaimed to be remined and then only partially reclaimed.

The Director will pursuant to 30 CFR 732.17(d), notify Missouri of any regulatory changes needed for its rule at 10 CSR 40–8.010(1)(A)71. to make its program no less effective than the Federal program after OSM promulgates a new definition.

57. Inspection of Abandoned Sites

At 10 CSR 40–8.030(1) (F) and (G), Missouri proposes new regulations that would address inspection of abandoned mine sites. The counterpart Federal regulations are at 30 CFR 840.11 (g) and (h).

On August 30, 1990, in *National Wildlife Federation* v. *Lujan*, 31 ERC 2034, 21 ELR 20125 (D.D.C. 1990), the U.S. District Court for the District of Columbia found that the Federal regulations at 30 CFR 840.11 (g) and (h) conflict with the plain language of section 517(c) of SMCRA that provides for no exceptions to the requirement to conduct an average of one partial inspection per month and one complete inspection per calendar quarter for each surface coal mining and reclamation operation. Accordingly the court remanded the Federal regulations at 30 CFR 840.11 (g) and (h) to the Secretary to be withdrawn or revised.

In the June 3, 1991, **Federal Register** (56 FR 25036), OSM suspended the Federal regulations at 30 CFR 840.11 (g) and (h) to the extent that the definition of abandoned sites relate to inspection frequencies at those sites.

On December 10, 1991, the U.S. Court of Appeals upheld the district court's decision on frequency of inspections *National Wildlife Federation* v. *Lujan*, 950 F.2d. 765, 771 (D.C. Cir. 1991). In that action, the Secretary agreed that a minimum number of inspections was required by section 517(c) of SMCRA and expressed a desire to redefine "abandoned sites" to include only those sites where a permit has either expired or been revoked. No rulemaking action has been initiated on this desire.

Accordingly, OSM evaluated Missouri's proposed rules against the appropriate provisions of SMCRA as interpreted by the court. Based upon the court's finding that the Federal regulations at 30 CFR 840.11 (g) and (h) are inconsistent with section 517(c) of SMCRA, the Director finds that the Missouri's proposed rules at 10 CSR 40–8.030(1) (F) and (G), that are substantively identical to the Federal regulations, are less stringent than section 517(c) of SMCRA to the extent that they would limit required inspection frequency as discussed in the courts opinion above. Therefore the Director is not approving Missouri's proposed rule to the extent that they would afford an interpretation for providing less frequent inspections than required by section 517(c) of SMCRA. Missouri is required to remove its regulations at 10 CSR 40–8.030(1) (F) and (G) from its program.

58. Enforcement of Notices of Violation

Missouri proposes to revise its regulation at 10 CSR 40–8.030(7)(A), by specifically providing that the commission or the State director may modify, terminate, or vacate a notice of violation (NOV) for good cause and may extend the time for abatement of an NOV if the failure to abate within the time previously set was not caused by a lack of diligence.

The State proposal thus consists of two parts. First, the amendment specifically allows the commission or the State director to modify, terminate, or vacate an NOV "for good cause." The Federal regulations at 30 CFR 843.12 also allow for the modification, termination, or vacation of NOV's, but the Federal regulations set certain limitations upon the regulatory authority's discretion. For instance, with regard to the termination of NOV's, 30 CFR 843.12(e) requires an authorized representative of the Secretary to terminate an NOV by written notice to the permittee when the authorized representative determines that all violations listed in the NOV have been abated. Also, with regard to the vacation of NOV's, 30 CFR 843.18 provides, in part, that no cessation order or NOV may be vacated because of the inability to comply.

The Missouri program contains counterpart regulations to both 30 CFR 843.12(e) [10 CSR 40–8.030(7)(E)] and 30 CFR 843.18 [10 CSR 40–8.030(12)]. Thus, the State regulatory authority's discretion to modify, terminate, or vacate NOV's is subject to limitations similar to and no less effective than those of the Federal regulations.

The second part of the State proposal allows the commission or the State director to extend the time for abatement of an NOV if the failure to abate within the time previously set was not caused by a lack of diligence on the part of the person to whom it was issued. The Federal regulations at 30 CFR 843.12(c) allow an authorized representative of the Secretary to extend the time for abatement of an NOV under similar circumstances as those outlined in the State proposal. In addition, however, the Federal regulations, set specific limits on the availability and length of such extensions. The Missouri program provides for the same requirements and limitations at 10 CSR 40–8.030(7)(C). Therefore, to the extent the proposed regulation provides for allowing extensions of time to abate a NOV, it is duplicative of previously approved portions of the Missouri program.

However, the Director finds that the duplicative nature of this part of the proposal does not render the amendment less effective than the Federal regulations and is approving it. The Director notes that any extensions of time for abatement of an NOV granted by the commission or State director must comply with 10 CSR 40–8.030(7)(C).

The Director finds that the State's proposed rule at 10 CSR 8.030(7)(A) in combination with its other approved regulations is no less effective than the Federal requirements and is approving the proposed change.

59. Assessment of Separate Violations for Each Day

At 10 CSR 40–8.040(5)(B)3. the State proposes to limit the assessment of civil penalties by requiring that a penalty for the failure to abate a violation shall not be assessed for more than 30 days for each such violation. If the permittee has not abated the violation within the 30 day period, the commission or the State director shall take appropriate action pursuant to RSMo 444.870.5 and .6 and 444.885.1 (4) and (5), RSMo (Supp. 1986) within 30 days to ensure that abatement occurs or to ensure that there will not be a reoccurrence of the failure to abate.

The State's proposed revision is the same as the Federal counterpart regulation at 30 CFR 845.15(b)(2) except that the State has not correctly cited its statutes in relation to the corresponding provisions of SMCRA at section 521(a)(4) dealing with patterns of violation and unwarranted failure to comply and section 521(c) requesting the Attorney General to institute a civil action of relief. The comparable State citations should be 444.885.3 and 444.885.5, respectively.

The Director finds that the incorrect cross-references do not render the proposed State rule less effective than SMCRA and the Federal regulations and therefore, he is approving the proposed change. However, with this rule notice, the Director is notifying Missouri of the reference error at 10 CSR 40–3.260(3)(A)1, and the need to correct the citations of 444.885.1(4) to 444.885.3 and 444.885.1(5) to 444.885.5.

60. Procedures for Settlement Agreement Disapproval or Nonpayment

At 10 CSR 40–8.040(8)(K), the State proposes to require that if a settlement agreement is disapproved, or if the payment is not made within 30 days, the State director shall within 30 days refer the agreement to the Commission to enforce the agreement or rescind it and affirm, raise, lower, or vacate the penalty. The Federal regulations at 30 CFR 845.18(d)(2) provide that if full payment of the amount specified in the settlement agreement is not received by the office within 30 days after the date of signing, the Office may enforce or rescind the agreement and proceed according to paragraph (b)(3)(ii) within 30 days from the date of rescission. Pursuant to 30 CFR 845.18(b)(3)(ii), the conference officer is required to affirm, raise, lower, or vacate the penalty.

The proposed Missouri regulation differs from the Federal regulations in that the State would require the settlement agreement be sent back to the commission within 30 days if the commission did not approve the initial agreement, as well as if the settlement agreement were not paid. In addition, the State does not specify that the payment must be received within 30 days after the date the settlement agreement is signed, or that the act of the commission to affirm, raise, lower, or vacate the penalty must be within 30 days from the date of the rescission.

Missouri's process does afford that the same considerations are given regarding treatment of the settlement agreement and action if the payment is not received. The Director is, therefore, approving Missouri's proposed changes to its regulation at 10 CSR 40–8.040(8)(K) as being no less effective than the Federal regulation requirements at 30 CFR 845.18(d)(2). However, the Director is requiring Missouri to further amend their regulations to specify that the payment must be received within 30 days from the date the settlement agreement is signed and that the action of the commission to affirm, raise, lower, or vacate the penalty must be taken within 30 days from the date of rescission.

61. Exemption for Coal Extraction Incidental to the Extraction of Other Minerals

Missouri proposes new language at 10 CSR 8.070(2) regarding applicability and exemptions for extraction of coal incidental to the extraction of other minerals.

a. Reporting of Cumulative Production

At 10 CSR 40–8.070(2)(C)1.A.II, Missouri provides dates for required initiation of and continuance of annual reporting of cumulative production as follows:

(a) For mining areas where coal or other minerals were extracted prior to November 1, 1990, and every October 31 thereafter; or

(b) For mining areas where extraction of coal or other minerals commenced on or after November 1, 1990, the last day of the calendar quarter during which coal extraction commenced and each anniversary of that day thereafter:

The counterpart Federal regulations at 30 CFR 702.5(a)(2) require the dates of coal extraction prior to or after April 1, 1990, and every March 31, 1990, respectively. OSM recognizes that the effective dates for the above reporting requirements will vary from the Federal regulation dates depending upon when individual States receive approval of their rules. The Federal preamble (54 FR 52092, 52094, December 20, 1989), clarifies that the rules are not intended retroactively to bring under the Act activities that occurred prior to the effective date of this rule or the effective date of counterpart provisions of the State regulatory programs. Such activities would not qualify for an exemption under the standards of this rule even if they did qualify under previous standards. Such operations would legitimately have relied upon standards in place to qualify for the exemption.

Even though the proposed State rules were promulgated by Missouri on September 27, 1990, the Federal regulation at 30 CFR 732.17(g) provides that any changes to a State program are not enforceable by that State until approved by the Director. Therefore, the Director is not approving the initial and subsequent annual reporting dates proposed by Missouri at 10 CSR 40–8.070(2)(C)1.A.II and is requiring Missouri to amend its program to provide appropriate dates that provide reporting no earlier than the date this amendment is published in the **Federal Register** as a final rule.

b. Direct Enforcement

At 10 CSR 40–8.070(2)(C)9.F (I), (II), and (III), the State proposes to require: (1) In subsection (I), in part, that an operator shall not be cited for "violations of the commission" which occurred prior to the revocation of the exemption; (2) in subsection (II), in part, that an operator shall be subject to direct enforcement action for violations of the commission which occur during the period of such activities; and (3) in subsection (III), in part, that an operator shall comply with the reclamation standards of the commission with regard to conditions, areas, and activities existing at the time of revocation or denial.

The State's proposed regulations are similar to the Federal regulations at 30 CFR 702.17(d) (1), (2), and (3) with the exception that the Federal regulations also require that the operator be cited for violations of; subject to direct enforcement actions for violations of;

and comply with the reclamation standards of the regulatory program. Missouri would limit the above to their commission and thus not assure that all violations or reclamation standards of the Missouri program would be considered. The Director finds that to this extent the State's proposed rule is less effective than the Federal regulations, and is requiring Missouri to further amend its program to be no less effective than the Federal program requirements.

However, the Director is approving the remainder of Missouri's proposed rule at 10 CSR 8.070(2) with the following required editorial corrections. The first paragraph of 10 CSR 40–8.070(2)(C) refers to the "exemption contained in 444.815.6(3) * * *." the correct citation should read 444.815.6(*4*). At 10 CSR 40–8.070(2) (C)9.B Missouri has proposed language "this part or counterpart provisions of the state regulatory program." This part should be "this subsection" and the counterpart provisions should be "counter subsection provisions."

62. Provisions of the State Regulatory Program Affirmatively Disapproved to Comply With the Order of the District Court

In the **Federal Register** notice announcing the Department of the Interior's approval of Missouri's original program, the Secretary, at 30 CFR 925.10(b), affirmatively disapproved provisions of Missouri's program that, incorporated, suspended, or remanded Federal regulations (45 FR 77027, November 21, 1980). The affirmative disapprovals were based upon an order of the U.S. District Court for the District of Columbia that the Secretary "affirmatively disapprove * * * those segments of a State program that incorporate a suspended or remanded regulation" (In re: Permanent Surface Mining Regulation Litigation, 19 ERC 1477, 1500 (D.D.C. 1980).

On August 15, 1980, however, the court partly stayed its May 16, 1980, order and allowed the Secretary to approve State program provisions similar to remanded or suspended Federal regulations when the State adopted such provisions in a rulemaking or legislative proceeding that occurred before the enactment of SMCRA or after the date of the District Court decision (May 16, 1980), since such State rules clearly were not based solely upon the suspended or remanded Federal regulations. In addition, the court stated that the Secretary need not affirmatively disapprove provisions based upon suspended or remanded Federal regulations if a responsible State official requested the Secretary to approve them.

a. Affirmatively Disapproved Items in This Amendment

The Director finds the affirmatively disapproved items addressed in this proposed amendment, at 30 CFR 925.10(b) (1), (2), (3), (6), (8), (9), (11), (13), (14), (15), (16), (18), (19), (20), (24), (25), (28), (31), (32), and (33) are no longer necessary and he is removing them as follows:

(1) At 10 CSR 40–5.010(1)(A)1.B.(I), the definition of "valid existing rights," to the extent it does not allow recognition of such rights an operator may claim by having made a good faith effort to obtain all permits before 8/3/77 as stipulated by the courts decision (Refer to Finding number 35 of this rulemaking action).

(2) At 10 CSR 40–8.010(1)(A)47 (later recodified to (A)53.), the definition of "mine plan area," and the use of the term in Section 10 CSR 40–6.040 and 6.050 to the extent of the court's order regarding requirements of information outside the permit area (Refer to Finding number 54 of this rulemaking action).

(3) At 10 CSR 40–6.040(11) and 10 CSR 40–4.050(7), requiring a permit application to contain a study of fish and wildlife and to include a fish and wildlife reclamation plan (Refer to Finding number 2 of this rulemaking action).

(6) At 10 CSR 40–3.120(5), to the extent it requires an operator who proposes range or pasture as the postmining land use to actually use the land for grazing for the last 2 years of bond liability (Refer to Finding number 19 of this rulemaking action).

(8) At 10 CSR 40–3.120(6)(B), to the extent that it states that an operator's responsibility for successful revegetation is not commenced until the vegetation reaches 90-percent of the natural cover in the area (Refer to Findings number 19 through 31 of this rulemaking action).

(9) At 10 CSR 40–3.130 (3)(D) and (3)(I), to the extent it requires an operator to provide "letters of commitment" for proposed land use changes or for proposed cropland use (Refer to finding number 31 of this rulemaking action).

(11) At 10 CSR 40–3.040(2)(A) 1 and 7, to the extent they apply effluent standards to the reclamation phase of a surface coal mining operation (Refer to Finding number 5 of this rulemaking action).

(13) At 10 CSR 40–3.040(6)(B), concerning sediment storage volume in sediment ponds (Refer to Finding number 2 of this rulemaking action).

(14) At 10 CSR 40–3.040(6)(C), concerning detention time for water in sediment ponds (Refer to Finding number 7 of this rulemaking action).

(15) At 10 CSR 40–3.040(6)(D), to the extent it requires dewatering devices to have a discharge rate to achieve and maintain the theoretical detention time for sediment ponds (Refer to Finding number 8 of this rulemaking action).

(16) At 10 CSR 40–3.040(6)(H), concerning sediment removal from sediment ponds (Refer to Finding number 2 of this rulemaking action).

(18) At 10 CSR 40–3.080(3)(A), concerning coal processing waste banks, to the extent it precludes a possible exemption from the underdrain requirement where the operator can demonstrate that an alternative would ensure structural integrity of the waste bank and protection of water quality (Refer to Finding number 15 of this rulemaking action).

(19) At 10 CSR 40–3.090, concerning air resources protection, to the extent it applies to air pollution not caused by erosion (Refer to Finding number 18 of this rulemaking action).

(20) At 10 CSR 40–3.140(1)–(21), concerning performance standards for three classes of roads (Refer to Finding numbers 2 and 32 of this rulemaking action).

(24) At 10 CSR 40–3.130(2)(A), to the extent it does not allow restoration of lands to the conditions they were capable of supporting prior to any mining (Refer to Finding number 29 of this rulemaking action).

(25) At 10 CSR 40–5.101(2)(C) and 10 CSR 40–5.010(1)(F) [correct citation is 10 CSR 40–5.010(3)(F)1.], to the extent that they prohibit or restrict mining near places only eligible for listing on the National Register of Historic Places, and the words "or a statutory or regulatory responsibility for" in Section 10 CSR 40–5.010(1)(F) are disapproved. Both rules are disapproved to the extent that they apply to privately owned places listed on the National Register of Historic Places in addition to publicly owned places (Refer to Finding number 2 of this rulemaking action).

(28) At 10 CSR 40–3.110(3)(A)1, to the extent it does not provide operators the option of treating acid-forming and toxic-forming material in lieu of covering such materials (Refer to Finding number 2 of this rulemaking action).

(31) At 10 CSR 40–5.010(1)(J), the definition of "public road." (Refer to Finding number 36 of this rulemaking action).

(32) At 10 CSR 40–6.060(4)(A), concerning the prime farmland

grandfather clause (Refer to Finding number 2 of this rulemaking action).

(33) At 10 CSR 40–6.060(1)(B), to the extent that "or has not been" is no longer part of the definition of "irreparable damage to the environment." (Refer to Finding number 41 of this rulemaking action).

b. Affirmatively Disapproved Items in Previous Amendments

The Director also finds that Missouri has adequately addressed in previous submittals, the following affirmatively disapproved items at 30 CFR 925.10(b) (5), (7), (10), (12), (17), (22), (23), (26), (27), (29), (30), and (34) and that they are no longer necessary and he is removing them.

(5) At 10 CSR 40–7.040(4)(B), to the extent it allows the regulatory authority to forfeit and keep the entire amount of a bond where the entire amount is not needed to complete the reclamation.

Missouri addressed this issue in an Amendment submitted April 13, 1983 (Administrative Record No. 253) and approved by OSM on May 8, 1984 (49 FR 19468).

(7) At 10 CSR 40–4.030(1)(C), 10 CSR 40–4.030(5)(B), and 10 CSR 40–4.030(5)(C), to the extent they require an operator on prime farmland to actually return the land to crop production. (The requirement to grow crops was upheld, In re: Permanent Surface Mining Regulation Litigation, 21 ERC 1724, 15 ELR 20481 (D.D.C. October 1, 1984)

Missouri addressed this issue in an amendment submitted on December 14, and 18, 1987, and approved by OSM on October 31, 1988 (53 FR 43866).

(10) At 10 CSR 40–6.060(4)(B)3 and 10 CSR 40–4.030(4)(C), concerning excessive soil compaction.

Missouri addressed this issue in an amendment submitted on December 14, and 18, 1987, and approved by OSM on October 31, 1988 (53 FR 43866).

(12) At 10 CSR 40–3.040(2)(B) , relating to effluent standard exemptions during major storm periods.

Missouri addressed this issue in an amendment submitted on February 4, 1987, and approved by OSM on February 26, 1988 (53 FR 5766).

(17) At 10 CSR 40–3.050(4)(F), requiring special approval prior to blasting within 1,000 feet of certain buildings and 500 feet of other facilities and which restricts blasting at distances greater than 300 feet.

Missouri addressed this issue in an amendment submitted on June 22, 1987, and approved by OSM on June 16, 1988 (53 FR 22475).

(22) At 10 CSR 40–6.060(4)(A)8., to the extent that it requires prime farmland reclamation target yields to be based on estimated yields under a high level of management rather than a level of management equivalent to that used on prime farmlands in the surrounding area.

Missouri addressed this issue in an amendment submitted on December 14, and 18, 1987, and approved by OSM on October 31, 1988 (53 FR 43866).

(23) At 10 CSR 40–8.070(2) (E) 1A and 1B, relating to exemptions for existing structures to the extent that the exemptions are not mandatory after the appropriate findings are made.

Missouri addressed this issue in an amendment submitted on December 14, and 18, 1987, and approved by OSM on October 31, 1988 (53 FR 43866).

(26) At 10 CSR 40–7.020(2)(E)5.C., to the extent it requires cessation of operations upon the insolvency of a surety.

Missouri addressed this issue in an Amendment submitted on April 13, 1983, (Administrative Record No. 253,) and approved by OSM on May 8, 1984 (49 FR 19468).

(27) At 10 CSR 40–7.040(2)(C), to the extent that it limits bond liability to protection of the hydrologic balance.

Missouri addressed this issue in an Amendment submitted April 13, 1983, (Administrative Record No. 253,) and approved by OSM on May 8, 1984 (49 FR 19468).

(29) At 10 CSR 40–7.010(7)(D), to the extent that the exception the regulatory authority may grant might be from all of Section 216.

Missouri addressed this issue in an amendment submitted on December 14, and 18, 1987, and approved by OSM on October 31, 1988 (53 FR 43866).

(30) At 10 CSR 40–8.070(2)(B), concerning the 2-acre exemption, insofar as it applies to any operation by the person who affects or intends to affect more than 2-acres of physically unrelated sites within 1-year when the area affected at each site does not exceed 2-acres.

Missouri addressed this issue in an amendment submitted on December 14, and 18, 1987, and approved by OSM on October 31, 1988 (53 FR 43866).

(34) At 10 CSR 40–8.040, to the extent it imposes a civil penalty point system.

Missouri addressed this issue in an amendment submitted on June 22, 1987, and approved by OSM on June 16, 1988 (53 FR 22476).

c. Affirmatively Disapproved Items Remaining

The Director is removing all affirmatively disapproved items at 30 CFR 926.10(b) and as discussed above, except for item (b)(21). This item addresses the definition of "roads" that is used in Sections 10 CSR 40–3.140(1)–(21). Item 925.10(b)(21) will be recodified to item 925.10(b)(1) in this rulemaking action.

IV. Public and Agency Comments

1. Public Comments

OSM solicited public comment and provided opportunity for a public hearing on the proposed amendment. No public comments were received, and since no one requested an opportunity to testify at a public hearing, no hearing was held.

2. Agency Comments

Pursuant to Section 503(b) of SMCRA and 30 CFR 732.17(h)(11), comments were also solicited from various State and Federal agencies with an actual or potential interest in the Missouri program.

State Historic Preservation Officer (SHPO) and Advisory Council on Historic Preservation (ACHP) Comments

As required by 30 CFR 732.17(h)(4), OSM provided the proposed amendment to the SHPO and the ACHP for comment. The Missouri Division of Parks, Recreation, and Historic Preservation responded by stating that it had no objection to the proposed amendment (Administrative Record No. MO–523). No Comments were received from the ACHP.

Environmental Protection Agency (EPA) Concurrence

Under 30 CFR 732.17(h)(11), the Director is required to obtain the written concurrence of the Administrator of the EPA with respect to any provision of a State program amendment that relate to air or water quality standards promulgated under the authority of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or the Clean Air Act (42 U.S.C. 7401 *et seq.*). The EPA Region VII responded by stating that it had no comment to offer (Administrative Record No. MO–527).

The EPA office in Washington D.C. responded by separate letter dated July 29, 1991 (Administrative Record No. MO–540). In that letter EPA concurred that Missouri's proposed amendments can be implemented consistent with the Clean Water Act (CWA). However, EPA expressed its concern that Missouri's rules should not be interpreted so as to provide full authorization for instream treatment of point source discharge. EPA noted certain situations related to instream treatment that could result in conditions that would not assure compliance with applicable State water quality standards as required by the

CWA. By instream treatment, EPA referred to two activities. The first activity is one in which mine waste is discharged into waters of the United States for the primary purpose of waste disposal but with the effect of fill. The second activity involves instream waste treatment impoundments. These impoundments are built in waters of the United States for the purpose of creating a waste treatment system. Such impoundments may be used for the chemical treatment of mine waste water as well as solids settling. EPA's definition of "waters of the United States" at 40 CFR 122.2 includes not only perennial, but also intermittent and ephemeral streams. EPA noted that the creation of any impoundments or sediment ponds in waters of the United States does not in itself remove those waters from the definition of "waters of the United States" under the CWA. The CWA requires that all discharges or pollutants from point sources into waters of the United States obtain a permit as appropriate under either section 402 or 404 of the CWA. The Director acknowledges that nothing in SMCRA supercedes the requirements of the CWA. The Director's approval of Missouri's proposed rules should not be construed to authorize any actions inconsistent with the CWA.

No other State or Federal agencies offered any comments.

V. Director's Decision

Based on the above findings, the Director is approving the proposed Amendment submitted by Missouri on October 10, 1990, with the exception of those provisions found to be inconsistent with SMCRA or the Federal regulations and identified in the codified portion of this notice under 30 CFR 925.15(o).

The Director is not approving certain provisions of the Missouri amendment, as codified at 30 CFR 925.15(o), for reason set forth in findings: 20, concerning Phase III bond liability release guidelines; 21, concerning reference of the revegetation success policy/guidelines in its rules; 22, concerning the 70-percent ground cover density standard; 25, concerning pasture land use revegetation success standards; 37, concerning the required format for submitting ownership and control information; 38, concerning violations of SMCRA to be listed by an applicant; 39, concerning certification of roads by land surveyors; 46, concerning parties that are required to execute an indemnity agreement; 48, concerning normal husbandry practices; 56, concerning the definition of "previously mined area"; 57, concerning inspection of abandoned sites; and 61(a), concerning the effective dates for reporting of cumulative production reports. The Director is requiring Missouri to further amend its regulations as discussed in Findings: 6, concerning an engineer certification of design criteria set by the regulatory authority; 9, concerning sediment removal from sedimentation ponds; 10, concerning 2 year removal of sedimentation structures; 13, concerning dam and embankment certification report content; 18, concerning air quality performance standards; 19, concerning range land use; 32, concerning the control of air pollution for Class I roads; 43, concerning "reason to believe" for improvidently issued permits; 47, concerning resumption of mining operations after the issuance of a cessation order; 51, concerning termination of jurisdiction; 52, concerning the release of surety bond liability; 60, concerning settlement agreements; and 61(b), concerning direct enforcement of exempt operations. The Director is deferring action at finding 42, concerning the presumption regarding abatement of notices of violation.

The Federal regulations at 30 CFR part 925 codifying decisions concerning the Missouri program are amended to implement this decision. This final rule is being made effective immediately to expedite the State program amendment process and to encourage States to bring their programs into conformity with the Federal standards without undue delay. Consistency between State and Federal standards is required by SMCRA.

VI. Effects of the Director's Decision

Section 503 of SMCRA provides that a State may not exercise jurisdiction under SMCRA unless the State program is approved by the Secretary of the Interior. The Federal regulations at 30 CFR 732.17(a) require that any alteration of an approved State program must be submitted to the Director as a program amendment. The Federal regulations at 30 CFR 732.17(g) prohibit any unilateral changes to approved State programs. Thus, any changes to an approved program are not enforceable by the State until approved by the Director. In his oversight of the Missouri program, the Director will recognize only statutes, regulations, and other materials approved by him, together with any consistent implementing policies, directives, and other materials, and will require the enforcement by Missouri of only such provisions.

VII. Procedural Determinations

Compliance With Executive Order No. 12291

On July 12, 1984, the Office of Management and Budget (OMB) granted OSM an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions related to approval or conditional approval of State regulatory programs, actions, and program amendments. Accordingly, preparation of a Regulatory Impact Analysis is not necessary and OMB regulatory review is not required.

Compliance with Executive Order 12778

The Department of the Interior has conducted the reviews required by section 2 of Executive Order 12778 and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsection (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each such program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the requirements of 30 CFR parts 730, 731, and 732 have been met.

Compliance with the National Environmental Policy Act

No environmental impact statement is required for this rule since section 702(d) of SMCRA [30 U.S.C. 1292(d)] provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by the Office of Management and Budget under the Paperwork Reduction Act, 44 U.S.C. 3507 *et seq.*

Compliance with the Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal

which is the subject of this rule is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Hence, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

List of Subjects in 30 CFR Part 925

Intergovernmental relations, Surface mining, Underground mining.

Dated: August 21, 1992.

Raymond L. Lowrie,

Assistant Director, Western Support Center.

For the reasons set out in the preamble, title 30, chapter VII, subchapter T of the Code of Federal Regulations is amended as set forth below:

PART 925—MISSOURI

1. The authority citation for part 925 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

2. Section 925.10 is revised to read as follows:

§ 925.10 State program approval.

(a) The Missouri State program submitted on February 1, 1980, and as amended and clarified on May 14, 1980, was conditionally approved effective November 21, 1980. Copies of the approved program as amended are available for review at:

Missouri Department of Natural Resources, Land Reclamation Program, 205 Jefferson Street, P.O. Box 176, Jefferson City, Missouri 65102.

Office of Surface Mining, Kansas City Field Office, 934 Wyandotte Street, room 500, Kansas City, Missouri 64105.

(b) In accordance with the May 16, 1980, opinion of the U.S. District Court for the District of Columbia, the Secretary affirmatively disapproves the following provision contained in the Missouri program. The provision is affirmatively disapproved to the extent indicated.

(1) Section 10 CSR 40–8.010–75 the definition of "roads" that is used in sections 10 CSR 40–3.140(1)–(21).

3. Section 925.15 is amended by adding paragraph (p) to read as follows:

§ 925.15 Approval of regulatory program amendments.

* * * * *

(p) With the exceptions of 10 CSR 40–3.120(6)(B)2. A. through H. and 3.270(6)(B)2. A. through H., concerning the ability to enforce the Guidelines for Phase III liability release; 10 CSR 40–3.120(6)(B)2. A, D, G, and 3.270(6)(B)2. A, D, G, concerning the 70-percent ground cover density criteria; 10 CSR 40–3.120(6)(B)2.E and 3.270(6)(B)2.E, concerning the 90-percent vegetative ground cover for pasture land use; 10 CSR 40–6.030(1)(I) and 6.100(1)(I), concerning the format for submitting ownership and control information; 10 CSR 40–6.030(2)(C) and 6.100(2)(C), concerning the listing of violations under SMCRA by the applicant; 10 CSR 40–6.050(17)(B) and 6.120(15)(B), concerning certification by land surveyors; 10 CSR 40–7.021(1)(B)2, concerning extension of Phase III liability for normal husbandry practices and repair of rills and gullies; 10 CSR 40–8.010(1)(A)71., concerning the definition of "previously mined area;" 10 CSR 40–8.030(1) (F) and (G), concerning inspection of abandoned sites; 10 CSR 40–8.070(2)(C)1.A.II, concerning cumulative production reporting; Permanent program Phase III liability release guidelines; and deferral on a decision for Missouri's rule at 10 CSR 40–6.070 (7)(C) and (7)(C)2., concerning the presumption regarding abatement of notices of violation; the Director is approving the following provisions of the Missouri Code of State Regulations (CSR) as submitted to OSM on October 10, 1990, effective September 29, 1992: 10 CSR 40–3.010(5) and 3.170(5), signs and markers; 10 CSR 40–3.030(1)(C) and 3.190(1)(C), requirements for topsoil removal, storage, and redistribution; 10 CSR 40–3.040(2)(A)1. and 3.200(2)(A)1., requirement to meet total suspended solids; 10 CSR 40–3.040(4)(B)3 and 3.200(4)(B)3, certification of diversion designs; 10 CSR 40–3.040(6) (B), (C), (D), (H), (Q), (T), and 3.200(6) (B), (C), (D), (H), (Q), (T), sedimentation pond design standards; 10 CSR 40–3.040(10) (G), (I) and 3.200(10) (G), (I), certification of dams and embankments; 10 CSR 40–3.050(6)(C) and 3.210(6)(C) blasters certification identification number; 10 CSR 40–3.060(1) (A) , (H), and 3.220(1) (A), (H), disposal and covering excess spoil; 10 CSR 40–3.060(3)(A) and 3.230(3)(A), waste bank drainage systems; 10 CSR 40–3.060(8)(B), disposal of noncoal waste; 10 CSR 40–3.060(8)(D) and 3.230(8)(D), disposal of hazardous noncoal mine waste; 10 CSR 40–3.090 and 3.240, air quality performance standards; 10 CSR 40–3.110(3)(A)1. and 3.260(3)(A)1., covering coal seams, acid- and toxic-forming materials and combustible materials; 10 CSR 40–3.120(1) (D) and (E) and 3.270(1) (D) and (E), quick growing temporary cover and limited exception to cropland postmining land use; 10 CSR 40–3.120(5) and 3.270(5), concerning revegetation success standard for pasture land use; 10 CSR 40–3.120(6)(B)1 and 3.270(6)(B)1, general requirements for ground cover liability; 10 CSR 40–3.120(6)(B)2.(I) and 3.270(6)(B)2.(I), revegetation success standards for previously mined areas; 10 CSR 40–3.120(6)(B)2. A., D., and G. and 3.270(6)(B)2. A., D., and G., revegetation standards for woodland, wildlife habitat, and recreational land uses; 10 CSR 40–3.120(6)(B)2. and 3.270(6)(B)2.B., erosion control for industrial/commercial and residential land uses; 10 CSR 40–3.120(7) (C)2, (C)3.C, and 3.270(7) (C)2, (C)3.C, consultation by MDOC; 10 CSR 40–3.120(7)(C)3.A. and 3.270(7)(C)3.A., tree and shrub revegetation success for bond release; 10 CSR 40–3.120(8)(A)4 and 3.270(8)(A)4, removal of sedimentation ponds; 10 CSR 40–3.120(8)(A) 5, 6, 7, 8, 10 and 3.270(8)(A) 5, 6, 7, 8, 10, revegetation success; 10 CSR 40–3.130(2)(A) and 3.300(2)(A), previously mined land; 10 CSR 40–3.130(3)(C) and 3.300(3)(C), public facilities land use; 10 CSR 40–3.130(3)(I) and 3.300(3)(I), cropland land use; 10 CSR 40–3.140(1)(A) and 3.290(1)(A), dust control provisions for class I roads; 10 CSR 40–3.140 (1)(D)1, (8)(D)1 and 3.290 (1)(D)1, (8)(D)1, certification of class I and II roads; 10 CSR 40–4.140 (3)(D)9, (10)(D)9 and 3.290 (3)(D)9, (10)(D)9, static safety factor; 10 CSR 40–3.140 (6)(D), (13)(D), (20)(D), and 3.290 (6)(D), (13)(D), (20)(D), class I, II, and III road maintenance; 10 CSR 40–3.140 (8)(A), (15)(A) and 3.290 (8)(A), (15)(A), dust control for class II and III roads; 10 CSR 40–3.140 (13)(C), (20)(C) and 3.290 (13)(C), (20)(C), repair of road after catastrophic event; 10 CSR 40–3.250(1)(B), activity likely to jeopardize continuance of endangered or threatened species; 10 CSR 40–3.260(3)(A)1, covering coal and acid-toxic-forming materials of underground mining; 10 CSR 40–4.030(4)(A), creation of water bodies on prime farmland; 10 CSR 40–4.030(7)(B)6, prime farmland crop reference selection; 10 CSR 40–5.010(1)(A), definition of valid existing rights; 10 CSR 40–5.010(1)(J), definition of public road; 10 CSR 40–5.010(2)(C), requirements for areas where mining is prohibited or limited; 10 CSR 40–5.010(3)(F)1., public parks and historic places; 10 CSR 40–6.010(2)(E), definition of owned or controlled; 10 CSR 40–6.020 (2)(B)3, (3)(B)3, (5), exploration map, narrative, and commercial use of coal; 10 CSR 40–6.030(1) (A), (C), (D), (H) and

6.100(1) (A), (C), (D), (H), ownership and control information requirements; 10 CSR 40–6.030(2)(D) and 6.100(2)(D), update and correction of violations; 10 CSR 40–6.040(5)(A) and 6.110(5)(A), description of areal and structural geology; 10 CSR 40–6.040(11) (A), (E), (F) and 6.110(11) (A), (E) and (F), site specific resource information requirements, Endangered Species Act citation and U.S. Fish and Wildlife review opportunity; 10 CSR 40–6.050(7) (A), (B)1., (B)2., (C)1., (C)3. and 6.120(12) (A), (B)1., (C)1., (C)3., threatened and endangered species information requirements; 10 CSR 40–6.050(9)(C)5 and 6.120(5)(C)4, supplemental hydrology information requirements; 10 CSR 40–6.050(11)(C) and 6.120(7)(C), impoundment design compliance; 10 CSR 40–6.050(17)(A) 1 through 9 and (B) and 6.120(17)(A) 1 through 9 and (B), stream fords/crossings and schedule for removal and certification of class I, II, and III roads; 10 CSR 40–6.050(18) and 6.120(16), support facilities; 10 CSR 40–6.060(4)(A), definition of renewal, revision, and single continuous surface coal mining operation; 10 CSR 40–6.060(4)(E)5., water bodies in prime farmland; 10 CSR 40–6.070(1)(B), definition of irreparable damage; 10 CSR 40–6.070(7) (C), (C)2, (F), (G), (8)(I), ownership and control requirements; 10 CSR 40–6.070(8)(L), approval of a long term intensive agricultural land use; 10 CSR 40–6.070 (10)(B)1.A, (10)(E)2, permit approval or denial actions; 10 CSR 40–6.070(11) (A) and (B), improvidently issued permits; 10 CSR 40–6.070(13)(E), follow up information on Cessation Orders; 10 CSR 40–6.110(5) (A) and (B), underground mining information for geology; 10 CSR 40–7.011(3)(C), incremental bonding area size; 10 CSR 40–7.011(4)(E), full-cost bond amounts; 10 CSR 40–7.011(5)(D)2.C. (II) and (III) and (D)2.(I), self-bond financial ratio values and audits; 10 CSR 40–7.011(5)(D)5. A., B., and C., execution of indemnity agreements; 10 CSR 40–7.011(5)(D)8., failure to replace self-bond; 10 CSR 40–7.021(2)(A), Phase I bond release drainage control requirements; 10 CSR 40–7.021(2)(B)1., criteria for Phase II bond release; 10 CSR 40–7.021(2)(B) 5. and 6., termination of jurisdiction; 10 CSR 40–7.031(3)(B), reclamation compliance in surety forfeiture; 10 CSR 40–8.010(1)(A)4, 53, 51.B, C, D, I, J, and 54., definitions of adjacent area, pasture land, prime farmland, woodland, water, undeveloped land, dry bulk density; 10 CSR 40–8.030(6)(G), notification of owners and controllers of cessation orders; 10 CSR 40–8.030(7)(A), modify, terminate, or vacate a notice of violation; 10 CSR 40–8.040(5)(B)3., assessment of separate violation for each day; 10 CSR 40–8.040(8)(A), informal conference time frames; 10 CSR 40–8.040(8)(K), procedures settlement agreement nonpayment; and 10 CSR 40–8.070(2)(C), direct enforcement.

4. Section 925.16 is amended by removing and reserving paragraph (b)(1)–(3), (c), (e), (f)(2)–(5), (n), and (g)(17); revising paragraphs (f)(1), (g)(16), and (g)(18); and adding paragraph (p), to read as follows:

§ 925.16 Required program amendments.

* * * * *

(f)(1) By November 30, 1992 Missouri must revise 10 CSR 40–3.040(4) and 40–3.200(4), to require the certification of any design criteria set by the regulatory authority as required at 30 CFR 816.43(b)(4) and 817.43(b)(4).

* * * * *

(g) * * *

(16) By November 30, 1992 Missouri must revise 10 CSR 40–7.011(5)(D)2.C, to express the ratio of total liabilities to net worth as 2.5 times or less to be no less effective than the Federal regulations at 30 CFR 800.23(b)(3) (ii) and (iii).

* * * * *

(18) By November 30, 1992 Missouri must revise 10 CSR 40–7.011(5)(D)5.A., to add the requirement that the applicant and guarantor must each execute an indemnity agreement.

* * * * *

(p) By November 30, 1992, Missouri shall amend its program as follows:

(1) At 10 CSR 40–3.040(6)(H) and 3.200(6)(H), by requiring that sediment ponds shall be designed, constructed, and maintained to provide sediment removal in a manner no less effective than the Federal regulation requirements at 30 CFR 816.46(c)(iii)(F) and 817.46(c)(iii)(F).

(2) At 10 CSR 40–3.040(6)(U) and 3.200(6)(U) by requiring that siltation structures shall be maintained until removal is authorized by the regulatory authority and in no case shall be removed sooner than 2 years after the last augmented seeding to be no less effective than the Federal regulations at 30 CFR 816.45(b)(5) and 817.46(b)(5).

(3) At 10 CSR 40–3.040(10)(I) and 3.200(10)(I) to require a discussion of the appearance of instability, structural weakness, or other hazardous condition in the certification report for dam and embankments to be no less effective than the Federal regulations at 30 CFR 816.49(a)(10)(iii) and 817.49(a)(10)(iii).

(4) At 10 CSR 40–3.090 and 3.240 by providing performance standards that address air quality in a manner no less effective than the Federal regulations at 30 CFR 816.95(a) and 817.95(a).

(5) At 10 CSR 40–3.120(5) and 3.270(5), by removing or defining the term "range land."

(6) At 10 CSR 40–3.120(6)(B)2.A through H and 3.270(6)(B)2.A through H to remove the reference to Land Reclamation Commission's June 1990 Phase III Liability Release Guidelines.

(7) At 10 CSR 40–3.120(6)(B)2. A, D, G and 3.270(6)(B)2. A, D, G, by providing statistical proof that a vegetative ground cover of 70-percent will achieve the approved woodland, wildlife habitat, and recreational postmining land use or otherwise amend its program to be no less effective than the federal regulations at 30 CFR 16.116(b)(3)(iii) and 817.117(b)(3)(iii).

(8) At 10 CSR 40–3.120(6)(B)2.E and 3.270(6)(B)2.E, by including a requirement that ground cover on the revegetated area be equal to that of a reference area or other success standards approved by the regulatory authority and by providing statistical proof that a vegetative ground cover of 90-percent of 90-percent (81-percent) will in all cases achieve the approved postmining pasture land use, to make this regulation as effective as the Federal regulations at 816.116 (a) and (b) and 817.116 (a) and (b).

(9) At 10 CSR 40–3.140(1)(A), by requiring efforts to control and prevent air pollution attendant to erosion, to include road dust as well as dust occurring on other exposed surfaces to make this regulation no less effective than the Federal regulations at 30 CFR 816.150(b)(1).

(10) At 10 CSR 40–6.030(1)(I) and 6.100(1)(I), to require that a permit applicant submit information in a format prescribed by OSM to make this regulation no less effective than the Federal regulations at 30 CFR 778.13 and 778.14.

(11) At 10 CSR 40–6.030(2)(C) and 6.100(2)(C), to require any violation of SMCRA to be listed by the operator to make this regulation no less effective than the Federal regulation at 30 CFR 778.14(c).

(12) At 10 CSR 40–6.050(17)(B) and 6.120(15)(B), to provide proof that land surveyors are authorized in the State to prepare and certify plans and drawings for road design or delete the provision.

(13) At 10 CSR 40–6.070(11)(A), to require that when the regulatory authority, has reason to believe, that it improvidently issued a surface coal mining and reclamation permit, it shall conduct a review, to make this regulation no less effective than the Federal regulations at 30 CFR 773.20(a).

(14) At 10 CSR 40–7.011(5)D.8. to require that upon issuance of a cessation order, mining operations shall not resume until the regulatory authority has determined that an acceptable bond has been posted as required by the Federal regulations at 30 CFR 800.16(e)(2).

(15) At 10 CSR 40–7.021(1)(B)2. to establish an administrative record for each normal husbandry practice including repair of rills and gullies and submit these to the Director for approval prior to allowing such practices per the requirements of the Federal regulations as 30 CFR 816.116(c)(4) and 817.116(c)(4) or delete the provision.

(16) At 10 CSR 40–7.021(2)(B) 5 and 6 to relocate its requirement that addresses termination of jurisdiction to an appropriate location in its regulation.

(17) At 10 CSR 40–7.031(3)(B), to require that no surety liability be released until successful completion of all reclamation under the permit terms by including liability periods comparable to the Federal regulations at 30 CFR 800.13 to make its regulation no less effective than the Federal regulations at 30 CFR 800.50(a)(2)(ii).

(18) At 10 CSR 40–8.030(1) (F) and (G), to remove limitations regarding the required number of inspections of abandoned mine sites.

(19) At 10 CSR 40–8.040(8)(K) to require that payment of a settlement agreement must be received within 30 days from the date the agreement is signed and that commission action to affirm, raise, lower, or vacate the penalty must be taken within 30 days from the date of the rescission.

(20) At 10 CSR 40–8.070(2)(C)1.A.II. to provide appropriate dates for reporting of cumulative production that are no earlier than the date this amendment is published and per the Federal regulation requirements at 30 CFR 702.5(a)(2).

(21) At 10 CSR 40–8.070(2)(C)9.F. (I), (II), and (III), to require in Missouri's enforcement procedures that an operator be cited for violations of; subject to direct enforcement actions for violations of; and comply with the reclamation standards of the applicable reclamation program to make this regulation no less effective than the Federal regulations at 30 CFR 702(d) (1), (2), and (3).

[FR Doc. 92–23190 Filed 9–28–92; 8:45 am]
BILLING CODE 4310–05–M

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 520

Foreign Funds Control Regulations

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Final rule; amendments.

SUMMARY: This final rule amends the Foreign Funds Control Regulations (31 CFR part 520, the "FFCR") in recognition of the independence of the Baltic Republics of Estonia, Latvia, and Lithuania, and the diplomatic recognition of their new governments by the United States. The FFCR are amended to remove the World War II restrictions on property of private individuals, partnerships, associations, corporations, and other organizations which on December 7, 1945, were nationals of, or were located in, the Baltic Republics.

EFFECTIVE DATE: September 29, 1992.

FOR FURTHER INFORMATION CONTACT: Loren L. Dohm, Chief, Blocked Assets Division (tel.: 202/622–2440), or William B. Hoffman, Chief Counsel (tel.: 202/622–2410), Office of Foreign Assets Control, Department of the Treasury, Treasury Annex, Washington, DC 20220.

SUPPLEMENTARY INFORMATION: The FFCR were issued by the Secretary of the Treasury on April 10, 1940, to implement sanctions imposed by the President in Executive Order 8389 to protect the property within U.S. jurisdiction of persons in Nazi-occupied territory.

The property held in the name of persons located in or considered to be nationals of Estonia, Latvia, or Lithuania on December 7, 1945, remained blocked during the period of Soviet occupation. In light of the establishment of democratically-elected governments now controlling the territory of the Baltic Republics, their recognition by the United States, and their recognition as independent states by the Soviet Union, the protective blocking of these non-governmental assets is no longer necessary. This final rule amends the FFCR to terminate that blocking, effective September 29, 1992.

Because the FFCR involves a foreign affairs function, Executive Order 12291 and the provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, also does not apply.

List of Subjects in 31 CFR Part 520

Administrative practice and procedure, Banks, Blocking of assets, Currency, Estonia, Foreign investments in United States, Latvia, Lithuania, Reporting and recordkeeping requirements, and Securities.

For the reasons set forth in the preamble, 31 CFR part 520 is amended as follows:

PART 520—FOREIGN FUNDS CONTROL REGULATIONS

1. The authority citation for part 520 continues to read as follows:

Authority: 50 U.S.C. App. 5, as amended; E.O. 8389, 5 FR 1400, as amended by E.O. 8785, 6 FR 2897, E.O. 8832, 6 FR 3715, E.O. 8963, 6 FR 6348, E.O. 8998, 6 FR 6785, and E.O. 9193, 7 FR 5205, 3 CFR, 1938–1943 Comp., p. 1174; E.O. 10348, 17 FR 3769, 3 CFR, 1949–1953 Comp., p. 871; E.O. 11281, 31 FR 7215, 3 CFR, 1966–1970 Comp., p. 546.

Subpart B—General Licenses

2. Paragraph (a)(2) of § 520.101 is removed.

3. Paragraph (a)(3) of § 520.101 is redesignated as paragraph (a)(2), and revised to read as follows:

§ 520.101 General License No. 101.

(a) * * *

* * * * * * *

(2) Any other partnership, association, corporation, or other organization which was a national of any country designated in paragraph (a)(1) of this section by reason of the interest therein of any such country.

* * * * * * *

Dated: August 25, 1992.

R. Richard Newcomb,

Director, Office of Foreign Assets Control.

Approved: August 26, 1992.

Peter K. Nunez,

Assistant Secretary (Enforcement).

BILLING CODE 4810–25–M

DEPARTMENT OF DEFENSE

Department of the Air Force

32 CFR Part 361

Department of Defense Commercial Air Carrier Quality and Safety Review Program

AGENCY: Department of the Air Force, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Air Force revised its regulation on DOD quality and safety criteria for air carriers providing or seeking to provide airlift services to the DOD. The revision updates CARB membership by eliminating the appointment or designation of Commercial Airlift Review Board (CARB) members by position. This change permits the Commander, Air Mobility Command, and Commander, Military Traffic Management Command, to appoint three voting members from their respective commands without being limited by specific title or staff position. Reorganization in the Air Force resulted in the redesignation of the Military Airlift Command (MAC) to the Air Mobility Command (AMC) and changed CINCMAC to read Commander, AMC. The DOD Commercial Air Carrier Review Committee is changed to read DOD Commercial Airlift Review Committee to be consistent with other DOD groups in the oversight process, i.e., DOD Commercial Airlift Review Board, DOD Commercial Airlift Review Authority. The definition of temporary nonuse is clarified to be consistent with actual CARB practice.

This revision serves to notify the commercial aviation industry of Commercial Airlift Review Board changes and current practices resulting from DOD reorganization actions. The changes are necessary for the DOD Commercial Airlift Review Board to legally and effectively carry out its aviation safety responsibilities as specified in the National Defense Authorization Act for Fiscal Year 1987. This part is published in its entirety for clarity.

EFFECTIVE DATE: October 1, 1992.

FOR FURTHER INFORMATION CONTACT: Colonel Robert S. Wells, Jr., Director, DOD Air Carrier Survey and Analysis Directorate, DCS/ Operations and Transportation, Headquarters Air Mobility Command (HQ AMC/XOB), Scott AFB IL 62225–5001, telephone (618) 256–4801/4806.

SUPPLEMENTARY INFORMATION: This part is published as a final rule because it implements Public Law 99–661 (FY 87 National Defense Authorization Act, § 1204, Requirements Concerning Transportation of Members of the Armed Forces by Chartered Aircraft) and DOD Directive 4500.53 (Commercial Passenger Airlift Management and Quality Control). Additionally, and as part of the final rule determination, this part is related to public contracts and to provisions for agency management.

The Department of the Air Force has determined that this regulation is not a major rule as defined by Executive Order 12291, is not subject to the relevant provisions of the Regulatory Flexibility Act of 1980 (5 U.S.C. 601–611), does not contain reporting or recordkeeping requirements under the criteria of the Paperwork Reduction Act of 1980 (44 U.S.C. 35), and poses no negative environmental impact as defined in the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq*).

List of Subjects in 32 CFR Part 861

Air carriers, Aviation safety.

Therefore, 32 CFR is amended by revising part 861 to read as follows:

PART 861—DEPARTMENT OF DEFENSE COMMERCIAL AIR CARRIER QUALITY AND SAFETY REVIEW PROGRAM

Sec.

861.1 References.
861.2 Purpose.
861.3 DOD commercial air carrier quality and safety requirements.
861.4 DOD Commercial Airlift Review Board procedures.

Authority: 10 U.S.C. 8013; 10 U.S.C. 2640.

§ 861.1 References.

(a) Section 1204, Public Law 99–661; 10 U.S.C. 2640, Charter Air Transportation of Members of the Armed Forces.

(b) DOD Directive 4500.53, Commercial Passenger Airlift Management and Quality Control.

(c) AMCR 76–8, Contract Airlift Management, Civil Air Carriers.

(d) MTMCR 15–1, Procedure for Disqualifying and Placing Carriers in Nonuse.

§ 861.2 Purpose.

Department of Defense Directive 4500.53, Commercial Passenger Airlift Management and Quality Control, charges the Commander, Air Mobility Command (AMC), with establishing safety standards and criteria for commercial passenger airlift service used by the Department of Defense. It also charges the Commander, AMC, jointly with the Commander, Military Traffic Management Command (MTMC), with establishing the Commercial Airlift Review Board and providing policy guidance and direction for its operation. This part establishes Department of Defense (DOD) quality and safety criteria for commercial air carriers providing or seeking to provide airlift services to the DOD. Included are the operating procedures of the Commercial Airlift Review Board (CARB). The CARB has the authority to suspend air carriers from DOD use or take other action when issues of air safety arise.

§ 861.3 DOD commercial air carrier quality and safety requirements.

(a) DOD, as a customer of airlift services, expects an air carrier or operator soliciting for or doing business with the DOD to engage in quality programs and business practices that not only ensure good service but enhance the safety, operational, and maintenance standards established by the applicable Civil Aviation Agency Regulations (CARs). Accordingly, and as required by U.S. Public Law 99–661, the DOD has established a set of air carrier quality and safety requirements that reflect the type programs and practices the DOD seeks from air carriers or operators airlifting DOD resources.

(b) A DOD survey team will use the following requirements, the specifics of the applicable DOD contract or agreement, the CARs, and the experienced judgment of DOD personnel to evaluate an air carrier's capability to perform for the DOD. The survey will also include, with the carrier's coordination, observation of cockpit crew performance, as well as ramp inspections of selected company aircraft. A satisfactory on-site survey (audit) conducted by DOD personnel is prerequisite to participation in the DOD air transportation program. Surveys are conducted prior to an air carrier's acceptance into the program; thereafter, surveys will be completed on a biennial basis and when otherwise required to validate adherence to DOD quality and safety requirements. DOD personnel will also assess these quality and safety requirements when conducting periodic commercial air carrier table-top performance evaluations.

(c) The size of an air carrier, along with the type and scope of operations, will be considered during the on-site survey. For example, while an air taxi/ FAA Part 135 air carrier may not have a formal flight control function, such as a 24-hour dispatch organization, that same air taxi is expected to demonstrate some kind of effective flight following capability. On the other hand, a major carrier/FAA Part 121 air carrier is expected to have a formal flight control or dispatch function. Both, however, will be evaluated based on the effectiveness and quality of whatever flight following function they do maintain.

(d) The air carrier requirements stated in this part provide the criteria against which would-be DOD air carrier contractors may be subjectively evaluated by the DOD. These requirements are neither all-inclusive nor are they inflexible in nature. They are not replacements for the certification criteria and other

regulations established by civil aviation agencies; rather, these requirements are customer-developed and describe enhanced air carrier activities sought by the DOD.

Note: The term "Civil Aviation Agency (CAA)" is used throughout this part since these requirements are applicable to U.S. and international air carriers doing business with DOD. CAA includes the United States Federal Aviation Administration.

(1) Quality and safety requirements—prior experience. U.S. certified air carriers or operators applying to conduct business for the United States Department of Defense are required to possess 12 months of continuous service equivalent to the service sought by DOD. If the air carrier or operator is applying to airlift passengers on domestic U.S. routes, then the air carrier or operator must have conducted passenger service equivalent to what the DOD is seeking for the 12 continuous months immediately prior to applying for DOD business. In order to provide international passenger airlift for DOD, the same criteria applies. The air carrier must have conducted international passenger operations comparable to the service DOD is seeking for the 12 continuous months immediately prior to applying for business with the Department of Defense. Prior experience must be equivalent in difficulty and complexity in regard to distance, weather systems, international or national procedures, similar aircraft, schedule demands, aircrew experience, and management required.

(2) Quality and safety requirements—air carrier management. Management has clearly defined safety as the number one company priority, and safety is never sacrificed to satisfy passenger concern, convenience, or cost. Policies, procedures, and goals that enhance the CAA's minimum operations and maintenance standards have been established and implemented. A cooperative response to CAA inspections, critiques, or comments is demonstrated. Proper support infrastructure, including facilities, equipment, parts, and qualified personnel, is provided at the certificate holder's primary facility and en route stations. Personnel with aviation credentials and experience fill key management positions. An internal quality audit program or other method capable of identifying in-house deficiencies and measuring the company's compliance with their stated policies and standards has been implemented. Audit results are analyzed in order to determine the cause, not just the symptom, of any deficiency. The result of sound fiscal policy is evident throughout the company.

(3) Quality and safety requirements—operations:

(i) Flight safety. Establish policies that promote flight safety. These policies are infused among all aircrew and operational personnel who translate the policies into practice. New or revised safety-related data are promptly disseminated to affected personnel who understand that deviation from any established safety policy is unacceptable. An audit system that detects unsafe practices is in place and a feedback structure informs management of safety policy results including possible safety problems. Management ensures that corrective actions resolve every unsafe condition.

(ii) Flight operations. Established flight operations policies and procedures are up-to-date, reflect the current scope of operations, and are clearly defined to aviation department employees. These adhered-to procedures are further supported by a flow of current, management-generated safety and operational communications. Managers are in touch with mission requirements, supervise crew selection, and ensure the risk associated with all flight operations is reduced to the lowest acceptable level. Flight crews are free from undue management pressure and are comfortable with exercising their professional judgment during flight activities, even if such actions do not support the flight schedule. Effective lines of communication permit feedback from line crews to operations managers. Personnel records are maintained and reflect such data as experience, qualifications, and medical status.

(iii) Flight crew hiring. Established procedures ensure that applicants are carefully screened, including a review of the individual's health and suitability to perform flight crew duties. Consideration is given to the applicant's total aviation background, appropriate experience, and the individual's potential to perform safely. Freedom from alcohol abuse and illegal drugs is required. If new-hire cockpit crewmembers do not meet industry standards for experience and qualification, then increased training and management attention to properly qualify these personnel are required.

(iv) Aircrew training. Training, including recurrent training, that develops and refines skills designed to eliminate mishaps and improve safety is essential to a quality operation. Crew coordination training that facilitates full cockpit crews training and interacting together using standardized procedures and including the principles of Cockpit Resource Management (CRM) is required. Programs involving the use of simulators or other devices that can provide realistic training scenarios are desired. Captain and first officer training objectives cultivate similar levels of proficiency. Appropriate emergency procedures training (e.g., evacuation procedures) is provided to flight deck and flight attendant personnel as a total crew whenever possible; such training focuses on cockpit and cabin crews functioning as a coordinated team during emergencies Crew training—be it pilot, engineer, or flight attendant—is appropriate to the level of risk and circumstances anticipated for the trainee. Training programs have the flexibility to incorporate and resolve recurring problem areas associated with day-to-day flight operations. Trainers are highly skilled in both subject matter and training techniques. Training received is documented, and that documentation is maintained in a current status.

(v) Captain upgrade training. A selection and training process that considers proven experience, decision making, cockpit resource management, and response to unusual situations, including stress and pressure, is required. Also important is emphasis on captain responsibility and authority.

(vi) Aircrew scheduling. A closely monitored system that evaluates operational risks, experience levels of crewmembers, and ensures the proper pairing of aircrews on all flights is required. New captains are scheduled with highly experienced first officers, and new or low-time first officers are scheduled with experienced captains. Except for aircraft new to the company, captains and first officers assigned to DOD charter passenger missions possess at least 250 hours combined experience in the type aircraft being operated. The scheduling system involves an established flight duty time program for aircrews, including flight attendants, carefully managed so as to ensure proper crew rest and considers quality-of-life factors. Attention is given to the stress on aircrews during strikes, mergers, or periods of labor-management difficulties.

(vii) In-flight performance. Aircrews, including flight attendants, are fit for flight duties and trained to handle normal, abnormal, and emergency situations. They demonstrate crew discipline and a knowledge of aviation rules; use company-developed standardized procedures; adhere to checklists; and emphasize safety, including security considerations,

throughout all preflight, in-flight, and postflight operations. Qualified company personnel evaluate aircrews and analyze results; known performance deficiencies are eliminated. Evaluations ensure aircrews demonstrate aircraft proficiency in accordance with company established standards. Flight crews are able to determine an aircraft's maintenance condition prior to flight and use standardized methods to accurately report aircraft deficiencies to the maintenance activity.

(viii) Operational control/support. Effective mission control includes communications with aircrews and the capability to respond to irregularities or difficulties. Clear written procedures for mission preparation and flight following aircraft and aircrews are provided. There is access to weather, flight planning, and aircraft maintenance data. There are personnel available who are knowledgeable in aircraft performance and mission requirements and that can correctly respond to emergency situations. There is close interface between operations and maintenance, ensuring a mutual awareness of aircraft operational and maintenance status. Procedures to notify DOD in case of an accident or serious incident have been established. Flight crews involved in such accidents or incidents report the situation to company personnel who, in turn, have procedures to evaluate the flight crew's capability to continue the mission. Aircraft involved in accidents or incidents are inspected in accordance with Civil Aviation Regulations and a determination made as to whether or not the aircraft is safe from continued operations.

(ix) DOD charter procedures. Detailed procedures addressing military charter requirements are expected. The level of risk associated with DOD charter missions does not exceed the risk inherent in the carrier's non-DOD daily flight operations. Complete route planning and airport analyses are accomplished, and actual passenger and cargo weights are used in computing aircraft weight and balance.

(4) Quality and safety requirements—maintenance. Maintenance supervisors ensure all personnel understand that in spite of scheduling pressure, peer pressure, supervisory pressure, or other factors, the airplane must be airworthy prior to flight. Passenger and employee safety is a paramount management concern. Quality, completeness, and integrity of work are trademarks of the maintenance manager and maintenance department. Nonconformance to established maintenance practices is not tolerated. Management ensures that contracted maintenance, including repair and overhaul facilities, is performed by maintenance organizations acceptable to the CAA.

(i) Maintenance personnel. Air carriers are expected to hire and train the number of employees required to safely maintain the company aircraft and support the scope of the maintenance operation both at home station (the company's primary facility) and at en route locations. These personnel ensure that all maintenance tasks, including required inspections and airworthiness directives, are performed; that maintenance actions are properly documented; and that the discrepancies identified between inspections are corrected. Mechanics are fit for duty, properly certificated, the company verifies certification, and these personnel possess the knowledge and the necessary aircraft-specific experience to accomplish the maintenance tasks. Noncertified and inexperienced personnel receive proper supervision. Freedom from alcohol abuse and illegal drugs is required.

(ii) Quality assurance (continuing analysis and surveillance program). A system that continuously analyzes the performance and effectiveness of maintenance activities and maintenance inspection programs is required. This system evaluates such functions as reliability reports, audits, component tear-down reports, inspection procedures and results, tool calibration program, real-time aircraft maintenance actions, warranty programs, and other maintenance functions. The extent of this program is directly related to the air carrier's size and scope of operation. The cause of any recurring discrepancy or negative trend is researched and eliminated. Action is taken to prevent recurrence to these discrepancies and preventive actions are monitored to ensure effectiveness. The results of preventive actions are provided to appropriate maintenance technicians.

(iii) Maintenance inspection activity. A process to ensure required aircraft inspections are completed and the results properly documented is required. Also required is a system to evaluate contract vendors, suppliers, and their products. Inspection personnel are identified, trained (initial and recurrent), and provided guidance regarding inspector responsibility and authority. The inspection activity is normally a separate entity within the maintenance department.

(iv) Maintenance training. Training is conducted commensurate with the size and type of maintenance function being performed. Continuing education and progressive experience are provided for all maintenance personnel. Orientation, familiarization, on-the-job, and appropriate recurrent training for all full- and part-time personnel is expected. The use of such training aids as mockups, simulators, and computer-based training enhances maintenance training efforts and is desired. Training documentation is required; it is current, complete, well-maintained, and correctly identifies any special authorizations such as inspection and airworthiness release. Trainers are fully qualified in the subject matter.

(v) Maintenance control. A method to control maintenance activities and track aircraft status is required. Qualified personnel monitor maintenance preplanning, ensure completion of maintenance actions, and track deferred discrepancies. Deferred maintenance actions are identified to supervisory personnel and corrected in accordance with the criteria provided by the manufacturer or regulatory agency. Constant and effective communications between maintenance and flight operations ensure an exchange of critical information.

(vi) Aircraft maintenance program. Aircraft are properly certified and maintained in a manner that ensures they are airworthy and safe. The program includes the use of manufacturer's and CAA information, as well as company policies and procedures. Airworthiness directives are complied with in the prescribed time frame, and service bulletins are evaluated for applicable action. Approved reliability programs are proactive, providing management with visibility on the effectiveness of the maintenance program; attention is given to initial component and older aircraft inspection intervals and to deferred maintenance actions. Special tools and equipment are calibrated.

(vii) Maintenance records. Maintenance actions are well documented and provide a complete record of maintenance accomplished and, for repetitive actions, maintenance required. Such records as aircraft log books and maintenance documentation are legibly prepared, dated, clean, readily identifiable, and maintained in an orderly fashion. Inspection compliance, airworthiness release, and maintenance release records, etc., are complete and signed by approved personnel.

(viii) Aircraft appearance (in-service aircraft). Aircraft exteriors, including all visible surfaces and components, are clean and well maintained. Interiors are also clean and orderly. Required safety

equipment and systems are available and operable.

(ix) Fueling and servicing. Aircraft fuel is free from contamination, and company fuel facilities (farms) are inspected and results documented. Procedures and instructions pertaining to servicing, handling, and storing fuel and oil meet established safety standards. Procedures for monitoring and verifying vendor servicing practices are included in this program.

(x) Maintenance manuals. Company policy manuals and manufacturer's maintenance manuals are current, available, clear, complete, and adhered to by maintenance personnel. These manuals provide maintenance personnel with standardized procedures for maintaining company aircraft. Management policies, lines of authority, and company maintenance procedures are documented in company manuals and kept in a current status.

(xi) Maintenance facilities. Well maintained, clean maintenance facilities adequate for the level of aircraft repair authorized in the company's CAA certificate are expected. Safety equipment is available in hangars, shops, etc., and is serviceable. Shipping, receiving, and stores areas are likewise clean and orderly. Parts are correctly packaged, tagged, segregated, and shelf life properly monitored.

(5) Quality and safety requirements—security. Company personnel are schooled in security responsibilities and practice applicable procedures during ground and in-flight operations. Compliance with provisions of the appropriate standard security program, established by the CAA, is required for all DOD missions.

(6) Quality and safety requirements—specific equipment requirements. Air carriers satisfy DOD equipment and other requirements as specified in Air Mobility Command contracts or Military Traffic Management Command Military Air Transportation Agreements.

§ 861.4 DOD Commercial Airlift Review Board procedures.

(a) This part establishes the procedures to be used by the United States Air Force Air Mobility Command (AMC) and the United States Army Military Traffic Management Command (MTMC) when, in accordance with reference § 861.1 (a) through (d):

(1) A commercial air carrier is subject to review or other action by the DOD Commercial Airlift Review Board (hereinafter referred to as the CARB),

(2) A warning, suspension, temporary nonuse, or reinstatement action is taken against a carrier by the CARB, or

(3) Review or other CARB action is escalated to a higher authority.

These procedures apply to all commercial air carriers providing DOD passenger or cargo airlift through charter, individual ticket movements, contracts, or other transportation agreements. They also apply to carriers providing air transportation purchased by DOD individuals for which government reimbursement will be made in whole or in part.

(b) Safety or airworthiness issues, per reference § 861.1(b) must be referred to the CARB. AMC and MTMC may each take independent corrective action in accordance with their respective procedures on standards of service issues when safety and airworthiness issues are not involved. The DOD Air Carrier Survey and Analysis Directorate will be informed of all actions taken independently by AMC or MTMC.

(c) Except as otherwise provided herein, the rights and remedies of the government and commercial air carriers outlined in these procedures are not exclusive and are in addition to any other rights and remedies provided for by law, regulation, contract, or agreement.

(d) *Definitions.* (1) Letter of warning is a notice to a carrier of a failure to satisfy safety or airworthiness requirements which, if not remedied, may result in temporary nonuse or suspension. The issuance of a letter of warning is not a prerequisite to a suspension or other action.

(2) Temporary nonuse is the immediate exclusion of a carrier from any flight activities in the DOD airlift transportation program, pending a decision on suspension, taken under the conditions outlined in paragraph (h)(1) of this section. By mutual agreement of the CARB and the air carrier involved, a suspension hearing or decision may be delayed and the air carrier continued in a temporary nonuse status for an extended period of time.

(3) Suspension is the exclusion of an air carrier from participating in the DOD airlift transportation program. The period of suspension will normally:

(i) Remain in effect until the carrier furnishes satisfactory evidence that the conditions causing the suspension have been remedied or

(ii) Be for a fixed period of time as determined at the discretion of the CARB.

(4) The procedures for commercial airlift safety review include five possible levels with increasing authority:

(i) DOD Air Carrier Survey and Analysis Directorate.

(ii) DOD Commercial Airlift Review Committee.

(iii) DOD Commercial Airlift Review Board.

(iv) Commanders MTMC and AMC.

(v) DOD Commercial Airlift Review Authority.

These levels are described in reference § 861.1(b), with the exception of the DOD Commercial Airlift Review Committee, which is described in reference § 861.1(c). The Committee provides multifunctional review of the efforts of the DOD Air Carrier Survey and Analysis Directorate, including approval or disapproval of carriers initially seeking DOD business, and offers advice to the higher authorities when appropriate.

(e) *Causes and conditions for suspension.* (1) Carrier shall be subject to suspension for good cause, including:

(i) Failing to comply with generally accepted standards of airmanship, training, and maintenance practices and procedures.

(ii) Failing to satisfy DOD quality and safety requirements as described in § 861.3.

(iii) Failing to comply with all provisions of applicable statutes, agreements, and contract terms, as such may affect flight safety, as well as with all applicable Federal Aviation Administration regulations, airworthiness directives, orders, rules, and standards promulgated under the Federal Aviation Act of 1958 as amended.

(iv) Involvement of one of the carrier's aircraft in a serious or fatal accident, incident, or operational occurrence (regardless of whether or not such aircraft is being used in the performance of government procured transportation).

(v) Any other condition which affects the safe operation of the carrier's flights hereunder.

(vi) Compliance with published standards does not, standing alone, constitute compliance with generally accepted standards or airmanship, training, or maintenance practices.

(f) *Reinstatement considerations.* In no event shall reinstatement occur unless and until the carrier shows to the satisfaction of the CARB that deficiencies that led to suspension have been corrected and that actions have been implemented to preclude the recurrence of similar deficiencies.

(g) *CARB membership.*

(1) Six voting members will constitute the CARB; three senior knowledgeable individuals appointed by Commander, AMC, and three similarly appointed by Commander, MTMC. Two of the voting members will be of general/flag officer rank or civilian equivalent; one from HQ AMC and one from HQ MTMC, and will

act as CARB cochairs. Other nonvoting CARB members will be appointed as necessary to facilitate the CARB deliberative process. A nonvoting recorder will also be appointed.

(2) The presiding member at a meeting of the CARB shall be the senior voting member or alternate present. A voting member, who will not be present at any meeting of the CARB, may be represented by a knowledgeable alternate empowered with the voting responsibilities of the voting member. Four voting members present shall constitute a quorum. Decisions shall be by majority vote.

(3) The meeting date, time, and site of the CARB will be determined at the time of the decision to convene the CARB. Teleconferencing, if utilized, will be specified in the notice to the carrier.

(4) Minutes of CARB hearings may be recorded or summarized and will be maintained with all other records pertaining to the CARB proceeding.

(5) The CARB recorder shall ensure that the air carrier and appropriate DOD agencies are notified of the CARB's decision and reasons therefor.

(h) *CARB operating proeedures:*

(1) *Temporary nonuse:* (i) In case of a fatal aircraft accident or for other good cause, the two senior members of the CARB (see paragraph (g)(1) of this section) will jointly make an immediate determination whether to place the carrier involved in a temporary nonuse status pending suspension proceedings. Prior notice to the carrier is not required.

(ii) Such determination shall include consideration of the advice of the DOD Commercial Airlift Review Committee, if reasonably available, but will not await such advice.

(iii) The carrier shall be promptly notified of the temporary nonuse determination and the basis therefore.

(iv) Temporary nonuse status terminates automatically if suspension proceedings are not commenced, as set out in paragraph (h)(2)(ii) of this section, within 30 days of inception, unless otherwise agreed to per paragraph (d)(2) of this section.

(2) *Suspension:* (i) On a recommendation of the DOD Air Carrier Survey and Analysis Directorate, the DOD Commercial Airlift Review Committee, or any individual member of the CARB, the CARB shall consider whether or not to suspend a carrier.

(ii) If the CARB determines that suspension may be appropriate, it shall notify the carrier that suspension action is under consideration and of the basis for such consideration and offer the carrier a hearing thereon within 15 days of the date of the notice, or such other period as granted by the CARB, at which the carrier may be present and may offer evidence. The presiding member of the CARB shall establish procedures for such hearing as may be appropriate which shall be as informal as practicable, consistent with administrative due process.

(iii) Types of evidence which may be considered, if appropriate, shall include, but not be limited to, the following:

(A) Information and analysis provided by the DOD Air Carrier Survey and Analysis Directorate.

(B) Carrier's written/oral evidence.

(C) Corrective actions that may have been taken by the carrier to:

(*1*) Correct the specific deficiencies that led the CARB to consider suspension, and

(*2*) Preclude recurring similar deficiencies.

(D) Such other matters as the CARB deems relevant.

(E) The CARB's decisions on the reception or exclusion of evidence shall be final.

(iv) Carriers shall have the burden of proving their suitability to safely perform DOD airlift services by clear and convincing evidence.

(v) After the conclusion of such hearing, or if no hearing is requested and attended by the carrier within the time specified by the CARB, the CARB shall consider the matter and make a final decision whether or not to suspend the carrier or to impose such lesser sanction as is appropriate. The carrier shall be notified of the CARB's decision.

(3) *Reinstatement:* (i) The CARB may consider reinstating a suspended carrier on either CARB motion or carrier motion, unless such carrier has become ineligible in the interim.

(ii) The carrier has the burden of proving by clear and convincing evidence that the reinstatement considerations in paragraph (f) of this section have been satisfied.

(iii) Carrier evidence in support of reinstatement will be provided in a timely manner to the CARB for its review. The CARB may independently corroborate the carrier-provided evidence and may, at its option, convene a hearing and request the participation of the carrier.

(i) *Decision by others.* In the event the CARB is unable to decide an issue properly before it, or if the issue in the judgment of the CARB requires review at a DOD organizational level higher than the CARB, the issue will be referred to the Commander, AMC, and Commander, MTMC, for appropriate disposition. In such event, the decision will be made upon the written record only, no hearing will be held.

(j) *Appeal of a determination.* (1) A carrier placed in suspension may administratively appeal this action to the authorities shown in paragraph (j)(3) of this section. An appeal, if any, must be filed within 15 work days after receipt of the decision of the CARB or Commander, AMC, and Commander, MTMC. The suspension will not be stayed pending appeal unless for good cause, as determined by the CARB. The decision of the appellate authority designated herein is final and is not subject to further administrative review or appeal.

(2) An appeal will be in writing only and carriers shall not be entitled to a de novo hearing before the administrative appellate authorities.

(3) The following administrative appellate authorities will review and make decisions on appeals:

(i) When the decision being appealed was made by the CARB, the appellate authorities are Commander, AMC, and Commander, MTMC. They will jointly decide the appeal.

(ii) When Commander, AMC, and Commander, MTMC, are unable to jointly agree on an appeal, they shall refer the matter to the DOD Commercial Airlift Review Authority (CARA) for its decision.

(iii) When the decision being appealed was made by Commander, AMC, and Commander, MTMC, the appellate authority is the DOD CARA.

Patsy J. Conner,

Air Force Federal Register, Liaison Officer.

BILLING CODE 3910-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD 05-92-61]

Special Local Regulations for Marine Events; 2.4 Mile Choptank River Swim, Choptank River Bridge, Choptank River, Cambridge, MD

AGENCY: Coast Guard, DOT.

ACTION: Notice of implementation of special local regulations.

SUMMARY: This notice implements special local regulations for the 3rd Annual 2.4 Mile Choptank River Swim, an annual event to be held on October 10, 1992. These special local regulations are needed to provide for the safety of participants and spectators on the navigable waters during this event. The effect will be to restrict general

navigation in the regulated area for the safety of participants in the swim, and their attending personnel.

EFFECTIVE DATES: The regulations in 33 CFR 100.512 are effective from 6 a.m. to 12:15 p.m., on October 10, 1992.

FOR FURTHER INFORMATION CONTACT: Stephen L. Phillips, Chief, Boating Affairs Branch, Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704–5004 (804) 398–6204, or Commander, Coast Guard Group Baltimore (301) 576–2520.

Drafting Information

The drafters of this notice are QM1 Kevin R. Connors, project officer, Boating Affairs Branch, Boating Safety Division, Fifth Coast Guard District, and Lieutenant Monica L. Lombardi, project attorney, Fifth Coast Guard District Legal Staff.

Discussion

Fletcher Hanks, Race Director for the 2.4 Mile Choptank River Swim submitted an application to hold this year's swim on October 10, 1992. The event will consist of approximately 400 swimmers racing on a course west of the Choptank River Bridge starting at the Gateway Marina and finishing at Great Marsh Point. Since this is the type of event contemplated by these regulations, and the safety of the participants would be enhanced by the implementation of the special local regulations for this regulated area, the regulations in 33 CFR 100.512 are being implemented.

Dated: September 18, 1992.

W.T. Leland,

Rear Admiral, U.S. Coast Guard Commander, Fifth Coast Guard District.

33 CFR Part 100

[CGD 05–92–64]

Special Local Regulations for Marine Events; Riverfest 1992; Cape Fear River, Wilmington, NC

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: Special local regulations are being adopted for Riverfest 1992. This special local regulation is necessary to control vessel traffic in the immediate vicinity of this event. The effect will be to restrict general navigation in the regulated area for the safety of spectators and participants.

EFFECTIVE DATE: This regulation is effective from 12:15 p.m. to 4 p.m. October 3, 1992. If inclement weather causes the postponement of the event, the regulation is effective from 12:15 p.m. to 4 p.m., October 4, 1992.

FOR FURTHER INFORMATION CONTACT: Stephen L. Phillips, Chief, Boating Affairs Branch, Boating Safety Division, Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704–5004 (804) 398–6204, or Commander, Coast Guard Group Fort Macon Operations (919) 247–4545.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a notice of proposed rulemaking has not been published for these regulations and good cause exists for making them effective in less than 30 days from the date of publication. Adherence to normal rulemaking procedures would not have been possible. Specifically, the sponsor's application to hold the event was not received in the district office until September 8, 1992, leaving insufficient time to publish a notice of proposed rulemaking in advance of the event.

Drafting Information: The drafters of this notice are QM1 Kevin R. Connors, project officer, Boating Affairs Branch, Fifth Coast Guard District, and Captain Michael K. Cain, project attorney, Fifth Coast Guard District Legal Staff.

Background and Purpose: Old Wilmington Riverfront Celebration, Inc. submitted an application to hold the Riverfest 1992 riverboat and raft races. As part of the application, the sponsor requested that the Coast Guard provide control of spectator and commercial traffic within the regulated area.

Discussion of Regulations: The event consists of two riverboats and approximately 35 homebuilt, manually powered rafts racing separately on the Cape Fear River, at Wilmington, North Carolina. These regulations are necessary to control spectator craft and provide for the safety of life and property on navigable waters during the event. Since the main shipping channel will not be closed for an extended period of time, commercial traffic should not be severely disrupted.

Regulatory Evaluation: This final rule is not considered major under Executive Order 12291 and is not significant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this regulation is expected to be so minimal that a full regulatory evaluation is unnecessary. This regulation will only be in effect for four hours, and the impacts on routine navigation are expected to be minimal.

Small Entities: Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this regulation will have a significant economic impact on a substantial number of small entities. "Small Entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). Since the impact of this rule on non-participating small entities will be minimal, the Coast Guard certifies under 5 U.S.C. 605(b), that this rule will not have a significant economic impact on a substantial number of small entities.

Federalism Assessment: This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the final rule does not raise sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environmental Assessment: This final rule has been thoroughly reviewed by the Coast Guard and determined to be categorically excluded from further environmental documentation in accordance with section 2.B.2.c of Commandant Instruction M16475.1B. A Categorical Exclusion Determination statement has been prepared and been placed in the rulemaking docket.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

In consideration of the foregoing, part 100 of title 33, Code of Federal Regulations is amended as follows:

PART 100—[AMENDED]

1. The authority citation for Part 100 continues to read as follows:

Authority: 33 U.S.C. 1233; 49 CFR 1.46 and 33 CFR 100.35.

2. A temporary Section 100.35–T0564 is added to read as follows:

§ 100.35–T0564 Cape Fear River, Wilmington, North Carolina.

(a) *Regulated area.* The waters of the Cape Fear River from shoreline to shoreline bounded to the north by a line drawn from latitude 34°14'22.5" North, longitude 77°57'23.0" West, to latitude 34°14'24" North, longitude 77°57'06.5" West, and to the south by the U.S. Route 74/76 highway bridge, center point latitude 34°13'38.0" North, longitude 77°57'08.5" West.

(b) *Definitions.* Coast Guard Patrol Commander. The Coast Guard Patrol Commander is any commissioned, warrant, or petty officer of the Coast Guard who has been designated by the

Commander, Coast Guard Group Fort Macon to act on his behalf.

(c) *Special local regulations.* (1) Except for participants in Riverfest 1992 and vessels authorized by the Coast Guard Patrol Commander, no person or vessel may enter or remain in the regulated area without the permission of the Patrol Commander.

(2) The operator of any vessel in the immediate vicinity of this area shall:

(i) Stop the vessel immediately when directed to do so by any commissioned, warrant, or petty officer on board a vessel displaying a Coast Guard ensign.

(ii) Proceed as directed by any commissioned, warrant or petty officer on board a vessel displaying a Coast Guard ensign.

(3) Vessel operators are advised to remain clear of the advisory area during the effective periods of this regulation.

(d) *Effective dates:* This regulation is effective from 12:15 p.m. to 4:00 p.m. October 3, 1992. If inclement weather causes the postponement of the event, the regulation is effective from 12:15 p.m. to 4 p.m., October 4, 1992.

Dated: September 18, 1992.

W.T. Leland,

Rear Admiral, U.S. Coast Guard, Commander, Fifth Coast Guard District.

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[OH28-1-5395; FRL-4514-1]

Approval and Promulgation of Implementation Plans; Ohio

AGENCY: United States Environmental Protection Agency (USEPA).

ACTION: Final rulemaking.

SUMMARY: The USEPA announces final disapproval of a revision request to the ozone portion of the Ohio State Implementation Plan (SIP) for the Wright-Patterson Air Force Base (WPAFB) located in Greene County, Ohio. The revision consists of a variance for WPAFB to operate a jet fuel fillstand. The variance would exempt WPAFB from the emission limit requirements contained in the Ohio Administrative Code (OAC) Rule 3745-21-07(E).

Greene County was designated as a nonattainment area of the National Ambient Air Quality Standards (NAAQS) for ozone.[1] Greene County was again designated as a nonattainment area for ozone, and classified as moderate. This designation was published in the November 6, 1991 **Federal Register** (56 FR 56694).

USEPA is disapproving this SIP revision request because: The State did not demonstrate that the relaxation of emission limits contained in OAC Rule 3745-21-07(E) will not interfere with the attainment and maintenance of the ozone standard; reasonable further progress (RFP) toward attainment has not been demonstrated; and a relaxation of SIP requirements, in nonattainment areas, is prohibited by the Clean Air Act Amendments of 1990 without offsetting emission reductions.

EFFECTIVE DATE: This final rulemaking becomes effective October 29, 1992.

ADDRESSES: Copies of the SIP revision request, USEPA's analysis, and public comments are available at the following location for review: (It is recommended that you telephone Richard Schleyer, at (312) 353-5089, before visiting the Region 5 office.) U.S. Environmental Protection Agency, Region 5, Air Enforcement Branch (AE-17J), 77 West Jackson Boulevard, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Richard Schleyer, Air Enforcement Branch, (AE-17J), U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 353-5089.

SUPPLEMENTARY INFORMATION:

I. Background

On January 27, 1987, the Ohio Environmental Protection Agency (OEPA) submitted a revision request to the ozone portion of the Ohio SIP for WPAFB. The revision consists of a variance for WPAFB to operate a jet fuel fillstand located in Greene County. The variance would exempt WPAFB from meeting the emission limit requirements contained in OAC Rule 3745-21-07(E).

On December 14, 1988, USEPA published a Notice of Proposed Rulemaking in the **Federal Register** (53 FR 50257) disapproving this SIP revision because the State did not demonstrate that it was technically or economically infeasible to meet the existing SIP limit and that the relaxation from the emission limit requirements contained in OAC Rule 3745-21-07(E) would not jeopardize attainment and maintenance of the ozone standard. Also, the State did not demonstrate that reasonable further progress toward attainment of the standard would be maintained in the area.

II. Current SIP

Under the existing federally approved SIP, the fillstand is regulated under the Ohio Administrative Code (OAC) Rule 3745-21-07(E) which contains the following requirements:

(1) No person shall load in any one day more than forty thousand gallons of any volatile photochemically reactive material into any tank truck, trailer, or railroad tank car from any loading facility unless the loading facility is equipped with a vapor collection and disposal system properly installed, in good working order, in operation, and consisting of one of the following:

(a) An adsorber system or condensation system which processes and recovers at least ninety percent by weight of all vapors and gases from the equipment being controlled; or

(b) A vapor handling system which directs all vapors to a fuel gas system; or

(c) Other equipment or means for purposes of air pollution control as may be acceptable to and approved by the DIRECTOR.

WPAFB applied for a variance to operate a jet fuel fillstand without meeting the emission limit requirements contained in OAC Rule 3745-21-07(E). On October 31, 1980 **Federal Register** (45 FR 72122) and June 29, 1982 **Federal Register** (47 FR 28097), USEPA approved OAC Rule 3745-21-07(E) as meeting the RACT requirements of Part D of the Clean Air Act. This variance would limit annual throughput to 25,000,000 gallons of JP-4 per year.

III. Greene County Attainment Status

Under Section 107(d) of the Clean Air Act, Greene County was designated as a nonattainment area of the NAAQS for ozone.[2] Greene County was again designated as a nonattainment area for ozone, and classified as moderate. This designation was published in the November 6, 1991 **Federal Register** (56 FR 56694).

IV. SIP Revision Policy

The USEPA July 29, 1983, policy memorandum entitled "Source Specific SIP Revisions," from Sheldon Meyers, requires that for a SIP revision to be approvable, the State must demonstrate that the revision will not interfere with the timely attainment and maintenance of the ozone standard and reasonable further progress (RFP) towards attainment. The State has not made such a demonstration.

[1] See 43 FR 8962 (March 13, 1978); 43 FR 45993 (October 5, 1978); and 49 FR 24124 (June 12, 1984).

[2] See 43 FR 8962 (March 13, 1978); 43 FR 45993 (October 5, 1978); and 49 FR 24124 (June 12, 1984).

V. Comments on Notice of Proposed Rulemaking

On January 12, 1989, and February 9, 1989, USEPA received public comments from the OEPA and the Department of the Air Force (DAF), respectively. USEPA's review of these comments is as follows:

OEPA Comments

1. The ozone SIP for the Dayton area was previously approved by the USEPA based on a modeled demonstration of attainment and the adoption of Reasonably Available Control Technology (RACT) rules for VOC sources in the area. The loading of jet fuel is not a RACT category. The SIP revision amounts to a site-specific RACT determination for a source that does not meet Ohio Administrative Code (OAC) Rule 3745–21–07, which regulates sources of organic materials. As such, the RACT determination exceeds the requirements of the 1972 ozone SIP.

2. Reasonable Further Progress (RFP) has been met. Ohio's April 1988 RFP report shows continued source reductions greatly in excess of the emissions associated with the proposed relaxation.

3. The USEPA has not issued an ozone SIP call for the Dayton area because of the low "design value" ozone level of 0.127 ppm for the 1985–1987 period. This level is less than the USEPA action level of 0.14 ppm.

4. The requested SIP relaxation is not significant, and is less that the 40 tons per year threshold amount required to trigger new source review under Federal regulations for new sources of photochemical oxidants.

5. In 1988, the USEPA proposed to approve a SIP revision for the LTV Steel Corporation in the Chicago area, which is non-attainment for particulate matter. The following statement of the USEPA appeared in the September 1, 1988 **Federal Register** (53 FR 33824): "Since LTV demonstrated that this SIP revision would be RACT, a modeled demonstration of attainment is not required." WPAFB has indicated its intention to provide the USEPA with additional cost documentation that will show that the SIP revision request will indeed constitute RACT for this particular loading rack. If acceptable documentation is submitted, an attainment demonstration for the Dayton area should not be required. In addition, USEPA believes that the information previously submitted demonstrates that the use of control equipment for the loading emissions is economically unreasonable.

USEPA's Response

1. OEPA is correct in stating that the loading of jet fuel is not a "RACT" or Control Techniques Guidelines (CTG) category. As a result, in order for this revision to be approved, it is not necessary for OEPA to demonstrate that it is technically or economically infeasible to meet the existing SIP limit. It is necessary, however, for OEPA to demonstrate that the relaxation will not interfere with the attainment or maintenance of the ozone standard. OEPA has not made such a demonstration.

2. The Dayton area currently has an approved 1979 ozone SIP. Although the approved attainment demonstration for the area predicts that attainment would have occurred by 1982 even with the increase in emissions due to this relaxation, recent air quality data for the Dayton area indicate that the area is still nonattainment for ozone. Therefore, the 1979 demonstration does not appear to be credible and cannot be used as a basis of approving a site-specific relaxation. Additionally, the fact that the increase in emissions is less than the level required to trigger new source review is irrelevant.

3. Finally, the discussion in comment five on the Notice of Proposed Rulemaking published in the September 1, 1988 **Federal Register** (53 FR 33824) for LTV Steel is misleading. A modeled demonstration was not required because the relaxation was for a Total Suspended Particulate (TSP) source. The requirement for an acceptable 1979 TSP SIP was the implementation of RACT, while a 1979 ozone SIP not only had to meet the requirement of implementation of RACT, but also a modeled demonstration of attainment. As a result, it is meaningless to compare the requirements for a site-specific TSP SIP to the requirements for a site-specific ozone SIP relaxation.

DAF Comments

On February 9, 1989, the following comments were submitted by the Department of the Air Force (DAF):

1. A Vapor Control Feasibility Study prepared by Oak Ridge National Laboratory in September, 1986, for the McClellan Air Force Base, California—JP–4 Fuel Storage and Transfer Facilities was submitted by the DAF. This contains cost estimates and cost documentation for carbon adsorption and incineration for JP–4 jet fuel vapor control at the McClellan Air Force Base.

2. Actual facility throughput of JP–4 and VOC emissions are presented in tabular form for a period from 1983 to 1988.

3. As presented in comment two, annual throughput of JP–4 at WPAFB has been decreasing since 1986. The DAF foresees further reductions in the annual throughput of JP–4 through the loading rack in upcoming years. This reduction in throughput is based on the following reasons. WPAFB has a pressurized hydrant refueling system on the east and west ramps. Currently, the west ramp is in operation and in 1988, pumped a total of 2,728.99 gallons of JP–4 through this system. The east ramp is currently not in operation due to a malfunction of differential pressure gauges. Once the east ramp is operational, WPAFB anticipates a total throughput from the hydrant system of 5 million gallons. This will result in a reduced annual throughput of JP–4 through the loading racks by 2 million gallons. In addition, due to a change in aircraft used by the 906 Tactical Fighter Group (to be completed in 1990), a reduction of 3 million gallons of JP–4 through the loading rack will occur annually. Total reduction in JP–4 through the loading rack will decrease by 5 million gallons in 1990, however, reductions will begin (2 million gallons) upon repair of the east ramp hydrant system in 1989.

4. Capital cost, as well as total annual operating costs, based on 1985/1986 data is presented for carbon adsorption and incineration. These costs are then projected for the years 1989 and 1992.

5. Throughout our analysis, we have questioned whether JP–4 is a Volatile Photochemically Reactive Material (VPRM). The definition of a VPRM is "any photochemically reactive material which has a vapor pressure of 1.5 pounds per square inch absolute or greater under actual storage conditions." WPAFB has previously submitted storage temperature data denoting that JP–4 will be VPRM when the temperature reaches 85 °F. That temperature is only reached 3% of the year in the Dayton area. It appears unreasonable that 3% justifies controlling all JP–4 vapors.

6. The conversion of JP–4 to JP–8 in the future will have an impact on cost effectiveness. Should JP–8 be available in 10 years, the capital recovery factor and cost per ton of removal will increase, not to mention rendering the control equipment obsolete.

USEPA's Response

1. As previously stated in USEPA's response to an OEPA comment, the loading of jet fuel is not a category subject to the requirements for RACT. As a result, it is not necessary for OEPA (or WPAFB) to demonstrate that it is

technically or economically infeasible to meet the existing SIP limit. It is necessary, however, for OEPA to demonstrate that the relaxation will not interfere with the attainment or maintenance of the ozone standard. OEPA has not made such a demonstration.

2. JP–4 meets the definition of "Volatile Photochemically Reactive Material" (VPRM) contained in OAC Rule 3745–21–01(C)(7) and as it appears in the Ohio SIP. This definition was approved by the USEPA as published in the October 31, 1980 **Federal Register** (45 FR 72122), and in the June 29, 1982 **Federal Register** (47 FR 28098). Also, the following excerpt was taken from the OEPA "Summary of Final Variance for the Wright-Patterson Air Force Base" which was submitted to the USEPA on January 27, 1987:

> JP–4 meets the definition of "volatile photochemically reactive material" (VPRM) under OAC Rule 3745–21–01(C)(7). Technical support provided by WPAFB shows that the storage tank temperature averages 53 °F, and that the true vapor pressure of the JP–4 can equal or exceed 1.5 psia (as required to meet Ohio's definition of VPRM). According to this technical support, when the fuel storage temperature reaches 72 °F (Ohio believes a value of 65 °F from Figure 1 in the Technical Support is more appropriate), the true vapor pressure is 1.5 psia. According to the attached technical support developed by the Dayton Regional Air Pollution Control Agency, there are typically "1.4 days per year" when mean daily temperatures exceed 72 °F. Even though the JP–4 vapor pressure is variable, and conditions do not always allow the JP–4 to meet the definition of a VPRM, the OEPA must define JP–4 as a VPRM. The requirements of OAC Rule 3745–21–07(E)(1) are, therefore, applicable to this source.

3. The problem of concern here is the release of VOC from the JP–4 fuel presently being used, not the future changes to JP–8.

VI. Compliance With the Clean Air Amendments of 1990

This request for a revision to the Ohio SIP for ozone has been reviewed for conformance with the provisions of the 1990 Clean Air Act Amendments (CAAA) enacted on November 15, 1990. It has been determined that the revision does not conform with the General Savings Clause stated in subpart 6, section 193 of the CAAA which prohibits, in nonattainment areas, any relaxation of SIP requirements, without at least equivalent emission reductions. This provision reads as follows:

> No control requirement in effect, or required to be adopted by an order, settlement agreement, or plan in effect before the date of the enactment of the CAAA of 1990 in any area which is a nonattainment area for any air pollutant may be modified after such enactment in any manner unless the modification ensures equivalent or greater emission reductions of such air pollutant.

For nonattainment areas, the State must demonstrate that the SIP revision provides for offsetting emission reductions. The revision contains no plan for emission offsets or equivalent emission reductions. Therefore, no relaxation from SIP requirements can be approved.

Final Action

USEPA is disapproving this SIP revision request because: (1) The State did not demonstrate that the relaxation from the emission limit requirements contained in OAC Rule 3745–21–07(E) will not interfere with the attainment and maintenance of the ozone standard; (2) RFP towards attainment has not been demonstrated; and (3) a relaxation of SIP requirements, in nonattainment areas, is prohibited by the CAAA of 1990 without offsetting emission reductions.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

This action has been classified as a Table Three action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget waived Tables Two and Three SIP revisions (54 FR 222) from the requirements of Section 3 of Executive Order 12291 for a period of 2 years. USEPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on USEPA's request.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from the date of publication). Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

40 CFR Part 62

[A–1–FRL–4512–2]

Approval and Promulgation of State Air Quality Implementation Plans for Designated Facilities and Pollutants; Rhode Island, Vermont; Negative Declarations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Regulations promulgated under the provisions of Section 111(d) of the Clean Air Act require states to submit plans to EPA to control emissions of designated pollutants from designated facilities. Title 40 of the Code of Federal Regulations § 62.06 provides that when no such designated facilities exist within a state's boundaries, a letter of "negative declaration" may be submitted in lieu of a control plan. The States of Rhode Island and Vermont have submitted negative declarations adequately certifying that certain types of designated facilities are not located within their States. EPA is approving negative declarations of municipal waste combustor emissions from municipal waste combustors submitted by the States of Rhode Island and Vermont.

DATES: This action will become effective on November 30, 1992, unless notice is received within 30 days that adverse or critical comments will be submitted. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Comments may be mailed to Linda M. Murphy, Director, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region I, JFK Federal Building, Boston, MA 02203. Copies of the documents relevant to this action are available for public inspection during

normal business hours, by appointment at the Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region I, One Congress Street, 10th floor, Boston, MA; Public Information Reference Unit, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460; and the Division of Air and Hazardous Materials, Department of Environmental Management, 291 Promenade Street, Providence, RI 02908–5767; and the Air Pollution Control Division, Agency of Natural Resources, Building 3 South, 103 South Main Street, Waterbury, VT 05676.

FOR FURTHER INFORMATION CONTACT: Cheryl A. Alloi, (617) 565–3252.

SUPPLEMENTARY INFORMATION: Pursuant to section 111(d) of the Clean Air Act, EPA promulgated regulations at 40 CFR part 60, subpart B, which require States to submit control plans to control emissions of designated pollutants from designated facilities. In the event that a State does not have a particular designated facility located within its boundaries, EPA requires that a negative declaration be submitted in lieu of a control plan.

On February 11, 1991, EPA established existing municipal waste combustors (MWC) with the capacity to combust greater than 250 tons per day of municipal solid waste (MSW) as designated facilities. EPA specified MWC organics, MWC metals, and MWC gases as designated pollutants by promulgating emission guidelines for existing MWCs as required by 40 CFR part 60, subpart B. See 56 FR 5514 for a complete discussion of the MWC guidelines. Therefore, States are required to submit to EPA either plans to control MWC organics, MWC metals and MWC gases from existing municipal waste combustors in the State, or a letter (negative declaration) certifying that no existing MWCs exist in the State.

On February 5, 1992, the Rhode Island Department of Environmental Management (DEM) submitted a letter certifying that there are no existing municipal waste combustors in the State subject to 40 CFR part 60, subpart B. EPA is codifying this negative declaration at 40 CFR 62.9975.

On September 18, 1991, the Vermont Agency of Natural Resources (ANR) submitted a letter certifying that there are no existing municipal waste combustors in the State subject to 40 CFR part 60, subpart B. EPA is codifying this negative declaration at 40 CFR 62.11450.

EPA is codifying these negative declarations without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will be effective 60 days from the date of this **Federal Register** notice unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted. If such notice is received, this action will be withdrawn before the effective date by simultaneously publishing two subsequent notices. One notice will withdraw the final action and the other notice will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action shall be effective on November 30, 1992.

Final Action

EPA is approving negative declarations of municipal waste combustor emissions from municipal waste combustors submitted by the States of Rhode Island and Vermont.

Under 5 U.S.C. 605(b), I certify that this State implementation plan revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225).

EPA has submitted a request for a permanent waiver for Table 2 and 3 SIP Revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any State implementation plan. Each request for revision to the State implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 30, 1992. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2) of the Clean Air Act.)

List of Subjects in 40 CFR Part 62

Administrative practice and procedure, Air pollution control, Intergovernmental relations, Municipal waste combustors, Nitrogen dioxide, Particulate matter, Reporting and recordkeeping requirements, Sulfur dioxides.

Dated: September 17, 1992.

Paul G. Keough,

Acting Regional Administrator, Region I

Part 62 of chapter I, title 40 of the Code of Federal Regulations is amended as follows:

1. The authority citation for part 62 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Subpart OO is amended by adding an undesignated center heading and § 62.9975 as follows:

Subpart OO—Rhode Island

Municipal Waste Combustor Emissions From Existing Municipal Waste Combustors With the Capacity To Combust Greater Than 250 Tons Per Day of Municipal Solid Waste

§ 62.9975 Identification of plan—negative declaration.

On February 5, 1992, the Rhode Island Department of Environmental Management submitted a letter certifying that there are no existing municipal waste combustors in the State subject to the emission guidelines published on February 11, 1991 (56 FR 5514) pursuant to part 60, subpart B of this chapter.

3. Subpart UU is amended by adding an undesignated center heading and § 62.11450 as follows:

Subpart UU—Vermont

Municipal Waste Combustor Emissions From Existing Municipal Waste Combustors With the Capacity To Combust Greater Than 250 Tons Per Day of Municipal Solid Waste

§ 62.11450 Identification of plan—negative declaration.

On September 18, 1992, the Vermont Agency of Natural Resources submitted a letter certifying that there are no existing municipal waste combustors in the State subject to the emission guidelines published on February 11, 1991 (56 FR 5514) pursuant to part 60, subpart B of this chapter.

BILLING CODE 6560–50–M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101-21

[FPMR Amendment D-91]

Change From Standard Level User Charge to Rent, and Change in Guidelines for Determining When an Appeal of the Rent Rate Is Appropriate

AGENCY: Public Buildings Service, GSA.

ACTION: Final rule.

SUMMARY: This regulation updates the FPMR to reflect the change in terminology from Standard Level User Charge (SLUC) to Rent in describing the charges to federal agencies for space and related services. This regulation also changes the guidelines for determining when an appeal of the Rent rate is appropriate, based on specific differences between the GSA rate and comparable commercial rates. SIBAC (Simplified Intragovernmental Billing and Collection) references are replaced by OPAC (On-Line Payment and Collection). Other minor clarifications of existing policies have been included.

EFFECTIVE DATE: September 29, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Manfred van der Walde, Director, Financial Management Division (202-501-1954).

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. Therefore, a Regulatory Impact Analysis has not been prepared. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and the consequence of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

Regulatory Flexibility Act

The General Services Administration has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

List of Subjects in 41 CFR Part 101-21

Federal buildings and facilities, Government property and management.

For reasons set forth in the preamble, 41 CFR part 101-21 is amended as follows:

PART 101-21 FEDERAL BUILDINGS FUND

1. The authority citation for part 101-21 continues to read as follows:

Authority: Sec. 205(c), 63 Stat. 390 (40 U.S.C. 486(c)).

2. The table of contents for part 101-21 is revised as follows:

PART 101-21—FEDERAL BUILDINGS FUND

Sec.
101-21.000 Scope of part.
101-21.001 Authority.
101-21.002 Basic policy.
101-21.003 Definition of terms.
101-21.003-1 Federal Buildings Fund.
101-21.003-2 Rent.
101-21.003-3 Standard levels of service.
101-21.003-4 Special services.
101-21.003-5 Space and services.

Subpart 101-21.1—General

101-21.101 Background.
101-21.102 Applicability.

Subpart 101-21.2—Rent

101-21.200 General.
101-21.201 Determination of Rent.
101-21.202 Joint-use space.
101-21.203 Exceptions.
101-21.204 Exemptions.
101-21.205 Space and services provided by other executive agencies.
101-21.206 Revision of Rent rates.
101-21.207 Annual projections.

Subpart 101-21.3—Standard Levels of Service

101-21.300 General.
101-21.300-1 Flexitime.
101-21.301 Standard services for cleaning, mechanical operation, and maintenance.
101-21.302 Other standard services.
101-21.303 Space exempted from the standard levels of services.

Subpart 101-21.4—Reimbursable Services

101-21.400 Special services.
101-21.402 Services performed by other agencies.

Subpart 101-21.5—Funding Projects

101-21.501 GSA funding responsibility.
101-21.502 Funding responsibilities of other agencies.

Subpart 101-21.6—Billings, Payments, and Related Budgeting Information for Space and Services Furnished by the General Services Administration

101-21.600 Applicability.
101-21.601 Budgeting information for Rent.
101-21.602 Billing procedures for Rent charges.
101-21.602-1 Billing credits.
101-21.603 Budgeting information for reimbursable charges.
101-21.604 Billing procedures for reimbursable charges.
101-21.605 Payment procedures.
101-21.606 Reviews and appeals.

Subparts 101-21.7—101-21.48—[Reserved]

Subpart 101-21.49—Forms

101-21.4900 Scope of subpart.
101-21.4901 GSA forms.
101-21.4901-2957 GSA Form 2957, Reimbursable Work Authorization.

3. Part 101-21 is amended by revising §§ 101-21.000 thru 101-21.003-5 and subparts 101-21.1 thru 101-21.6.

§ 101-21.000 Scope of part.

This part prescribes policies and procedures to be followed for the furnishing of space and services by GSA in Government-owned and -leased buildings.

§ 101-21.001 Authority.

This part implements the applicable provisions of the Public Buildings Amendments of 1988, Public Buildings Amendments of 1972 (86 Stat. 216), the Federal Property and Administrative Services Act of 1949 (63 Stat. 377), the Public Buildings Act of 1959 (73 Stat. 479), and the Reorganization Plan No. 18 of 1950 (40 U.S.C. 490 note).

§ 101-21.002 Basic policy.

(a) GSA will charge for space and services furnished by GSA (unless exempted by the Administrator of General Services) a Rent charge which will approximate commercial charges for comparable space and services. This is accomplished by using an appraisal procedure. The appraisal is based on a fully serviced lease and reflects the standard level of services provided by GSA. Services approximate those provided in the private sector.

(b) GSA may furnish services additional to those included in the Rent on a reimbursable basis.

(c) GSA may furnish alterations on a reimbursable basis in buildings where GSA is responsible for alterations only.

§ 101-21.003 Definition of terms.

The following definitions are established for terms used in Subchapter D of this chapter.

§ 101-21.003-1 Federal Buildings Fund.

Federal Buildings Fund means the fund into which Rent charges and other revenues are deposited, and collections cited in section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(j)), and from which monies shall be available for expenditures for real property management and related activities in such amounts as are specified in annual appropriation acts without regard to fiscal year limitations.

§ 101-21.003-2 Rent.

Rent means the rate charged for GSA-controlled space. GSA-controlled space is that space assigned to an agency by GSA by authority of the Federal Property and Administrative Services Act of 1949, as amended, or by authority of any other statute. It includes any space for which an agency pays GSA directly. The Rent charge approximates commercial charges for comparable space and services.

§ 101-21.003-3 Standard levels of service.

Standard levels of service means those services provided as part of the Rent charge, depending upon the type of space occupied, and as defined in Subpart 101-21.3 ad 101-20.1 of this part.

§ 101-21.003-4 Special services.

Special services means those services that are not included in the standard level of services but are provided by GSA on a reimbursable basis upon request.

§ 101-21.003-5 Space and services.

Space and services means the combination of space occupied and the related services provided for that space.

Subpart 101-21.1—General

§ 101-21.101 Background.

The principal intent of section 210(d) of the Federal Property and Administrative Services Act of 1949, as amended is to promote greater efficiency and effectiveness in the use and management of Government-owned and -leased space. To this end, the assessment of charges that approximate commercial rates for comparable space and services will stimulate efficient space utilization, induce performance budgeting through the more realistic reporting of program costs, provide the basis for a responsible landlord-tenant relationship between GSA and other agencies, and establish a sound financial structure for the acquisition, construction, repair, alteration, maintenance, protection, and operation of real property.

§ 101-21.102 Applicability.

Rules and regulations in this part 101-21 apply to all agencies assigned space by GSA.

Subpart 101-21.2—Rent

§ 101-21.200 General.

This subpart prescribes the policies and procedures governing the establishment of the Rent charge for space and services provided by GSA.

§ 101-21.201 Determination of rent.

(a) The Rent charge is established by GSA and approved by the Office of Management and Budget. The charge reflects approximate equivalent commercial rates for comparable space and services, and is based on the type, quality, and geographic location of the space provided. Rent charges are based on appraisals performed by professional appraisers every five years and updated in the intervening years by changes in the local Consumer Price Index (CPI). Adjustments for increases or decreases in service and utility costs in the area where the building is located are based on weighted averages of amounts expended by GSA.

(b) Rent charges for GSA-controlled space entering the inventory after budget estimates are provided to customer agencies, are developed by appraisal prior to the assignment of the space. Annual adjustments are made as previously explained in this section.

§ 101-21.202 Joint-use space.

In those buildings where GSA has assignment responsibility and there is joint-use space such as cafeterias, auditoriums, conference rooms, credit unions, visitor parking spaces not specifically assigned, and snack bars, each agency provided access to or use of the facilities occupying the joint-use space will be charged a pro rata share of the space costs based on the percentage of the space assigned.

§ 101-21.203 Exceptions.

In those buildings where GSA is responsible only for alterations, the charges for such alterations will approximate the cost incurred.

§ 101-21.204 Exemptions.

The Administrator of General Services may exempt any occupant from Rent if he determines that application of the charge would be infeasible or impractical. Requests for exemption must be made in writing to the Administrator.

§ 101-21.205 Space and services provided by other executive agencies.

Any executive agency other than GSA that provides to anyone space and services is authorized to charge the occupant for the space and services at rates approved by the Administrator of General Services.

§ 101-21.206 Revision of rent rates.

GSA will review Rent rates annually to insure that they approximate commercial rates. Rates will be revised according to the criteria described in § 101-21.201. GSA will not increase its rates without notification through the Budget Estimate process except in the case of gross errors. Even in this special case, affected agencies are entitled to an opportunity to budget for the increase, if the revised total Rent charge is higher than the amount shown initially in the budget estimate. Eighteen months notice is generally given for an agency to budget for the increased Rent charges.

§ 101-21.207 Annual projections.

Annual projections of space assignments and related services are prescribed to provide occupant agencies with accurate data necessary for budget submission. Procedures for annual projections are described in § 101-21.601.

Subpart 101-21.3—Standard Levels of Service

§ 101-21.300 General.

The levels of service included in Rent approximate those currently furnished in commercial practice. They are based on the effort required to service the occupant agency's space for a 5-day week (Monday to Friday), one-shift regular work schedule. Adequate building start-up services before the occupant agency starts the regular work schedule and shutdown services after the occupant agency ceases the regular work schedule, even though the working hours of the occupant agency may be staggered, will be provided by GSA. Space, automatic elevator systems, lights and small office and business machines may be used on an incidental basis 24 hours a day, 7 days a week without additional payment to GSA where access by the occupant is available without additional cost to GSA.

§ 101-21.300-1 Flexitime.

Occupant agencies who extend their regular work schedule by a system of flexible hours shall reimburse GSA for the actual cost of the additional services required.

§ 101-21.301 Standard services for cleaning, mechanical operation, and maintenance.

Standard services for cleaning, mechanical operation, and maintenance shall be accomplished in accordance with the established GSA standards as cited in Subpart 101-20.1 of part 101.20 of this chapter.

§ 101-21.302 Other standard services.

GSA may provide additional services at appropriate levels and times that the Administrator of General Services determines to be necessary for efficient operations and proper servicing of space

under the assignment responsibility of GSA.

§ 101-21.303 Space exempted from the standard levels of service

The Administrator of General Services may exempt from the standard levels of service space for which, because of its limited square footage or functional use, application of the standard levels of service would be infeasible or impractical.

Subpart 101-21.4 Reimbursable Services.

§ 101-21.401 Special services.

Special services not included in the standard levels of service are provided by GSA on a reimbursable basis. Funds for reimbursable services should be included in occupant agency budget submissions.

§ 101-21.402 Services performed by other agencies.

Agencies occupying space under the assignment responsibility of GSA that perform or contract for services normally provided for in the Rent levied by GSA will be reimbursed by GSA for the actual cost of services performed.The amount of reimbursement will be limited to the cost of the services to GSA if GSA had provided them. Approval to perform or contract for such services must be obtained in advance from the appropriate GSA regional office.

Subpart 101-21.5—Funding Projects.

§ 101-21.501 GSA funding responsibility.

Projects for the construction or alteration of public buildings, or for the alteration of leased buildings, for which GSA is responsible will be financed from the Federal Buildings Fund.

§ 101-21.502 Funding responsibilities of other agencies.

(a) A department or agency may request an appropriation to cover the cost of the construction or acquisition of a facility defined as a public building in § 101–19.003–6 of this chapter when the Administrator of General Services has obtained the authorization therefor and concurs with the request, and approval has been given by the Office of Management and Budget. The construction or acquisition of the facility shall be performed by GSA.

(b) GSA shall, upon the request of a department or agency, construct, alter, or acquire buildings other than public buildings which are normally financed by other agencies upon condition that funds to cover the cost of the work shall be transferred or reimbursement shall be made to GSA.

(c) Each Federal agency shall be responsible for the financing of special use facilities and equipment not contemplated in the approved project.

Subpart 101-21.6 Billings, Payments, and Related Budgeting Information For Space and Services Furnished by the GeneralServices Administration

§ 101-21.600 Applicability.

These rules and regulations apply to GSA and all agencies furnished space and related services by GSA.

§ 101-21.601 Budgeting information for rent.

(a) GSA provides to agencies summary level and detailed documentation in support of budgetary information it submits for the space and related services it furnishes. The documentation identifies organizations and organizational elements by an agency and bureau code numbering system.

(b) Federal agencies that require relocation of other agencies because of expanding space needs are responsible for funding.

(1) Moving, telecommunications, and related costs incurred by GSA in relocating displaced agencies and,

(2) above standard alterations comparable to their previously occupied space on a square foot by square foot basis and,

(3) Rent charges in excess of the amount budgeted by the displaced agency until such time (no more than 18 months) as the agency has had an opportunity to budget for the increase.

§ 101-21.602 Billing procedures for rent charges.

(a) Bills for Rent are normally rendered to the Central Office headquarters of each agency occupying space under the assignment responsibility of GSA. Under the OPAC (On-Line Payment and Collection), formerly SIBAC (Simplified Intragovernmental Billing and Collection) system, payment is to be processed at the level of organization within an agency which relates to a Treasury Department 8-digit station symbol. (Forms with references to SIBAC will continue to be used until stock is depleted.)

(b) Bills for charges applicable to current space assignments are rendered quarterly at the beginning of the quarter. The billing includes adjustments for billing errors and changes in space assignments made prior to or during the previous quarter. Documentation delineating billing errors and changes in space assignments are provided with bills.

(c) Agencies which have been assigned an 8-digit station symbol by the Treasury Department (OPAC agencies) are billed in accordance with the procedures prescribed by the Treasury Fiscal Requirements Manual, Part VI, Chapter 5000. Non-OPAC, designated as BOAC (Billed Office Address Code) agencies, are billed on GSA Form 789, Statement, Voucher, and Schedule of Withdrawals and Credits (referenced in § 101–2.4902–789 of this chapter).

§ 101-21.602-1 Billing credits.

If an error in billing occurs, an adjustment may be requested through the applicable GSA Regional Office by letter, by GSA Form 2972 for OPAC Agencies, or by GSA Form 2992 for BOAC agencies. GSA applies a one year limitation standard to adjustment requests received by letter or by GSA Form 2972 or 2992. Adjustment requests must be received within one year from the date of the Rent bill.

§ 101-21.603 Budgeting information for reimbursable charges.

Concurrently with the Rent listings for the applicable budget year, GSA provides an estimate of increases in the cost of recurring reimbursable services through the budget year based on projections provided by the Office of Management and Budget. These may be used to escalate actual costs from current year or preceding year data. The use of this information is not mandatory.

§ 101-21.604 Billing procedures for reimbursable charges.

(a) Charges for reimbursable services are billed to the level of organization within an agency which relates to a Department of the Treasury assigned 8-digit station symbol (OPAC agencies). This is accomplished under the On-Line Payment and Collection (OPAC) procedure. (See Treasury Fiscal Requirements Manual, Part VI, Chapter 5000.) BOAC (Billed Office Address Code) agencies are charged for reimbursable services by GSA billing directly to the agency paying office cited on the reimbursable work authorization request. (See § 101–21.4901–2957, GSA Form 2957, Reimbursable Work Authorization.)

(b) GSA Form 789, Statement, Voucher, and Schedule of Withdrawals and Credits is used for billing purposes for BOAC agencies. (See illustration at § 101–2.4902–789 of this chapter).

(c) Rates charged for recurring above-standard-level reimbursable services shall be fixed to recover the

approximate cost incurred by GSA in providing such services. Recurring above-standard-level reimbursable services are those recurring services, such as cleaning or utilities, which cannot readily be differentiated from the same type of services included in the standard level.

(d) The following basic types of reimbursable work are also performed by GSA but on an actual cost basis:

(1) Non-recurring services performed above standard levels of service, such as out-of-cycle painting;

(2) Recurring services not included in the standard level for which the actual cost can be readily identified;

(3) Repairs and alterations in buildings not controlled by GSA;

(4) Special space alterations and adjustments performed by GSA in GSA-operated buildings, which are requested and financed by other agencies in accordance with § 101–20.106, Reimbursable services of this chapter; and

(5) Services financed by other agencies but performed by GSA personnel on construction and alteration projects.

(e) GSA Form 2957, Reimbursable Work Authorization, must be completed and approved by GSA and the client agency before reimbursable work is begun. This authorization must describe the work or services ordered and include an estimate of the cost of the work described. Work authorizations must be signed by a responsible official capable of authorizing the obligation and committing the agency to payment of the charges, must contain a citation to the appropriation or funds to be charged, and must have a statement that funds in the amount of the stated estimate are available for immediate obligation for the requested work. GSA will make every effort to obtain approval and certification of additional funds before incurring any obligations in excess of the estimate except when:

(1) Total obligations are incurred against reimbursable work authorizations with a total authorized amount of $1,000 or less in an amount exceeding the authorized amount by up to $100 and;

(2) Total obligations are incurred against reimbursable work authorizations with an authorized amount in excess of $1,000 by up to 10 percent of the amount or $1,000, whichever is less, unless such action would result in the estimated maximum costs exceeding the prospectus limitation for the current fiscal year for which no specific congressional prospectus project approval or certification exempting the funds from section 7 of the Public Buildings Act of 1959, as amended, exists. However, failure of GSA to notify the agency that obligations will exceed the authorized amount, regardless of the dollar amount, does not relieve the agency of paying full actual costs.

(f) Bills for recurring above-standard-level services (identified by prefix "R" in the first position of the work authorization number on GSA Form 2957) are rendered in advance at a fixed-price equal to the estimated amount. This type of work authorization, with the right to cancel (subject to incurred costs and obligations) upon 60 days notice by either party must be completed and forwarded to GSA prior to the commencement of the period for which services are required. With the exception of recurring work authorizations for utilities, which GSA may limit to 3-month periods, each "R" type work authorization must authorize charges for the full period during the fiscal year that the services will be required. These work authorizations must always begin and end within the same fiscal year.

(g) Bills for all other reimbursable services are rendered quarterly in an amount equal to the obligations accumulated for the billing period. A final adjustment to actual cost will be made upon completion of the services.

(h) Agencies shall ensure that bills for special space alteration services ordered by them under provisions of § 101–20.106 shall be rendered by the contractor or lessor directly to the agencies' paying office. The agencies shall be responsible for timely payment and resolving any billing problems regarding orders they place under the contracts or agreements.

§ 101–21.605 Payment procedures.

Payment of billings for space and services to OPAC agencies shall be in accordance with the procedures prescribed by the Treasury Fiscal Requirements Manual, Part VI, Chapter 5000. Billings for space and services to BOAC agencies shall be paid promptly by check or transfer document upon receipt of the billing document, in accordance with the GAO Manual for Guidance of Federal Agencies, title 7, Fiscal Procedures, Ch. 2, Sec. 7.3(b).

§ 101–21.606 Reviews and appeals.

(a) Agencies may at any time request a regional review of the measurement, classification, service levels provided, or charges assessed that pertain to the space assignment without resorting to formal procedures. Such requests do not constitute appeals and should be directed to the appropriate GSA regional office.

(b) Agencies may file formal appeals on the Rent assessed, but only when the charge assessed is in excess of the comparable commercial square foot rates by 20 per cent or one dollar per square foot, whichever is greater, and when the quarterly Rent charge is in excess of the comparable commercial charge for that quality of space by $25,000. Formal appeals should be filed with the appropriate Regional Administrator. To determine if the Rent charge assessed is subject to appeal under this procedure, an agency is required to compare its assigned space with other space in the surrounding community that:

(1) is available in similar size blocks of space in a comparable location,

(2) is the same type of space as defined by GSA,

(3) provides similar service levels as part of the charges,

(4) contains similar contractual terms, conditions, and escalation clauses, and

(5) represents a lease transaction completed at a similar point in time.

Data from at least three comparable locations will be necessary to demonstrate a market trend sufficient to warrant revising a Rent rate. Agencies filing appeals must develop documentation supporting an appeal of the Rent charge assessed using the factors described in this paragraph.

(c) An appeal shall initially be filed by local agency officials with the appropriate GSA regional office and include all pertinent information and documentation supporting the need for the appeal. The GSA regional office will verify the data submitted and perform additional investigation as necessary. The GSA Regional Administrator will determine the validity of the appeal and will notify the appealing agency of his ruling.

(d) A further appeal may be filed by the agency's bureau level officials with the Commissioner, Public Buildings Service, GSA, if an equitable resolution has not been obtained from the initial appeal. The second stage appeal must provide supporting information justifying the continuation of the appeal.

(e) A head of an agency may further appeal to the Administrator of General Services only after the procedure to obtain prior resolution at the first two levels has been followed. Documentation of the procedure followed for prior resolution must accompany an appeal to the Administrator. Decisions made by the Administrator shall be final.

(f) Adjustments to the Rent rates which result from the reviews and appeals procedure will be effective in the quarter in which the agency submitted a properly documented appeal. Adjusted rates remain in effect for the remainder of the fiscal year.

(g) If an agency questions the rate developed for a specific building in the budget estimate, the appropriate GSA Regional Office should be contacted for information on the projected rate:

Note: If an informal resolution is not reached after discussions with the Regional Real Estate personnel, the agency may appeal the rate, provided the criteria for an appeal are met. The appeal may be filed, as outlined in paragraphs (b), (c), (d), and (e) of this section. The appeal documentation must include current-year information for comparable buildings. The Regional Office will provide the current year rate for the building in question.

Dated: August 26, 1992.

Richard G. Austin,

Administrator.

BILLING CODE 6820-23-M

FEDERAL MARITIME COMMISSION

46 CFR Parts 500, 514, 550, 552, 553, and 555

[Docket No. 92-34]

Domestic Offshore Financial Filing Regulations; Exemption Under Section 35 of the Shipping Act, 1916

AGENCY: Federal Maritime Commission.

ACTION: Final rule.

SUMMARY: The Federal Maritime Commission ("FMC" or "Commission") amends its regulations to remove certain financial filing requirements and auditing procedures for carriers in the domestic offshore trades. The rule also exempts non-vessel-operating common carriers ("NVOCCs") from the provisions of section 3 of the Intercoastal Shipping Act, 1933 ("1933 Act"). These amendments will reduce recordkeeping and other regulatory requirements.

EFFECTIVE DATE: September 29, 1992.

FOR FURTHER INFORMATION CONTACT: Joseph C. Polking, Secretary, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573-0001, (202) 523-5725.

SUPPLEMENTARY INFORMATION: By Notice of Proposed Rulemaking ("NPR") published in the **Federal Register** on June 12, 1992, 57 FR 25005, the Commission proposed to eliminate 46 CFR part 553, which prescribes the form and content of certain financial exhibits and schedules of NVOCCs in the domestic offshore trades and establishes the methodology that the Commission would follow in evaluating proposed rate changes submitted by such NVOCCs subject to the provisions of the 1933 Act, 46 U.S.C. app. 843 *et seq.* This part also provides for the retention and orderly acquisition of the data required for the methodology so established, and specifies that the Commission employ the operating ratio methodology when evaluating proposed rate changes by NVOCCs. Specifically, § 553.4 requires each NVOCC to maintain its records in such a manner as to permit the timely preparation of the exhibits and schedules filed in the event that the Commission institutes an investigation and hearing with respect to proposed rate changes.

Since the Commission has had no reason to institute an investigation and hearing with respect to an NVOCC's proposed rate change in the 14 years since the 1933 Act was amended to require such methodology guidelines, the NPR indicated that part 553 does not appear to be necessary and would seem to impose a recordkeeping burden on NVOCCs that outweighs any identifiable benefits. Accordingly, the Commission proposed to relieve NVOCCs from these recordkeeping requirements by terminating part 553.

As a corollary to removal of these recordkeeping requirements, the Commission also proposed to delete the guidelines for what constitutes a just and reasonable profit for NVOCCs, and exempt NVOCCs from the provisions of section 3 of the 1933 Act, 46 U.S.C. app. 845. Section 3 authorizes the Commission to suspend and investigate new and amended tariff matter filed by carriers, including NVOCCs, in the domestic offshore trades. Strict time limits are placed upon proceedings conducted under this section, and the carrier is required to refund any unsuspended portion of a general increase in rates found unjust and unreasonable. The Commission recognized that section 18 of the Shipping Act, 1916 ("1916 Act"), 46 U.S.C. app. 817, provides a continuing basis for investigating the reasonableness of NVOCC rates in the domestic offshore trades, without the strict time constraints (and consequent recordkeeping requirements) imposed by section 3 of the 1933 Act.

46 CFR part 555 pertains to audits and auditing procedures in the domestic offshore trades and to those carriers required to file periodic reports with the Commission pursuant to 46 CFR part 552.[1] Part 555 establishes rules governing audits by Commission auditors of the books and records of carriers engaged in the domestic offshore trades of the United States, and those required to file periodic reports with the Commission pursuant to part 552 of this chapter. Section 555.5 provides for the confidentiality of the information obtained by the Commission.

Since the Commission has not conducted any audits under part 555 in the past 15 years, it proposed its removal. The NPR noted that 46 CFR 552.4 provides the Commission with access to all financial documents, records and working papers used by a carrier in preparation of the financial reports and exhibits submitted to the Commission under 46 CFR part 552. Because 46 CFR part 552 does not provide for confidentiality as does 46 CFR part 555, the Commission also proposed to incorporate the confidentiality provisions of § 555.2 into 46 CFR 552.4.

Comments on the proposed rulemaking were filed by American President Lines, Ltd. ("APL"), Sea-Land Service, Inc. ("Sea-Land") and Tropical Shipping and Construction Co., Ltd. ("Tropical").

APL raises no objections to the proposals to eliminate parts 553 and 555, and supports the reincorporation of the confidentiality requirements into § 552.4(c). APL believes that the text of § 552.4(c) would be more accurately accommodated to the context of part 552 by deleting the words "or its duly accredited special agents or auditors as a result of an audit carried out." The carrier also points out the need for a conforming change to 46 CFR § 500.211, which contains a reference to part 555. The Commission concurs and has revised the text of § 552.4(c) accordingly. A conforming change to § 500.211 has been made in the final rule. A technical change also has been made to the authority cited for part 500.

Sea-Land supports the proposed amendments in this rulemaking to eliminate parts 553 and 555, the incorporation of the confidentiality provisions of part 555 into part 552, and the amendment of part 550 to exempt NVOCCs from the requirements of section 3 of the 1933 Act. It argues that the regulations to be eliminated or revised are overly burdensome and unwarranted. Sea-Land believes that the elimination of part 553, and the

[1] Part 552 contains the requirements for financial reports of vessel-operating common carriers ("VOCCs") in the domestic offshore trades.

PART 500—EMPLOYEE RESPONSIBILITIES AND CONDUCT

1. The authority citation for part 500 is revised to read as follows:

Authority: 18 U.S.C. 207, 208; 46 U.S.C. app. 1111; E.O. 12674, 54 FR 15159, 3 CFR, 1989 Comp., P. 215; E.O. 12731, 55 FR 42547, 3 CFR, 1990 Comp., p. 306.

2. Section 500.211 is revised, to read as follows:

§ 500.211 Release of confidential or nonpublic information.

An employee shall not divulge to any unauthorized person any nonpublic or confidential Commission document or information, including the results of portions of Commission meetings closed to the public pursuant to 46 CFR part 503, subpart H, and comments made, information divulged or memoranda prepared incidental to such closed meetings, except pursuant to the procedures of 5 U.S.C. 552, 552a and 552b and 46 CFR part 503 or as specifically directed by the Commission. Employees are also reminded of the provisions of § 552.4(c) of this chapter, which relate to confidentiality of information obtained in the course of official Commission audits, and which provide for penalties for disclosure of confidential information.

PART 514—TARIFFS AND SERVICE CONTRACTS

1. The authority citation for part 514 continues to read as follows:

Authority: U.S.C. 552 and 553; 31 U.S.C. 9701; 46 U.S.C. app. 804, 812, 814–817(a), 820, 833a, 841a, 843, 844, 845, 845a, 845b, 847, 1702–1712, 1714–1716, 1718, 1721 and 1722; and sec. 2(b) of Pub. L. 101–82, 103 Stat. 601.

2. Section 514.3 is amended by adding a new paragraph (a)(10) to read as follows:

(a) * * *

§ 514.3 Exemptions and exclusions.

* * * * *

(10) *NVOCCs in domestic offshore commerce.* Non-vessel-operating common carriers ("NVOCCs") providing transportation in domestic offshore commerce are exempt from the provisions of section 3 of the Intercoastal Shipping Act, 1933, 46 U.S.C. app. 845, and thus, from the suspension provisions of § 514.19(a). The reasonableness of NVOCC rates in domestic offshore commerce may be determined under the provisions of section 18 of the 1916 Act, 46 U.S.C. app. 817.

* * * * *

PART 550—PUBLISHING, FILING AND POSTING OF TARIFFS IN DOMESTIC OFFSHORE COMMERCE

1. The authority citation for part 550 continues to read as follows:

Authority: 5 U.S.C. 553; 46 U.S.C. app. 812, 814, 815, 817, 820, 833a, 841a, 843, 844, 845, 845a, 845b, and 847.

2. Section 550.1 is amended by adding a new paragraph (c) to read as follows:

§ 550.1 Exemptions.

* * * * *

(c) Non-vessel-operating common carriers ("NVOCCs") providing transportation in domestic offshore commerce are exempt from the provisions of section 3 of the Intercoastal Shipping Act, 1933, 46 U.S.C. app. 845, and, thus, from the provisions of § 550.13 of this part. The reasonableness of NVOCC rates in domestic offshore commerce may be determined under the provisions of section 18 of the Shipping Act, 1916, 46 U.S.C. app. 817.

PART 552—FINANCIAL REPORTS OF VESSEL OPERATING COMMON CARRIERS BY WATER IN THE DOMESTIC OFFSHORE TRADES

1. The authority citation for part 552 continues to read as follows:

Authority: 5 U.S.C. 553; 46 U.S.C. app. 817(a), 820, 841a, 843, 844, 845, 845a and 847.

2. Section 552.4 is amended by adding a new paragraph (c) to read as follows:

§ 552.4 Access to and audits of records.

* * * * *

(c) All information obtained by the Commission pursuant to the provisions of this part shall be withheld from public disclosure and shall be treated as confidential information in the files of the Commission; except that any confidential information derived from an audit may be utilized by the Commission as the basis for a formal proceeding instituted pursuant to section 22 of the Shipping Act, 1916, and/or sections 3 and 4 of the Intercoastal Shipping Act, 1933, and may also be utilized in such a proceeding.

PART 553—FINANCIAL EXHIBITS AND SCHEDULES OF NON-VESSEL-OPERATING COMMON CARRIERS IN THE DOMESTIC OFFSHORE TRADES

1. Part 553 is removed.

PART 555—AUDITS AND AUDITING PROCEDURES IN THE DOMESTIC OFFSHORE TRADES

1. Part 555 is removed.

By the Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 80

[DA 92–1277]

Maritime Radio Services

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This Order revises the performance standards for Global Maritime Distress and Safety System (GMDSS) radio equipment to reflect the latest international standards. Actual changes to the standards were minor or editorial in nature and should have minimal, if any, affect on subject equipment. It also clarifies the equipment authorization requirements under the GMDSS for existing emergency position-indicating radiobeacons operating on 406 MHz (406 MHz EPIRBs).

EFFECTIVE DATE: This regulation is effective as of September 29, 1992. The incorporation by reference of IMO

Resolution A.700(17) is approved by the Director of the Federal Register as of September 29, 1992.

FOR FURTHER INFORMATION CONTACT: Kathryn S. Hosford, Special Services Division, Private Radio Bureau, Federal Communications Commission, Washington, DC 20554; or telephone (202) 632-7197.

SUPPLEMENTARY INFORMATION: The following Order, DA 92-1277, was adopted September 17, 1992, and released September 23, 1992, by delegated authority of the Chief, Private Radio Bureau.

List of Subjects in 47 CFR Part 80

Communications equipment, Incorporation by reference, Marine safety, Ship stations.

In the Matter of; Nonsubstantive and editorial amendments of Part 80, Subpart W of the Commission's Rules regarding the Global Maritime Distress and Safety System (GMDSS); Order

Adopted: September 17, 1992.

Released: September 23, 1992.

By the Chief, Private Radio Bureau.

1. On February 7, 1992, the Commission released a Report and Order that implemented the Global Maritime Distress and Safety System (GMDSS) in the Commission's Rules. Report and Order, PR Docket No. 90-480, FCC 92-19, 7 FCC Rcd 951 (1992), 57 FR 9063 (1992). At the same time, the International Maritime Organization (IMO) was updating the GMDSS performance standards in the Safety of Life at Sea (SOLAS) Convention. Additionally, the performance standards being considered by the Commission simultaneously were being reviewed by the **Federal Register** under special procedures for "incorporation by reference." Minor differences among the various documents resulted.

2. The international standards now have been updated and we have reviewed the status of all performance standards incorporated by reference in the Rules. Actual changes to the standards were minor or editorial in nature and should have minimal affect, if any, on subject equipment. Thus, 47 CFR 80.1101 is updated to be consistent with the latest international standards. For clarity § 80.1101 is revised in its entirety. The notable changes, however, are as follows: IMO Resolution A.700(17) is added to paragraph (c)(4) for MF/HF narrow-band direct-printing (NBDP) radio equipment; IMO Resolution A.698(17) replaces IMO Resolution A.608(15) in paragraph (c)(8) for INMARSAT-A ship earth stations (SESs); and the CCIR Recommendation 493-4 reference in paragraphs (c)(8) and (c)(9) is deleted for INMARSAT SESs.

3. On a related matter, we are also clarifying that emergency position-indicating radiobeacons operating on 406 MHz (406 MHz EPIRBs) that were authorized prior to April 15, 1992 (the effective date of the Report and Order) and meet the GMDSS performance standards are exempt from the GMDSS labeling requirement. They may be added to the list of GMDSS-approved equipment by simply submitting a letter. This provision for 406 MHz EPIRBs was stated in the text of the Report and Order but it was not reflected in the Rules. See Report and Order, footnote 39. Therefore, 47 CFR 80.1103 is amended to clarify this point.

4. Because the rule amendments adopted herein are nonsubstantive in nature, the notice and comment procedures and the 30 day effective date provisions of Section 553 of the Administrative Procedure Act, 5 U.S.C. section 553, need not be complied with. Authority for this action is contained in section 0.331(a)(1) of the Commission's Rules, 47 CFR section 0.331(a)(1).

5. Accordingly, part 80 is amended as set forth in the Amendatory Text effective upon publication in the **Federal Register**.

6. Regarding questions on matters covered in this document, contact Kathryn S. Hosford at 202-632-7197.

Federal Communications Commission.

Ralph A. Haller,

Chief, Private Radio Bureau.

Amendatory Text

Part 80 of Chapter I of title 47 of the Code of Federal Regulations is amended as follows:

1. The authority citation for part 80 continues to read as follows:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted. Interpret or apply 48 Stat. 1064-1068, 1081-1105, as amended; 47 U.S.C. 151-155, 301-609; 3 UST 3450, 3 UST 4726, 12 UST 2377.

2. Section 80.1101 is revised to read as follows:

§ 80.1101 Performance standards.

(a) The abbreviations used in this section are as follows:

(1) International Maritime Organization (IMO).

(2) International Telegraph and Telephone Consultative Committee (CCITT).

(3) International Electrotechnical Commission (IEC).

(4) International Organization for Standardization (ISO).

(5) International Radio Consultative Committee (CCIR).

(b) All equipment specified in this subpart must meet the general requirements for shipboard equipment listed in this paragraph, which are incorporated by reference.

(1) IMO Resolution A.694(17), "General Requirements for Shipborne Radio Equipment Forming Part of the Global Maritime Distress and Safety System (GMDSS) and for Electronic Navigational Aids," adopted 6 November 1991.

(2) CCITT Recommendation E.161, "Arrangement of Figures, Letters and Symbols on Telephones and Other Devices that Can Be Used for Gaining Access to a Telephone Network," 1989.

(3) CCITT Recommendation Q.11, "Numbering Plan for the International Telephone Service," 1989.

(4) IEC Publication 92-101, "Electrical Installations in Ships," Third Edition 1980 with amendments through 1984.

(5) IEC Publication 533, "Electromagnetic Compatibility of Electrical and Electronic Installations in Ships," First Edition 1977.

(6) IEC Publication 945, "Marine Navigational Equipment," First Edition 1988.

(7) ISO Standard 3791, "Office Machines and Data Processing Equipment—Keyboard Layouts for Numeric Applications," First Edition 1976(E).

(c) The equipment specified in this subpart must also conform to the appropriate performance standards listed below which are incorporated by reference.

(1) *NAVTEX receivers*: (i) IMO Resolution A.525(13), "Performance Standards for Narrow-band Direct Printing Telegraph Equipment for the Reception of Navigational and Meteorological Warnings and Urgent Information to Ships," adopted 17 November 1983.

(ii) CCIR Recommendation 540-2, "Operational and Technical Characteristics for an Automated Direct-printing Telegraph System for Promulgation of Navigational and Meteorological Warnings and Urgent Information to Ships," 1990.

(2) *VHF radio equipment*: (i) IMO Resolution A.609(15), "Performance Standards for Shipborne VHF Radio Installations Capable of Voice Communication and Digital Selective Calling," adopted 19 November 1987.

(ii) CCIR Recommendation 493-4, "Digital Selective-calling System for use in the Maritime Mobile Service," 1990.

(3) *MF radio equipment*: (i) IMO Resolution A. 610(15), "Performance

Standards for Shipborne MF Radio Installations Capable of Voice Communication and Digital Selective Calling," adopted 19 November 1987.

(ii) CCIR Recommendation 493–4, "Digital Selective-calling System for use in the Maritime Mobile Service," 1990.

(4) *MF/HF radio equipment:* (i) IMO Resolution A.613(15), "Performance Standards for Shipborne MF/HF Radio Installations capable of Voice Communication, Narrow-band Direct Printing and digital Selective Calling," adopted 19 November 1987.

(ii) CCIR Recommendations 493–4, "Digital Selective-calling System for use in the Maritime Mobile Service," 1990.

(iii) CCIR Recommendation 625–1, "Direct-printing Telegraph Equipment Employing Automatic Identification in the Maritime Mobile Service," 1990. Equipment may conform to CCIR Recommendation 476–4, "Direct-Printing Telegraph Equipment in the Maritime Mobile Service," 1986, in lieu of CCIR Recommendation 625–1, where such equipment was installed on ships prior to February 1, 1993.

(iv) IMO Resolution A.700(17), "Performance Standards for Narrow-band Direct-printing Telegraph Equipment for the Reception of Navigational and Meteorological Warnings and Urgent Information to Ships (MSI) by HF," adopted 6 November 1991.

(5) *406 MHz EPIRBs:* (i) IMO Resolution A.611(15), "Performance Standards for Float-free Satellite Emergency Position-indicating Radio Beacons Operating on 406 MHz," adopted 19 November 1987.

(ii) IMO Resolution A.662(16), "Performance Standards for Float-free Release and Activation Arrangements for Emergency Radio Equipment," adopted 19 October 1989.

(iii) CCIR Recommendation 633–1, "Transmission Characteristics of a Satellite Emergency Position-indicating Radiobeacon (Satellite EPIRB) System Operating Through a Low Polar-orbiting Satellite System in the 406 MHz Band," 1990.

(iv) The 406 MHz EPIRBs must also comply with § 80.1061.

(6) *9 GHz radar transponders:* (i) IMO Resolution A.604(15), "Performance Standards for Survival Craft Radar Transponders for Use in Search and Rescue Operations," adopted 19 November 1987.

(ii) CCIR Recommendation 628–1, Technical Characteristics for Search and Rescue Radar Transponders," 1990.

(7) *Two-way VHF radiotelephone:* IMO Resolution A.605(15), "Performance Standards for Survival Craft Two-way VHF Radiotelephone Apparatus," adopted 19 November 1987.

(8) *INMARSAT–A SES:* IMO Resolution A.698(17), "Performance Standards for Ship Earth Stations Capable of Two-way Communications," adopted 6 November 1991.

(9) INMARSAT–C SES: IMO Resolution A.663(16), "Performance Standards for INMARSAT Standard–C Ship Earth Stations Capable of Transmitting and Receiving Direct-printing Communications," adopted 19 October 1989.

(10) *INMARSAT EGC:* IMO Resolution A.664(16), "Performance Standards for Enhanced Group Call Equipment," adopted 19 October 1989.

(d) The above-referenced documents have been approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Identification data and place to purchase for each of the above-reference documents are listed as follows:

(1) Copies of IMO Resolutions, the 1974 SOLAS Convention, and the 1983 and 1988 amendments to the 1974 SOLAS Convention can be purchased from Publications, International Maritime Organization, 4 Albert Embankment, London SE1 7SR, United Kingdom.

(i) IMO resolution A.525(13) is contained in the Resolutions and Other Decisions of the Assembly of the International Maritime Organization, 13th Session, 1983, (IMO, London, 1984), Sales Number 073 84.07.E.

(ii) IMO Resolutions A.604(15), A.605(15), A.610(15), A.611(15) and A.613(15) are contained in the Resolutions and Other Decisions of the Assembly of the International Maritime Organization, 15th Session, 1987, (IMO, London, 1988), Sales Number 130 88.03.E.

(iii) IMO Resolutions A.662(16), A.663(16) and A.664(16) are contained in the Resolutions and Other Decisions of the Assembly of the International Maritime Organization, 16th Session, 1989, (IMO, London, 1990), Sales Number 136 90.04.E

(iv) IMO Resolutions A.694(17), A.698(17), and A.700(17) can be ordered from IMO by requesting "A.694, A.698, or A.700(17) from the seventeenth session." IMO Resolutions A.694(17), A.698(17), and A.700(17) will be published in the Resolutions and Other Decisions of the Assembly of the International Maritime Organization, 17th Session, 1991.

(2) CCIR Recommendations, ITU Radio Regulations, and CCITT publications can be purchased from the International Telecommunications Union (ITU), Place des Nations, CH–1211 Geneva 20, Switzerland.

(i) All CCIR Recommendations referenced in this Section are contained in Recommendations of the CCIR, 1990, Volume VIII, (ITU, Geneva, 1990), 92–61–0424104.

(ii) CCITT Recommendation E.161 is contained in CCITT Volume II—Telephone and Network ISDN—Operation, Numbering, Routing and Mobile Service, (ITU, Geneva, 1989), ISBN 92–61–03261–3.

(iii) CCITT Recommendation Q.11 is contained in CCITT Blue Book Volume VI, General Recommendation on Telephone Switching and Signalling, (ITU, Geneva, 1989), ISBN 92–61–03451–9.

(3) IEC Publications can be purchased from the International Electrotechnical Commission, 3 Rue de Varembe, CH–1211 Geneva 20, Switzerland, or from the American National Standards Institute (ANSI), 11 West 42nd Street, New York, NY 10036, telephone (212) 642–4900.

(4) ISO Standards can be purchased from the International Organization for Standardization, 1 Rue de Varembe, CH–1211 Geneva 20, Switzerland, or from the American National Standards Institute (ANSI), 11 West 42nd Street, New York, NY 10036, telephone (212) 642–4900.

(5) Copies of the publications listed in this Section that are incorporated by reference may be inspected at the Federal Communications Commission, 1919 M Street, NW., Dockets Branch (room 239), Washington, DC or at the Office of the Federal Register, 800 North Capital Street, NW., suite 700, Washington DC.

3. Section 80.1103 is amended by revising paragraphs (a) and (e) to read as follows:

§ 80.1103 Equipment authorization.

(a) All equipment specified § 80.1101 must be type accepted in accordance with 47 CFR part 2 specifically for GMDSS use, except for equipment used in the INMARSAT space segment which must be type-approved by INMARSAT and notified in accordance with 47 CFR part 2 specifically for GMDSS use. The technical parameters of the equipment must conform to the performance standards as specified in § 80.1101. For emergency position-indicating radiobeacons operating on 406 MHz (406 MHz EPIRBs) that were authorized prior to April 15, 1992, and meet the requirements of § 80.1101, the manufacturer may attest by letter that the equipment (indicate FCC ID#) meets the requirements of § 80.1101 and

request that it be denoted as approved for GMDSS use.

* * * * *

(e) In addition to the requirements in part 2 of this chapter, equipment specified in § 80.1101 shall be labelled as follows: "This device complies with the GMDSS provisions of part 80 of the FCC Rules." Such a label is not required for emergency position-indicating radiobeacons operating on 406 MHz (406 MHz EPIRBs) that were authorized prior to April 15, 1992.

[Docket 89-5; Notice 12]

RIN 2127-AD00

Importation of Vehicles and Equipment Subject to Federal Safety, Bumper and Theft Prevention Standards

AGENCY: National Highway Traffic Safety Administration, (NHTSA), DOT.

ACTION: Technical amendment; final rule.

SUMMARY: This notice contains a technical amendment of the final rule published on September 29, 1989, which established requirements for the importation of motor vehicles and motor vehicle equipment subject to the Federal motor vehicle safety, bumper, and theft prevention standards. The amendment clarifies that vehicles, other than motorcycles, manufactured on and after January 1, 1968, and motorcycles manufactured on and after January 1, 1969, may be imported without the necessity of conformance to the safety standards if their date of entry is a date that is 25 years or more after their date of manufacture.

EFFECTIVE DATE: The amendment is effective January 1, 1993.

FOR FURTHER INFORMATION CONTACT: Taylor Vinson, Office of Chief Counsel, NHTSA, Washington, DC (202-366-5263).

SUPPLEMENTARY INFORMATION: This notice adopts a technical rule that conforms 49 CFR 591.5(i)(1) to the wording of 15 U.S.C. 1397(i).

Section 108(i) of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1397(i)), enacted in 1988 with other amendments pertaining to the importation of motor vehicles, exempts from the necessity of conformance to the Federal motor vehicle safety standards "any motor vehicle that is 25 or more years old." At the time the regulation implementing this exemption became effective, January 31, 1990, the safety standards for vehicles other than motorcycles had been in effect for less than 25 years, specifically, only 22 years, having become effective on January 1, 1968. Motorcycle standards became effective a year later. To avoid confusion concerning the importation of vehicles more than 22 years old, but less than 25 years old, the agency phrased the relevant regulatory language in terms of the dates that the safety standards became effective for motor vehicles. Importation without conformance was allowed upon the declaration that "The vehicle was manufactured before January 1, 1968, or if a motorcycle, before January 1, 1969." (49 CFR 591.5(i)(1), 54 FR 40069).

At that time, the agency noted that, after January 1, 1993, vehicles that were manufactured on or after January 1, 1968, will be relieved of the necessity to conform as they reach 25 years of age. The agency further noted that, during 1992, it would amended paragraph 591.5(i) to implement the 25-year old exclusion effective January 1,1993. NHTSA also noted that there were no comments from the public on this aspect of the importation regulation. Therefore, as it stated on September 29, 1989, the agency is adopting an appropriate amendment to implement this statutory provision.

Because the amendment is technical in nature and has no substantive impact beyond conforming the regulation to the Vehicle Safety Act, and because NHTSA advised the public in 1989 that it would make a conforming amendment in 1992, it is hereby found that notice and public comment thereon are unnecessary. The amendment is effective on January 1, 1993.

List of Subjects in 49 CFR Part 591

Imports, Motor vehicle safety, Motor vehicles.

In consideration of the foregoing part 591 of 49 CFR is amended as follows:

PART 591—[AMENDED]

1. The authority citation for part 591 continues to read as follows:

Authority: Pub. L. 100-562, 15 U.S.C. 1401, 1407; delegation of authority a 49 CFR 1.50 and 501.8.

2. Paragraph 591.5(i)(1) is revised to read as follows:

§ 591.5 Declarations required for importation.

* * * * *

(i)(1) The vehicle is 25 or more years old.

* * * * *

Issued on: September 16, 1992.

Marion C. Blakey,

Acting Administrator.

50 CFR Part 17

RIN 1018-AB66

Endangered and Threatened Wildlife and Plants; Endangered Status for Schwalbea Americana (American Chaffseed)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines the plant, *Schwalbea americana* (American chaffseed), a perennial herb of the figwort family (Scrophulariaceae), to be an endangered species pursuant to the Endangered Species Act of 1973 (Act), as amended. Twenty extant populations of *Schwalbea americana* are found in open pine flatwoods, savannas, and other open areas, in moist to dry acidic sandy loams or sandy peat loams in Florida, Georgia, Mississippi, New Jersey, North Carolina, and South Carolina. However, information received since publication of the listing proposal suggests that one of these populations in Florida may have been extirpated by residential development. The species is known historically from Alabama, Connecticut, Delaware, Kentucky, Maryland, Massachusetts, New York, Tennessee, and Virginia. The species is threatened by widespread habitat destruction due to development and from fire suppression, which allows invasion of vegetation that competes with *Schwalbea americana*. This rule implements the protection provided by the Endangered Species Act of 1973, as amended, for *Schwalbea americana*.

EFFECTIVE DATE: October 29, 1992.

ADDRESSES: The complete file for this species is available for inspection, by appointment, during normal business hours at the New Jersey Field Office, U.S. Fish and Wildlife Service, 927 N. Main Street, Bldg. D-1, Pleasantville, New Jersey 08232.

FOR FURTHER INFORMATION CONTACT: Dana M. Peters at the above address (telephone: 609/646-9310).

SUPPLEMENTARY INFORMATION:

Background

Schwalbea americana (American chaffseed), a perennial member of the figwort family (Scrophulariaceae), was described by Linnaeus in *Species Plantarum* in 1753, and named for Christian Georg Schwalbe, an eighteenth century botanical writer. Pennel (1935) recognized a southern and a northern species, *S. australis* and *S. americana* respectively. He distinguished *S. australis* by a pubescence of mostly upcurved hairs and leaves up to 1.5 cm (0.6 inches) wide, and *S. americana* by mostly recurved hairs and narrower leaves up to 1 cm (0.4 inches) wide or less. However, Fernald (1937) found characters of leaves and calyx lobes to vary over the total range so that recognition of two species was unwarranted. Following an examination of herbarium material, Musselman and Mann (1977) concurred that there was little taxonomic merit in recognizing more than a single species. Therefore, for the purposes of listing, *S. americana* and *S. australis* will be considered one species (*S. americana*) and will be referred to as the monotypic genus *Schwalbea*.

Schwalbea is an erect herb with unbranched stems or branched only at the base and grows to a height of 3 to 8 decimeters (12 to 31 inches). It is densely, but minutely hairy throughout, including the flowers. The leaves are alternate, lance-shaped to elliptic, stalkless, 2 to 5 cm (1 to 2 inches) long, and entire; the upper leaves are reduced to narrow bracts. Large, purplish-yellow, tubular flowers borne singly on short stalks in the axils of the uppermost, reduced leaves (bracts) form a many-flowered, spike-like raceme. The showy flowers have a high degree of bilateral symmetry elaborated for pollination by bees (Pennell 1935). The fruit is a long and narrow capsule, enclosed in a loose-fitting sac-like structure that provides the basis for the common name, chaffseed (Musselman and Mann 1978). Flowering occurs from April to June in the South, and from June to mid-July in the North (Johnson 1988). Fruits mature from early summer in the South to October in the North. *Schwalbea* is a hemiparasite, that is, a plant that is partially dependent on its host. Like most hemiparasitic Scrophulariaceae, it is not host specific, and its rarity, therefore, is not due to its preference for a specialized host.

Characteristically, the species occurs in sandy (sandy peat, sandy loam), acidic, seasonally moist to dry soils. It is generally found in habitats described as open, moist pine flatwoods, fire-maintained savannas, ecotonal areas between peaty wetlands and xeric sandy soils, and other open grass-sedge systems. On population, however, occurs in a heavy clay soil in a hayfield. *Schwalbea* is dependent on factors such as fire, mowing, or fluctuating water tables to maintain the crucial open to partly-open conditions that it requires. The species appears to be shade intolerant. Historically, the species existed on savannas and pinelands throughout the coastal plain and on sandstone knobs and plains inland where frequent, naturally occurring fires maintained these sub-climax communities. Under these conditions, herbaceous plants such as *Schwalbea* were favored over trees and shrubs. Most of the surviving populations, and the most vigorous, are in areas that are still subject to frequent fire. These fire-maintained habitats include plantations that are prescribed burned for management of quail and other game species, an army base impact zone that burns regularly because of live artillery shelling, forest management areas that are burned to maintain habitat for wildlife including the red-cockaded woodpecker, and various other private lands that are burned to maintain open fields. Fire may be important to the species in ways that are not yet documented or understood. Two small populations, one in New Jersey (along a roadside in Lebanon State Forests) and one in Mississippi (in a hayfield on the Noxubee National Wildlife Refuge) survive in frequently mowed areas that are not burned.

As indicated by Kral (1983), *Schwalbea* occurs in species-rich plant communities where grasses, sedges, and other colorful savanna dicots are especially numerous. One South Carolina population co-occurs with two other plant species being considered for listing under the Act, *Parnassia caroliniana* and *Eulophia ecristata* (Rawinski and Cassin 1986).

In 1986 the Fish and Wildlife Service (Service) contracted with The Nature Conservancy's Eastern Regional Office to conduct status surveys for *Schwalbea* (Rawinski and Cassin 1986). More recently The Nature Conservancy's New Jersey Field Office prepared an Element Stewardship Abstract for *Schwalbea* (Johnson 1988). Based on these reports and additional input from various sources in the respective States, it is known that the species occurred historically in 15 States including Alabama, Connecticut, Delaware, Florida, Georgia, Kentucky, Maryland, Massachusetts, Mississippi, New Jersey, New York, North Carolina, South Carolina, Tennessee, and Virginia at a total of approximately 78 sites. One historic record from Louisiana is considered erroneous (Annette Parker, Louisiana Heritage Program, *in litt.*, 1986). Today, 20 populations of the species are known, including: one on the Lebanon State Forest in New Jersey (Burlington County), one on Fort Bragg, North Carolina (Hoke County), one on the Noxubee National Wildlife Refuge in Mississippi (Noxubee County), four on the Francis Marion National Forest in South Carolina (Berkeley and Charleston Counties), four on private land in Georgia (Baker and Dougherty Counties), two on private land in Florida (Gadsden and Leon Counties), and seven on private land in South Carolina (Berkeley, Horry, Jasper, Sumter, and Williamsburg Counties). According to a report received since publication of the proposed rule, one of the populations in Florida may have been recently extirpated by residential development (Loran Anderson, The Florida State University, *in litt.*, 1991), thus reducing the number of extant populations to 19. The species is extirpated from Alabama, Connecticut, Delaware, Kentucky, Maryland, Massachusetts, New York, Tennessee, and Virginia, 9 of the 15 states where it was historically reported. This plant, always considered rare, appears to have suffered a drastic decline in populations and range. The one small population in New Jersey is the only population north of North Carolina. Despite intensive searches of historic stations and potentially suitable habitat, this species remains very rare, and many historic populations are confirmed extirpated due to habitat destruction, mostly by development (Rawinski and Cassin 1986).

Federal consideration of this plant for listing began with acceptance by the Service of *Endangered and Threatened Plants of the United States* (Ayensu and DeFilipps 1978) as a listing petition within the context of Section 4 of the Act. This report recommended *Schwalbea americana* for "threatened status." The Service's subsequent actions in relation to the Smithsonian petition are explained in detail in the "Relationship to Petition Requirements' section of the February 21, 1990 (55 FR 6184) comprehensive plant notice of review.

Additional petition findings involving *Schwalbea* were published on January 20, 1984 (49 FR 2485), May 10, 1985 (50

FR 19761), January 9, 1986 (51 FR 996), June 30, 1987 (52 FR 24312), July 7, 1988 (53 FR 25511), December 29, 1988 (53 FR 52746), and April 25, 1990 (55 FR 17475). The Service published the proposed rule for this species on September 11, 1991 (56 FR 46277). That proposal constituted the Service's final finding on the petition, required by the Endangered Species Act.

Summary of Comments and Recommendations

In the September 11, 1991, proposed rule (56 FR 46277) and associated notifications, all interested parties were requested to submit factual reports or information by November 12, 1991, that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. Newspaper notices were published in The Horry Independent, The News, Sumter Item, The Albany Herald, The Fayetteville Observer, The Beaufort Gazette, The Macon Beacon, Gadsden County Times, Burlington County Times, and The News and Courier between September 25 and September 27, 1991, which invited general public comment. A total of 15 comments were received. One letter was from a private citizen in South Carolina who requested a public hearing to discuss concerns regarding the proposed listing and its potential curtailment of activities on private land. The Service contacted this citizen and provided further information on the species and on the Endangered Species Act. This citizen considered his concerns adequately addressed by this additional information and subsequently withdrew the request for a public hearing. One letter, from the Tennessee Valley Authority, requested additional locational information on the species, which the Service is addressing. One letter, from Burlington County in New Jersey, offered information on proposed highway improvements near the one extant New Jersey population. The remaining 12 letters, from The Pinelands Commission, U.S. Forest Service, The Florida State University, Florida Office of the Governor, Florida Game and Fresh Water Fish Commission, Florida Department of Agriculture and Consumer Services, Florida Natural Areas Inventory, The New Jersey Department of Environmental Protection and Energy, The Nature Conservancy (Mississippi Office), The Nature Conservancy (Georgia Field Office), the Center for Plant Conservation, and a private botanist known for his knowledge of the species supported the proposal. Comments updating the data presented in the Background of Summary of Factors Affecting the Species are incorporated in those sections of this final rule.

Further information received after the comment period provided reports of two additional locations for the species: one in Florida, and one in Georgia (Wilson Baker, Tall Timbers Research Station, Tallahassee, Florida, pers. comm., 1992). Since other recently received information suggests that another Florida population may have been extirpated, the total number of extant sites is now 19 or 20. Based upon available information on rarity and threats, the Service retains the position that *Schwalbea* is most appropriately designated as "endangered," as it is in danger of extinction in the foreseeable future.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. *et seq.*) and regulations promulgated to implement the listing provisions of the Act (50 CFR Part 424) set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in Section 4(a)(1). These factors and their application to *Schwalbea americana* L. (American chaffseed) are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of its Habitat or Range

Schwalbea has been and continues to be endangered by destruction and adverse alteration of its habitat. Since discovery of this species, 60 (three-fourths) of the known populations have been extirpated due to conversion of the habitat to residential and commercial purposes, incompatible agriculture and forestry practices, and succession of the vegetative community due to fire suppression. Sandy pineland communities where the species exists have proven to be especially vulnerable to development because soils are level, deep, and suitable for building sites. Also, many *Schwalbea* populations were or are very near the Atlantic Coast where development pressures are severe (Rawinski and Cassin 1986). Habitat destruction presently taking place on Cape Cod, Massachusetts exemplifies the situation throughout much of the range of *Schwalbea*. None of the 10 historic Massachusetts populations of this plant have been relocated and other potentially suitable habitat is being destroyed at a rapid rate. In Florida, four of the seven historic sites are confirmed extirpated because of habitat destruction (Rawinski and Cassin 1986). In New Jersey, a population was extirpated in 1988 by the construction of a street for new housing (David Snyder, New Jersey Natural Heritage Program, *in litt.*, 1988). Development was a factor in the demise of at least 15 other populations rangewide (Johnson 1988).

Current threats to extant populations include destruction of habitat due to development, agriculture, or forestry practices, succession of vegetation, and improper management that renders the habitat unsuitable. Impending development is an immediate threat to two of the extant populations in South Carolina, and a report received since the publication of the proposed rule states that a population in Florida may have been recently extirpated by residential development. Development or succession of habitat is a potential threat to four other populations on private land. Development adjacent to extant populations may also pose a threat since urbanization generally results in fire suppression and thus possible succession of field habitats. The threats due to fire suppression will be discussed in more detail under Factor E.

B. Overutilization for Commercial, Recreational, Scientific or Educational Purposes

One extant population has been adversely affected due to removal of plants by an employee of a botanical garden for transplanting to the garden. This population was also adversely affected by a local photography club that dug up plants to photograph them under studio conditions, and by careless photographers and onlookers who have trampled the site. Attention due to listing could result in further threats to accessible populations due to collection and trampling from curiosity seekers and vandals.

C. Disease or Predation

Disease and predation have not been documented as factors in the decline of this species.

D. The Inadequacy of Existing Regulatory Mechanisms

In Mississippi, *Schwalbea* is not on an official list and there is no protection for the species.

In Georgia, *Schwalbea* is currently being proposed as endangered on the official State list. If this listing is completed, the species will receive protection under The Georgia Wildflower Preservation Act of 1973.

This Act prohibits digging, removal, or sale of State listed plants from public lands without the approval of the Georgia Department of Natural Resources. However, the four *Schwalbea* populations in Georgia are on private land and would not benefit from the protection of this Act. Three of these populations receive limited protection through voluntary, informal landowner agreements with The Nature Conservancy.

In South Carolina, *Schwalbea* is recognized as "of national concern" by the South Carolina Advisory Committee on rare, threatened, and endangered plants; however, this State offers no legal protection to recognized species.

In Florida, *Schwalbea* is listed as endangered by the State of Florida under the Preservation of Native Flora of Florida Act, Section 581.185–187, Florida Statute. This Act prohibits removal of State-listed plants from public lands or from private lands without written permission of thelandowners.

In North Carolina, *Schwalbea* is officially recognized as endangered. North Carolina General Statute 19–B, 202.12–202.19, provides State listed plants protection from intra-state trade without a permit, provides for monitoring and management of listed populations, and prohibits taking of plants without written permission of landowners.

In New Jersey, *Schwalbea* is listed as endangered on the Endangered Plant Species List authorized by the Endangered Plant Species List Act (N.J.S.A. 7:5C). This list provides recognition to listed plants, but does not provide regulatory protection to the species from collection, habitat loss, or degradation. The population in New Jersey occurs within the Lebanon State Forest and within the Pinelands Reserve. The State Forest does not provide any specific protection to the species. Pursuant to the policy to preserve, protect, and enhance the diversity of plant communities through regulation of development, the Pinelands Protection Act (N.J.S.A. 13:18–1 et seq.) states that no development within the Pinelands Reserve shall be carried out unless it is designed to avoid irreversible adverse impacts to the survival of populations of threatened or endangered plants listed therein. Despite the location of the New Jersey population within the Pinelands Reserve, it is still subject to severe adverse impacts. It is located next to a roadway in an area maintained by the highway department. This type of maintenance is exempt from the aforementioned protection of threatened or endangered species. Current management of this population consists of yearly mowing and is conducted through an informal agreement involving several parties, including the New Jersey Department of Environmental Protection and Energy, a local concerned botanist, a farmer who leases the State land supporting the population, and the Burlington County Highway Department. Protection of the site is inadequate. Vehicles routinely pull off of the road, damaging plants and disturbing the habitat. The New Jersey Office of Natural Lands Management is currently proposing to formalize an agreement with all involved parties to protect and properly manage this population.

Only North Carolina and Florida have legislation protecting *Schwalbea* from taking, and only New Jersey has some protection for the plant's habitat. The primary threat to *Schwalbea* is habitat destruction and lack of habitat management, therefore, existing legislation is inadequate.

E. Other Natural or Manmade Factors Affecting Continued Existence

As mentioned in Factor "A," fire or another suitable form of disturbance, such as well-timed mowing, is essential to maintain the sub-climax community where this species exists. Although corroborating research is lacking, botanists familiar with the species believe that *Schwalbea* may be adapted to a regular fire regime. Historically, naturally-occurring lightning-strike fires throughout *Schwalbea*'s range and more frequent burning, as practiced by pre-European human populations, maintained these conditions. These fires were possibly frequent enough that fuel did not accumulate and, thus, they were generally of low-intensity. Herbaceous species were favored over tree and shrub species and thrived in these conditions. With the general suppression of natural fires in this century, the habitat for this species has been greatly reduced. Without fire, open grass-sedge communities proceed through seral stages and become dominated by trees, shrubs and dense herbaceous growth that overtops *Schwalbea*. The species appears to be shade intolerant. If fire is suppressed for more than three years, the *Schwalbea* population declines as other species shade and out-compete it (Douglas Rayner, Wofford College, pers. comm., 1991). Without naturally occurring fires, management in the form of prescribed burns or mowing may be necessary to maintain the sub-climax community and perpetuate *Schwalbea* populations. However, excessive mowing or disturbance could eliminate populations, and there are questions concerning the optimal timing and frequency of burning or mowing. Further research on the effects of prescribed burning and mowing, and on soil moisture variation is needed to determine the best management techniques that will maintain viable populations of the species Also, research is needed to determine the extent and viability of seed banks for the species at historic locations.

Twelve of the 20 known populations of *Schwalbea* contain fewer than 100 plants with 6 of these populations having less than 20 plants. These isolated and critically small populations are highly vulnerable to extinction. Extreme isolation, whether by geographic distance, ecological factors or reproductive strategy, prevents the influx of new genetic material and can result in a highly inbred population with low viability or fecundity (Chesser 1983). In addition, current knowledge of the species biology and population dynamics is insufficient to assess whether *Schwalbea* could persist following a natural event such as drought or high-intensity fire.

The Service has carefully assessed the best scientific information available regarding the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list *Schwalbea americana* as endangered. The species is extirpated from over half of its historic range. Only 20, or possibly 19, populations, approximately one-fourth of the recorded historic populations, are known to persist. Existing populations are threatened by the continuation of fire suppression, development, and potential mismanagement of habitat. Specific habitat requirements and optimum management regimes are unknown; lack of such critical information greatly hampers efforts to protect and perpetuate this species. These factors support listing as an endangered species. Critical habitat is not being designated for reasons discussed in the following section.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species that is considered critical habitat at the time the species is determined to be endangered or threatened. Designation of critical habitat is not prudent if one or both of the following situations exist: (1) The species is threatened by taking or other human activity, and identification

of critical habitat can be expected to increase the degree of threat to the species, or (2) such designation of critical habitat would not be beneficial to the species (50 CFR 424.12(a)(1)).

The Service finds that designation of critical habitat is not prudent for *Schwalbea americana* at this time because such designation will exacerbate threats from collecting and trampling. As noted under Factor "B", above, collecting and careless trampling by photographers have already adversely affected at least one population. The Act furnishes listed plants with very limited protection from take, prohibiting collection and harm only when plants are located on Federally administered lands or in situations where take is perpetrated in knowing violation of a State law or regulation. Only six *Schwalbea* populations are located on lands under Federal jurisdiction. Most populations are small to moderate in size and, therefore, even occasional collecting and trampling could exert significant adverse impacts on them. Publication of critical habitat descriptions and maps in the **Federal Register** could increase these threats to the survival of the species, overriding any protection that such designation might provide.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such activities are initiated by the Service following listing.

Conservation and management of *Schwalbea* will likely involve a combination of site protection through acquisition or landowner agreements and habitat manipulation to maintain early successional habitats. Listing *Schwalbea americana* will encourage research on critical aspects of its life history and population ecology, and the effects of fire, mowing and soil moisture variation on population establishment and maintenance. This information is necessary to determine the optimal timing and frequency of these management techniques.

The protection required of Federal agencies and the prohibitions against certain activities involving listed plants are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of listed species or result in destruction or adverse modification of critical habitat. If a proposed Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. Federal actions that could impact *Schwalbea* include, but are not limited to, incompatible forestry and wildlife management practices, and construction of access roads to accommodate changes in military bombing practice areas on lands under Federal jurisdiction. The Service will work with the involved agencies to secure protection and proper management of *Schwalbea* while accommodating agency activities to the extent possible.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62 and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plants. All trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, sell or offer for sale this species in interstate or foreign commerce, or to remove and reduce to possession the species from areas under Federal jurisdiction. In addition, for listed plants, the 1988 amendments (Pub. L. 100–478) to the Act prohibit the malicious damage or destruction on Federal lands and the removal, cutting, digging up, or damaging or destroying of listed plants in knowing violation of any State law or regulation, including State criminal trespass law. Certain exceptions apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. It is anticipated that few trade permits would ever be sought or issued because the species is not common in cultivation or in the wild. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, Rm 432, 4401 N Fairfax Dr., Arlington VA 22203–3507 (703/358–2104).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Regulation Promulgation

PART 17—[AMENDED]

Accordingly, part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, is amended as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1543; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat 3500; unless otherwise noted.

2. Amend § 17.12(h) by adding the following, in alphabetical order under the family Scrophulariaceae, to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

BILLING CODE 4310–55–M

Proposed Rules

Federal Register
Vol. 57, No. 189
Tuesday, September 29, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1413

RIN 0560-AC63

1993 Upland Cotton Program

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: The Agricultural Act of 1949 (1949 Act), as amended, requires the Secretary of Agriculture to implement an acreage reduction program (ARP) for upland cotton which will result in a ratio of carry-over to total disappearance of 30 percent. This proposed rule would amend the regulations to set forth the acreage reduction percentage for the 1993 crop of upland cotton.

DATES: Comments must be received on or before October 14, 1992, in order to be assured of consideration.

ADDRESSES: Comments must be mailed to Deputy Administrator, Policy Analysis, Agricultural Stabilization and Conservation Service (ASCS), U.S. Department of Agriculture (USDA), room 3090–S, P.O. Box 2415, Washington, DC 20013–2415.

FOR FURTHER INFORMATION CONTACT: Minnie Tom H. Meyer, Fibers and Rice Analysis Division, USDA, ASCS, room 3754–S, P.O. Box 2415, Washington, DC 20013–2415 or call 202–720–6734. The Preliminary Regulatory Impact Analysis describing the options considered in developing this proposed rule and the impact of the implementation of each option is available on request from the above-named individual.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under USDA procedures established in accordance with Executive Order 12291 and provisions of Departmental Regulation 1512–1 and has been classified as "major." It has been determined that an annual effect on the economy of $100 million or more may result from implementation of the provisions of this proposed rule.

It has been determined that the Regulatory Flexibility Act is not applicable to this proposed rule since the Commodity Credit Corporation is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of these determinations.

It has been determined by an environmental evaluation that this action will not have a significant impact on the quality of the human environment. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

The title and number of the Federal Assistance Program, as found in the catalog of Federal Domestic Assistance, to which this rule applies are: Cotton Production Stabilization—10.052.

This proposed rule has been reviewed in accordance with Executive Order 12778. The provisions of the proposed rule do not preempt State laws, are not retroactive, and do not involve administrative appeals.

This program/activity is not subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. See notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115 (June 24, 1983).

The amendments to 7 CFR part 1413 set forth in this proposed rule do not contain information collections that require clearance by the Office of Management and Budget under the provisions of 44 U.S.C. chapter 35.

Comments are requested with respect to this proposed rule and such comments shall be considered in developing the final rule.

In accordance with section 103B of the 1949 Act, an acreage reduction program (ARP) is required to be implemented for the 1993 crop of upland cotton if it is determined that the total supply of upland cotton, in the absence of an ARP, will be excessive, taking into account the need for an adequate carry-over to maintain reasonable and stable supplies and prices and to meet a national emergency.

Land diversion payments also may be made to producers of upland cotton, whether or not an ARP for upland cotton is in effect, if needed to assist in adjusting the total national acreage of upland cotton to desirable goals. If, at the time of final announcement of the ARP, the projected carry-over of upland cotton for the crop year is equal to or greater than 8 million bales, a paid land diversion shall be offered to upland cotton producers. A paid land diversion has not been considered because, given the existing supply/use situation, it is not needed.

If an ARP is announced, the reduction shall be achieved by applying a uniform percentage reduction (from 0 to 25 percent) to the upland cotton crop acreage base for the crop for each upland cotton-producing farm. In making such a determination, the number of acres placed into the agricultural resources conservation program established under subtitle D of title XII of the Food Security Act of 1985, as amended, must be taken into consideration.

Producers who knowingly produce upland cotton in excess of the permitted upland cotton acreage for the farm plus any upland cotton acreage planted in accordance with the flexibility provisions are ineligible for upland cotton loans and payments with respect to that farm.

If it is determined that an ARP for the 1993 crop of upland cotton is needed, a preliminary announcement of the ARP uniform percentage requirement (from 0 to 25 percent) must be made not later than November 1 of the calendar year preceding the year in which the crop is harvested. Not later than January 1 of the calendar year in which the crop is harvested, a final announcement of the ARP uniform percentage requirement must be made. Producers in early planting areas may elect to participate in the program on the terms of the ARP first announced for the crop, or as subsequently revised, if the Secretary determines that the procedures may be unfairly disadvantaged by the revision.

The ARP for the 1993 crop of upland cotton must be set at a level that will result in a ratio of carry-over to total disappearance of 30 percent, based on the most recent projection of carry-over and total disappearance at the time of announcement of the ARP. For the purposes of this provision, the term "total disappearance" means all upland cotton utilization, including total domestic, total export, and total residual disappearance.

Based on August 1992 supply/use estimates, ending stocks for the 1993 marketing year under a 5-percent ARP, a 10-percent ARP and a 15-percent ARP are 5.05 million bales, 4.80 million thousand bales and 4.55 million bales, respectively. Such ARP levels would result in ratios of carry-over to total disappearance of 0.309, 0.296 and 0.283, respectively. For the purposes of this proposed rule, these three ARP options will be considered. However, because of changes in the supply/use situation that may develop between now and November 1, the actual announced preliminary ARP may be different from the options discussed in this notice and may include a 0-percent ARP.

The estimated impacts of the ARP options are shown in the following table.

UPLAND COTTON SUPPLY/DEMAND ESTIMATES

Item	Option 1	Option 2	Option 3
ARP (%)	5	10	15
Participation (%)	88	86	84
Planted Acres (thousand)	13,500	13,100	12,700
Production (thousand bales)	17,400	17,000	16,600
Domestic Use (thousand bales)	9,850	9,800	9,750
Exports (thousand bales)	6,500	6,400	6,300
Ending Stocks (thousand bales)	5,050	4,800	4,550
Carry-over/Disappearance	0.309	0.296	0.283
Deficiency Payments ($ million)	1,046	949	854

Accordingly, comments are requested as to the 1993 acreage reduction percentage for upland cotton. The final determination of this percentage will be set forth at 7 CFR part 1413.

List of Subjects in 7 CFR 1413

Cotton, Feed grains, Price support programs, Rice, Wheat.

Accordingly, it is proposed that 7 CFR part 1413 be amended as follows:

PART 1413—FEED GRAIN, RICE, UPLAND AND EXTRA LONG STAPLE COTTON, WHEAT AND RELATED PROGRAMS

1. The authority citation for 7 CFR part 1413 continues to read as follows:

Authority: 7 U.S.C. 1308, 1308a, 1309, 1441–2, 1444–2, 1444f, 1445b–3a, 1461–1469; 15 U.S.C. 714b and 714c.

2. Section 1413.54 is amended by adding paragraph (a)(3)(iii) and revising paragraph (d)(3) as proposed at 57 FR 34090 (August 3, 1992), to read as follows:

§ 1413.54 Acreage reduction program provisions.

(a) * * *

(3) * * *

(iii) 1993 upland cotton shall be within the range of 0 to 25 percent, as determined and announced by CCC;

* * * * *

(d) * * *

(3) Shall not be made available to producers of the 1993 crops of wheat, feed grains, rice and upland cotton.

* * * * *

Signed at Washington, DC on September 24, 1992.

Keith D. Bjerke,

Executive Vice President, Commodity Credit Corporation.

[FR Doc. 92–23662 Filed 9–25–92; 10:29 am]

BILLING CODE 3410–05–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92–NM–158–AD]

Airworthiness Directives; de Havilland, Inc., Model DHC–7 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain de Havilland Model DHC–7 series airplanes. This proposal would require an inspection to determine whether rivets securing the upper longeron in each inner nacelle were installed during production, and modification of the upper longerons, if necessary. This proposal is prompted by reports that four rivets securing the upper longeron in each engine inner nacelle may have been omitted inadvertently during production. The actions specified by the proposed AD are intended to prevent reduced structural integrity of the engine nacelles.

DATES: Comments must be received by November 9, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airport Directorate, ANM–103, Attention: Rules Docket No. 92–NM–158–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays

The service information referenced in the proposed rule may be obtained from de Havilland, Inc., Garratt Boulevard, Downsview, Ontario M3K, 1Y5, Canada. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Sol Maroof, Aerospace Engineer, Airframe Branch, ANE–172, FAA, Engine and Propeller Directorate, 181 South Franklin Avenue, room 202, Valley Stream, New York 15581; telephone (516) 791–6220; fax (516) 791–9024.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92–NM–158–AD." The postcard will be stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–158–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion: Transport Canada Aviation, which is the airworthiness authority for Canada, recently notified the FAA that an unsafe condition may exist on certain de Havilland Model DHC–7 series airplanes. Transport Canada Aviation advises that the manufacturer has indicated that four rivets securing the upper longeron in each engine inner nacelle may have been omitted inadvertently during production of certain de Havilland Model DHC–7 series airplanes. This condition, if not corrected, could result in reduced structural integrity of the engine nacelles.

De Havilland has issued Service Bulletin 7–54–9, dated February 29, 1980, which describes procedures for inspecting the engine nacelles to determine whether rivets that secure the upper longeron to each engine nacelle have been installed, and modification of the upper longerons (Modification No. 7/1707), if necessary. Modification No. 7/1707 encompasses the installation of four Jo-bolts in drilled holes in each inner nacelle upper longeron. Transport Canada Aviation classified this service bulletin as mandatory and issued Canadian Airworthiness Directive CF–91–10, dated May 10, 1991, in order to assure the continued airworthiness of these airplanes in Canada.

This airplane model is manufactured in Canada and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, Transport Canada Aviation has kept the FAA informed of the situation described above. The FAA has examined the findings of Transport Canada Aviation, revised all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require inspection to detect missing rivets of the upper longeron in each inner nacelle, and modification of the upper longerons, if necessary. The actions would be required to be accomplished in accordance with the service bulletin described previously.

The FAA estimates that 4 de Havilland Model DHC–7 series airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. The cost of parts is expected to be negligible. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $220. This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD action.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

De Havilland, Inc.: Docket 92–NM–158–AD.

Applicability: Model DHC–7 series airplanes; serial numbers 1 through 7, inclusive, and 9, 10, and 11; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced structural integrity of the engine nacelles, accomplish the following:

(a) Within 6 months after the effective date of this AD, conduct an inspection to determine whether rivets that secure the upper longerons in each inner engine nacelle have been installed, in accordance with de Havilland Service Bulletin 7–54–9, dated February 29, 1980.

(1) If any rivets are missing, prior to further flight, accomplish Modification No. 7/1707, in accordance with the service bulletin.

(2) If all rivets are detected, no further action is required by this AD.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, New York Aircraft Certification Office (ACO), ANE–170, FAA, Engine and Propeller Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, New York ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the New York ACO.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on September 8, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92–23565 Filed 9–28–92; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 71

[Airspace Docket No. 92-AWP-16]

Proposed Enlargement of the Riverside, CA 700 Foot Mean Sea Level (MSL) and Above Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: This notice proposes to enlarge the 700 foot MSL and above Riverside transition area. This addition to the transition area would provide controlled airspace for aircraft executing a missed approach for the very high frequency omnidirectional-range B (VOR-B) standard instrument approach procedure (SIAP) to Riverside Muni Airport, CA.

DATES: Comments must be received on or before November 15, 1992.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Attn: Manager, System Management Branch, AWP-530, Docket No. 92-AWP-16, Air Traffic Division, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009.

The official docket may be examined in the Office of the Regional Counsel, Western-Pacific Region, Federal Aviation Administration, room 6W14, 15000 Aviation Boulevard, Lawndale, CA.

An informal docket may be examined during normal business hours at the Office of the Manager, System Management Branch, Air Traffic Division at the above address.

FOR FURTHER INFORMATION CONTACT: Gene Enstad, Airspace Specialist, System Management Branch, AWP-530, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261, telephone (310) 297-0010.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with the comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 92-AWP-16." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the System Management Branch, Air Traffic Division, at 15000 Aviation Boulevard, Lawndale, California 90261, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with the rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, System Management Branch, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedures.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to enlarge the Riverside, CA 700 foot MSL and above transition area. This enlargement of the Riverside transition area would contain the holding pattern for aircraft executing the missed approach for the VOR-B SIAP. While most of the missed approach is contained in existing 700 foot MSL and above transition area, an additional area of approximately one mile by five miles is needed at the south end of the missed approach pattern to ensure containment. Transition areas are published in § 71.181 of FAA Handbook 7400.7, effective November 1, 1991, which is incorporated by reference in 14 CFR 71.1. The transition area listed in this document would be published subsequently in the Handbook.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 10034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Incorporation by reference, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Administration proposes to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS, JET ROUTES, AND AREA HIGH ROUTES

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854; 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7, Compilation of Regulations, published April 30, 1991, and effective November 1, 1991, is amended as follows:

Section 71.181 Designation

* * * * *

AWP CA TA Riverside, CA [Revised]

That airspace extending upward from 700 feet above the surface bounded by a line beginning at lat. 34°10'00"N, long. 117°59'00"W; to lat. 34°10'00"N, long. 117°01'00"W; to lat. 34°00'00"N, long. 117°01'00"W; to lat. 33°42'30"N, long. 116°56'30"W; to lat. 33°38'00"N, long. 117°09'00"W; to lat. 33°43'00"N, long. 117°15'00"W; to lat. 33°43'00"N, long. 117°20'00"W; to lat. 33°42'00"N, long. 117°20'00"W; to lat. 33°42'00"N, long. 117°25'00"W; to lat. 33°39'00"N, long. 117°25'00"W; to lat. 33°39'00"N, long. 117°30'00"W; to lat. 33°46'00"N, long. 117°45'00"W; to lat. 33°56'00"N, long. 117°53'00"W; to lat. 33°56'00"N, long. 117°59'00"W, thence to the point of beginning.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 90-AEA-03]

Proposed Alteration of Control Zone and Transition Area; Du Bois, PA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: The FAA is proposing to alter the description of the Du Bois, PA, Control Zone and 700 foot Transition Area due to a review of air traffic control procedures in the area. Subsequent to the publication of the original proposal, the Du Bois Nondirectional Radio Beacon (NDB) has failed flight checks. This has resulted in the Du Bois NDB being removed from service permanently. The removal of this equipment and the termination of the proposed instrument approach procedure development necessitates a reduction in the 700 foot Transition Area northeast extension width described in the original proposal. This proposal would modify that amount of controlled airspace deemed necessary by the FAA to contain aircraft operating under instrument flight rules. This notice supersedes the original proposal in airspace docket number 90-AEA-03 which was originally issued on January 25, 1990.

DATES: Comments must be received on or before October 30, 1992.

ADDRESSES: Send comments on the rule in triplicate to: John W. Kies, Acting Manager, System Management Branch, AEA-530, Docket No. 90-AEA-03. F.A.A. Eastern Region, Fitzgerald Federal Building #111, John F. Kennedy Int'l Airport, Jamaica, NY 11430.

The official docket may be examined in the Office of the Assistant Chief Counsel, AEA-7, F.A.A. Eastern Region, Fitzgerald Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430.

An informal docket may also be examined during normal business hours in the System Management Branch, AEA-530, F.A.A. Eastern Region, Fitzgerald Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430.

FOR FURTHER INFORMATION CONTACT: Mr. Curtis L. Brewington, Designated Airspace Specialist, System Management Branch, AEA-530, F.A.A. Eastern Region, Fitzgerald Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553-0857.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commentors wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 90-AEA-03". The postcard will be date/time stamped and returned to the commentor. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Office of the Assistant Chief Counsel, AEA-7, F.A.A. Eastern Region, Fitzgerald Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise the Control Zone and Transition Area established at Du Bois, PA, due to numerous revisions to air traffic control procedures in the area. The Control Zone and Transition Area descriptions were republished in §§ 71.171 and 71.181 of FAA Handbook 7400.7 effective November 1, 1991, which is incorporated by reference in 14 CFR 71.1. The Control Zone and Transition Area listed in this document would be published subsequently in the Handbook.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that, when promulgated, this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones, Transition areas, Incorporation by reference.

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. App. 1348(a), 1354(a), 1510; E.O. 10854; 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7, Compilation of Regulations, published April 30, 1991, and effective November 1, 1991, is proposed to be amended as follows:

Section 71.171 Designation

* * * * *

AEA PA CZ Du Bois, PA [Revised]
Du Bois-Jefferson County Airport, Du Bois, PA (lat. 41°10'42"N., long. 78°53'56"W.)
Clarion, PA, VORTAC (lat. 41°08'46"N., long. 79°27'30"W.)
Du Bois ILS northeast course OM (lat. 41°13'11"N., long. 78°48'09"W.)
That airspace extending upward from the surface within a 4-mile radius of the Du Bois-Jefferson County Airport and within 2.6 miles each side of the Du Bois-Jefferson County Airport ILS localizer northeast course, extending from the 4-mile radius to 7.4 miles northeast of the OM and within 2.2 miles each side of the Clarion, PA. VORTAC 086° (T) 092° (M) radial, extending from the 4-mile radius zone to 20 miles east of the VORTAC and within 2.2 miles each side of a 242° (T) 248° (M) bearing from a point at lat. 41°10'30"N., long. 78°54'30"W., extending from said point to 4.8 miles southwest of said point.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 10

Temporary Importation Bonds; Anticipatory Breach, Assessment Amounts, Petitions for Relief

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document proposes to amend the Customs Regulations to permit anticipatory breach and provide for early payment of liquidated damages in Temporary Importation Bond cases. It also proposes to amend the Regulations to permit assessment of liquidated damages in excess of double the duties in those cases where the district director requires extra bonding in order to protect the revenue and that the term "duties" for TIB bonding and assessment shall also include any applicable merchandise processing fees or harbor maintenance fees that otherwise would be charged on an entry for consumption. Finally, the document proposes to amend the Regulations to eliminate forwarding of petitions for relief in TIB cases to Customs Headquarters when the bond principal or surety is dissatisfied with the decision on the petition afforded by the district director, and provide for their processing in the same manner as other liquidated damages cases.

DATES: Comments must be received on or before November 30, 1992.

ADDRESSES: Comments (preferably in triplicate) may be submitted to and inspected at the Regulations and Disclosure Law Branch, room 2119, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: Jeremy Baskin, Penalties Branch, Office of Regulations and Rulings, 202-927-0870.

SUPPLEMENTARY INFORMATION:

Background

Under the provisions of Chapter 98, Subchapter XIII, Harmonized Tariff Schedule of the United States (HTSUS), merchandise may be entered under the terms of a Temporary Importation Bond (TIB) without the payment of duties if the merchandise is entered for a specific purpose enumerated in Subchapter XIII, HTSUS. Per U.S. Note 1 to Subchapter XIII, the merchandise is permitted to remain in the United States for a one-year period subsequent to the date of importation with a maximum of two one-year extensions allowed. Prior to the expiration of the bond period or any properly approved extension thereof, the merchandise must be exported or destroyed under Customs supervision. Failure to export or destroy in a timely manner results in the imposition of liquidated damages against the importer.

Instances arise where, after initiation of a TIB entry, the importer decides that the merchandise will remain in the United States in violation of the terms of the bond. Rather than wait for the one-year period to end and for liquidated damages to be assessed, importers have inquired as to the possibility of early payment of liquidated damages. Customs Regulations currently do not provide for an anticipatory breach of a TIB. Through this document, it is proposed to amend § 10.39 to permit said anticipatory breach and allow the importer to pay the full measure of liquidated damages and thereby close the bond. Through payment of the liquidated damages, the importer will waive his right to receipt of notice of a claim for liquidated damages pursuant to § 172.1(a) and concomitantly waive his right to file a petition for relief.

For TIB entries, the provisions of 10.31(f) require that a bond shall be given containing the conditions set forth in § 113.62 in an amount equal to double the duties which it is estimated would accrue (or such larger amount as the district director shall state in writing to the entrant is necessary to protect the revenue) had all the articles covered by the entry been entered under an ordinary consumption entry or in an amount equal to 110 percent of the duties in the cases of samples used solely for taking orders, motion-picture advertising films and professional equipment and tools of trade. By contrast, under the provisions of 10.39(d)(1), if any article entered under Chapter 98, Subchapter XIII, HTSUS, has not been exported or destroyed in accordance with the regulations within the period of time during which the articles may remain in the Customs territory of the United States under bond (including any lawful extension), the district director shall make a demand in writing under the bond for the payment of liquidated damages equal to double the estimated duties applicable to such entry, unless a lower amount is prescribed by § 10.31(f).

On the one hand, § 10.31(f) empowers the district director to require a bond in excess of double or 110 percent of the duties, but the provisions of § 10.39(d)(1) only permit him to assess liquidated damages at double the estimated duties, 110 percent of the duties or such lower amount as prescribed by § 10.31(f). These regulations can provide anomalous results and inefficient protection of the revenue. Accordingly, this document proposes to amend § 10.39(d)(1) to permit, in the case of breach of a TIB, assessment of liquidated damages in an amount equal to double the estimated duties, 110 percent of the estimated duties or any different amount prescribed by § 10.31(f) rather than only a lower amount.

When a TIB entry is filed, no merchandise processing fees or harbor

maintenance fees are charged to the importer of record. However, section 111 of the Customs and Trade Act of 1990 (Pub. L. 101–382) amended 19 U.S.C. 58c(g) (the statute which requires payment of the merchandise processing fee) to provide that all administrative and enforcement provisions of the Customs laws and regulations, except those relating to drawback, shall apply with respect to any fee prescribed under section 58c(a) (which requires payment of the merchandise processing fee), and with respect to persons liable therefor, as if such fee is a customs duty. Any penalty which is expressed in terms of a relationship to the amount of the duty (e.g., liquidated damages expressed in terms of an amount equal to double the estimated duties due on an entry) shall be assessed as a multiple of the unpaid fee. Accordingly, when calculating the bond amount or the measure of liquidated damages for breach of a TIB, the amount of estimated duties should include duties plus the merchandise processing fees that would have been applicable to the entry had an entry for consumption been filed.

The provisions of the Harbor Maintenance Revenue Act of 1986 (Pub. L. 99–662) impose a harbor maintenance fee on any importers, exporters, and domestic shippers of commercial cargo who use any port. The language of the statute authorizing assessment of the harbor maintenance fee also notes that all customs administrative and enforcement provisions of law and regulation shall apply to the fee as though such was a customs duty. Section 4462(f)(1) of the statute indicates that "any penalty expressed in terms of a relationship to the amount of the duty shall be treated as not less than the amount which bears a similar relationship to the value of the cargo."

As with the merchandise processing fee, any harbor maintenance fee which would otherwise be due and owing on an entry for consumption is not paid if a TIB entry is made. As with the merchandise processing fee, the unpaid harbor maintenance fee should be considered as part of the amount equal to estimated duties that would be chargeable had the merchandise which is the subject of the TIB been entered for consumption.

Accordingly, when calculating the bond amount or the measure of liquidated damages for breach of a TIB, the amount of estimated duties due should include duties plus the merchandise processing fees plus the harbor maintenance fees that would have been applicable to the entry had an entry for consumption been filed. This document proposes to amend § 10.31(f) and § 10.39(d)(1) to provide that the bond amount and the liquidated damages for breach of a TIB will include as appropriate, an amount equal to double or 110 percent of the estimated duties, fees and taxes due if the entry had been filed as a consumption entry.

Under the provisions of § 10.39(a) of the Customs Regulations, if there has been a default with respect to all the articles covered by the bond and a written petition for relief is filed timely, the regulations state that the petition "shall be transmitted to Headquarters, U.S. Customs Service with a full report of the facts, unless it is allowed by the district director in whole or in part in accordance with this regulation. * * *." This language noting referral to Headquarters is unique to TIB cases in which all the articles covered by the bond are in default and the district director allows no mitigation. In order to avoid confusion and simplify the processing of fines, penalties and forfeiture matters, the jurisdictional amount found in § 172.21 should govern review of all petitions. Accordingly, this document proposes to amend § 10.39(a) to remove the reference regarding referral of these petitions to Customs Headquarters.

Comments

Before making a determination in this matter, Customs will consider any written comments timely submitted. Comments will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4 of the Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9 a.m. and 4:30 p.m. at the Regulations and Disclosure Law Branch, room 2119, Customs Headquarters, 1301 Constitution Avenue NW., Washington, DC.

Regulatory Flexibility Act and Executive Order 12291

Pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), it is certified that the amendments will not have a significant economic impact on a substantial number of small entities. Permitting anticipatory breach of Temporary Importation Bond provisions allows early removal of an otherwise outstanding contingent liability of an importer, while eliminating the requirement that petitions be decided at Customs Headquarters reduces delays in processing, both to the benefit of importers. As noted above, provisions relating to inclusion of the merchandise processing fee and the harbor maintenance fee are dictated by the provisions of the statute, and are not within agency discretion. Accordingly, the amendments are not subject to the regulatory analysis requirements of 5 U.S.C. 603 and 604. Because the document does not meet the criteria for a "major rule" as specified in Executive Order 12291, no regulatory impact analysis has been prepared.

List of Subjects in 19 CFR Part 10

Customs duties and inspection, Imports, Surety Bonds.

Proposed Amendments

Accordingly, for the reasons set forth below, it is proposed to amend part 10, Customs Regulations (19 CFR part 10), as follows:

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

1. The general authority citation and relevant specific authority citations for part 10 continues to read as follows:

Authority: 19 U.S.C. 66, 1202, 1481, 1484, 1498, 1508, 1623, 1624;

2. It is proposed to amend § 10.31 by revising the first two sentences of paragraph (f) to read as follows:

§ 10.31 Entry; bond.

* * * * *

(f) With the exceptions stated herein, a bond shall be given on Customs Form 301, containing the bond conditions set forth in § 113.62 of this chapter, in an amount equal to double the duties, including fees, which it is estimated would accrue (or such larger amount as the district director shall state in writing to the entrant is necessary to protect the revenue) had all the articles covered by the entry been entered under an ordinary consumption entry. In the case of samples solely for use in taking orders entered under subheading 9813.00.20, HTSUS, motion-picture advertising films entered under subheading 9813.00.25, HTSUS, and professional equipment, tools of trade and repair components for such equipment or tools entered under subheading 9813.00.50, HTSUS, the bond required to be given shall be in an amount equal to 110 percent of the estimated duties, including fees, determined at the time of entry. * * *

* * * * *

3. It is proposed to amend § 10.39(d)(1) by removing the word "lower" and replacing it with the word "different" in the first sentence, and by adding a new second sentence to read as follows:

§ 10.39 Cancellation of bond charges.

* * * * *

(d)(1) * * * For purposes of this section, the term estimated duties shall include any merchandise processing fees and harbor maintenance fees applicable to such entry. * * *

* * * * *

4. It is proposed to revise the first sentence of § 10.39(e) to read as follows:

§ 10.39 Cancellation of bond charges.

* * * * *

(e) If there has been a default with respect to all the articles covered by the bond and a written petition for relief has been timely filed as provided in part 172 of this chapter, it shall be reviewed by the district director if the full amount of the claim does not exceed $100,000 and by the Director, International Trade Compliance Division, Customs Headquarters, if the full amount of the claim exceeds $100,000.

* * * * *

5. It is proposed to amend § 10.39 by redesignating paragraph (g) as paragraph (h) and add a new paragraph (g) to read as follows:

§ 10.39 Cancellation of bond charges.

* * * * *

(g) *Anticipatory breach.* If an importer anticipates that the merchandise entered under a Temporary Importation Bond will not be exported or destroyed in accordance with the terms of the bond, the importer may advise the district director in writing before the bond period has expired of the anticipatory breach. At the time of written notification of the breach, the importer shall pay to Customs the full amount of liquidated damages that would be assessed at the time of breach of the bond, and upon such notification and payment the entry will be closed and the bond will be cancelled. By this payment, the importer waives his right to receive a notice of claim for liquidated damages as required by § 172.1(a) of this chapter or to file any petition for relief on the matter.

Michael H. Lane,

Acting Commissioner of Customs.

Approved: September 22, 1992.

Peter K. Nunez,

Assistant Secretary of the Treasury.

BILLING CODE 4820-02-M

DEPARTMENT OF DEFENSE

Department of the Army

32 CFR Part 505

The Army Privacy Program

AGENCY: Director of Information Systems for Command, Control, Communications, and Computers (DISC4), DOD.

ACTION: Proposed rule revision.

SUMMARY: The Department of the Army proposes to revise 32 CFR part 505, The Army Privacy Program. This revision will shift responsibilities for Access and Amendment Refusal Authority to conform with the reorganization of the Department of the Army as a result of the Goldwater-Nichols Department of Defense Reorganization Act of 1986, and other organizational realignments. It also establishes policy for the delegation of Access and Amendment Refusal Authority responsibilities, and the disclosure of records for agency use in litigation. It updates responsibilities for the Army Privacy Act Program.

DATES: Comments must be received on or before November 30, 1992.

ADDRESSES: Comments are to be submitted in writing only to: Director of Information Systems for Command, Control, Communications, and Computers, Attn: SAIS-IDP/Mr. Walker, Pentagon, Washington, DC 20310-0107.

FOR FURTHER INFORMATION CONTACT: Mr. William Walker, Office, Director of Information Systems for Command, Control, Communications, and Computers, Washington, DC 20310-0107, telephone (703) 614-3729.

EXECUTIVE ORDER 12291 This proposed revision has been reviewed under Executive Order 12291. This action is nonmajor meaning that the effect on the economy will be less than $100 million.

Regulatory Flexibility Act

This proposed revision has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (USC 601-612). This action will not have any adverse act on small entities. The primary purpose of the proposed rule is to revise the Army Privacy Program. There will not be any adverse effects on small businesses by the adoption of this revision to part 505.

List of Subjects in 32 CFR Part 505

Privacy.

Accordingly, 32 CFR part 505 is amended as follows:

1. The authority citation for part 505 continues to read:

Authority: 5 U.S.C. 51a: DOD Directive 5400.11, June 9, 1982; and DOD Regulation 5400.11R, August 31, 1983.

2. In § 505.1, paragraphs (d)(1) and (2), (g) and (h) are revised to read as follows:

§ 505.1 General information.

* * * * *

(d) * * *

(1) The Director of Information Systems for Command, Control, Communications, and Computers (DISC4) is responsible for issuing policy and guidance for the Army Privacy Program in Consultation with the Army General Counsel.

(2) The Commander, U.S. Army Information Systems Command is responsible for developing policy for and executing the Privacy Act Program under the policy and guidance of the DISC4.

* * * * *

(g) *Access and Amendment Refusal Authority (AARA).* Each Access and Amendment Refusal Authority (AARA) is responsible for action on requests for access to, or amendment of, records referred to them under this part. The officials listed below are the only AARA for records in their authority. Authority may be delegated to an officer or subordinate commander. All delegations must be in writing. If an AARA's delegate denies access or amendment, the delegate must clearly state that he or she is acting on behalf of the AARA and identify the AARA by name and position in the written response to the requester. Denial of access or amendment by an AARA's delegate must have appropriate legal review. Delegations will not be made below the colonel (06) or GS/GM-15 level. Such delegations must not slow Privacy actions. AARAs will send the names, offices, telephone numbers of their delegates to the Director of Information Systems for Command, Control, Communications and Computers, HQDA, ATTN: SAIS-IDP, Washington, DC 20310-0107; and the Department of the Army Privacy Review Board, Crystal Square #1, Suite 201, 1725 Jefferson Davis Highway, Arlington, VA 22202.

(1) The Administrative Assistant to the Secretary of the Army (AASA) for records of the Secretariat and its serviced activities, to include the personnel records maintained by the General Officer Management Office, personnel records pertaining to Senior Executive Service Personnel serviced by the Office of the Secretary of the Army (ASA), and Equal Employment Opportunity (EEO) records from offices serviced by the OSA. The AASA will

also serve as AARA for those records requiring the personal attention of the Secretary of the Army.

(2) The Inspector General (TIG)—for TIG investigative records.

(3) The president or executive secretary of boards, councils, and similar bodies established by DA to consider personnel matters, including the Army Board of Correction of Military Appeals, for records under their purview.

(4) The Deputy Chief of Staff for Personnel (DCSPER)—for records of active and former non-appropriated fund employees (except those in the Army and Air Force Exchange Service, alcohol and drug abuse treatment records, behavioral science records, recruiting, Armed Services vocational Attitude Battery (ASVAB), equal opportunity, Junior Reserve Officers' Training Corps (ROTC), Senior ROTC Instructor, military academy cadet), selection, promotion, and reduction boards; special review boards; professional staff informational records; and entrance processing records (when records pertain to those not entering active duty).

(5) The Deputy Chief of Staff for Operations and Plans (DCSOPS)—for military police records and reports and prisoner confinement and correctional records.

(6) Chief of Engineers (COE)—for records pertaining to civil works (including litigation), military construction, engineer procurement, other engineering matters not under the purview of another AARA, ecology, and contractor qualifications.

(7) The Surgeon General (TSG)—for medical records, except properly part of the Official Personnel Folder (OPM/GOVT–1 systems of records).

(8) Chief of Chaplains (CCH)—for ecclesiastical records.

(9) The Judge Advocate General (TJAG)—for personnel records of the Army National Guard.

(11) Chief, Army Reserve (CAR)—for personnel records of Army retired, separated and reserve military personnel members.

(12) Commander, United States Army Material Command (USAMC)—for records of Army contractor personnel of USAMC.

(13) Commander, United States Army Criminal Investigation Command (USACIDC)—for criminal investigation reports and military police reports included therein.

(14) Commander, United States Total Army Personnel Command (PERSCOM)— for personnel and personnel related records of Army members on active duty and current Federal appropriated fund civilian employees. (Requests from former civilian employees to amend a record in an Office of Personnel Management (OPM) system of records, such as the Official Personnel Folder, should be sent to the Office of Personnel Management, Assistant Director for Workforce Information, Compliance, and Investigations Group, 1900 E Street, NW, Washington, DC 20415–0001).

(15) Commander, United States Army Community and Family Support Center (USACFS)—for records relating to morale, welfare and recreation activities, community life programs, family action programs, retired activities, club management, Army emergency relief, consumer protection, retiree survival benefits, and records dealing with DA relationships and social security, veterans' affairs, United Service Organizations, U.S. Soldiers' and Airmen's Home and American Red Cross.

(16) Commander, United States Army Intelligence and Security Command (INSCOM)—for intelligence, investigative, and security records, foreign scientific and technological information, intelligence training, mapping and geodesy information, ground surveillance records, intelligence threat assessments, and missile intelligence data relating to tactical land warfare systems.

(17) Commander, Army and Air Force Exchange Service (AAFES)—for records pertaining to employees, patrons, and other matters which are the responsibility of the Exchange Service.

(18) Commander, Military traffic Management Command (MTMC)—for transportation records.

(19) Director of Army Safety—for safety records.

(20) Commander, United States Army Information Systems Command (USAISC)—for records which do not fall within the functional area of another AARA.

(h) *DA Privacy Review Board.* The DA Privacy Review Board acts on behalf of the Secretary of the Army in deciding appeals from refusal of the appropriate AARAs to amend records. Board membership is comprised of the AASA, the Commander, USAISC-Pentagon, and TJAG, or their representatives. The AARA may serve as a nonvoting member when the Board considers matters in the AARA's area of functional specialization. The Commander, USAISC-Pentagon chairs the Board and provides the recording secretary.

* * * * *

3. In § 505.3 revise paragraph (b) (10) and (11) to read as follows:

§ 505.3 Disclosure of personal information to other agencies and third parties.

* * * * *

(b) * * *

(10) *Disclosure to the Department of Justice for litigation.* Records may be disclosed as a routine use to any component of the Department of Justice when—

(i) The agency, or any component there, or

(ii) Any employee of the agency in his or her official capacity, or

(iii) Any employee of the agency in his or her individual capacity where the Department of Justice has agreed to represent the employee, or

(iv) The United States, where the agency determines that litigation is likely to affect the agency or any of its components, is a party to litigation or has an interest in such litigation, and the use of such records by the Department of Justice is deemed by the agency to be relevant and necessary to the litigation, provided, however, that in each case, the agency determines that disclosure of the records to the Department of Justice is a use of the information contained in the records that is compatible with the purpose for which it is collected.

(11) *Disclosure for agency use in litigation.* A record may be disclosed in a matter before a court or adjudicative body before which the agency is authorized to appear when—

(i) The agency, or any component there, or

(ii) Any employee of the agency in his or her official capacity, or

(iii) Any employee of the agency in his or her official capacity where the Department of Justice has agreed to represent the employee, or

(iv) The United States, where the agency determines that litigation is likely to affect the agency or any of its components, is a party to litigation or has an interest in such litigation, and the agency determines that their use of such records is relevant and necessary to the litigation, provided; however, that in each case, the agency determines that disclosure of the records to the court or adjudicative body is a use of the information contained in the records that is compatible with the purpose for which it is collected.

BILLING CODE 3710–08–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 2

[CFRL-4514-7]

Transfer of Data to Contractors

AGENCY: Environmental Protection Agency.

ACTION: Notice of transfer of data and request for comments.

SUMMARY: The Environmental Protection Agency (EPA) will transfer to its contractor, ICF, Inc., and its subcontractors: A.T. Kearney, Inc.; Booz-Allen & Hamilton, Inc.; DPRA, Inc.; Information Systems Solution International; SAIC, Inc.; and Westat, Inc., information which has been submitted to EPA under the authority of the Resource Conservation and Recovery Act (RCRA) as amended. These firms will support the Office of Solid Waste by providing capacity analyses for the Land Disposal Restriction Phase II Final Rule. ICF, and its subcontractors, will review public comments received from the Land Disposal Restriction Phase II Proposed Rule. Some of the information that ICF will review is contained in Part B permit applications, RCRA Facility Asssessment Reports, including facility file information, photo logs, site inspection reports, RCRA Facility Investigation Reports, and applications for RCRA closure or post-closure permits under 40 CFR parts 264 and 270. ICF, and its subcontractors, will also review responses to RCRA 3007 questionnaires received from facilities that land dispose newly identified organic wastes. Some of the information may have a claim of business confidentiality.

DATE: Transfer of confidential data submitted to EPA will occur no sooner than October 6, 1992.

ADDRESSES: Comments should be sent to Margaret Lee, Document Control Officer, Office of Solid Waste (OS-312), U. S. Environmental Protection Agency, 401 M Street, SW., Washington, DC, 20460. Comments should be identified as "Transfer of Confidential Data.".

FOR FURTHER INFORMATION CONTACT: Margaret Lee, Document Control Officer, Office of Solid Waste (OS-312), U. S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 260-3410.

SUPPLEMENTARY INFORMATION:

I. Transfer of Data

The Environmental Protection Agency is in the process of analyzing data submitted by the regulated community for the Land Disposal Restriction Phase II Proposed Rule.

Under EPA Contract 68-W2-0008, ICF, and its subcontractors, will assist the Permits and State Programs Division by providing capacity analyses for the Land Disposal Restriction Phase II Final Rule. ICF, and its subcontractors, will review public comments received from the Land Disposal Restriction Phase II Proposed Rule, and will analyze the data submitted by the regulated community. Specific examples of some of the information ICF will review is contained in Part B Permit applications, RCRA Facility Assessment Reports, including facility file information, photo logs and site inspection reports, RCRA Facility Investigation Reports and applications for RCRA closure or post-closure permits under 40 CFR parts 264 and 270. ICF, and its subcontractors, will also review responses to RCRA 3007 questionnaires received from facilities that land dispose newly identified organic waste. The information being transferred to ICF, and its subcontractors, may have been or will be claimed as confidential business information.

In accordance with 40 CFR 2.305(h), EPA has determined that ICF, and its subcontractors, require access to confidential business information submitted to EPA under the authority of RCRA to perform work satisfactorily under the above-noted contract. EPA is issuing this notice to inform all submitters of confidential business information that EPA may transfer to these firms, on a need-to-know basis, CBI collected under the authority of RCRA. Upon completing their review of materials, ICF will return all such materials to EPA.

ICF, and its subcontractors, have been authorized to have access to RCRA CBI under the EPA "Contractor Requirements for the Control and Security of RCRA Confidential Business Information Security Manual". EPA will approve the security plans of the contractors to insure that their facilities comply with security procedures outlined in the security manual prior to RCRA CBI being transferred to the contractors. Personnel from these firms will be required to sign non-disclosure agreements and be briefed on appropriate security procedures before they are permitted access to confidential business information.

Dated: September 18, 1992.

Richard J. Guimand,

Acting Assistant Administrator.

BILLING CODE 6560-50-M

40 CFR Part 52

[AZ4-1-5263; FRL-4514-2]

Approval and Promulgation of Implementation Plans; Arizona State Implementation Plan Revision; Maricopa County Bureau of Air Pollution Control

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: EPA is proposing to grant conditional approval to four revised rules controlling volatile organic compounds (VOCs) and one revised rule concerning general provisions and definitions adopted on July 13, 1988 by the Maricopa County Bureau of Air Pollution Control (the Bureau) for inclusion in the Arizona State Implementation Plan (SIP). The Arizona Department of Environmental Quality (DEQ) submitted these revisions to EPA on January 4, 1990. The revisions concern Rule 100, General Provisions and Definitions; Rule 331, Solvent Cleaning; Rule 332, Perchloroethylene Dry Cleaning; Rule 333, Petroleum Solvent Dry Cleaning; and Rule 340, Cutback and Emulsified Asphalt. EPA has evaluated the revisions to these rules and is proposing a conditional approval under section 110(k)(4) of the Clean Air Act, as amended in 1990 (CAA or the Act), because the rules strengthen the SIP and the Bureau has committed to correct certain deficiencies in the rules which have been identified by EPA.

DATES: Comments must be received on or before October 29, 1992.

ADDRESSES: Comments may be mailed to: Daniel A. Meer, Southern California & Arizona Rulemaking Section (A-5-3), Air and Toxics Division, Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, CA 94105.

Copies of each rule revision and EPA's detailed Technical Support Document for each rule are available for public inspection at EPA's Region 9 office (address above) during normal business hours. Copies of the submitted rule revisions are also available for inspection at the following locations:

Arizona Department of Environmental Quality, Air Quality Planning Office, 2005 N. Central Avenue, Phoenix, AZ 85004.

Maricopa County Bureau of Air Pollution Control, 2406 S. 24th Street, Suite E214, Phoenix, AZ 85034.

FOR FURTHER INFORMATION CONTACT: William E. Davis, Jr., Southern

California & Arizona Rulemaking Section (A–5–3), Air and Toxics Division, Environmental Protection Agency, 75 Hawthorne Street, San Francisco, CA 94105, Telephone: (415) 744–1183.

SUPPLEMENTARY INFORMATION:

Background

On March 3, 1978, EPA promulgated a list of ozone nonattainment areas under the provisions of the Clear Air Act, as amended in 1977 (1977 CAA or pre-amended Act) that included Maricopa County. 43 FR 8964, 40 CFR 81.303. On March 19, 1979, EPA changed the name and modified the geographic boundaries of the ozone nonattainment area of Maricopa County to the Maricopa Association of Government (MAG) Urban Planning Area. 44 FR 16391, 40 CFR 81.303. On February 24, 1984, EPA notified the Governor of Arizona that the Bureau's portion of the Arizona SIP was inadequate to attain and maintain the National Ambient Air Quality Standard (NAAQS) for ozone and requested that the State submit curative SIP revisions to EPA for approval (EPA's SIP-Call, 49 FR 18827, May 3, 1984). On May 26, 1988, EPA again notified the Governor of Arizona that the Bureau's portion of the Arizona SIP was inadequate to meet the ozone NAAQS and requested that deficiencies relating to VOC controls and the application of reasonably available control technology (RACT) in the existing SIP be corrected (EPA's second SIP-Call, 53 FR 34500, September 7, 1988). On November 15, 1990, the Clean Air Act Amendments of 1990 (CAA) were enacted. Public Law 101–594, 104 Stat. 2399, codified at 42 U.S.C. 7401–7671q. In amended section 182(a)(2)(A) of the CAA, Congress statutorily adopted the requirement that nonattainment areas correct their deficient RACT rules and established a deadline of May 15, 1991 for states to submit corrections of those deficiencies.

Section 182(a)(2)(A) applies to areas designated as nonattainment prior to enactment of the amendments and classified as marginal or above as of the date of enactment. It requires such areas to adopt and correct RACT rules pursuant to pre-amended section 172(b) as interpreted in pre-amended guidance.[1] EPA's SIP-Call used that guidance to indicate the necessary corrections for specific nonattainment areas. The MAG Urban Planning Area is classified as a moderate nonattainment area [2]; therefore, this area is subject to the RACT fix-up requirement and the May 15, 1991 deadline. The Bureau adopted the four VOC-controlling rules being proposed for conditional approval in this notice in July of 1988, and the Arizona DEQ, acting as the Governor's designee, submitted them to EPA on January 4, 1990 in response to the SIP-Calls. Although this submittal predates the amendments to the CAA, it also serves as a submittal predates the amendments to the CAA, it also serves as a submittal under section 182(a)(2)(A). At the same time as the state submitted the RACT corrections pursuant to the SIP call, the Arizona DEQ submitted a portion of its VOC rules, which it adopted in July of 1988, pertaining to general provisions and definitions. These new and amended definitions were not specifically a part of the SIP-Call and, therefore, are not part of the RACT fix-up requirement. However, because these definitions are integrally related to the other rules submitted by the State, EPA is proposing to conditionally approve this portion of the submittal in conjunction with the other rules as meeting the general RACT requirement.

The State of Arizona submitted several revised rules to EPA for incorporation into its SIP on January 4, 1990, including the rules proposed for action in this notice. This notice addresses EPA's proposed action for Rule 100, General Provisions and Definitions; Rule 331, Solvent Cleaning; Rule 332, Perchloroethylene Dry Cleaning; Rule 333, Petroleum Solvent Dry Cleaning; and Rule 340, Cutback and Emulsified Asphalt. The submitted rules were found to be complete on May 25, 1990 pursuant to EPA's completeness criteria adopted on February 16, 1990 and set forth in 40 CFR part 51, appendix V [3] and are being proposed for conditional approval.

Rule 100 is a general rule containing definitions that apply to all of the Bureau's rules. Rules 331, 332, 333, and 340 are rules that control volatile organic compounds (VOCs) from the cleaning (degreasing) of parts, from dry cleaning operations using perchloroethylene solvent, from dry cleaning operations using petroleum solvents, and from the use of asphalts, respectively. VOCs contribute to the production of ground level ozone and smog. Rules 331, 332, 333, and 340 were originally adopted as part of Maricopa's effort to achieve the NAAQS for ozone in the MAG Urban Planning Area and have been revised in response to EPA's SIP-Calls.

EPA Evaluation and Proposed Action

The Agency has examined the issue of whether this action should be reviewed only under the provisions of the law as it existed on the date of submittal to EPA (January 4, 1990) and has determined that the Agency must apply the later amendments of the law to the revisions. Therefore, the Agency has reviewed this request for revision of the SIP for conformance with the CAA as amended November 15, 1990.

In determining the approvability of a VOC rule, EPA must evaluate the rule for consistency with the requirements of the CAA and EPA regulations, as found in section 110 and part D of the CAA and 40 CFR part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans). The EPA interpretation of these requirements, which forms the basis for today's action, appears in various EPA policy guidance documents listed in footnote 1. Among those provisions is the requirement that a VOC rule must, at a minimum, provide for the implementation of RACT for stationary sources of VOC emissions. This requirement was carried forth from the pre-amended Act.

For the purpose of assisting state and local agencies in developing RACT rules, EPA prepared a series of Control Techniques Guideline (CTG) documents that, based on the underlying requirements of the Act, specified the presumptive norms for what is RACT for specific source categories. Under the CAA, Congress ratified EPA's use of these documents, as well as other Agency policy, for requiring States to "fix-up" their RACT rules. See section 182(a)(2)(A). The CTGs that apply to the four RACT rules follow:

Rule No.	CTG title	EPA number
331.....	Control of Volatile Organic Emissions from Solvent Metal Cleaning.	EPA–450/2–77–022

[1] 1. Among other things, the pre-amendment guidance consists of those portions of the proposed post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); "Issues Relating to VOC Regulation, Cutpoints, Deficiencies, and Deviations, Clarification to appendix D of November 24, 1987 **Federal Register** Notice (appendix D or the Blue Book) (notice of availability was published in the **Federal Register** on May 25, 1988); and the existing control techniques guidelines (CTGs).

[2] 2. Upon enactment of the CAA, the MAG Urban Planning Area continued as nonattainment for ozone pursuant to section 107(d) and classified as moderate by operation of law pursuant to section 181(a). See 56 FR 56694 (November 6, 1991).

[3] EPA has since adopted completeness criteria pursuant to section 110(k)(1)(A) of the amended Act. See 56 FR 42216 (August 26, 1991).

Rule No.	CTG title	EPA number
332	Control of Volatile Organic Emissions from Perchloroethylene Dry Cleaning Systems.	EPA–450/2–78–050
333	Control of Volatile Organic Compound Emissions from Large Petroleum Dry Cleaners.	EPA/450/3–82–009
340	Control of Volatile Organic Compounds from the Use of Cutback Asphalt.	EPA–450/2–77–037

Further interpretations are found in the Blue Book. In general these guidance documents have been set forth to ensure that VOC rules are fully enforceable and strengthen or maintain the SIP.

The rules discussed below are being proposed for conditional approval under section 110(k)(4) of the CAA because they strengthen the SIP and the Bureau has committed to correct the identified appendix D and CTG deficiencies within one year after the date of publication of the Notice of Final Rulemaking.

Rule 100, General Provisions and Definitions

This rule applies to the entire SIP and provides the purpose of the regulations, legal authority and common definitions. The rules does not control VOCs directly but many definitions apply to VOC-controlling rules. The revision is a consolidation of several SIP rules, definitions and provisions. The rule has been strengthened for purposes of VOC emission control by (1) the inclusion of a prohibition against circumvention of the rules, (2) a statement that the lowest emission limit will apply when multiple limits apply, and (3) inclusion of requirements for recordkeeping and record retention. However, there are deficiencies which include unclear definitions and definitions which allow the use of non-EPA approved test methods.

Rule 331, Solvent Cleaning

This rule regulates VOC emissions from the use of solvents for cleaning or degreasing of parts or products. It has several appendix D deficiencies including lack of test methods for determining emission limits or alternate controls. However, the revised rule strengthens the existing SIP because (1) a lower limit has been placed on the cooling capacity of freeboard chillers; (2) a provision, recommended by the CTG, for a vapor level control safety switch on open top vapor degreasers has been added; and (3) regulations for small conveyorized degreasers have been added.

Rule 332, Perchloroethylene Dry Cleaning

This rule provides for the regulation of VOC emissions from dry cleaning operations using perchloroethylene. The proposed rule strengthens the existing SIP because, in contrast to the provisions in the existing SIP, the revised rule requires the control technology specified in the CTG including (1) a requirement to reduce perchloroethylene emission to 100 ppm, and (2) specified operating requirements. However, the rule also allows an alternative, potentially higher, emission level which is a deficiency. Other deficiencies are the lack of certain test methods and recordkeeping.

Rule 333, Petroleum Solvent Dry Cleaning

This rule regulates VOC emissions from dry cleaning operations using non-aqueous solvents other than perchloroethylene. The rule represents a strengthening of the SIP because it is consistent with most CTG provisions, in contrast to the existing SIP. The strengthening provisions include (1) enforceable operating requirements for controls for dryers, filters and recovery units, and (2) deletion of a solvent use cutoff which allows for exemption of certain facilities. The rule is deficient in that not all VOCs are regulated and certain test methods are missing.

Rule 340, Cutback and Emulsified Asphalt

This rule applies to the regulation of VOCs in asphalt materials by limiting the amount of petroleum solvents in the asphalt. This revision represents a strengthening of the SIP because it deletes a provision allowing for a winter season exemption for cutback asphalts. However, the rule is deficient because certain test methods are missing and the recordkeeping provisions do not apply to manufacturers of asphalts for roadways.

EPA has evaluated these five rules for consistency with EPA requirements and has found that the revisions address and correct many deficiencies previously identified by EPA. These corrected deficiencies have resulted in clearer, more enforceable rules.

Although the approval of Maricopa's rules 331, 332, 333 and 340 will strengthen the SIP, these rules still contain deficiencies, identified above for each rule, which were required to be corrected pursuant to section 182(a)(2)(A) of the CAA. In addition, Rule 100 also strengthens the SIP. However, it also contains deficiencies that prevent EPA from determining that it meets RACT as it applies in conjunction with the submitted rules. Details of the evaluation and the deficiencies identified can be found in EPA's Technical Support Document for each rule.

Because of the above deficiencies, EPA cannot grant full approval of these rules under section 110(k)(3) and part D. Also, because the submitted rules are not composed of separable parts which meet all the applicable requirements of the CAA, EPA cannot grant partial approval of the rules under section 110(k)(3). However, EPA may grant a conditional approval under section 110(k)(4) based on a commitment by the Bureau to correct the rules within one year of the finalization of the conditional approval. The Bureau has committed to adopt final rules correcting the deficiencies within the required timeframe. The commitment letter contains a schedule of interim steps (with dates) for each rule. The State of Arizona has submitted the commitment letter to EPA. Therefore, EPA is proposing to give conditional approval to all five rules under section 110(k)(4) of the CAA.

Under section 110(k)(4), the Bureau must adopt the rules for which the State submitted a commitment within one year of EPA's final conditional approval of this action. In addition, the State must submit these rules to EPA within a reasonable time after such adoption. If the Bureau fails to adopt and the State fails to submit the rule revisions to EPA within this time frame, this approval will become a disapproval upon EPA notification of the State by letter. At that time, these rules will no longer be a part of the approved Arizona SIP. EPA subsequently will publish a notice in the notice section of the **Federal Register.** If the Bureau adopts and the State submits these rules to EPA within the applicable time frame, the conditionally approved rules will remain a part of the SIP until EPA takes final action approving or disapproving the new submittal. If EPA disapproves the submittal, the rules on which the conditional approval was based will also be disapproved at that time. If EPA approves the submittal, those newly approved rules will become a part of the SIP and will modify or replace the rules on which the conditional approval is based.

If the conditional approval is converted to a disapproval, the sanctions clock under section 179(a) will begin. Under 179(a)(2), if the Administrator disapproves a submission

under section 110(k) for an area designated nonattainment, based on the submissions's failure to meet one or more of the elements required by the CAA, the Administrator must apply one of the sanctions set forth in section 179(b) unless the deficiency has been corrected within 18 months of such disapproval. Section 179(b) provides two sanctions available to the Administrator: Highway funding and offsets. The 18 month period referred to in section 179(a) will begin at the time EPA issues a finding of disapproval. Moreover, the final disapproval triggers the federal implementation plan (FIP) requirement under section 110(c).

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Regulatory Process

Under the Regulatory Flexibility Act, 5 U.S.C. section 600 et seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. sections 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

Conditional approvals of SIP submittals under section 110 and subchapter I, part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new improvements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S. Ct. 1976); 42 U.S.C. section 7410(a)(2).

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register**, on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

[Docket No. 91–68; Notice 02]

RIN 2127–AC64

Planning Document for Rollover Prevention Rulemaking

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Notice of availability; request for comments.

SUMMARY: This notice announces the availability of an agency planning document that describes NHTSA's multi-faceted rulemaking effort and planned and ongoing data analyses and physical research to address the problem of rollover crashes and their resulting injuries and fatalities. The agency seeks comments on the planning document. The comments will be evaluated and incorporated, as appropriate, into the activities planned by the agency.

DATES: Comments must be received no later than November 13, 1992.

ADDRESSES: Interested persons may obtain a copy of the planning document, free of charge, from NHTSA's Docket Section at the address below. All comments should refer to the docket and notice number of this notice and be submitted to: Docket Section, room 5219, 400 Seventh Street SW., Washington, DC 20590. Telephone: 202–366–4949. Docket hours are 9:30 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Arthur Neill, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590. Telephone: 202–366–5281.

SUPPLEMENTARY INFORMATION: The Intermodal Surface and Transportation Efficiency Act of 1991 requires NHTSA to initiate rulemaking to address the problems of rollover crashes. In response to that mandate, NHTSA published an advance notice of proposed rulemaking on January 3, 1992 (57 FR 242) that summarized the statistics and research on rollover crashes, sought answers to several questions about vehicle stability and rollover crashes, and outlined possible regulatory and other approaches to reduce rollover casualties. These approaches included crash avoidance measures, crashworthiness measures, and public safety education. After reviewing the available data, research reports, and the public comments on the advance notice, the agency has concluded that the reduction of rollover casualties will necessitate a combination of regulatory and consumer information measures. NHTSA has concluded also that additional research and data analyses need to be conducted concerning these measures and has described these efforts in an agency planning document. These activities will enable the agency to assess the appropriate combination of approaches for addressing the injuries and fatalities from rollover crashes.

Issued on September 23, 1992.

Barry Felrice,

Associate Administrator for Rulemaking.

RIN 1018–AB85

Endangered and Threatened Wildlife and Plants; Proposal To Establish an Experimental Nonessential Population of Whooping Cranes in Florida

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to reintroduce whooping cranes (*Grus americana*) in central Florida in the Kissimmee Prairie area. The

reintroduction is proposed to implement a primary recovery action for a federally listed endangered species, to obtain data for further assessing the suitability of Kissimmee Prairie of south central Florida as whooping crane habitat, and to evaluate the merit of releasing captive-reared whooping cranes, conditioned for wild release, as a technique for establishing a self-sustaining, nonmigratory population. The Service proposes that this reintroduced population be designated a nonessential experimental population according to section 10(j) of the Endangered Species Act of 1973 (ESA), as amended. An experimental population is treated as a threatened species for the purposes of sections 4(d) and 9 of the ESA, which prohibit certain activities involving listed species. Accordingly, a special rule for specifying circumstances under which "taking" of introduced whooping cranes will be allowed is being promulgated in conjunction with the nonessential, experimental population rule. No conflicts are envisioned between the whooping crane's reintroduction and any existing or anticipated Federal agency actions.

DATES: Comments from all interested parties must be received by October 29, 1992.

ADDRESSES: Comments and materials concerning this proposal should be sent to Mr. David J. Wesley, Field Supervisor, at the address listed below. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the Service's Jacksonville Field Office, 3100 University Boulevard, South, Suite 120, Jacksonville, Florida 32216 (Phone: 904/232-2580).

FOR FURTHER INFORMATION CONTACT: (See **ADDRESSES** section above).

SUPPLEMENTARY INFORMATION:

Background

1. Legislative: The ESA amendments of 1982, Public Law No. 97-304, created a new Section 10(j), providing for the designation of specific introduced populations of listed species as "experimental populations." Under previous authorities in the ESA, the Service was permitted to reintroduce populations into unoccupied portions of the historic range of a listed species when it would foster the conservation and recovery of the species. Local opposition to reintroduction efforts, however, stemming from concerns about the restrictions and prohibitions on private and Federal activities contained in sections 7 and 9 of the ESA, severely handicapped the effectiveness of this as a management tool.

Under section 10(j), past and future reintroduced populations established outside the current range, but within the species' historic range, may now be designated, at the discretion of the Service, as "experimental." Such designations will increase the Service's flexibility to manage these reintroduced populations because such experimental populations may be treated as threatened species. The Service has more discretion in devising management programs for threatened species than for endangered species, especially on matters regarding incidental or regulated takings. Moreover, experimental populations found to be "nonessential" to the continued existence of the species in question are to be treated as if they were only proposed for listing for purposes of section 7 of the ESA, except as noted below.

A "nonessential" experimental population is not subject to the formal consultation requirement of section 7(a)(2) of the ESA, except that the full protection of section 7 applies to individuals of the experimental population found on a National Wildlife Refuge or National Park. Section 7(a)(1) of the ESA, requiring Federal agencies to carry out programs to conserve listed species, applies to all experimental populations. Individuals to comprise a designated experimental population can be removed from an existing source or donor population only after determining that such removal is not likely to jeopardize the continued existence of the species; a permit issued in accordance with 50 CFR 17.22 is also required.

2. Biological: The species included in this proposed rule is the whooping crane (*Grus americana*), listed as an endangered species on March 11, 1967 (32 FR 4001). The whooping crane is classified in the family Gruidae, Order Gruiformes. It is the tallest bird in North America; males approach 1.5 m. In captivity adult males average 7.3 kg and females 6.4 kg. Adult plumage is snowy white except for black primaries, black or grayish alulae, sparse black bristly feather on the carmine crown and malar region, and dark gray-black wedge-shaped patch on the nape. The bill is dark olive-gray which becomes lighter during the breeding season. The iris of the eye is yellow; legs and feet are gray-black.

Adults are potentially long-lived. Current estimates suggest a maximum longevity in the wild of 22 to 24 years (Binkley and Miller 1980). Captive individuals are known to have survived 27 to 40 years (McNulty 1966, Moody 1931). Mating is characterized by monogamous life-long pair bonds. Individuals remate following death of their mate. Fertile eggs are occasionally produced at age 3 years but more typically at age 4 (pers. comm., Ernie Kuyt 1991). Experienced pairs may not breed every year, especially when habitat conditions are poor. Whooping cranes ordinarily lay two eggs. They will renest if their first clutch is destroyed or lost before mid-incubation (Erickson and Derrickson 1981, Kuyt 1981).

Although two eggs are laid, whooping cranes infrequently fledge two chicks. Only about one of every four hatched chicks survives to reach the wintering grounds (U.S. Fish and Wildlife Service 1986).

The whooping crane first appeared in fossil records from the early Pleistocene (Allen 1952) and probably was most abundant during that two-million-year epoch. They once occurred from the Arctic Sea to the high plateau of central Mexico, and from Utah east to New Jersey, South Carolina, and Florida (Allen 1952, Nesbitt 1982). In the 19th century, the principal breeding range extended from central Illinois northwest through northern Iowa, western Minnesota, northeastern North Dakota, southern Manitoba, and Saskatchewan to the vicinity of Edmonton, Alberta. A nonmigratory breeding population still existed in southwestern Louisiana in the early 1900's (Allen 1952, Craft 1991).

Through the use of two independent techniques of population estimation, Banks (1978) derived estimates of 500 to 700 whooping cranes in 1870. By 1941, the migratory population contained only 16 individuals. The whooping crane population decline in the 19th and early 20th century was a consequence of hunting and specimen collection, human disturbance, and conversion of the primary nesting habitat to hay, pastureland, and grain production.

Allen (1952) described several historical migration routes. One of the most important led from the principal nesting grounds in Iowa, Illinois, Minnesota, North Dakota, and Manitoba to coastal Louisiana. Another went from Texas and the Rio Grande Delta region of Mexico northward to nesting grounds in North Dakota and the Canadian Provinces. A route through west Texas into Mexico probably followed the route still used by sandhill cranes. These whooping cranes wintered in the interior tablelands of western Texas and the high plateau of central Mexico.

Another migration route crossed the Appalachians to the Atlantic Coast. These birds apparently nested in the

Hudson Bay area of Canada. Coastal areas of New Jersey, South Carolina, and river deltas farther south were the wintering grounds. The latest specimen records or sighting reports for some eastern locations are Alabama, 1899; Arkansas, 1889; Florida, 1927 or 1928; Georgia, 1885; Illinois, 1891; Indiana, 1881; Kentucky, 1886; Manitoba, 1948; Michigan, 1882; Minnesota, 1917; Mississippi, 1902; Missouri, 1884; New Jersey, 1857; Ohio, 1902; Ontario, 1895; South Carolina, 1850; and Wisconsin, 1878; (Allen 1952, Burleigh 1944, Hallman 1965, Sprunt and Chamberlain 1949).

Atlantic coast locations used by whooping cranes include the Cape May area and Beesley's Point at Great Egg Bay in New Jersey; the Waccamaw River in South Carolina; the deltas of the Savannah and Altamaha rivers, and St. Simon's Island in Georgia; and the St. Augustine area of Florida. Gulf coast locations include Mobile Bay, Alabama; Bay St. Louis in Mississippi; and numerous records from southwestern Louisiana, where the last bird was captured in 1949. Coastal Louisiana contained both a nonmigratory flock and wintering migrants (Allen 1952).

"There is evidence to suggest that whooping cranes occurred in Florida, perhaps well into the 20th century" (Nesbitt 1982). Nesbitt described various sighting reports including one by O.E. Baynard, a respected field naturalist, who stated that the last flock of whooping cranes (14 birds) he saw in Florida was in 1911 near Micanopy, southern Alachua County. Two whooping cranes were reported east of the Kissimmee River on 19 January 1936 and a whooping crane was shot (and photographed) north of St. Augustine, St. Johns County, in 1927 or 1928 (Nesbitt 1982).

Records from more interior areas of the Southeast include the Montgomery, Alabama, area; Crocketts Bluff on the White River, and near Corning in Arkansas; in Missouri in Jackson County near Kansas City, near Corning, in Lawrence County southwest of Springfield, in Audrain County, and near St. Louis; and in Kentucky near Louisville and Hickman. It is unknown whether these records represent wintering locations, remnants of a nonmigratory population, or wandering birds.

Whooping cranes currently exist in two wild populations and at three captive locations. The only self-sustaining natural wild population nests in the Northwest Territories and adjacent areas of Alberta, Canada, primarily within the boundaries of Wood Buffalo National Park. These birds winter along the central Texas Gulf of Mexico coast at Aransas National Wildlife Refuge and adjacent areas. This population contained 132 whoopers in December 1991 and 33 pairs nested in 1991. The flock recovered from a population low of 16 birds in 1941. This population is hereafter referred to as the Aransas/Wood Buffalo National Park population (AWP).

The second wild flock consists of 12 individuals reared by wild sandhill cranes (termed cross-fostered because they are foster-reared by another species) in an effort to establish a migratory, self-sustaining population in the Rocky Mountains. The project began in 1975 with the transfer of wild whooping crane eggs from nests in Wood Buffalo National Park to the nests of greater sandhill cranes (*Grus canadensis tabida*) at Grays Lake National Wildlife Refuge in southeastern Idaho. The sandhill cranes became the foster parents to the whooping crane chicks and taught them the migration route which the parents traditionally followed. These birds spend the summer in Idaho, western Wyoming, and southwestern Montana and winter in New Mexico. From 1975 through 1988, 289 eggs were transferred (including 73 eggs from the captive flock at the Patuxent Wildlife Research Center), 210 hatched, and 85 chicks fledged. The population peaked at 33 birds in 1985 and has declined since then to 12 birds.

Dr. Edward O. Garton, biometrician at the University of Idaho, working with Dr. Rod Drewien the leader of the cross-fostering project (Garton et al. 1989), modelled the cross-fostered population to predict when it might become self-sustaining. In the model they assumed: (1) The cross-fostered females would be breeding at the same rate as the females in Canada; and (2) survival of birds in their first year would be similar to that of first year birds in Canada (Garton et al. 1989). Despite these optimistic and unrealized assumptions, with the future transfer of 30 eggs per year, the population would only reach 6 breeding pairs after 50 years. "It is obvious from all scenarios modelled that egg transplants of less than 30 eggs per year will not suffice to establish a self-sustaining population in a reasonable period of time. Natural breeding will be essential to establish a self-sustaining population" (Garton et al. 1989). The Idaho project is being phased out because these birds have never bred (perhaps due to improper sexual imprinting) and the mortality rate in this population has become too high to justify continuing egg transfer for cross-fostering. Fieldwork in the project ended in summer 1991, and during fiscal year 1992 project personnel will concentrate on finishing their final contract report.

The largest captive population of 38 birds greater than 1 year of age, including 8 productive pairs, is located at the Patuxent Wildlife Research Center (Patuxent) near Laurel, Maryland. Another 7 pairs at Patuxent should begin producing eggs in 1 to 5 years. This site is directly administered by the Service. A second captive flock containing 27 birds is maintained at Service cost at International Crane Foundation (ICF), a private foundation, near Baraboo, Wisconsin. The Wisconsin flock contains three experienced breeding pairs and another seven pairs which should enter production over the next one to five years. A subadult pair is maintained at the San Antonio Zoo in San Antonio, Texas. These birds are maintained at the expense of the zoo under supervision of the Service. An additional captive site is now under construction in Calgary, Alberta, Canada at the Calgary Zoo. The Calgary staff received training at ICF and Patuxent in 1991, will acquire avicultural experience with other crane species in 1992, and will receive the first whooping crane eggs or birds in 1993 provided from the Patuxent and ICF flocks and the wild flock in Canada.

Whooping cranes adhere to ancestral breeding areas, migratory routes, and wintering grounds, leaving little possibility of pioneering into new regions. The only self-sustaining wild breeding population can be expected to continue utilizing its current nesting location with little likelihood of expansion except on a local geographic scale. This population remains vulnerable to destruction through a natural catastrophe (hurricane), a red tide outbreak, or contaminant spill, due primarily to its limited wintering distribution along the intracoastal waterway of the Texas coast. The gulf Intracoastal Water Way (GIWW) experiences some of the heaviest barge traffic of any waterway in the world. Much of the shipping tonnage is petrochemical products. An accidental spill could destroy whooping cranes and/or their food resources. With the only breeding wild population so vulnerable, it is urgent that additional wild self-sustaining populations be established as soon as practical

3. Recovery Efforts: The first recovery plan developed by the U.S. Whooping Crane Recovery Team (Team) was approved January 23, 1980. It was revised December 23, 1986. The short-term goal is to downlist the whooping crane from the endangered category to

the threatened category. The criteria for attaining this downlisting goal is achieving a population level of 40 pairs in the AWP and establishing two additional, separate and self-sustaining, populations consisting of 25 nesting pairs each. The recovery plan recommends these goals should be attained for 10 consecutive years before the species is reclassified to threatened. These new populations may be migratory or nonmigratory.

In 1985, the Director-General of the Canadian Wildlife Service and the Director of the U.S. Fish and Wildlife Service signed a memorandum of understanding (MOU) entitled "Conservation of the Whooping Crane Related to Coordinated Management Activities". The MOU was revised and signed in 1990. It discusses disposition of birds and eggs, postmortem analysis, population restoration and objectives, new population site, international management, recovery plans, and consultation and coordination. All captive whooping cranes and their future progeny are jointly owned by the U.S. Fish and Wildlife Service and the Canadian Wildlife Service. Consequently, both nations are involved in recovery decisions.

4. Reintroduction Methodology and Site Selection Process: In early 1984, pursuant to the recovery plan goals and the recommendation of the recovery team, potential whooping crane release areas were selected in the eastern United States. At the time the prognosis was favorable for successfully establishing a western population by use of the cross-fostering technique. Consequently, key considerations in selecting areas to evaluate for the eastern release were (1) large areas of potentially suitable wetland habitat; (2) a health sandhill crane population sufficient to support recovery using the cross-fostering technique; (3) public and State agency support for such recovery effort in the release locale; (4) low-to-moderate levels of avian disease pathogens, environmental contaminants, and power lines; and (5) the potential of the habitats to simultaneously support whooping cranes and sandhill cranes.

The areas selected were the upper peninsula of Michigan and adjacent areas of Ontario, the Okefenokee Swamp in southern Georgia, and three sites in Florida. The Michigan site would potentially support a migratory population. The Georgia and three Florida sites would each support a nonmigratory population. The Michigan/Ontario wetlands are occupied by greater sandhill cranes that winter in Florida and the Okefenokee Swamp of Georgia. The wetlands in Georgia and Florida are occupied by the nonmigratory Florida sandhill crane (*G. c. pratensis*) and in winter by greater sandhill cranes which primarily nest in southern Ontario, Michigan, eastern Minnesota, and Wisconsin. Three-year studies were initiated at each site in October 1984 to evaluate their respective suitabilities.

Results of the studies were presented in written final reports to the U.S. Whooping Crane Recovery Team in fall 1987 (Bennett and Bennett 1987, Bishop 1988, McMillan 1987, Nesbitt 1988) and in verbal reports in February 1988. By 1988, the Team recognized that cross-fostering was not working to establish a migratory population in the West. The possibility of inappropriate sexual imprinting associated with cross-fostering, and the lack of a proven technique for establishing a migratory flock, influenced the team to favor establishing a nonmigratory flock. A ninmigratory population has several features which make it easier to achieve success: (1) Released birds do not face the hazards of migration (over one half of the losses of fledged, cross-fostered birds occurs during migration); and (2) released birds inhabit a more geographically limited area year-round than do migratory cranes, which increases the opportunity for birds to find a compatible mate.

Studies of whooping cranes (Drewien and Bizeau 1977) and greater sandhill cranes (Nesbitt 1988) have shown that migration in these cranes is learned rather than innate behavior. Captive-reared whooping cranes released in Florida are expected to develop a sedentary population.

In summer 1988 the Team selected Kissimmee Prairie as the area most suitable for the next experiment to establish a self-sustaining population. A suitable technique for release of whooping cranes in Kissimmee Prairie is the gentle release of captive-reared birds conditioned for wild release. Cranes are conditioned for wild release by being reared in isolation from humans, by use of nonspecific role models, puppets, and exercised by animal care personnel in bird costumes to avoid imprinting on humans. This technique has been successful in supplementing the population of endangered nonmigratory Mississippi sandhill cranes (*G. c. pulla*) (Zwank and Wilson 1987, Ellis et al. 1992). The term gentle release refers to retaining captive-reared birds in open-topped enclosures (conditioning pens) at the release site as they gradually adjust to their new surroundings. The enclosures contain some natural foods and water. Commercial foods are provided *ad libitum*. While in the conditioning pens, flight is restricted by the use of plastic brailes which preclude full wing extension. After several seeks the brailes are removed and the birds are allowed to fly from the pen. While the birds acclimate to their new freedom, commercial foods are continued in the pens for their use as needed.

The Service proposes to gentle release 9 to 12 juvenile whooping cranes on Kissimmee Prairie. If this proposed rule is made final, release may occur in November 1992. These birds will be captive-reared at Patuxent National Wildlife Research Center in Laurel, Maryland, and the International Crane Foundation in Baraboo, Wisconsin. They will be conditioned for wild release to increase post-release survival and their ability to adjust to wild foods. Birds will be double radio tagged and monitored for 2 years after release to discern movements, habitat use, other behavior, and survival. If results of this initial release are favorable, the releases will be resumed late in 1994 with the goal of releasing 20 birds annually for about 10 years.

The reintroduction is proposed for three purposes: (1) To implement a primary recovery action for a federally listed endangered species; (2) to obtain data for further assessing the suitability of Kissimmee Prairie of south central Florida as whooping crane habitat; and (3) to evaluate the suitability of releasing captive-reared whooping cranes, conditioned for wild release, as a technique for establishing a self-sustaining, nonmigratory population. Information on survival of released birds, movements, behavior, causes of losses, reproductive success, and other data will be gathered throughout the project. Project progress will be evaluated annually.

The likelihood of the releases resulting in a self-sustaining population is believed to be good (60–80%). Whooping cranes historically occurred in Florida and the release area habitat is similar to that which supported nesting whooping cranes in a nonmigratory population in Louisiana into the 1940's. The minimum goal for numbers of cranes to be released annually is based on the research of Griffith *et al.* (1989). As captive production increases, annual release numbers will be increased and, for a long-lived species like the whooping crane, continuing releases for a number of years increases the likelihood of reaching a population level which can sustain stochastic events. The rearing and release techniques have

proven successful in building the wild population of the endangered Mississippi sandhill cranes (*G. c. pulla*.)

Status of Reintroduced Population

The whooping crane population of Florida is proposed to be designated a nonessential experimental population according to the provisions of Section 10(j) of the ESA.

Being authorized for release as an "experimental population" means the reintroduced population will be treated as a threatened species rather than an endangered species. This designation enables the Service to develop special regulations for population management that are less restrictive than the mandatory prohibitions. Such special regulations can provide management flexibility when needed to make a reintroduction compatible with current or planned human activities in the release area. Per Section 4(d) of the ESA, these special regulations must be "necessary and advisable" to provide for the conservation of the whooping crane.

"Nonessential" experimental populations are not essential to the continued existence of the species. For purposes of Section 7 of ESA, they are treated as though they were only proposed for listing, except when occurring in an area of the National Wildlife Refuge System or the National Park System. This experimental population qualifies as being nonessential to the continued existence of the whooping crane because:

1. For the time being, the AWP and the captive populations will be the primary species population. This species has been protected against the threat of extinction from a single catastrophic event by gradual recovery of the AWP and by increase and management of the cranes at three captive sites. Loss of the experimental population will not jeopardize species' survival.

2. For the time being, the primary repository of genetic diversity for the species will be the approximately 200 wild and captive whooping cranes in the locations mentioned in (1) above. The birds selected for reintroduction purposes will be as genetically redundant as possible with the captive population, hence any loss of reintroduced animals in this experiment will not significantly impact the goal of preserving maximum genetic diversity in the species.

3. Any birds lost during the reintroduction attempt can be replaced through captive breeding or by transfer of eggs from the AWP. Eggs have been transferred to captivity from the AWP population for recovery purposes (building the captive flocks and the experimental wild cross-fostered population) since 1967. The AWP has continued to grow during this interval despite the egg transfers. Since 1985, biologists involved in the egg transfer have endeavored to ensure that one viable egg remains in each nest. Such egg switching within the Park provides infertile pairs the opportunity to raise a chick. These egg switches have increased flock growth and the potential for species recovery. In 1991 at least 33 wild pairs nested in Canada, another 7 experienced pairs failed to nest because of poor habitat conditions (drought), and other subadults might have initiated nesting if habitat conditions had been suitable. An increase in the breeding component of the wild flock is expected as soon as the drought ends on the nesting grounds. Within the captive population there also are a number of young pairs (16) expected to enter the breeding component of the population over the next 5 years. Such wild and captive flock increases illustrate the potential of the species to replace individual birds released in the reintroduction effort in Florida.

The hazards and uncertainties of the reintroduction experiment are substantial, but a decision not to attempt to establish a second, wild, self-sustaining population could be equally hazardous to survival of the species in the wild. The present tenuous status of the AWP, which could be annihilated by catastrophic events such as a Gulf coast hurricane or a contaminants spill on the wintering grounds, necessitate management efforts to establish an additional wild population. The Service believes three self-sustaining wild populations should be in existence before the whooping crane can be down listed to threatened status. The nonmigratory Florida population would potentially be the second such population. The site for the third population will be selected at a future date and, in part, will depend on the success of the Florida experiment. If the reintroduction effort at Kissimmee Prairie is successful, the conservation of the species will have been furthered considerably by not only establishing a second self-sustaining population, but by confirming that captive reared birds can be used to establish a nonmigratory wild population.

The area currently supports one of the largest and most consistently productive populations of Florida sandhill cranes in the State. The Florida sandhill crane is currently listed as threatened by the State (Florida Game and Fresh Water Fish Commission 1991). Additionally, the area supports populations of eastern indigo snake (*Drymarchon corais couperi*), bald eagle (*Haliaeetus leucocephalus*), snail kite (*Rostrhamus sociabilis*), red-cockaded woodpecker (*Picoides borealis*), American alligator (*Alligator mississippiensis*); Florida panther (*Felis concolor coryi*), and Florida grasshopper sparrow (*Ammodramus savannarum floridanus*), all of which are federally listed as endangered or threatened species. The whooping crane will be added to the State list of endangered species before the releases are initiated.

Location of Reintroduced Population

The Kissimmee Prairie is 1,200 square kilometers characterized by flat, open expanses of broad palmetto prairie interspersed with shallow wetlands and lakes. On private ranch lands much of the prairie has been converted to improved pasture. Land ownership includes eight large private ranches totaling 82,200 ha and seven public ownerships totaling 104,953 ha. Large private holdings range from 2,700 ha to 42,500 ha. Public lands range from 2,955 ha to 43,300 ha and include Three Lakes Wildlife Management Area (WMA) (22,400 ha), National Audubon Society Kissimmee Prairie Sanctuary (2,955 ha), Kicco WMA (3,100 ha), Bull Creek WMA (8,425 ha), Upper St. John's River WMA (24,800 ha), and Avon Park Bombing Range (43,300 ha).

Seventy percent of the primary proposed release site, Three Lakes WMA, is suitable crane habitat. Twenty-seven percent of this habitat is shallow wetlands characterized by pickerel weed (*Pontederia* spp.), nuphar (*Nuphar luteum*), and maiden cane (*Panicum hemitomon*). Fifty-five percent of the area consists of dry prairie and flatwoods with saw palmetto (*Serenoa repens*), various grasses, and scattered slash pine (*Pinus elliottii*) the characteristic vegetation. Lakes Kissimmee, Marion, and Jackson bound the Three Lakes WMA and each has an extensive wetland edge. Scattered strands of cypress (*Taxodium* spp.) are associated with these and several similar lakes in the area.

The principal private land use is livestock grazing and sod farming. Habitat is maintained in a subclimax state through controlled burning, primarily in winter and early spring. Areas are burned on a 2–3 year rotation. The public lands are managed for wildlife values, water conservation, and to maintain natural habitat conditions. Compared to other proposed release areas in Florida, the Kissimmee Prairie has experienced the least pressures associated with human population

growth over the past 30 years due to its distance from major population centers and the presence of large private and public land holdings.

Management

1. Monitoring

Whooping cranes will be intensively monitored by the Florida Game and Fresh Water Fish Commission (Commission) prior to and after release. The birds will be observed daily while they are in the conditioning pen. During the pre-release conditioning period, at least nine 30-minute time budgets will be collected on each individual (three from dawn to 1000 hours, three from 1000 to 1500 hours, and three from 1600 hours to dusk). Facilities for captive maintenance of the birds will be modeled after facilities at the Service's Patuxent Wildlife Research Center and the International Crane Foundation. They will conform to standards set forth in the Animal Welfare Act and Florida Wildlife Code (Title 39.6 F.A.C.). To further ensure the well-being of birds in captivity and their suitability for release to the wild, facilities will incorporate features of their natural environment (e.g., feeding, loafing, and roosting habitat) to the extent possible. The conditioning pens are similar to those being used successfully to release Mississippi sandhill cranes.

To ensure contact with the released birds, each crane will be equipped with two legband-mounted radio telemetry transmitters. Subsequent to gentle-release, the birds will be monitored daily to assess movements and dispersal from the area of the release pen. Whooping cranes will be checked daily for mortality or indications of disease (listlessness, social exclusion, flightlessness, or obvious weakness, etc.). Social behavior (e.g., pair formation, dominance, cohort loyalty) will also be evaluated.

A voucher blood serum sample will be taken for each bird upon its arrival in Florida. A second sample will be taken just prior to release. Any time a bird is handled after release a blood sample will be taken to monitor disease exposure, physiological condition, etc. One year after release all surviving birds will be captured and an evaluation made of their exposure to disease/parasites through blood, fecal, and other sampling regimens. Monitoring will continue for a second year and exposure to disease/parasites reevaluated at the end of the second year. Healthy birds still in the wild at the end of the second year will remain in the area. Additional releases will begin in 1994, if all conditions appear suitable. If these preliminary results are favorable, the releases will be continued annually beginning in 1994 with the goal of releasing 20 birds per year for about 10 years and then evaluating the success of the recovery effort.

2. Disease/Parasite Considerations

Both sandhill and whooping cranes are known to be vulnerable, in part or all of their natural range, to avian herpes (inclusion body disease), avian cholera, acute and chronic mycotoxicosis, Eastern equine encephalitis (EEE), and avian tuberculosis. Additionally, *Eimeria* spp., *Haemoproteus* spp., *Leucocytozoon* spp., avian pox, lead poisoning, and *Hexamita* sp. have been identified as debilitating or lethal factors in wild or pre-release, captive populations.

A group of crane veterinarians and disease specialists developed protocols for pre-release and pre-transfer health screening for birds selected for release to prevent introduction of diseases and parasites into Florida. Exposure to disease and parasites will be evaluated through blood, serum, and fecal analysis of any individual crane handled post release or at the regular monitoring interval. Remedial action will be taken to return to good health any sick individuals taken into captivity. Sick birds will be held in specially built facilities and their health and treatment monitored by University of Florida veterinarians. Special attention will be given to EEE because an outbreak at Patuxent Wildlife Research Center (Center) in 1984 killed 7 of 39 whooping cranes present at the Center. After the outbreak a vaccine was developed for use on captive cranes. In 1989, EEE was documented in sentinel bobwhite quail and sandhill cranes at the Center. No whooping cranes became ill and it appears the vaccine may provide protection. EEE is present in Florida so the released birds will be vaccinated. Other strains of encephalitis (St. Louis, Everglades) also occur in Florida. The vaccine for EEE may also provide protection against these arboviruses.

When appropriate, other avian species may be used to assess the prevalence of certain disease factors. This could mean using sentinel turkeys for ascertaining exposure probability to encephalitis or evaluating a species with similar food habits for susceptibility to chronic mycotoxicosis.

3. Genetic Considerations

The ultimate genetic goal of the reintroduction program is to establish wild reintroduced populations that embody the maximum level of genetic diversity available from the captive population. Early reintroductions will likely consist of a biased sample of the genetic diversity of the captive gene pool. This bias will be corrected at a later date by selecting and reestablishing breeding whooping cranes that theoretically compensate for any genetic biases in earlier releases.

4. Mortality

Although efforts will be made to reduce mortality, some will inevitably occur as captive-reared birds adapt to the wild. Collision with power lines and fences are known hazards to wild whooping cranes. There are no major power lines crossing the proposed release site. Three- and four-strand barbed wire fencing is used in conjunction with cattle ranching in the Kissimmee area and presents some collision hazard. If whooping cranes begin regular use of areas traversed by power lines or fences, the Service and Commission will consider placing markers on the obstacles to reduce the probability of collisions.

Bobcats are known predators of adult sandhill cranes and, along with Florida panther and alligators, would be potential predators of adult whooping cranes. Bald eagles, gray fox, bobcats, alligators, panthers, owls, and raccoons are potential predators of young cranes. Natural mortality from predators, fluctuating food availability, disease, wild feeding inexperience, etc., will be reduced through predator management, vaccination, soft release, supplemental feeding for a post-release period, and pre-release conditioning. Human-caused mortality will be reduced by information and education efforts directed at landowners and landusers, and review and management of human activities in the area.

5. Special Handling

Under the proposed special regulation, promulgated under authority of section 4(d) of the Act, that will accompany the experimental population designation, Service and Commission employees and agents would be authorized to relocate whooping cranes to avoid conflict with human activities; relocate whooping cranes that have moved outside the appropriate release area when removal is necessary or requested; relocate whooping cranes within the experimental population area to improve survival and recovery prospects; and aid animals which are sick, injured or otherwise in need of special care. If a whooping crane is determined to be unfit to remain in the wild, it would be returned to captivity. Service and Commission employees

would be authorized to salvage or dispose of dead whooping cranes.

6. Coordination With Landowners and Land Management Agencies

The proposed action is being coordinated with potentially affected State and Federal agencies, private landowners, and the general public. As previously noted, the Kissimmee Prairie includes 82,200 ha in private ownership and 104,953 ha in public lands. The primary proposed release area is 22,400 ha of public land. Private land managers were contacted and concur with or do not oppose the proposed action provided it does not interfere with existing lifestyles and current and potential income (Bishop, pers. comm.). The Commission manages wildlife management areas in the Prairie, has been actively involved as a cooperator in pre-release studies, and has actively endorsed the project. The Commission has stated whooping cranes will receive priority management decisions on Three Lakes WMA. The Director General of the Canadian Wildlife Service, a partner with the U.S. Fish and Wildlife Service as noted in the Memorandum of Understanding, has approved the proposed project. Florida Department of Natural Resources (Division of State Parks), National Audubon Society (Kissimmee Prairie Sanctuary), the Department of Defense (Avon Park Bombing Range), St. Johns Water Management District, and other entities have been informed of the proposed release and are aware of the possibility that whooping cranes may be introduced on or move to their project area.

7. Potential Conflicts

Conflicts have resulted when migratory birds have been hunted in areas utilized by whooping cranes. These have resulted from the hunting of sandhill cranes and snow geese (*Chen cerulescens*) which to novice hunters may appear similar to whooping cranes. At least two whooping cranes have been killed when they were mistaken for snow geese, and other whooping cranes have been wounded or shot at in areas where snow geese and sandhill cranes were being hunted. Sandhill cranes and snow geese are not hunted in this area of Florida. No conflicts with migratory bird hunting activities are anticipated.

Traditional hunting in the release area has been for deer (*Odocoileus virginianus*), turkey (*Meleagris gallopavo*), and small game. Conflict with traditional hunting in the release area is not anticipated. Access to some areas where whooping cranes might be particularly vulnerable to human disturbance (i.e., occupied nesting areas, conditioning pens, and critical feeding areas) will be prohibited at times, but such closures will be of short duration and they are not viewed as a source of conflict.

The principal activities on the private property adjacent to the release area are grazing and sod production. Use of these private properties by whooping cranes should not preclude such uses. Coordination with land managers may be necessary to accommodate certain land use activities (i.e., pesticide applications) and use by whooping cranes.

Requests by the public for an opportunity to view whooping cranes, a high profile endangered species, might create conflict on private land when whooping cranes are present. Commission personnel assigned to the Kissimmee Prairie area will be alert to activities of the public attempting to observe whooping cranes on private lands. If such activities begin to infringe on or become a nuisance to the rights of private property owners, the Commission and Service will take action to correct the situation. Commission plans to provide opportunity for the public to view whooping cranes on public property, away from sensitive areas, should reduce or eliminate this potential source of conflict.

Released whooping cranes might wander or migrate from the release site, moving into other states or other locations within Florida. The Service believes such movements are unlikely to occur outside Florida for the reasons mentioned below, but if they do the bird(s) will be recaptured and returned to the release site or to captivity. Likewise, any whooping cranes that wander to locations not conducive to the bird's health or safety will also be captured and moved. Studies of whooping cranes and greater sandhill cranes have shown that migration in these cranes is learned rather than innate behavior.

The cross-fostered whooping cranes in Idaho learned the migration route and wintering site preferences from their parents. An experiment in Florida tested whether captive-reared cranes, with an innate tendency to migrate, would migrate or remain sedentary when released in association with cranes that migrate. Greater sandhill cranes that nest in the Great Lakes States migrate to Florida for the winter. Eggs removed from this wild population were hatched and reared in captivity. The birds were released in Florida where they associated with wild nonmigratory Florida sandhill cranes and with wintering, migratory, greater sandhill cranes. The released birds noticeably expanded their localized movements during subsequent migration periods but remained year-round in the Florida release area. Captive-reared whooping cranes released in Florida are expected to develop a sedentary population.

8. Protection

Recently released whooping cranes will need protection from natural sources of mortality (predators, disease, inadequate foods, etc.) and from human-caused sources of mortality. Natural mortality will be reduced through pre-release conditioning, gentle release, vaccination, predator control, etc. Human-caused mortality will be minimized by placing whooping cranes in an area with low human population density and relatively low development; by working with and educating landowners, land managers, developers, and recreationists to develop means for conducting their existing and planned activities in a manner that is compatible with whooping crane recovery; and by conferring with developers on proposed actions and providing recommendations that will reduce any likely adverse impacts to the cranes.

Before releases are made within Florida, whooping cranes will be added to the list of endangered species provided protection by State law. Florida Wildlife Code, Title 39–27.002 General Prohibitions relative to endangered species states "No person shall pursue, molest, harm, harass, capture, possess, or sell any endangered species or parts thereof or their nests or eggs except as authorized by specific permit. . ."

A draft biological opinion, prepared on the proposed action to reintroduce whooping cranes into the Kissimmee Prairie, concluded that the proposed action will not jeopardize the species. A final biological opinion will be prepared on the final rulemaking.

9. Public Awareness and Cooperation

An extensive sharing of information about the program and the species, via educational efforts targeted toward the public in the region and nationally, will enhance public awareness of this species and its reintroduction. The public will be encouraged to cooperate with the Service and the Commission in attempts to maintain whooping cranes in the release area.

Public Comments Solicited

Comments or recommendations concerning any aspect of this proposed

rule are hereby invited (see "ADDRESSES" section) from State, public, and government agencies, the scientific community, industry, or any other interested party. Comments should be as specific as possible. Final promulgation of a rule to implement this proposed action will take into consideration the comments and any additional information received by the Service. Such communications may lead to a final rule that differs from this proposal.

National Environmental Policy Act

A draft environmental assessment as defined under the authority of the National Environmental Policy Act of 1969 has been prepared and is available to the public at the Service Office identified in the "ADDRESSES" section. This assessment will form the basis for deciding whether this is a major Federal action which would significantly affect the quality of the human environment within the meaning of section 102(2)(c) of the National Environmental Policy Act of 1969. The decision will be made before the final rule is published.

Required Determinations

The Service has determined that this is not a major rule as defined by Executive Order 12291 and that it would not have a significant economic effect on a substantial number of small entities as described in the Regulatory Flexibility Act (Pub. L. 96–354). The rule as proposed does not contain any information collection or record keeping requirements as defined in the Paperwork Reduction Act of 1980 (Pub. L. 96–511). The Service has also determined that this action would not involve any taking of constitutionally protected property rights that require preparation of a takings implication assessment under Executive Order 12630. The rule does not require a Federalism assessment under Executive Order 12612 since it would not have any significant federalism effects as described in the order.

Proposed Regulation Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend part 17, subchapter B of Chapter I, title 50 of the U.S. Code of Federal Regulations, as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Public Law 99–625, 100 Stat. 3500; unless otherwise noted.

2. It is proposed to amend § 17.11(h) by revising the entry for "Crane, whooping" under BIRDS to read as follows:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

Species		Historic range	Vertebrate population where endangered or threatened	Status	When listed	Critical habitat	Special rules
Common name	Scientific name						
BIRDS:							
Crane, whooping	*Grus americana*	Canada, U.S.A. (Rocky Mountains east to Carolinas) Mexico.	Entire, except where listed as an experimental population.	E	1,3	17.95(b)	NA
Do	do	do	U.S.A. Florida	XN		NA	17.84(h)

3. It is proposed to amend 50 CFR 17.84 by adding a new paragraph (h) as follows:

§ 17.84 Special rules—vertebrates.

* * * * *

(h) Whooping crane (*Grus americana*). (1) The whooping crane population identified in paragraph (h)(8) of this section is a nonessential experimental population.

(2) No person may intentionally take this species in the wild in the experimental population area, except as provided in paragraphs (h) (3) and (4) of this section.

(3) Any person with a valid permit issued by the Service under § 17.32 may take whooping cranes in the wild in the experimental population area for educational purposes, scientific purposes, the enhancement of propagation or survival of the species, and other conservation purposes consistent with the Endangered Species Act and in accordance with applicable State fish and wildlife conservation laws and regulations.

(4) Any employee or agent of the Service or State wildlife agency who is designated for such purposes, when acting in the course of official duties, may take a whooping crane in the wild in the experimental population area if such action is necessary to:

(i) Relocate a whooping crane to avoid conflict with human activities;

(ii) Relocate a whooping crane that has moved outside the Kissimmee Prairie when removal is necessary or requested;

(iii) Relocate whooping cranes within the experimental population area to improve survival and recovery prospects;

(iv) Relocate whooping cranes from the experimental population area into captivity;

(v) Aid a sick, injured, or orphaned specimen; or

(vi) Dispose of a dead specimen, or salvage a dead specimen which may be useful for scientific study.

(5) Any taking pursuant to paragraphs (h) (3) and (4) must be immediately reported to the National Whooping Crane Coordinator, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103 (Phone: 505/766–2904), who, in conjunction with his counterpart in the Canadian Wildlife Service, will determine the disposition of any live or dead specimens.

(6) No person shall possess, sell, deliver, carry, transport, ship, import, or export by any means whatsoever, any such species from the experimental population taken in violation of these regulations or in violation of applicable State fish and wildlife laws or regulations or the Endangered Species Act.

(7) It is unlawful for any person to attempt to commit, solicit another to commit, or cause to be committed, any offense defined in paragraphs (h)(2) through (6) of this section.

(8) The geographic area that the nonessential experimental population may inhabit will include the entire State of Florida. The reintroduction site will be the Kissimmee Prairie portions of Polk, Osceola, Highlands, and Okeechobee counties. Current information indicates that the Kissimmee Prairie is within the historic range of the whooping crane in Florida. There are no other extant populations of whooping cranes that could come into contact with the experimental population. There are no other extant populations of whooping cranes that could come into contact with the experimental population. The only two extant populations occur well west of the Mississippi River. The Aransas/Wood Buffalo National Park population nests in the Northwest Territories and adjacent areas of Alberta, Canada, primarily within the boundaries of the Wood Buffalo National Park, and winters along the Central Texas Gulf of Mexico coast at Aransas National Wildlife Refuge. The other population, which was cross-fostered by wild sandhill cranes but has failed to reproduce, summers in Idaho, western Wyoming and southwestern Montana and winters in New Mexico. Whooping cranes adhere to ancestral breeding areas, migratory routes, and wintering grounds leaving little possibility that individuals from the two extant populations will stray into Florida. Studies of whooping cranes have shown that migration is learned rather than innate behavior. The experimental population proposed for release at Kissimmee Prairie is expected to remain within the prairie region of central Florida.

(9) The reintroduced population will be closely monitored during the duration of the projects by the use of radio telemetry. Any animal which is determined to be sick, injured, or otherwise in need of special care would be immediately recaptured by Fish and Wildlife Service and/or State wildlife personnel and given appropriate care. Such animals will be released back to the wild as soon as possible, unless physical or behavioral problems make it necessary to return them to a captive breeding facility.

(10) The status of the experimental population will be reevaluated periodically to determine future management needs. This review will take into account the reproductive success and movement patterns of the individuals released on the area.

Dated: August 20, 1992.

John F. Turner,

Director, Fish and Wildlife Service.

BILLING CODE 4310–55–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration (NOAA)

50 CFR Parts 672 and 675

Groundfish of the Gulf of Alaska; and Groundfish of the Bering Sea and Aleutian Islands

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of amendments to fishery management plans; request for comments.

SUMMARY: The North Pacific Fishery Management Council (Council) has submitted Amendment 22 to the Fishery Management Plan (FMP) for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (BSAI) and Amendment 27 to the FMP for Groundfish to the Gulf of Alaska (GOA) for review by the Secretary of Commerce (Secretary). Comments are requested from the public. Copies of the amendments and the environmental assessment/regulatory impact review/initial regulatory flexibility analysis (EA/RIR/IRFA) may be obtained from the Council (see **ADDRESSES**).

DATES: Comments on the FMP amendments should be submitted on or before November 9, 1992.

ADDRESSES: Comments on the FMP amendments should be submitted to Steven Pennoyer, Director, Alaska Region National Marine Fisheries Service, P.O. Box 21668, Juneau, AK 99802. Copies of the amendments with the EA/RIR/IRFA are available from the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510 (telephone 907–271–2809).

FOR FURTHER INFORMATION CONTACT: David C. Ham, Fisheries Management Biologist, Alaska Region, NMFS at 907–586–7230.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conservation and Management Act (Magnuson Act) requires that each Regional Fishery Management Council submit any fishery management plan or plan amendment it prepares to the Secretary for review and approval, disapproval, or partial disapproval. The Magnuson Act also requires the Secretary, on receiving the plan or amendment, to immediately publish a notice that the plan or amendment is available for review and approval or disapproval. The Secretary will consider public comments received during the comment period in determining whether to approve the amendments.

If approved, the amendments would establish one trawl test area in the BSAI and two trawl test areas in the GOA for pelagic and bottom trawl fishermen to test their trawl fishing gear. These areas would be available when the BSAI or GOA is closed to trawling.

Regulations proposed by the Council to implement these amendments are scheduled to be published within 15 days of this notice.

Notices

Federal Register
Vol. 57, No. 189
Tuesday, September 29, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Agricultural Biotechnology Research Advisory Committee Working Group on Aquatic Biotechnology and Environmental Safety

In accordance with the Federal Advisory Committee Act of October 1972 (Pub. L. No. 92-463, 86 Stat. 770-776), the U.S. Department of Agriculture (USDA), Science and Education, announces the following meeting of a working group of the Agricultural Biotechnology Research Advisory Committee (ABRAC).

The Working Group on Aquatic Biotechnology and Environmental Safety will meet at 170 Hubert H. Humphrey Center, 301 19th Avenue South, University of Minnesota, Minneapolis, Minnesota on October 15, 1992 from 9 a.m. to approximately 4 p.m. The purpose of the meeting is to: (1) Initiate development of draft scientific criteria for performance standards for conducting research in contained facilities such as hatcheries, raceways, ponds, and cages with new lines of freshwater and marine fish, molluscs, and crustaceans, and (2) plan an interdisciplinary workshop of experts at which the draft standards will be reviewed and refined.

The meeting of the working group is open to the public. Persons may particiapte in the meeting as time and space permit.

Further information may be obtained from, and written comments may be sent to, Ms. Maryln Cordle, Senior Regulatory Specialist, Office of Agricultural Biotechnology, room 1001, Rosslyn Plaza East, 14th Street and Independence Avenue SW., Washington, DC 20250. Telephone (703) 235-1510.

Done at Washington, DC, this 9th day of September, 1992.

Duane Acker,

Assistant Secretary, Science and Education.

BILLING CODE 3410-22-M

Forest Service

Exemption of Horn Salvage Timber Sale, Bug Out Salvage Timber Sale, Topple Salvage Timber Sale, Sheep Salvage Timber Sale, and Sufferin' Smith Salvage Timber Sale from Appeal, Wallowa-Whitman National Forest, Oregon

AGENCY: Forest Service, USDA.

ACTION: Notice to exempt decisions from administrative appeal.

SUMMARY: This is a notification that the decisions to implement the Horn Salvage Timber Sale, Bug Out Salvage Timber Sale, Topple Salvage Timber Sale, (blowdown), Sheep Salvage Timber Sale, and the Sufferin' Smith Salvage Timber Sale located on the La Grande Ranger District of the Wallowa-Whitman National Forest are exempt from appeal. This is in conformance with provisions of 36 CFR 217.4(a)(11) as published January 23, 1989, at Vol. 54, No. 13, pages 3342-3370.

EFFECTIVE DATE: September 29, 1992.

FOR FURTHER INFORMATION CONTACT: Bruce Kaufman, Timber Staff, Wallowa-Whitman National Forest, 1550 Dewey Avenue, Baker City, Oregon 97814.

SUPPLEMENTARY INFORMATION: A western spruce budworn epidemic began on the La Grande Ranger District in 1980. Within three years nearly all of the susceptible host type had become infested. Defoliation was especially severe from 1985 to 1987 and then again in 1989 and 1990. The many years of defoliation, combined with abnormally dry years, created conditions favorable for the increase in Douglas-fir bark beetle activity during the last three years. Much of the infestation is located on the west side of the La Grande District but has been slowly spreading onto the eastern side of the district over the last 3 years. The insect damage effects all resources, including vegetation, soils, and water.

In addition to the insect-related salvage, during the winter of 1991/92 parts of the La Grande Ranger District were hit by high intensity wind storms. Several areas suffered considerable damage to merchantable size timber. Most blowdown occurred adjacent to roads and in areas recently harvested in generally the northwest part of the district. The purpose of the Topple Salvage Timber Sale is to utilize the high value sawlog material that is not needed for resource protection before it deteriorates and loses its value.

The La Grande interdisciplinary team (IDT) and public comments received on the salvage program identified the need to salvage the dead and dying timber in as short a time as possible while the logs remain merchantable. Although the size of merchantable timber varies within the different areas, white fir averages 13 inches in diameter at breast height (DBH), Douglas-fir averages 14-16 inches DBH, and the other species average 10-12 inches DBH. Deterioration of the merchantability of insect infested or blowdown trees due to "checking" and sap rot is dependent on the tree species and the average diameter. In general, the smaller the diameter of the tree the more rapidly it will deteriorate. Bark beetle killed Douglas-fir trees of less than 14 inches DBH were generally not selected for harvest in any of these salvage sales because they would not remain merchantable long enough to harvest them.

During the summer of 1990 and continuing on into 1991, the La Grande IDT begin the process of scoping and analyzing the potential to salvage timber in all of the areas analyzed in the environmental assessments for the insect related salvage timber sales. Scoping for the Topple Blowdown Salvage was accomplished in 1992. After public meetings, press releases, and contacts with individuals and State and Federal agencies, major issues were identified for each of the environmental assessments. In many cases the major issues related to the insect epidemic and blowdown for the salvage of dead and dying timber in all of the project areas were quite similar with the few exceptions noted in the following description of each major issue:

1. Forest Tree Health—Overall forest tree health is very poor. What management practices would be utilized to modify, diversify, and rejuvenate the forested landscape in the project areas?

2. Riparian Habitat, Fish Habitat, and Water Quality—Any proposed activities

must protect riparian and fish habitat and water quality. Of particular concern are those areas that support or are like-habitat of the sensitive and threatened fish species identified on the La Grande River District.

3. Big Game/Wildlife Habitat—Due to the extensive nature of the insect infestation and past management practices on the District, wildlife habitat has been severely impacted in both the short and long term. What will be the effect or benefits of salvage and rehabilitation of these dead stands of timber on big game and wildlife habitat?

4. Economics/Cost Effectiveness—Any proposed harvest entry must be cost effective while protecting resource values. Salvage volume will be used to meet District sell targets but if not utilized this volume will be lost.

5. Timber Yield and Utilization—The extensive insect infestation has reduced timber yield below acceptable levels and the opportunity exists to utilize this material before lost and to rehabilitate stands in order to return them to their growth potential levels.

6. Access Management—(Horn Salvage, Bug Out Salvage, Sheep Salvage, and Sufferin' Smith Salvage)—The road management plans for these project areas need to protect and enhance resource values within the area, achieve the standards set in the Wallowa-Whitman National Forest Land and Resource Management Plan, and provide reasonable access to the area for public and administrative needs.

7. Fire Management—What management options could be utilized to reduce the high fuel loadings within these areas and the potential for large wildfires?

The IDT developed a range of two to eight alternatives, including the No Action Alternative, for each of the project areas. The effects of these alternatives are disclosed for each project area in the appropriate Environmental Assessment prepared for these proposals. The Proposed Action for each of the projects listed above are described in the table below.

LA GRANDE RANGER DISTRICT SALVAGE SALES

Descriptions	Horn	Bug Out	Topple	Sheep	Sufferin' Smith
Proposed Action	Alt. 2	Alt. 5	Alt. 2	Alt. 4	Alt. 4
Harvest Acres	445	952	5,000	210	766
Harvest Volume	1,340 MBF	2,294 MBF	750 MBF	581 MBF	4,279 MBF
Reforestation Acres	526	593	0	210	766
New Road Construction	.30 mi	0	0	0	2.70 mi
Road Reconstruction	0	2.50 mi	0	12.04 mi	2.10 mi
Logging Systems:					
Tractor	397 ac	773 ac	5,000 ac	11 ac	695 ac
Skyline	141 ac	179 ac	0 ac	199 ac	71 ac

Biological evaluations have been completed for all plant, wildlife, and fish Proposed, Endangered, Threatened, and Sensitive (PETS) species within each of the project areas. Informal consultation has been initiated with National Marine Fisheries Service for threatened spring-summer chinook salmon for all the projects. All biological evaluations indicated that the project could proceed as planned.

These salvage sales were designed to accomplish their objectives as quickly as possible and minimize the amount of salvage volume lost. To expedite these sale projects and the accompanying work, and to prevent delays by appeals, the process according to 36 CFR part 217 is being followed. Under this Regulation the following is exempt from appeal:

Decisions related to rehabilitation of National Forest System Lands and recovery of forest resources resulting from natural disasters or other natural phenomena, such as wildfires * * * when the Regional Forester * * * determines and gives notice in the **Federal Register** that good cause exists to exempt such decisions from review under this part.

Upon publication of this notice, The Decision Notices for Horn Salvage Timber Sale, Bug Out Salvage Timber Sale, Topple Salvage Timber Sale, Sheep Salvage Timber Sale, and Sufferin' Smith Salvage Timber Sale will be signed by the La Grande District Ranger. These projects will not be subject to review under 36 CFR part 217.

Dated: September 22, 1992.

Richard A. Ferraro,

Deputy Regional Forester.

[FR Doc. 92-23548 Filed 9-28-92; 8:45 am]

BILLING CODE 3410-01-M

Modernization of Existing Facilities and New Construction, Pacific Unified School District

AGENCY: Forest Service, USDA and Pacific Unified School District.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service will jointly prepare an Environmental Impact Statement (EIS), as required by the National Environmental Quality Act (NEPA), and an Environmental Impact Report (EIR), as required by the California Environmental Quality Act, with the Pacific Unified School District, Big Sur, California. The proposed project is the modernization of existing school facilities and new construction to meet state department of education requirements for a high school in an isolated mountain community. The proposal would result in the revision of the existing Forest Service special use permit to include twenty buildable acres (the current permit if for five acres), with a 40-year lease for the National Forest System lands on which school buildings and outdoor education facilities would be placed.

The agency invites comments and suggestions on the scope of analysis to be included in the draft environmental statement. In addition the agency gives notice of the full environmental analysis and decision making process that is beginning on the proposal so that interested and affected people know how they may participate and contribute to the final decision.

DATE: Comments on the scope of the analysis will be accepted for 45 days from the date this notice is published in the Federal Register.

ADDRESS: Submit written comments and suggestions concerning the scope of the analysis to Nancy Knapp, Pacific Unified School District, Pacific Valley 41, Big Sur, CA 93920.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed action

should be directed to Kathleen A. Jordan, District Ranger, Monterey Ranger District, 406 S. Mildred Avenue, King City, CA 93930–3423, telephone (408) 385–5434, FAX (408) 385–0628.

SUPPLEMENTARY INFORMATION: The project has been proposed by Pacific Unified School District, in order to meet state department of education requirements for K–12 education in an isolated mountain community. Over 20 sites were considered by a multi-agency site selection committee, with seven of these sites being visited and further evaluated. The present (proposed) high school site has been publically reviewed and recommended by the Big Sur Multi-Agency Committee as meeting state department of education requirements.

Preliminary issues which have been identified are: Visual viewshed, cultural resource impacts, disruption of school during the construction period, disruption of public recreation use of adjacent areas during the construction period, temporary storage of construction materials, location of borrow and disposal areas, native plants, site selection,soil stability, threatened and endangered species, riparian area effects, water quality and quantity, fisheries, fire protection, solid and sanitary waste disposal, energy use and fuel storage, noise, transportation, housing for school staff, cost of maintenance and operation, site security, air quality, existing and changing uses and users.

The project will require revision and extension of the existing Forest Service Special Use Permit. State Historical Preservation Office approval will be needed for cultural resource surveys and reports. The County of Monterey will require a Use Permit. The California Coastal Commission will require a Consistency Determination with the Local Coastal Plan.

The responsible official for the Forest Service and the NEPA process is David W. Dahl, Forest Supervisor, Los Padres National Forest, 6144 Calle Real, Goleta, California, 93117.

The decision to be made by the Forest Supervisor is whether or not to revise the existing Special Use Permit to authorize additional school facilities on a twenty acre portion of National Forest System land for a 40 year term. The potential impacts to adjacent public facilities, particularly the Plaskett Creek Campground and Sand Dollar Day Use Area, will also be considered.

The estimated date for completion of the DEIS is March 1, 1993. The estimated date for completion of the final EIS is August 1, 1993.

The comment period of the Draft Environmental Impact Statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts the agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC, U.S. 519, 553 (1978).* Also, enviromental objections that could be raised at the draft environmental impact stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon* v. *Hodel,* 803 F.2nd 1016, 1022 (9th Cir. 1986) and *Western Heritages, Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45 day comment period so that substantive comments and objections are available to the Forest Service at a time when it can meaningfully consider them and respond to them in the environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Dated: September 17, 1992.

Mark J. Madrid,

Deputy Forest Supervisor.

[FR Doc. 92–23553 Filed 9–28–92; 8:45 am]

BILLING CODE 3410–11–M

DEPARTMENT OF COMMERCE

Agency Forms Under Review by the Office of Management and Budget

DOC has submitted to OMB for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: National Oceanic and Atmospheric Administration.

Title: Applications and Reports for Registration as Tanner or Agent.

Agency Form Number: N/A.

OMB Approval Number: 0648–0179.

Type of Request: Extension of the expiration date of a currently approved collection.

Burden: 78 hours.

Number of Respondents: 39.

Avg Hours Per Respondent: 2 hours.

Needs and Uses: Under the Marine Mammal Protection Act, Alaskan natives may take marine mammals for subsistence or for creating or selling native handicrafts. Possession of marine mammals so taken is allowed only to natives or registered agents or tanners. The requested information is needed to register tanners/agents and to monitor activities through reports.

Affected Public: Individuals or households, businesses or other for-profit institutions, small businesses or organizations.

Frequency: Annually, recordkeeping.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Ron Minsk, (202) 395–3084.

Agency: National Oceanic and Atmospheric Administration.

Title: Cooperative Charting Program.

Form Numbers: NOAA 77–4 and 77–5.

OMB Approval Number: 0648–0022.

Type of Request: Extension of the expiration date of a currently approved collection.

Burden: 45,000 hours.

Number of Respondents: 3,000.

Avg Hours Per Respondent: 15 hours (average 3 hours per response — 5 responses per respondent).

Needs and Uses: Forms are used by the U.S. Power Squadrons and U.S. Coast Guard Auxiliary members for reporting observed chart corrections. Corrections are used daily by the National Ocean Service in maintaining and preparing new editions of its nautical charts and for issuing Notices to Mariners. The charts are used nationwide by recreational boaters and commercial vessels for safe navigation on our nation's waterways.

Affected Public: Individuals, non-profit institutions.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Ron Minsk, (202) 395–3084.

Agency: National Oceanic and Atmospheric Administration.

Title: Management and Oversight of the National Estuarine Research Reserves System.

Agency Form Number: N/A.

OMB Approval Number: 0648–0121.

Type of Request: Extension of the expiration date of a currently approved collection.

Burden: 12,532 hours.

Number of Respondents: 94.

Avg Hours Per Respondent: 133 hours (response time ranges between 1.25 and 2,012 hours depending on reporting requirement).

Needs and Uses: Grant monies are available for states to establish estuarine reserves. Grants funds are given to state governments and others to conduct research within those reserves. Applications are necessary to determine eligibility, and reports are needed to determine grant results.

Affected Public: Individuals or households, state or local governments, non–profit institutions.

Frequency: On occasion, quarterly.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Ron Minsk, (202) 395–3084.

Copies of the above information collection proposals can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 482–3271, Department of Commerce, room 5327, 14th and Constitution Avenue, NW., Washington, DC 20230..

Written comments and recommendations for the proposed information collections should be sent to Ron Minsk, OMB Desk Officer, room 3019, New Executive Office Building, Washington, DC 20503.

Dated: September 22, 1992.

Edward Michals,

Departmental Forms Clearance Officer, Office of Management and Organization.

Datacon, Inc	60 Blanchard Road, Burlington, MA 01803	09/10/92	Electronics—wire wrapped printed circuit boards.

The petitions were submitted pursuant to section 251 of the Trade Act of 1974 (19 U.S.C. 2341). Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Trade Adjustment Assistance Division, room 7023, Economic Development Administration, U.S. Department of Commerce, Washington, DC 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

The Catalog of Federal Domestic Assistance official program number and title of the program under which these petitions are submitted is 11.313, Trade Adjustment Assistance.

Dated: September 21, 1992.

Kathleen W. Lawrence,

Deputy Assistant Secretary for Program Operations.

BILLING CODE 3510-24-M

International Trade Administration

Annual Report on the Status of Antidumping and Countervailing Duty Program and Opportunity to Comment

AGENCY: Import Administration/ International Trade Administration Department of Commerce.

ACTION: Proposal for an Annual Report on the status of the Antidumping and Countervailing Duty Program and opportunity to comment.

SUMMARY: The International Trade Administration (ITA) is planning to begin issuing an annual report on the status of the antidumping (AD) and countervailing duty (CVD) program. Because this will be a new action, interested parties are invited to comment.

EFFECTIVE DATE: September 28, 1992.

FOR FURTHER INFORMATION CONTACT: Thomas F. Futtner, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone: (202) 377-3814.

SUPPLEMENTARY INFORMATION:

Background

ITA is proposing to issue an annual report on the status of the AD/CVD program. The first report covering the fiscal year of 1992 (October 1, 1991 through September 30, 1992) will be issued in early 1993. Among other things, the proposed report will include the following:

- A summary of AD/CVD orders and suspension agreements currently in effect.
- A summary of the petitions filed, initiations, and new AD/CVD orders and suspension agreements implemented during the fiscal year.
- A summary of the AD/CVD administrative reviews, scope rulings and protests completed during the fiscal calendar.
- The total number of suspended entries on a case-by-case basis as of the end of the fiscal year.
- A summary of the AD/CVD cases subject to court-ordered injunctions on liquidation.
- The total entered value of merchandise subject to AD/CVD orders entered during the fiscal year.
- The total value of cash deposited and/or bonds posted on the entered merchandise for the fiscal year.

The report will include a list of the AD/CVD orders and suspension agreements currently in effect. It will also summarize some of the key issues and problems encountered in the administration and enforcement of the AD/CVD orders.

All interested parties and the general public may comment on the above and/or any other relevant issue(s) associated with the foregoing. Comments should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, room B099, U.S. Department of Commerce, Washington, DC 20230. Comments are due no later than 30 days from the publication of this notice.

Dated: September 22, 1992.

Rolf Th. Lundberg, Jr.,

Acting Assistant Secretary for Import Administration.

[C-614-701]

Certain Steel Wire Nails from New Zealand, Intent To Revoke Countervailing Duty Order

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of intent to revoke countervailing duty order.

SUMMARY: The Department of Commerce is notifying the public of its intent to revoke the countervailing duty order on certain steel wire nails from New Zealand. Interested parties who object to this revocation must submit their comments in writing not later than October 31, 1992.

EFFECTIVE DATE: September 29, 1992.

FOR FURTHER INFORMATION CONTACT: Patricia W. Stroup, Gayle Longest, or Maria MacKay, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 482-0983 or 482-4149.

SUPPLEMENTARY INFORMATION:

Background

On October 5, 1987, the Department of Commerce ("the Department") published a countervailing duty order on certain steel wire nails from New Zealand (52 FR 37196). The Department has not received a request to conduct an administrative review of the countervailing duty order on certain steel wire nails from New Zealand for four consecutive annual anniversary months.

In accordance with 19 CFR 355.25(d)(4)(iii), the Secretary of Commerce will conclude that an order is no longer of interest to interested parties and will revoke the order if no interested party objects to revocation or requests an administrative review by the last day of the fifth anniversary month. Accordingly, as required by § 355.25(d)(4) of the Department's regulations, we are notifying the public of our intent to revoke this order.

Opportunity to Object

Not later than October 31, 1992, interested parties, as defined in § 355.2(i) of the Department's regulations, may object to the Department's intent to revoke this countervailing duty order.

Seven copies of any such objections should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, room B-099, U.S. Department of Commerce, Washington, DC 20230.

If interested parties neither request an administrative review (pursuant I84Backgroundto the Department's notice of opportunity to request administrative review), nor object to the Department's intent to revoke by October 31, 1992, we shall conclude that the order is no longer of interest to

interested parties and shall proceed with the revocation.

This notice is in accordance with 19 CFR 355.25(d)(4)(i).

Dated: September 23, 1992.

Roland L. MacDonald,

Acting Deputy Assistant Secretary for Compliance.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Marine Mammals

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Issuance of permit (P517).

On August 7, 1992, notice was published in the **Federal Register** (57 FR 34911) that an application had been filed by Dr. Kathryn A. Ono, Assistant Research Marine Biologist, Biology Board of Studies and Institute of Marine Sciences, University of California, Santa Cruz, CA 95064, to take Steller sea lions (*Eumetopias jubatus*) by harassment during capture, marking, tagging and handling operations and to incidentally harass California sea lions (*Zalophus californianus*) during periodic censuses of both species.

Notice is hereby given that on September 11, 1992, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) the National Marine Fisheries Service issued a Permit for the above taking, subject to certain conditions set forth therein.

Issuance of this Permit is based on a finding that the proposed taking is consistent with the purposes and policies of the Marine Mammal Protection Act. The Service has determined that this research satisfies the issuance criteria for scientific research permits. The taking is required to further a *bona fide* scientific purpose and does not involve unnecessary duplication of research.

Issuance of this Permit, as required by the Endangered Species Act of 1973, is based on a finding that the Permit: (1) was applied for in good faith; (2) does not operate to the disadvantage of the endangered species which is the subject of this Permit; (3) and is consistent with the purposes and policies set forth in Section 2 of the Endangered Species Act of 1973. This Permit was issued in accordance with and is subject to parts 220–222 of title 50 CFR, the National Marine Fisheries Service regulations governing endangered species permits.

The Permit is available for review, by appointment, in the Permit Division, Office of Protected Resources, National Marine Fisheries Service, NOAA, 1335 East-West Highway, room 7324, Silver Spring, MD 20910 (301/713–2289); and

Director, Southwest Region, National Marine Fisheries Service, NOAA, 501 W. Ocean Blvd., Long Beach, CA 90802–4213 (310/980–4015).

Dated: September 11, 1992.

Charles Karnella,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

COUNCIL ON ENVIRONMENTAL QUALITY

Meeting of President's Commission on Environmental Quality

AGENCY: Council on Environmental Quality, Executive Office of the President, President's Commission on Environmental Quality.

ACTION: Notice of meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, notice is being provided for a meeting of the President's Commission on Environmental Quality. This meeting is open to the public and there will be an opportunity for public comment.

DATES: The meeting will be held on October 16, 1992.

ADDRESSES: The meeting will be held from 9 am to 1:15 pm on Friday, October 16, 1992, at Room 474 (Indian Treaty Room), Old Executive Office Building, 17th & Pennsylvania Avenue, NW., Washington, DC.

Persons attending the meeting will need to provide their names and dates of birth to Ms. Kim Castain (telephone: (202) 395–5750) by Friday, October 9, 1992, at 5 pm for clearance into the Old Executive Office Building. Space in the Indian Treaty Room is limited and persons interested in attending will be accommodated on a first-come, first-served basis.

Agenda

Friday, October 16, 1992

Old Executive Office Building, 17th & Pennsylvania Avenue, NW., Room 474 (Indian Treaty Room), Washington, DC.

9 am–9:15 am Opening Remarks & Agenda Overview
9:15 am–10:30 am Reports/Discussions of Projects Underway
10:30 am–10:45 am Break
10:45 am–11:45 am Project Updates (Continued)
11:45 am–1:00 pm Emerging Findings Discussion
1 pm–1:15 pm Public Comment
1:15 pm Adjourn

FOR FURTHER INFORMATION CONTACT: Ms. Kim Chastain, Staff Assistant, President's Commission on Environmental Quality (telephone: (202) 395–5750).

SUPPLEMENTARY INFORMATION: The President's Commission on Environmental Quality was establish by Executive Order No. 12737 on December 12, 1990. The Commission has 25 members and is chaired by the Chairman of the Council on Environmental Quality. The function of the Commission is to advise the President on matters involving environmental quality.

David Struhs,

Chief of Staff, Council on Environmental Quality.

DEPARTMENT OF EDUCATION

President's Advisory Commission on Educational Excellence for Hispanic Americans; Meeting

AGENCY: President's Advisory Commission on Educational Excellence for Hispanic Americans, Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda for a forthcoming meeting of the President's Advisory Commission on Educational Excellence for Hispanic Americans. This notice also describes the function of the Commission. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act.

DATE AND TIME: October 12, 1992 from 3 p.m. to 6 p.m.

ADDRESS: The Ritz-Carlton Hotel, 2100 Massachusetts Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: John Florez, Executive Director, White House Initiative on Educational Excellence for Hispanic Americans, U.S. Department of Education, Washington, DC 20202–7588. Telephone: (202) 205–2420.

SUPPLEMENTARY INFORMATION: The President's Advisory Commission on Educational Excellence for Hispanic Americans is established under Executive Order 12729.

The Commission is established to advise the Secretary of Education on the educational status of Hispanic Americans, including the programs of Hispanic Americans toward achievement of the national educational goals, and on Federal efforts to promote quality education for Hispanic Americans.

On October 12, the Commission will meet in an open session from 3 p.m. to 6 p.m. The agenda will include: (1) A report on old business; (2) discussion on the appointment of a new executive director; (3) discussion of the letter from the Secretary extending the charter; and (4) discussion of the progress report to be presented to the Secretary of Education on October 13, 1992.

Records are kept of all Commission proceedings, and are available for public inspection at the office of the White House Initiative on Educational Excellence for Hispanic Americans, 400 Maryland Avenue, SW., Washington, DC 20202–7588 from the hours of 8:30 a.m. to 5 p.m.

Dated: September 23, 1992.

Daniel Bonner,

Deputy Assistant Secretary for Elementary and Secondary Education.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Financial Assistance Award Intent to Award a Cooperative Agreement National Association of Regulatory Utility Commissioners

AGENCY: U.S. Department of Energy.

ACTION: Notice of noncompetitive financial assistance award.

SUMMARY: The U.S. Department of Energy (DOE) announces that pursuant to 10 CFR 600.6(a)(2), it is making a financial assistance award based on an unsolicited application satisfying the criteria of 10 CFR 600.14(e)(1) under Cooperative Agreement Number DE–FC01–93RW00277 to the National Association of Regulatory Utility Commissioners to establish a Nuclear Waste Program Office (NWPO) to support review activities and interaction with the National Association of Regulatory Commissioners (NARUC), DOE/Office of Civilian Radioactive Waste Management (OCRWM), the Nuclear Regulatory Commission (NRC) and others in the development of a repository for the permanent disposal of high-level nuclear waste and spend fuel, under the Nuclear Waste Policy Act (NWPA) of 1982, as amended, (42 U.S.C. 10131 *et seq.*). The anticipated term of the cooperative agreement will be five years, subject to the availability of funds. The agreement will have an estimated cost of $630,000 for the first year to be provided by DOE. NARUC will contribute $41,000 for the first year.

SCOPE: The cooperative agreement will provide funding for NWPO to disseminate information to the electric utility ratepayers on issues regarding disposal of high-level radioactive waste and spend nuclear fuel, monitor and review legislation and regulations that will impact NARUC's members, and conduct conferences and technical forums between public utility commissioners, staff, interest groups and DOE to exchange information and views to promote pubic confidence in the safety of the disposal of high-level radioactive waste and spent fuel.

ELIGIBILITY: Based on the receipt of an unsolicited proposal, eligibility for this award is being limited to the National Association of Regulatory Utility Commissioners, the only nationwide organization of regulatory utility commissioners. It has been determined that this project represents a unique and innovative idea which is not eligible for any financial assistance under a recent, current, or planned solicitation. This activity will accomplish a public purpose of support which is fully compatible with the mission of OCRWM, the sponsoring office, which mission is authorized by the Nuclear Waste Policy Act, as amended.

The term of the cooperative agreement shall be five years from the effective date of the award.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Office of Placement and Administration, Attn: Ms. Gracie Narcho, PR–322.1, 1000 Independence Ave, SW., Washington, DC 20585.

BILLING CODE 6450–01–M

Amendment to Solicitation Number DE–PS01–91RW00231 entitled Assess the Feasibility of Siting a Monitored Retrievable Storage (MRS) Facility

AGENCY: U.S. Department of Energy.

ACTION: Amended notice of availability.

SUMMARY: On June 5, 1991, the Department of Energy published a notice of availability of a restricted eligibility solicitation for conduct of feasibility studies for the siting of a Monitored Retrievable Storage (MRS) facility (56 FR 25674).

Amendments to the restricted eligibility solicitation were announced in the **Federal Register** on: August 30, 1991 (56 FR 43006); December 31, 1991 (56 FR 67604); and April 8, 1992 (57 FR 11942). There have been a total of four amendments to the solicitation.

The Department of Energy hereby announces a fifth amendment to the restricted eligibility solicitation. This amendment extends the closing date to March 31, 1993, for Phase 2 grants. The solicitation is now available inviting the submission by eligible States, Indian tribes, and affected units of local government of applications for financial assistance. Executive Order 12372, Intergovernmental Review of Federal Programs, as implemented by 10 CFR Part 1005, applies to this program.

Those who have previously requested copies of the solicitation will be sent copies of the amendment to the solicitation. Requests for copies of the solicitation and amendments must be in writing to the address shown below.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Office of Placement and Administration, Attn: Mr. Nick Graham, PR-322.1, 1000 Independence Ave., SW., Washington, DC 20585.

BILLING CODE 6450-01-M

Secretary of Energy Advisory Board; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770), notice is hereby given of the following advisory committee meeting:

Name: Secretary of Energy Advisory Board Task Force on Economic Analysis and Modeling Related to Energy.

Date and Time: Friday, October 9, 1992, 9 a.m.-5:30 p.m.

Place: Bureau of Economic Geology, University of Texas, Austin, Texas 78713-7508, 512-471-1534.

Contact: Dr. Jake W. Stewart, Designated Federal Officer, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-7092.

Purpose: The Task Force will advise the Department of Energy on how economic models and tools and analysis can better be used to address issues of energy policy by developing recommendations to clarify analytical needs, facilitate communication between DOE analysts and policy markers, and create institutions within DOE that accumulate knowledge gained through the policy making process.

Tentative Agenda

Friday, October 9, 1992, 9 a.m.-5:30 p.m.

9:00 a.m. Call to Order and Introductions—Welcoming Remarks.
9:15 a.m. Review of activities since last meeting.
10:00 a.m. Break.
10:15 a.m. Presentations by DOE staff describing full costs of Fuel Cycle Study.
10:45 a.m. Task force discussion of Externalities Study.
12:00 p.m. Lunch.
1:00 p.m. Task Force discussion on structure of recommendations and final report.
3:00 p.m. Break.
3:15 p.m. Resume discussion on structure of recommendations and final report.
5:00 p.m Public Comment (10 minute rule).
5:30 p.m. Adjourn.

Public Participation: The meeting is open to the public. The Chairman of the Task Force is empowered to conduct the meeting in a fashion that will, in the Chairman's judgment, facilitate the orderly conduct of business.

Any member of the public who wishes to make an oral statement pertaining to agenda items should contact the Designated Federal Officer at the address or telephone number listed above. Requests must be received before 3 p.m. (E.D.T.) Tuesday, October 6, 1992, and reasonable provision will be made to include the presentation during the public comment period. It is requested that oral presenters provide 20 copies of their statements at the time of their presentations.

Written testimony pertaining to agenda items may be submitted prior to the meeting. Written testimony must be received by the Designated Federal Officer at the address shown above before 5 p.m. (E.D.T.) Tuesday, October 6, 1992, to assure that it is considered by Board members during the meeting.

Minutes: A transcript of the meeting will be available for public review and copying approximately 30 days following the meeting at the Public Reading Room, 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 9 a.m. and 4 p.m., Monday through Friday except Federal holidays.

Issued: Washington, DC on: September 24, 1992.

J. Robert Franklin,

Acting Advisory Committee Management Officer.

[FR Doc. 92-23594 Filed 9-28-92; 8:45 am]

BILLING CODE 6450-01-M

Secretary of Energy Advisory Board; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770), notice is hereby given of the following advisory committee meeting:

Name: Secretary of Energy Advisory Board Task Force on Space Nuclear Systems.

Date and Time: Tuesday, October 13, 1992, 8 a.m.-4:30 p.m.

Place: Old Town Sheraton Hotel, 800 Rio Grande Blvd., NE., Albuquerque, New Mexico.

Contact: Dr. Jake W. Stewart, Designated Federal Officer, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-7092.

Purpose: The Secretary of Energy Advisory Board Task Force on Space Nuclear Systems was established in August, 1992 to: (1.) review current DOE space nuclear policy in light of national space policy; (2.) review current DOE space nuclear-related activities with respect to their support of present civilian and national security space requirements; (3.) evaluate the role and practices of the DOE in supporting nuclear space systems required for present and future missions of NASA and the DOD; (4.) review environmental safety and health issues associated with space nuclear systems, and determine whether ample consideration is afforded possible alternative systems; (5.) assess opportunities for international cooperation and collaboration in space nuclear systems; (6.) examine aspects of space nuclear systems in the context of nuclear non-proliferation and other national security issues; (7.) provide to the Secretary of Energy recommendations and guidance for most effectively utilizing DOE and other agency resource to serve national goals in the area of space nuclear systems.

Tentative Agenda

Tuesday, October 13, 1992, 8 a.m.-4:30 p.m.

8:00 am Call to Order and Introductions—Welcoming Remarks.
8:45 am Laws concerning space nuclear applications.
9:30 am Conclusions of Defense Science Board concerning Space Thermal Nuclear Propulsion.
10:15 am Break.
10:30 am Strategic Defense needs for Space Nuclear Systems.
11:15 am Air Force requirements for space nuclear applications.
12:00 pm Work lunch—presentations concerning lab tours.
1:00 pm NASA Office of Exploration requirements and plans for space nuclear missions (NASA Code X).
1:45 pm NASA Office of Space Science needs for space nuclear technology (NASA Code S).
2:30 pm NASA Office of Aeronautics and Space Technology requirements and plans for space nuclear applications (NASA Code R).
3:15 pm Break.
3:30 pm National Space Council perspectives on space nuclear systems.
4:15 pm Time for Task Force Members to converse—Public Comment (10-minute rule).
5:00 pm Adjourn.

Public Participation: The meeting is open to the public. The Chairman of the Task Force is empowered to conduct the meeting in a fashion that will, in the Chairman's judgment, facilitate the orderly conduct of business.

Any member of the public who wishes to make an oral statement pertaining to agenda items should contact the Designated Federal Office at the address or telephone number listed above. Requests must be received before 3 p.m. (E.D.T.) Tuesday, October 6, 1992, and reasonable provision will be made to include the presentation during the public comment period. It is requested that oral presenters provide 20 copies of their statements at the time of their presentations.

Written testimony pertaining to agenda items may be submitted prior to the meeting. Written testimony must be received by the Designated Federal Officer at the address shown above before 5 p.m. (e.d.t.) Tuesday, October 6, 1992, to assure that it is considered by Board members during the meeting.

Minutes: A transcript of the meeting will be available for public review and copying approximately 30 days following the meeting at the Public Reading Room, 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 9 am and 4 pm, Monday through Friday except Federal holidays.

Issued: Washington, DC, on: September 24, 1992.

J. Robert Franklin,

Acting Advisory Committee Management Officer.

[FR Doc. 92-23593 Filed 9-28-92; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. C192-78-000]

Multi-Energy Inc.; Application for Blanket Certificate With Pregranted Abandonment

September 22, 1922.

Take notice that on September 16, 1992, Multi-Energy Inc. (MEI) filed an application under sections 4 and 7 of the Natural Gas Act (NGA) for a blanket certificate with pregranted abandonment authorizing sales in interstate commerce for resale of all categories of natural gas subject to the Commission's NGA jurisdiction. MEI's application is on file with the Commission and open to public inspection.

To be heard or to protest the application a person must file a motion to intervene or a protest on or before October 8, 1992. A person filing a protest or motion to intervene must follow the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All protests or motions to intervene must be filed with the Federal Energy Regulatory Commission, Washington, DC 20426.

The Commission will consider all filed protests in deciding the appropriate action to take but filing a protest does not make a protestant a party to a proceeding. A person wanting to be a party to a proceeding or to participate as a party in a hearing must file a motion to intervene.

Under the procedure provided for here, unless otherwise advised, MEI will not have to appear or be represented at any hearing.

Lois D. Cashell,

Secretary.

[Docket No. RS92-71-000]

Overthrust Pipeline Company; Prefiling Conference

September 22, 1992.

Take notice that a prefiling conference will be convened in this proceeding on Thursday, October 8, 1992, at 9 a.m. It will be held at the offices of the Federal Energy Regulatory Commission, 810 First Street, NE., Washington, DC. The conference will address the proposal for compliance with Order No. 636 circulated by Overthrust Pipeline Company under letter dated July 2, 1992, together with any modifications circulated before or at the October 8 conference. All interested parties are invited to attend. Attendance at the conference will not confer party status. For additional information, interested persons may contact Jacqueline S. Holmes at (202) 208-1265.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Office of Environment, Safety and Health

Meeting of Environment, Safety and Health Advisory Committee; Open Meeting

Pursuant to the provision of the Federal Advisory Committee Act (Pub. L. No. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Environment, Safety and Health Advisory Committee.

Date and Time: Friday, October 23, 1992, 9 a.m.

Place: American Museum of Science and Energy Auditorium, 300 S. Tulane Avenue, Oak Ridge, TN 37830.

Contact: Lisa Kardell, U.S. Department of Energy, Office of Environment, Safety and Health (EH-50), room 7A-075, Washington, DC 20585, Telephone: 202/586-1088.

Purpose of the Committee: To provide advice and guidance to the Department of Energy on matters relating to environment, safety and health at DOE facilities.

Purpose of the Meeting: To gather information regarding Environment, Safety and Health activities at the Department of Energy.

Tentative Agenda:

—Call to order by Robert F. Mathias, Designated Federal Official.
—Remarks by Chairperson Gebbie.
—Update on Environment, Safety and Health Activities at DOE by Paul L. Ziemer, Assistant Secretary for Environment, Safety and Health, U.S. Department of Energy.
—Committee Discussion.
—Local Views.
—Public comment—10-minute rule.
—Subcommittee Reports
—Adjournment

Public Participation: The meeting is open to the public. The Chairperson is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Lisa Kardell at the address or telephone number listed above. Requests must be received at least five business days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda. Persons wishing to attend the public meeting should provide their names to (202) 586-1088 by October 16, 1992.

Transcript: Available for public review and copying at the Public Reading Room, room 1E-190, Forrestal Building, 1000 Independence Avenue, S.W., Washington DC, between 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on September 24, 1992.

J. Robert Franklin,

Acting Advisory Committee Management Officer.

Office of Fossil Energy

[FE Docket No. 92-101-NG]

Aluminum Company of America; Order Granting Blanket Authorization To Import Natural Gas From Canada

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of an order.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Aluminum Company of America blanket authorization to import up to 5.05 Bcf of natural gas from Canada over a two-year term beginning on the date of the first import.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, September 23, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4651-1099]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget

(OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before October 29, 1992.

FOR FURTHER INFORMATION OR TO OBTAIN A COPY OF THIS ICR, CONTACT: Sandy Farmer at EPA, (202) 260092740.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: Mobile Sources Emission Factors Survey (EPA ICR No. 619.06; OMB No. 2060090078). This ICR requests renewal of the existing clearance.

Abstract: The Office of Mobile Sources conducts a survey by testing a random sample of privately owned motor vehicles, stratified by class, mileage, and geographical area. The purpose of the survey is to characterize levels of exhaust pollutants for each combination of class and mileage in the sample. EPA uses the data generated by this survey to model air pollution produced by mobile sources, and to determine the impact of regulations and the benefits of control programs.

Burden Statement: The public reporting burden for this collection of information is estimated to average .389 hour per response. This estimate includes the time needed to review instructions.

Respondents: Owners of in-use motor vehicles.

Estimated Number of Respondents: 8,604.

Estimated Total Annual Burden on Respondents: 3,347 hours.

Frequency of Collection: Annually.

Send comments regarding the burden estimate, or any other aspect of this information collection, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM09223Y), 401 M St., SW., Washington, DC 20460.

and

Troy Hillier, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th Street, NW., Washington, DC, 20530.

Dated: September 21, 1992.

Paul Lapsley,

Director, Regulatory Management Division.

Billing Code 6560-50-F

[FRL-4514-9]

Fuels and Fuel Additives; Workshop

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: On July 12, 1991, the Ethyl Corporation (Ethyl) submitted an application for a waiver of the prohibition against the introduction into commerce of certain fuels and fuel additives set forth in section 211(f) of the Clean Air Act (Act). This application sought a waiver for the gasoline additive, methylcyclopentadienyl manganese tricarbonyl (MMT), an octane enhancer, commercially labeled by Ethyl as HiTEC 3000, to be blended in unleaded gasoline resulting in a level of 0.03125 (1/32) gram per gallon manganese (gpg Mn). On January 8, 1992, the Agency denied Ethyl's request for a waiver for HiTEC 3000 based in part on new data submitted to the Agency by Ford Motor Company (Ford).

On February 13, 1992, Ethyl filed a petition for review of the January 8, 1992 waiver denial decision in the United States Court of Appeals for the District of Columbia Circuit. EPA and Ethyl subsequently entered into discussions concerning a possible settlement of the court case.

To facilitate further settlement discussions with Ethyl, EPA has decided to formulate an emission testing program intended to address in a timely manner specific unresolved issues concerning the effect of MMT on emissions. To allow interested parties to assist in preparing such a program, a workshop will be conducted on October 28, 1992 in Washington, DC.

DATES: EPA will conduct a one-day public workshop concerning a proposed testing program for vehicles utilizing fuels containing MMT beginning at 10 a.m. on October 28, 1992. Parties wishing to participate in the workshop or wishing to receive a copy of EPA's draft emissions testing proposal should contact David J. Kortum by October 14, 1992 at (202) 233-9020. Parties with prepared presentations should provide copies at the time of the workshop for distribution to other attendees. Parties who attend the workshop and other interested persons may submit written comments to the docket until November 4, 1992.

ADDRESSES: The public workshop will take place at Crystal City Marriott, 1999 Jefferson Davis Highway, Arlington, VA 22202 (telephone 703-413-5500).

Copies of the information relative to the Ethyl application are available for inspection in public docket A-92-41 at the Air Docket (LE-131) of the EPA, room M-1500, 401 M Street, SW., Washington, DC 20460, (202) 260-7548, between the hours of 8:30 a.m. to noon and 1:30 p.m. to 3:30 p.m. weekdays. Any comments from interested parties should be addressed to this docket with a copy forwarded to Mary T. Smith, Director, Field Operations and Support Division (6406J), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. As provided in 40 CFR part 2, a reasonable fee may be charged for copying services. Copies of the new data submitted by Ethyl may be obtained from the docket.

FOR FURTHER INFORMATION CONTACT: David J. Kortum, Environmental Engineer, Field Operations and Support Division (6406J), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 233-9022.

SUPPLEMENTARY INFORMATION: Section 211(f)(1)(A) of the Act makes it unlawful, effective March 31, 1977, for any manufacturer of a fuel or fuel additive to first introduce into commerce, or to increase the concentration in use of, any fuel or fuel additive for use in light-duty motor vehicles manufactured after model year 1974 which is not substantially similar to any fuel or fuel additive utilized in the certification of any model year 1975, or subsequent model year, vehicle or engine under section 206 of the Act. EPA has defined "substantially similar" at 56 FR 5352 (February 11, 1991). Section 211(f)(1)(B) of the Act makes it unlawful, effective November 15, 1990, for any manufacturer of a fuel or fuel additive to first introduce into commerce, or to increase the concentration in use of, any fuel or fuel additive for use by any person in motor vehicles manufactured after model-year 1974 which is not substantially similar to any fuel or fuel additive utilized in the certification of a model year 1975, or subsequent model year, vehicle or engine under section 206 of the Act. Thus, section 211(f)(1)(B) expands the prohibitions of 211(f)(1)(A), which apply only to light-duty vehicles. Section 211(f)(4) of the Act provides that, upon application by any fuel or fuel additive manufacturer, the Administrator of EPA may waive the prohibitions of section 211(f)(1) if the Administrator determines that the applicant has established that such fuel or fuel additive will not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emissions standards to which it has

been certified pursuant to section 206 of the Act. If the Administrator does not act to grant or deny a waiver within 180 days of receipt of the application, the statute provides that the waiver shall be treated as granted.

On July 12, 1991, Ethyl submitted an application under section 211(f)(4) of the Act for a waiver for the fuel additive methylcyclopentadienyl manganese tricarbonyl (MMT), commercially labeled by Ethyl as HiTEC 3000, to be blended in unleaded gasoline resulting in a level of 0.03125 (1/32) gram per gallon manganese (gpg Mn). This was Ethyl's fourth application for a waiver for MMT. Ethyl's first application was submitted on March 17, 1978 for concentrations of MMT resulting in 1/16 and 1/32 gpg Mn in unleaded gasoline. Ethyl's second application was submitted on May 26, 1981 for concentrations of MMT resulting in 1/64 gpg Mn in unleaded gasoline. The Administrator denied these requests for waivers. The decisions and justifications thereof may be found in the September 18, 1978 Federal Register, 43 FR 41424, and the December 1, 1981 Federal Register, 46 FR 58630. Ethyl's third application, was submitted on May 9, 1990, for concentrations of MMT resulting in a level of 0.3125 (1/32) gpg Mn in unleaded gasoline. Ethyl withdrew its third application on November 1, 1990, before the deadline for the Administrator to make a determination on the application.

On January 8, 1992, the Administrator of EPA denied Ethyl's July 12, 1991, application for a waiver (57 FR 2535, January 22, 1992). The application was denied based in part upon data submitted by Ford Motor Company which indicated that, for the model groups tested by Ford and, for the conditions under which Ford tested its vehicles, the increases in hydrocarbon exhaust emissions as a result of the use of MMT were substantially greater than those observed in the Ethyl test program. In its decision, the Agency stated that a likely factor which might account for the differences observed between the Ethyl and Ford test programs was the severity of the driving cycle. However, the Agency concluded that other factors might be responsible for the observed differences.

In the denial decision, the Agency stated that it had always accepted data from test programs which "model" the fleet in support of waiver applications, but that if an interested party were to present data indicating that a potentially significant subset of the fleet, not tested by the applicant, was especially susceptible to the negative effects of the additive, the Agency could reasonably require specific testing on representative models of that sub-fleet.

In its decision, the Agency also stated that it believes it is reasonable to take into account the effect of a fuel on vehicles' ability to meet future emissions standards. (The "Tier I" tailpipe standards prescribed by section 202(g) begin to take effect in model year 1994, which begins approximately in September 1993.[1] Therefore, regarding the Ford data mentioned above, the Agency stated in its decision that concerns raised by that data related to both current and future standards.

On February 13, 1992, Ethyl filed a petition for review of the January 8, 1992 waiver denial decision in the United States Court of Appeals for the District of Columbia Circuit. EPA and Ethyl subsequently entered into discussions concerning a possible settlement of the court case. In the context of those discussions, Ethyl submitted to the Agency new emissions test data developed by Ethyl since the denial decision.

In its new test program, Ethyl tested six pairs of 1991 Escorts, using both the relatively high-speed driving pattern similar to that utilized by Ford in its testing of 1991 Escorts (the Ford cycle) and, also, after changing emissions system components (catalyst and oxygen sensor), the driving cycle used by Ethyl in the original test program (EPA's durability certification cycle also known as the AMA). Half of the vehicles utilized MMT-containing fuel and half were run on clear fuel (fuel not containing MMT). Ethyl also performed some catalyst efficiency tests on these vehicles utilizing a "slave engine".[2]

Ethyl also tested six 1988 Escorts which were used in its original test program driven on the AMA cycle. In the new program, after replacing the catalyst and oxygen sensor, Ethyl continued mileage accumulation, from 75,000 to 100,000 miles, utilizing the Ford cycle. Likewise, Ethyl tested six 1988 Buicks from its original fleet accumulating mileage (100,000 to 115,000 miles) using the Ford cycle but without replacing any components.

Finally, in this latest test program, Ethyl accumulated mileage on seven pairs of 1992 vehicles (four Crown Victorias, Six Buick Regals and four Ford Mustangs) over 20,000 to 45,000 miles, with and without MMT, using the Ford cycle.

Based on its inspection and analysis of the new Ethyl data, EPA has tentatively concluded that the data indicate that driving cycle does not contribute significantly to MMT-induced increases in hydrocarbon emissions. (EPA's preliminary analysis has been placed in the docket.) However, in addition to addressing the issue of driving cycle, the Ethyl data appear to confirm the finding by Ford that 1991 Escorts experienced a much higher MMT-induced HC increase than that observed in other models tested (either in Ethyl's new program or in the original Ethyl test program). The Agency is concerned that these data could indicate that certain engine and emissions control system configurations are more vulnerable to an MMT-induced emissions increase irrespective of driving cycle.

To facilitate further settlement discussions with Ethyl, EPA has decided to formulate an emission testing program intended to address in a timely manner specific unresolved issues concerning the effect of MMT on emissions. The test program, to be conducted by Ethyl, will be designed to determine: (1) Whether other vehicles utilizing fuels containing MMT are likely to experience increases in hydrocarbon emissions similar to those observed in 1991 Ford Escorts; and (2) whether fuels containing MMT have significant adverse effects on emissions from vehicles utilizing the technologies most likely to be employed to meet future standards.

EPA has decided to hold a public workshop to assist EPA in formulating a proposed emission test program to address these issues. In particular, EPA would like to obtain information and assistance from technical experts outside of the Agency. Moreover, in view of the significance of any future waiver decision concerning MMT for the auto industry and the general public, EPA is interested in obtaining comments concerning a specific emission testing program and decisional framework designed to address and resolve these issues.

The workshop will be conducted on October 28, 1992 at 10 a.m. at the location listed in the addresses section. Prior to the workshop, EPA will prepare a draft emission testing program and decisional framework that will serve as the focus on the discussions during the workshop. (See the "Dates" section above for instructions on how to receive a copy of this draft prior to the workshop.) All interested parties will be

BILLING CODE 6560-5-M

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirements Submitted to Office of Management and Budget for Review

September 21, 1992.

The Federal Communications Commission has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of these submissions may be purchased from the Commission's copy contractor, Downtown Copy Center, 1990 M Street, NW., Suite 640, Washington, DC 20036, (202) 452-1422. For further information on these submissions contact Judy Boley, Federal Communications Commission, (202) 632-7513. Persons wishing to comment on these information collections should contact Jonas Neihardt, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503 (202) 395-4814.

OMB Number: 3060-0370

Title: Part 32—Uniform System of Accounts for Telecommunications Companies

Action: Extension of a currently approved collection

Respondents: Business or other for-profit

Frequency of Response: Recordkeeping and on occasion reporting

Estimated Annual Burden: 239 responses, 105.305 hours average burden per response, 25,168 hours total annual burden per response; 68 recordkeepers, 44,216.176 hours average burden per recordkeeper, 3,006,700 hours total annual burden per recordkeeper; 3,031,868 hours total annual burden

Needs and Uses: The Communications Act of 1934, as amended, allows the Commission, in its discretion, to prescribe the forms of any and all accounts, records, and memeranda to be kept by carriers subject to this Act, including the accounts, records and memoranda of the movement of traffic, as well as of the receipts and expenditures of moneys. It also authorizes the Commission by general or special orders to require any carrier subject to this Act to file monthly reports of earnings and expenses and to file periodical and/or special reports concerning any matters with respect to which the Commission is authorized or required by law to act. The information contained in the various reports submitted to this Commission by the carriers provides necessary detail to enable this Commission to fulfill its regulatory responsibilities. Part 32 imposes essentially recordkeeping requirements. The reporting requirements contained in the rulepart are sporadic or initiated by the carriers.

OMB Number: 3060-0150

Title: Part 22—Public Mobile Service

Action: Revision of a currently approved collection

Respondents: Businesses or other for-profit (including small businesses)

Frequency of Response: Recordkeeping requirement, quarterly, semi-annually, and on occasion reporting

Estimated Annual Burden: 35,828 responses, 8.8 hours average burden per response; 315,286 hours total annual burden per response; 1,200 recordkeepers, 52.27 average burden per recordkeeper, 62,724 hours total annual burden per recordkeeper; 378,010 hours total annual burden

Needs and Uses: Information collection requirements contained in part 22 have been previously submitted to OMB for review/approval. In addition, the Commission has recently proposed a major revision of part 22, and these proposed rules have been submitted to OMB. However, because the new rules may not become effective for another 12 to 18 months, and because of recent questions raised about whether OMB clearance was properly obtained for certain provisions of the current part 22, the Commission is resubmitting the entire part, to ensure that we are in full compliance with the Paperwork Reduction Act of 1980 (PRA). The Commission collects this information to ensure that stations licensed under part 22 do not cause interference to other radio facilities, and otherwise meet basic technical and legal requirements.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

FCC Renews EBSAC Charter

September 22, 1992.

In accordance with the GSA Final Rule on Federal advisory committee management, 41 CFR part 101-6 Sec. 101-6.1015, the Federal Communications Commission is giving official notice on the renewal of the Emergency Broadcast System Advisory Committee (EBSAC). The term of this Committee runs from July 30, 1992 to July 30, 1994.

EBSAC advises the FCC on all matters concerning the Emergency Broadcast System including policies, technologies, plans, regulations and procedures for the existing system and possible new systems at the national, state and local levels.

For additional information, contact the EBS staff at (202) 632-3906.

Federal Communications Commission.

BILLING CODE 6712-01-M

FEDERAL RESERVE SYSTEM

Consumer Advisory Council; Meeting of Consumer Advisory Council

The Consumer Advisory Council will meet on Thursday, October 29. The meeting, which will be open to public observation, will take place in the Board Room of the Eccles Building. The meeting is expected to begin at 9 a.m. and to continue until 5 p.m., with a lunch break from 1 until 2 p.m. The Eccles Building is located on C Street, Northwest, between 20th and 21th Streets in Washington, DC.

The Council's function is to advise the Board on the exercise of the Board's responsibilities under the Consumer Credit Protection Act and on other matters on which the Board seeks its advice. Time permitting, the Council will discuss the following topics:

Survey of Mortgage Lending Practices in Boston. Status report on a study by the Federal Reserve Bank of Boston on the lending practices of 132 financial institutions operating in the Boston metropolitan area (specifically what information the lenders rely on in determining whether to grant or deny applications for mortgages).

Home Mortgage Disclosure Act Data. Status report on the 1991 national aggregates of Home Mortgage Disclosure Act data, which will summarize the mortgage activity of all lenders that report HMDA data.

Issues Related to Unlawful Mortgage Discrimination. Briefing by the

Community Affairs and Housing Committee on its activities concerning possible disparate impacts of primary and secondary mortgage market underwriting standards and other issues related to mortgage discrimination.

Burdens and Benefits of Consumer Protection Rules. Discussion of the merits of possible actions that could be taken to reduce the regulatory burden associated with the Board's consumer protection rules.

Consumer Credit Education Activities. A report from the Board's Office of Public Affairs and the International Credit Association (ICA) about the relationship that has been established between the ICA and the Board and others to support quality credit education to teachers and students.

Members Forum. Presentation of individual Council members' views on whether there are visible signs of an economic upturn present within their industries or local economies and whether it is getting easier to obtain a loan.

Governor's Report. Report by Federal Reserve Board Member Lawrence B. Lindsey on recent Board initiatives and issues of concern, with an opportunity for questions from Council members.

Council Member Perspectives. Remarks by Council members identifying special areas of importance and concern to their organizations regarding the provision of financial services to consumers and communities.

Committee Reports. Reports from Council committees on their work and plans for 1993.

Other matters previously considered by the Council or initiated by Council members may also be discussed.

Persons wishing to submit to the Council their views regarding any of the above topics may do so by sending written statements to Ann Marie Bray, Secretary, Consumer Advisory Council, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551. Comments must be received no later than close of business Friday, October 23, and must be of a quality suitable for reproduction.

Information with regard to this meeting may be obtained from Bedelia Calhoun, Staff Specialist, Consumer Advisory Council, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452–2412. Telecommunications Device for the Deaf (TDD) users may contact Dorothea Thompson, (202) 452–3544.

Board of Governors of the Federal Reserve System, September 23, 1992.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210–01–M

FEDERAL TRADE COMMISSION

[Dkt. C–3392]

Jason Pharmaceutical, Inc., et al.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order prohibits, among other things, the Maryland marketers of the Medifast diet programs from misrepresenting the efficacy of any very-low-calorie diet program, and from falsely claiming that their physicians are certified in the treatment of obesity. In addition, the order requires the respondents to possess competent and reliable scientific evidence to substantiate any claims about the success of patients on any diet program in achieving or maintaining weight loss, and requires that claims about the safety of the program be accompanied by a clear disclosure that physician monitoring is needed to minimize the potential for health risks.

DATES: Complaint and Order issued September 16, 1992.[1]

FOR FURTHER INFORMATION CONTACT: Richard Kelly, FTC/H–200, Washington, DC 20580. (202) 326–3304.

SUPPLEMENTARY INFORMATION: On Wednesday, October 23, 1991, there was published in the **Federal Register**, 56 FR 54866, a proposed consent agreement with analysis In the Matter of Jason Pharmaceutical, Inc., et al., for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of the order.

Comments were filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered an order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

Authority: Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45, 52.

[Docket 9247]

Phone Programs, Inc.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit, among other things, a New York corporation from misrepresenting the ease with which a premium is obtainable and the content of any telephone information service message to children aged twelve and under. In addition, the respondent would be required to include a clear statement at the beginning of each children's message giving the child a chance to hang up without charge, and would be required to provide a means for parents to prevent, or not be charged for, unauthorized calls by their children.

DATES: Comments must be received on or before November 30, 1992.

ADDRESSES: Comments should be directed to: FTC/Office of the Secretary, room 159, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Joel Winston, FTC/S-4002, Washington, DC 20580. (202) 326-3153.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 3.25(f) of the Commission's Rules of Practice (16 CFR 3.25(f)), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(6)(ii) of the Commission's Rules of Practice (16 CFR 4.9(b)(6)(ii)).

Agreement Containing Consent Order to Cease and Desist

The agreement herein, by and between Phone Programs Incorporated, a corporation, by its duly authorized officer, hereafter sometimes referred to as respondent, and its attorney, and counsel for the Federal Trade Commission, is entered into in accordance with the Commission's Rule governing consent order procedures. In accordance therewith the parties hereby agree that:

1. Respondent Phone Programs Incorporated is a corporation organized, existing and doing business under and by virtue of the laws of the State of New York, with its office and principal place of business located at 919 Third Avenue, New York, New York 10022.

2. Respondent has been served with a copy of the complaint issued by the Federal Trade Commission charging it with violation of section 5(a) of the Federal Trade Commission Act, and has filed its answer denying said charges.

3. Respondent admits all the jurisdictional facts set forth in the Commission's complaint in this proceeding.

4. Respondent waives:

(a) any further procedural steps;

(b) the requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) all rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) any claim under the Equal Access To Justice Act.

5. This agreement shall not become a part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the respondent, in which event it will take such action as it may consider appropriate, or issue and serve its decision, in disposition of the proceeding.

6. This agreement is for settlement purposes only and does not constitute an admission by respondent of facts, other than jurisdiction, or of violations of law as alleged in the complaint.

7. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 3.25(f) of the Commission's Rules, the Commission may, without further notice to respondent: (1) Issue its decision containing the following order to cease and desist in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the decision containing the agreed-to-order to respondent's address as stated in this agreement shall constitute service. Respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

8. Respondent has read the complaint and the order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

For purposes of this order, the term "children" or "child" shall mean a person of age twelve or under.

For purposes of this order, the term "information service for children" shall mean a telephone message accessed through a numbered exchange (*e.g.*, "900") for which a fee is charged, consisting of live or recorded statements promoted or sold primarily to children.

For purposes of this order, the term "premium" shall mean any item respondent offers to send to those who call its information service for children.

For purposes of this order, the term "information service message" shall mean any live or recorded story, program or other communication transmitted to callers of respondent's information service for children.

For purposes of this order, the term "video advertisement" shall mean any advertisement intended for dissemination on television broadcast, cablecast, home video, or theatrical release.

For purposes of this order, the term "affiliate" includes, but is not limited to, corporations with a majority of

shareholders or directors in common with respondent.

I.

It is ordered That respondent Phone Programs Incorporated, a corporation, its successors, assigns, and affiliates, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, promotion, offering for sale, sale or transmission of any information service for children in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from misrepresenting, directly or by implication:

A. The ease with which a premium is obtainable; and

B. The content of any information service message for children.

II.

It is further ordered That respondent Phone Programs Incorporated, its successors, assigns, and affiliates, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, promotion, offering for sale, sale or transmission of any information service for children in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from failing as specified below to disclose, clearly and prominently, whenever an offer of any premium is made, all the material terms, conditions and obligations upon which receipt and retention of the premium is contingent. Such terms, conditions, and obligations shall include, but not be limited to, the number of calls necessary to receive the premium, if more than one, and the need to have a writing implement and paper available to record the necessary information given during the information service message.

The disclosure shall be made in a manner understandable to children, and shall be made in the same medium in which the offer of the premium is made and, in addition, in any information service message.

III.

It is further ordered That respondent Phone Programs Incorporated, its successors, assigns, and affiliates, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, do forthwith cease and desist from disseminating or causing to be disseminated any advertisement in any medium for an information service for children that does not include the following statement: "Kids, you must ask your mom or dad and get their permission before you call. This call costs money."

The above-required disclosure shall be presented in a manner designed to ensure clarity and prominence. If the disclosure is made in the manner described below, it will be considered as complying with this provision of the order.

A. In any video advertisement, the disclosure shall be presented simultaneously in both the audio and video portions of the advertisement. The disclosure shall appear immediately following the first video presentation of the "900" telephone number, but in any event shall begin within the first fifteen (15) seconds of the advertisement. The audio portion shall be presented in a slow and deliberate manner. Each line of the video portion shall be at least as large as one-half of the size of the largest presentation of the "900" number that appears on the screen during the advertisement, shall be of a color or shade that readily contrasts with the background, and shall appeal on the screen for the duration of the audio disclosure.

B. In any print advertisement, the disclosure shall be parallel to the base of the advertisement and shall be placed in close proximity to the 900 number. All lines of the disclosure when taken together shall be the same size or larger than the largest presentation of the 900 number, but in any event the type size of each line of the disclosure shall be no less than 12 point, bold-face type.

C. In any radio advertisement, the disclosure shall be presented in a slow and deliberate manner and shall appear immediately following the first presentation of the "900" telephone number, but in any event it shall begin within the first fifteen (15) seconds of the advertisement.

Nothing contrary to, inconsistent with, or in mitigation of the above-required statement shall be used in any advertisement in any medium.

IV.

It is further ordered That respondent Phone Programs Incorporated, its successors, assigns, and affiliates, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, do forthwith cease and desist from disseminating or causing to be disseminated any advertisement in any medium for an information service for children that does not include a disclosure of the cost of a call to the information service. This disclosure shall be presented in a manner designed to ensure clarity and prominence. In any video advertisement, the disclosure shall be presented simultaneously in both the audio and video portions of the advertisement.

V.

It is further ordered That respondent Phone Programs Incorporated, its successors, assigns, and affiliates, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, shall include, at the beginning of every information service message, an introductory preamble that states in a slow, deliberate and clear manner the following: "This telephone call costs money. If you do not have your mom or dad's permission, hang up now and there will be no charge for this call."

VI.

It is further ordered That respondent Phone Programs Incorporated, its successors, assigns, and affiliates, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, do forthwith cease and desist from billing or causing to be billed, or collecting any funds or causing any funds to be collected, for any call to any information service for children terminated within no less than five (5) seconds of the end of the introductory preamble, as required by Paragraph V of this Order.

Provided, in the event that any provision of a federal law or regulation of the Federal Communications Commission is in "actual conflict" with any requirement imposed by Paragraph V or VI of this Order, compliance with such law or regulation shall not be deemed to be a violation of this Order. As used herein, "actual conflict" shall mean that it is impossible for respondent to comply with both the law or regulation and Paragraph V and VI of this Order.

VII.

It is further ordered That respondent Phone Programs Incorporated, its successors, assigns, and affiliates, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, do forthwith cease and desist from including children to call its information service for children and thereby incur charges, without providing any reasonable means for the person responsible for payment of such charges

to exercise control over the transaction. For purposes of this Paragraph, if the respondent does not provide, prior to placement of any call by a child, a reasonable means for the person responsible for payment to avoid unauthorized calls, the provision of a reasonable means to exercise control over the transaction shall be the use of the respondent's best efforts to ensure that one-time refunds or credits are provided upon request for unauthorized calls made by children, as specified below. Best efforts shall include at least the following:

A. Contracting with the appropriate interstate common carrier or local exchange carrier to:

(1) Identify in all telephone bills containing charges for calls to respondent's information service for children each telephone call to such service by the characters "CHILD CALL;"

(2) Place in all telephone bills containing charges for calls to respondent's information service for children, clearly and prominently in close proximity to the itemization of those charges, a toll-free or local telephone number specified to be used for consumer inquiries concerning charges on the telephone bill; *provided*, that a general billing inquiry telephone number for customer inquiries concerning charges on the telephone bill shall satisfy this requirement;

(3) Refer all customers who call the toll-free number inquiring about the charges for respondent's information service for children to their local exchange carrier for information regarding the availability of blocking in their jurisdiction; and

(4) Provide a one-time prompt and full credit or refund at the customer's request for all such calls, whether such request is made to the toll-free or local telephone number specified herein or in any other manner; *provided*, that respondent must contract with the carrier to provide a second prompt and full credit or refund to any customer who requests the first credit or refund during a period of the billing cycle where unauthorized calls have been made, but do not yet appear on the customer's bill, and subsequently requests a second credit or refund for any additional unauthorized calls made before the date of the first request for a credit or refund;

provided, that if the interstate common carrier utilized by respondent employs local exchange carriers to provide billing inquiry services, respondent shall be in compliance with subparagraphs A (3) and (4) of this Paragraph if its contract with the interstate common carrier provides that the interstate common carrier notify each local exchange carrier of the interstate common carrier's policies to:

(i) Provide the customer with information regarding the availability of blocking 900 number calls; and

(ii) Provide upon request one-time refunds or credits for unauthorized calls by children, as provided in subparagraph A(4) of this Paragraph.

B. In the event that respondent receives any information that the interstate common carrier has failed to fulfill its obligations under the contract required by subparagraph A of this Paragraph, immediately notifying the interstate common carrier:

(1) Of the existence of the alleged failure(s);

(2) Of the carrier's responsibility to fulfill its obligations under the contract;

(3) Of the need to investigate and correct all past failures; and

(4) That if a pattern or practice of failures continues, respondent will terminate the use of said carrier for any information service for children; and

C. Terminating the use of said interstate common carrier for any information service for children, in the event that the interstate common carrier does not correct all past failures or continues to fail to fulfill its obligations under said contract.

D. Compliance with the requirements set forth in subparagraphs A–C of this Paragraph is deemed to be satisfactory compliance with this Paragraph.

Provided, that for purposes of this Paragraph, the mere inclusion of any audio or video disclosure relating to parental authorization in advertisements or information service messages is expressly deemed not to be a reasonable means, prior to placement of any call by a child, for the person responsible for payment to avoid unauthorized calls.

VIII.

It is further ordered That for three (3) years from the date of service of this Order, respondent shall maintain and upon request make available to the Federal Trade Commission for inspection and copying: (1) All advertisements for information services for children and all corresponding information service messages; (2) a record of all credit or refund requests made for charges billed for respondent's information services for children; (3) all documents relating to compliance with Paragraph VII of this Order, and (4) all consumer complaints and dispositions thereof relating to respondent's information services for children.

IX.

It is further ordered That respondent shall notify the Commission at least thirty (30) days prior to any proposed change in the corporation such as dissolution, assignment or sale resulting in the emergence of a successor corporation or corporations, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of this Order.

X.

It is further ordered That respondent shall forthwith distribute a copy of this Order to each of its operating divisions and any carrier(s) or other entities providing billing and/or collection service for its information services for children.

XI.

It is further ordered That respondent shall, within sixty (60) days after service of this Order and at such other times as the Commission may require, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Phone Programs, Inc. ("respondent" or "PPI").

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

This matter concerns PPI's television advertisements for its pay-per-call information services for children. These are services accessed by calling a numbered telephone exchange (*e.g.*, 900), in which callers hear recorded stories, games or contests featuring animated or fictional characters.

The Commission's complaint in this matter charges respondent with engaging in unfair and deceptive practices in connection with the advertising and sale of its information services for children. According to the complaint, respondent's ads represented that children who complete a call to

respondent's information service for children would readily and easily obtain the "gift" (or "premium") specified in the advertisement simply by calling the advertised number. This representation is alleged to be false and misleading. In order to obtain the premium, callers were required to follow a number of complex steps that children could not reasonably follow. For example, callers needed to transcribe an address given rapidly and without warning after the recorded story message and were required to send a copy of the phone bill showing the charge for the call to that address.

The complaint also alleges that respondent's advertisements failed to disclose that there are material terms and conditions for obtaining the premium, including the need for a writing implement and paper to transcribe the ordering information.

The complaint also alleges that PPI misrepresented what a child would hear when he/she called PPI's Popeye story line. According to the complaint, PPI's ads and story messages claimed that callers to the story line would hear news about Popeye's birthday. The complaint alleges that these representations were false and misleading because, in fact, only the last of the twenty-nine messages in the series contained any information about Popeye's birthday.

Finally, the complaint alleges that respondent has unfairly induced children to call its information services without providing any reasonable means for the person responsible for paying the charges to exercise control over the transaction. These practices are alleged to cause substantial consumer injury and constitute unfair practices.

The consent order contains provisions designed to remedy the violations charged and to prevent respondent from engaging in similar deceptive and unfair acts and practices in the future.

Part I of the order prohibits respondent from misrepresenting in the advertising or sale of its information services for children the ease with which a premium is obtainable. Part I of the order also prohibits PPI from misrepresenting the content of any information service message for children. The order defines information services for children as fee-charged phone services accessed through a numbered exchange consisting of live or recorded statements promoted or sold primarily to children aged twelve or under.

Part II of the order requires respondent to disclose, clearly and prominently, whenever an offer of premium is made, all of the material terms, conditions and obligations upon which receipt and retention of any premium is contingent. These terms must include, at a minimum, the number of calls needed to receive the premium, if more than one, and the need for a writing implement and paper to transcribe the ordering information. The disclosure must be made in the same medium as the premium offer and also in the recorded message.

Part III of the order requires respondent to include the following disclosure, presented in a manner designed to ensure clarity and prominence, in its advertisements for its information services for children: "Kids, you must ask your mom or dad and get their permission before you call. This call costs money." The order specifies with particularity the manner in which the disclosures shall be presented in different media.

Part IV of the order requires respondent to disclose in a manner designed to ensure clarity and prominence, in all of its advertisements for information services for children, the cost of the telephone call to such services.

Part V of the order requires respondent to include, at the beginning of every recorded phone message for children, the following introductory message in a slow, deliberate and clear manner: "This telephone call costs money. If you do not have your mom or dad's permission, hang up now and there will be no charge for this call."

Part VI of the order prohibits respondent from collecting any funds for any call terminated within five seconds of the end of the introductory preamble required by Part V. Part VI also provides that in the event that the order's introductory message requirement is in actual conflict with a federal law or regulation, compliance with such law or regulation shall not be deemed to be a violation of the order. The term "actual conflict" is defined to mean that it is impossible for respondent to comply with both the law or regulation and the order.

Part VII of the order requires that respondent not induce children to call its information services for children unless it provides a reasonable means for persons responsible for payment to exercise control over the transaction. If respondent does not provide a reasonable means for such persons to avoid unauthorized calls before they are made, respondent must use its best efforts to ensure that one-time credits or refunds are provided upon request for unauthorized calls made by children. "Best efforts" is defined to include, at a minimum, contracting with the appropriate phone company to: (1) Identify in all telephone bills containing charges for calls to respondent's information service for children each telephone call to such service by the characters "Child Call"; (2) place in all bills containing charges for respondent's information service for children, a toll-free number for customer inquiries; (3) refer to all customers who call such toll-free number to their local phone company for information on blocking of 900 calls; and (4) provide a one-time prompt and full refund or credit, upon request, for unauthorized calls made by children. Best efforts also requires respondent to monitor the phone company's compliance with the order requirements and take certain action, including termination of its contract with the phone company, if the phone company does not fulfill its obligations under its contract with respondent.

Part VIII of the order requires respondent to maintain and make available to the Federal Trade Commission for inspection and copying all advertisements for information services for children and all corresponding information service messages, records of all credits or refund requests and their dispositions, all consumer complaints, and all documents relating to the implementation of Part VII, for a period of three years.

Part IX of the order requires respondent to notify the Commission prior to any change in the corporation that may affect compliance obligations arising out of this order.

Part X of the order requires respondent to distribute a copy of the order to each of its operating divisions and to any entity providing billing and/or collection services for its information services for children.

Part XI of the order requires respondent to file a compliance report.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order, or to modify in any way their terms.

Donald S. Clark,

Secretary.

[1] Copies of the Complaint and the Decision and Order are available from the Commission's Public Reference Branch, H–130, 6th Street & Pennsylvania Avenue, NW., Washington, DC 20580.

September 21, 1992, by letter to the Heads of all Executive agencies, the Administrator of General Services waived certain provisions, and clarified the application of certain other provisions, of the FTR to help alleviate hardships encountered by Federal employees relocating to or from the Florida and Louisiana disaster areas. A copy of the Administrator's letter is attached for informational purposes.

FOR FURTHER INFORMATION CONTACT: Jane Groat, General Services Administration, Transportation Management Division (FBX), Washington, DC 20406, telephone FTR or commercial 703–305–5253.

SUPPLEMENTARY INFORMATION: To assist Federal employees relocating from or to the Presidentially declared disaster areas of Florida and Louisiana, agencies have expressed a need to extend the maximum time period allowed for temporary storage of household goods, occupancy of temporary quarters, and completion of residence transactions, as well as to pay for reappraisal and reinspection of damaged homes, after repair, in the case of employees participating in the relocation services program. The attached letter advises agencies of the following authorities available to them, either under existing regulation or by waiver of certain FTR provisions, to assist relocating employees affected by Hurricane Andrew:

(1) Under existing authority, an agency may use the household goods nontemporary storage provision for isolated locations within CONUS (41 CFR 302–9.1) to accommodate relocated employees who need an extension of the maximum time limitation on temporary storage of household goods (applicable in all the declared disaster locations);

(2) The existing 120-day time limitation on occupancy of temporary quarters provided in 41 CFR 302–5.2(a)(2) is waived, allowing agencies to authorize extensions, as needed, in 60-day increments (applicable in all the declared disaster locations);

(3) Also waived is the existing temporary quarters standard-CONUS-rate-based reimbursement ceiling provided in 41 CFR 302–5.4(c). Agencies are authorized to establish a ceiling based on a rate that is not in excess of (a) 300 percent of the applicable maximum per diem rate for disaster localities specified in GSA Bulletins FTR 6 (57 FR 40466, Sept. 3, 1992) and 7, and any supplement(s) thereto, during the period of effectiveness of GSA Bulletins FTR 6 and 7, or (b) 150 percent of the applicable maximum per diem rate for Florida and Louisiana disaster localities not specified in GSA Bulletins FTR 6 or 7 and related supplements, as well as for all disaster locations upon expiration of GSA Bulletins FTR 6 and 7;

(4) The existing 3-year time limitation on completion of residence transactions provided in 41 CFR 302–6.1(e) is waived, allowing agencies to authorize extensions as needed in 1-year increments (applicable in all the declared disaster locations). Also waived is the existing 3-year time limitation, provided in 41 CFR 302–1.6(c), which governs the beginning of travel and transportation associated with a permanent change of official station. This allows agencies to authorize, as needed, extensions in 1-year increments when the 3-year time limitation for completion of residence transactions is extended under the above waiver authority (applicable in all the declared disaster locations); and

(5) Under existing authority, agencies may pay under the terms and conditions of the relocation services contract for reappraisal and reinspection of hurricane-damaged homes, after repair, in the case of employees participating in the relocation services program.

Dated: September 22, 1992.

By delegation of the Commissioner, Federal Supply Service.

Allan W. Beres,

Assistant Commissioner, Transportation and Property Management.

Attachment

September 21, 1992

To: Heads of Executive agencies

Dear [Agency Head]:

Late last month, the most costly natural disaster in our nation's history struck south Florida and the Gulf coast of Louisiana. Hurricane Andrew has left hundreds of thousands homeless and caused billions of dollars in damage. The Federal Government is providing direct assistance and coordinating relief efforts on a massive scale, requiring significant Federal travel to the affected areas. Federal agencies have expressed a need for exceptions to certain Federal Travel Regulation (FTR) (41 CFR 301–304) provisions to accommodate unusual circumstances encountered by Federal employees performing official travel in, or being permanently relocated from or to, only the Presidentially declared disaster areas of Florida and Louisiana.

To aid agencies in carrying out their relief efforts and other necessary missions, GSA Bulletin FTR 6 issued on August 28, 1992 (Enclosure 1), and published at 57 FR 40466, authorizes agencies to approve actual subsistence expense travel reimbursement not to exceed 300 percent of the applicable maximum per diem rate for the Florida counties of Broward, Dade, and Monroe, and for the Louisiana parishes of Assumption, Iberia, Iberville, Lafourche, St. John the Baptist, St. Martin, St. Mary, and Terrebonne. This action is intended to alleviate the difficulty of obtaining suitable lodging at reasonable rates given the current shortage situation. We are issuing Supplement 1 to GSA Bulletin FTR 6 to extend the effective dates therein for an additional 30-day period, and also are issuing GSA Bulletin FTR 7 to mirror for Collier County, Florida and the Parish of East Baton Rouge, Louisiana the authority granted in GSA Bulletin FTR 6.

I also have made the decision to waive additional FTR provisions to aid employees in the process of permanently relocating to or from the areas most severely damaged by Hurricane Andrew. Many of their homes were either destroyed or rendered temporarily uninhabitable. Following are specific actions you may take, either within existing FTR (41 CFR 301–304) authority or within the special waiver authority I am hereby granting to the regulation, to help alleviate the Hurricane-related relocation hardships encountered by these employees. Except as otherwise specified, the actions may be applied as necessary in any of the Florida counties and Louisiana parishes officially designated as a Presidentially declared disaster area following Hurricane Andrew (Enclosure 2), and are retroactive to the effective date of the disaster declaration applicable to each area.

First, in the case of employees who need an extension of the household goods temporary storage time limit, you may use the provisions at 41 CFR 302–9.1 governing nontemporary storage at an isolated location in the continental United States and convert temporary storage to nontemporary storage. Under this provision heads of individual agencies are responsible for designating an isolated official station at which conditions exist for allowing nontemporary storage of household goods at Government expense. Nontemporary storage may be authorized for up to 3 years as necessary.

Second, for those employees relocating to or from a Presidentially declared disaster area who need for reasons attributable to the disaster an extension of the maximum period for occupancy of temporary quarters, I am waiving the maximum 120-day time limitation provided at 41 CFR 302–5.2(a)(2). Agencies are hereby granted authority to extend the temporary

quarters time period in 60-day increments when the head of the agency, or his/her designee, determines that there are compelling reasons for the continued occupancy of temporary quarters.

Additionally, I am waiving the provision at 41 CFR 302–5.4(c) which limits reimbursement for temporary quarters subsistence expenses to a maximum amount based on the standard CONUS rate. Instead, agencies may approve reimbursement for temporary quarters subsistence expenses not to exceed a maximum amount computed in accordance with 41 CFR 302–5.4(c) as follows:

(a) Based on a rate that is not in excess of 300 percent of the maximum per diem rate applicable for the disaster locality for those areas specified in, and during the period covered by, GSA Bulletins FTR 6 and 7 and any supplements thereto; or

(b) Based on a rate that is not in excess of 150 percent of the maximum per diem rate applicable for the disaster locality for disaster areas not specified in GSA Bulletins FTR 6 and 7 and any supplements thereto, as well as for all disaster locations upon expiration of GSA Bulletins FTR 6 and 7 and any supplements thereto.

Third, for those employees relocating to or from a Presidentially declared disaster area who need an extension of the maximum period for completion of residence transactions, I am waiving the maximum 3-year time limitation provided at 41 CFR 302–6.1(e). Agencies are hereby granted authority to extend the period for completion of residence transactions, as needed, in 1-year increments. Correspondingly, I am waiving the maximum 3-year time limitation (provided at 41 CFR 302–1.6(c)) applicable to the beginning of travel and transportation in connection with a change of official station. Agencies are hereby granted authority to extend the period for beginning travel and transportation, as needed, in 1-year increments when the 3-year time limitation for completion of residence transactions is extended under the authority of this paragraph.

Finally, for employees participating in the relocation services program whose residences had already been appraised and/or inspected prior to Hurricane Andrew and whose residences now must be repaired due to the disaster and reappraised and/or reinspected, it is important to note that the expense(s) of the second appraisal/inspection are payable by the agency. They do not constitute duplicate payments for the same service. Such reappraisals/reinspections will be considered as a discrete transaction arising from a new event bearing no relation to the first order for service. If an agency orders the new service, it may pay for the service under the contract's terms and conditions.

The impact of the Hurricane Andrew disaster upon the resources of the Federal Government is great and likely will continue for a protracted period. The authorities I have outlined in this letter are intended to assist you in carrying out your agency's mission with minimum disruption and to allow you to successfully meet the needs of both your employees and the public. It is important that you exercise these authorities judiciously and only as long as is warranted by individual circumstances.

Sincerely,

(John P. Hiler signed for)

Richard G. Austin,

Administrator of General Services.

ENCLOSURE 1

[GSA Bulletin FTR 6]

Federal Travel Regulation; Actual Subsistence Expense Reimbursement in Presidentially Declared Disaster Areas in Florida and Louisiana

August 28, 1992

To: Heads of Federal agencies

Subject: Reimbursement for actual subsistence expenses in Presidentially declared disaster areas of Florida and Louisiana.

1. *Purpose.* This bulletin informs agencies of the establishment of a special actual subsistence expense ceiling for official travel to Florida and Louisiana localities designated as Presidentially declared disaster areas as a result of Hurricane Andrew. This special rate may be applied retroactively to claims for reimbursement covering travel during the periods of August 24 through September 22, 1992 for designated Florida areas, and August 26 through September 24, 1992 for designated Louisiana areas.

2. *Background.* The Federal Travel Regulation (FTR) (41 CFR 301–8) permits the Administrator of General Services to establish a higher actual subsistence expense reimbursement rate for the reimbursement of actual subsistence expenses of Federal employees on official travel to an area within the continental United States. The head of an agency may request establishment of such a rate when special or unusual circumstances, such as a natural disaster resulting in a Presidential disaster declaration, result in an extreme increase in subsistence costs for a temporary period.

3. *Maximum rate and effective date.* The Administrator of General Services, pursuant to 41 CFR 301–8.3(c), has increased the maximum daily amount of reimbursement that may be approved for actual and necessary subsistence expenses for official travel to Florida and Louisiana localities designated as Presidentially declared disaster areas as a result of Hurricane Andrew. For travel during the 30-day period, August 24 through September 22, 1992 for Florida, and August 26 through September 24, 1992 for Louisiana, agencies may approve actual subsistence expense reimbursement not to exceed 300 percent of the applicable maximum per diem rate for the affected Florida counties and Louisiana parishes listed in paragraph 4, below.

4. *Affected localities.* The special reimbursement rate described in paragraph 3, above, applies for travel to the following areas of Florida and Louisiana:

FLORIDA: Counties of Broward, Dade, and Monroe.

LOUISIANA: Parishes of Assumption, Iberia, Iberville, Lafourche, St. John the Baptist, St. Martin, St. Mary, and Terrebonne.

5. *Expiration date.* This bulletin expires on December 31, 1992.

6. *For further information contact.* Jane E. Groat, General Services Administration, Transportation Management Division (FBX), Washington, DC 20406, telephone FTS or commercial 703–305–5253.

By delegation of the Commissioner, Federal Supply Service.

Allan W. Beres,

Assistant Commissioner, Transportation and Property Management.

ENCLOSURE 2

Presidentially declared disaster areas in Florida and Louisiana as a result of Hurricane Andrew

Following is a complete listing (current as of September 15, 1992) of all Florida counties and Louisiana parishes declared disaster areas as a result of Hurricane Andrew:

FLORIDA: Counties of Broward, Collier, Dade, and Monroe.

LOUISIANA: Parishes of Acadia, Allen, Ascension, Assumption, Avoyelles, Calcasieu, Cameron, East Baton Rouge, East Feliciana, Evangeline, Iberia, Iberville, Jefferson, Jefferson Davis, Lafayette, Lafourche, Livingston, Orleans, Plaquemines, Pointe Coupee, Rapides, St. Bernard, St. Charles, St. Helena, St. James, St. John the Baptist, St. Landry, St. Martin, St. Mary, St. Tammany, Tangipahoa, Terrebonne, Vermilion, Washington, West Baton Rouge, and West Feliciana.

A total of 4 counties in Florida and 36 parishes in Louisiana have been designated as disaster areas.

[GSA Bulletin FTR 6, Supplement 1]

Federal Travel Regulation; Actual Subsistence Expense Reimbursement in Presidentially Declared Disaster Areas in Florida and Louisiana

September 21, 1992

To: Heads of Federal agencies

Subject: Reimbursement for actual subsistence expenses in Presidentially declared disaster areas of Florida and Louisiana.

1. *Purpose.* This supplement informs agencies of the extension for an additional 30-day period of the special actual subsistence expense ceiling described in GSA Bulletin FTR 6 (57 FR 40466, Sept. 3, 1992) for official travel to certain Florida and Louisiana localities designated as Presidentially declared disaster areas as a result of Hurricane Andrew.

2. *Explanation of change.* The Administrator of General Services, pursuant to 41 CFR 301-8.3(c), has extended for an additional 30 days the period during which agencies may approve, in accordance with paragraph 3 of GSA Bulletin FTR 6, actual and necessary subsistence expense reimbursement not to exceed 300 percent of the applicable maximum locality per diem rate for official travel to the Presidentially declared disaster areas in Florida and Louisiana named in paragraph 4 of GSA Bulletin FTR 6. For Florida counties named in GSA Bulletin FTR 6 the extended period covers September 23 through October 22, 1992; for Louisiana parishes named in GSA Bulletin FTR 6 the extended period covers September 25 through October 24, 1992.

3. *Expiration date.* This supplement expires on December 31, 1992.

4. *For further information contact.* Jane E. Groat, General Services Administration, Transportation Management Division (FBX), Washington, DC 20406, telephone FTS or commercial 703-305-5253.

By delegation of the Commissioner, Federal Supply Service.

Allan W. Beres,

Assistant Commissioner, Transportation and Property Management.

[GSA Bulletin FTR 7]

Federal Travel Regulation; Actual Subsistence Expense Reimbursement in Presidentially Declared Disaster Areas in Florida and Louisiana

September 21, 1992

To: Heads of Federal agencies

Subject: Reimbursement for actual subsistence expenses in Presidentially declared disaster areas of Florida and Louisiana.

1. *Purpose.* This bulletin informs agencies of the establishment of a special actual subsistence expense ceiling for official travel to two Florida and Louisiana localities designated as Presidentially declared disaster areas as a result of Hurricane Andrew. These two locations are in addition to the three Florida counties and eight Louisiana parishes for which a special actual subsistence expense ceiling was announced in GSA Bulletin FTR 6 issued on August 28, 1992 (57 FR 40466, Sept. 3, 1992). This special rate may be applied retroactively to claims for reimbursement covering travel during the periods of September 23 through October 22, 1992 for the new Florida area, and September 25 through October 24, 1992 for the new Louisiana area.

2. *Background.* The Federal Travel Regulation (FTR) (41 CFR 301-8) permits the Administrator of General Services to establish a higher actual subsistence expense reimbursement rate for the reimbursement of actual subsistence expenses of Federal employees on official travel to an area within the continental United States. The head of an agency may request establishment of such a rate when special or unusual circumstances, such as a natural disaster resulting in a Presidential disaster declaration, result in an extreme increase in subsistence costs for a temporary period.

The General Services Administration (GSA) issued GSA Bulletin FTR 6 on August 28, 1992 (57 FR 40466) authorizing a special actual subsistence expense ceiling for official travel performed to certain Presidentially declared disaster areas in Florida and Louisiana resulting from Hurricane Andrew. The effective period of the special reimbursement ceiling announced in GSA Bulletin FTR 6 has been extended by Supplement 1 to Bulletin 6. The Federal Emergency Management Agency has now requested establishment of a special actual subsistence expense ceiling for two additional Hurricane Andrew disaster locations, one in Florida and one in Louisiana.

3. *Maximum rate and effective date.* The Administrator of General Services, pursuant to 41 CFR 301-8.3(c), has increased the maximum daily amount of reimbursement that may be approved for actual and necessary subsistence expenses for official travel to the specified Florida and Louisiana localities designated as Presidentially declared disaster areas as a result of Hurricane Andrew. For travel during the 30-day period, September 23 through October 22, 1992 for Florida, and September 25 through October 24, 1992 for Louisiana, agencies may approve actual subsistence expense reimbursement not to exceed 300 percent of the applicable maximum per diem rate for the affected Florida county and Louisiana parish listed in paragraph 4, below.

4. *Affected localities.* The special reimbursement rate described in paragraph 3, above, applies for travel to the following areas in Florida and Louisiana:

FLORIDA

Collier County

LOUISIANA

Parish of East Baton Rouge

5. *Expiration date.* This bulletin expires on December 31, 1992.

6. *For further information contact.* Jane E. Groat, General Services Administration, Transportation Management Division (FBX), Washington, DC 20406, telephone FTS or commercial 703-305-5253.

By delegation of the Commissioner, Federal Supply Service.

Allan W. Beres,

Assistant Commissioner, Transportation and Property Management.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N-92-3515]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Angela Antonelli, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Kay F. Weaver, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708-0050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Ms. Weaver.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: September 23, 1992.

Kay Weaver,

Acting Director, IRM Policy and Management Division.

Notice of Submission of Proposed Information Collection to OMB

Proposal: Single Family Application for Insurance Benefits.
Office: Housing.
Description of the Need for the Information and Its Proposed Use: This form will be used to provide the Department with information needed to process and pay claims on defaulted FHA insured home mortgage loans.
Form Number: HUD-27011, Parts A, B, C, D, and E.
Respondents: Businesses or Other For-Profit.
Frequency of Submission: On Occasion.

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Outer Continental Shelf Advisory Board; Renewal

This notice is published in accordance with section 9(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix). Notice is hereby given that the Secretary of the Interior is renewing the Outer Continental Shelf (OCS) Advisory Board Charter.

The purpose of the OCS Advisory Board is to provide advice to the Secretary of the Interior and other officers of the Department in the performance of discretionary functions of the OCS Lands Act, as amended, including all aspects of leasing, exploration, development, and protection of the resources of the OCS.

Further information regarding the Committee may be obtained from the Chief, Office of OCS Advisory Board Support, Minerals Management Service, Department of the Interior, 381 Elden Street, Herndon, Virginia 22070.

Certification

I hereby certify that the renewal of the Outer Continental Shelf Advisory Board Charter is in the public interest in connection with the performance of duties imposed on the Department of the Interior by 43 U.S.C. 1331 et seq.

Dated: September 17, 1992.

Manuel Lujan, Jr.,

Secretary of the Interior.

BILLING CODE 4310-RM-M

Bureau of Land Management

Review of Land Use Plan, Exception to the California Desert Conservation Area Plan

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent.

SUMMARY: Notice is hereby given that the Bureau of Land Management (BLM) is considering an exception to the California Desert Conservation Area (CDCA) Plan, in accordance with 43 CFR 1610.5-5 and the procedures outlined in Chapter 7 of the CDCA Plan. This proposed exception, if approved, would allow the issuance of a Right-of-Way Grant across public land for a water pipeline, larger than 12 inches, outside of a designated utility corridor, but within a contingent corridor. The Mojave Water Agency has applied for a Right-of-Way Grant, under 43 CFR 2800, to construct, operate and maintain a 30-inch water pipeline to deliver State Project Water from the Aqueduct in

Hesperia, California to the vicinity of the Town of Yucca Valley. A contingency corridor was identified in the CDCA Plan along the proposed pipeline alignment across public land. If approved, the BLM proposes to permit an exception to the CDCA Plan for this proposed project and not to activate this contingent corridor.

DATES: Written comments must be submitted or postmarked no later than October 30, 1992.

ADDRESSES: Written comments should be sent to: Stephen Johnson, Special Projects Manager, Bureau of Land Management, California Desert District Office, 6221 Box Springs Boulevard, Riverside, California 92507–0714.

FOR FURTHER INFORMATION CONTACT: Stephen Johnson, Special Projects Manager, California Desert District Office; (714) 697–5234.

SUPPLEMENTARY INFORMATION: The Mojave Water Agency (MWA) is an instrumentality, authorized by the State of California, with responsibility for wholesaling State Project Water to local water purveyors in the Morongo Basin portion of San Bernardino County. In 1989, several communities in the Morongo Basin (Yucca Valley, Joshua Tree and Landers) voted to approve general obligation bonds to fund the construction of a 68.4 mile pipeline to convey State Project Water from the City of Hesperia, along the north slope of the San Bernardino Mountains, to these communities. After detailed engineering and environmental studies, a pipeline alignment was selected by MWA which follows existing public roads, including State Highway 247. This proposed pipeline will be 30 inches in diameter and will cross public land, administered by the BLM, for approximately 15 percent of the total route, or 9.67 miles.

Portions of the Morongo Basin have experienced severe overdraft from historic pumping activities. Without access to State Project Water, some local aquifers could be depleted. The 30-inch size of this pipeline is dictated to ensure delivery to the Morongo Basin of up to 10,900 acre feet of water per year of State Project Water. This volume of State Project Water could be delivered during those years when sufficient water is available from the State Water Project. The water delivered to the Morongo Basin will be served to water customers by the local water purveyors that have contracted for State Project Water.

The BLM contemplates that this water pipeline, as proposed, should be considered as an exception to the CDCA Plan, rather than activating the contingency corridor that parallels State Highway 247 from Lucerne Valley to Yucca Valley. An Environmental Assessment is being prepared that will evaluate the effects of constructing and operating this proposed water pipeline from its point of origin to its point of termination, including the 9.67 miles of public land. It is anticipated that this Environmental Assessment will be issued in November 1992.

Dated: September 22, 1992.

Richard E. Fagan,

Acting Desert District Manager.

Kingman Resource Area Grazing Advisory Board Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting—Kingman Resource Area Grazing Board.

SUMMARY: The Kingman Resource Area Grazing Advisory Board will hold a meeting on Wednesday, November 4, 1992. The meeting will start at 9 a.m. in the Kingman Resource Area Conference Room, 2475 Beverly Avenue, Kingman, Arizona 86401.

The agenda for the meeting will include:

1. Update of the Kingman Resource Management Plan.
2. Status of Wilderness/Range Improvement Maintenance Schedules.
3. Report on Range Improvements for FY 92/93.
4. Allotment Management Plan Update.
5. Request for Advisory Board Expenditures.
6. Arrangements for Future Meetings.

The meeting is open to the public. Anyone wishing to make oral or written statements to the Board is requested to do so through the office of the District Manager, 2015 West Deer Valley Road, Phoenix, Arizona 85027, at least seven days prior to the meeting date.

Summary minutes of the Board meeting will be maintained in the District Office and be made available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Dated: September 23, 1992.

Southwestern Arizona Grazing Advisory Board; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting—Southwestern Arizona Grazing Advisory Board.

SUMMARY: The Southwestern Arizona Grazing Advisory Board will hold a meeting on Thursday, November 5, 1992. The meeting will start a 9 a.m. in the Phoenix District Conference Room, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

The agenda for the meeting will include:

1. Update of the Bureau's Exchange Program.
2. Update of the Santa Maria Ranch.
3. Status of Wilderness Program.
4. Report on Range Improvements for FY 92/93.
5. Range Program Summary Update.
6. Request for Advisory Board Expenditures.
7. Arrangements for Future Meetings.

The meeting is open to the public. Anyone wishing to make oral or written statements to the Board is requested to do so through the office of the District Manager, 2015 West Deer Valley Road, Phoenix, Arizona 85027, at least seven days prior to the meeting date.

Summary minutes of the Board meeting will be maintained in the District Office and be made available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

BILLING CODE 4310–32–M

[CA–010–4212–13, CACA 30807]

Realty Action; Exchange of Public Land in El Dorado County, CA

AGENCY: Bureau of Land Management (BLM), Interior.

SUMMARY: The following described public land is being considered for exchange under section 206 of the Federal Land Policy and Management Act of October 21, 1976 (43 U.S.C. 1716):

Selected Public Land

El Dorado County, CA

T. 11 N., R. 9E., M.D.M.
Sec. 12: all public land lying north and east of State Highway 49, including the

NW¼NE¼SE¼, E½NW¼SE¼NW¼, and W½NE¼SE¼NW¼
Totaling Approximately 35-acres.

The above described public land is being considered for a possible transfer to adjacent owners ED and Virginia Bacchi. The subject tracts are difficult to manage in Federal ownership and are of minimal value to the general public.

In exchange the public would receive a conservation easement on 29-acres of private riverfront property on the South Fork of the American River. The property fronts approximately one-half mile (2400 ft.) of this extremely popular river. The easement would essentially prevent future disturbances detrimental to wildlife habitat, and preserve the scenic qualities present. The conservation easement would be located on the following described private land:

Offered Conservation Easement

El Dorado County, CA

T. 11 N., R. 9E., M.D.M.
Sec. 15: that portion of the W½NW¼ lying west of the South Fork of the American River (APN 105–120–25)
Totaling Approximately 29-acres.

SUPPLEMENTARY INFORMATION: The above described Federal land would be transferred subject to a reservation to the United States for a right-of-way for ditches and canals constructed under the authority of the Act of August 20, 1890 (43 U.S.C. 943); also rights-of-way of record would be identified as prior existing rights.

All necessary clearances including clearances for archaeology, and rare plants and animals would be completed prior to any conveyances of title by the United States.

This proposal is considered to be in the public interest and is consistent with current land use plans.

The selected public land described in this notice is hereby segregated form settlement, location and entry under the public land laws and from the mining laws for a period of two years from the date that this notice is published in the **Federal Register**, or until patent is issued by the United States.

For additional Information: Contact Mike Kelley at (916) 985–4474, or at the address listed below.

ADDRESSES: For a period of 45 days from publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, c/o the Area Manager, Folsom Resource Area, 63 Natoma Street, Folsom, CA 95630.

D.K. Swickard,
Area Manager.

Bureau of Reclamation

Paradox Valley Unit, Colorado River Basin Salinity Control Project, Colorado

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of cancellation of a draft supplement to the final environmental statement (FES#): INT–FES–79–14.

SUMMARY: The Bureau of Reclamation will not prepare a draft supplement to the Paradox Valley Unit Final Environmental Statement (FES–79–14) as published in the **Federal Register**, 54 FR 53193, December 27, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Stan Powers, Bureau of Reclamation, PO Box 640, Durango, CO 81302, telephone: (303) 385–6500.

SUPPLEMENTARY INFORMATION: The draft supplement would have covered changes to the plans for the Paradox Valley Unit resulting from investigations and tests conducted after preparation of FES 79–14. Additional testing indicated that the goal of annually preventing 180,000 tons of salt from entering the Dolores River could be achieved at a pumping rate of 1.5 cubic feet per second (ft^3/s) as opposed to the 5.0 ft^3/s pumping rate presented in the FES. As a result, the brine disposal method was reevaluated and disposal by injection appeared to be more feasible than the evaporation procedure recommended in the FES.

A draft environmental assessment addressing the construction and testing of test injection facilities was prepared and distributed to the public for review and comment. After comments were incorporated, the document was finalized and a Finding of No Significant Impact was signed. Test facilities have been constructed and testing of the injection concept is underway. Results from these tests will enable a final evaluation of brine disposal by injection rather than by evaporation. If injection is selected as the preferred alternative, the original 1979 Definite Plan Report will be amended and additional National Environmental Policy Act compliance will be done.

Interested public entities and individuals may obtain information on the proposed changes to the project plans by contacting Mr. Stan Powers at the address above.

Dated: September 15, 1992.

Joe D. Hall,
Deputy Commissioner

National Park Service

Civil War Sites Advisory Commission Meeting

AGENCY: National Park Service, Department of the Interior.

ACTION: Notice of meeting of the Civil War Sites Advisory Commission.

Notice is hereby given in accordance with the Federal Advisory Committee Act, 5 U.S.C. Appendix (1988), that a meeting of the Civil War Sites Advisory Commission will be held on Monday, November 9, 1992, at the National Park Service, 800 North Capitol Street, NW, Training Room—Lower Level, Washington, DC 20002. The meeting will begin at 9 a.m. and conclude before 3:30 p.m.

This meeting constitutes the eleventh meeting of the Commission. The primary focus of the meeting will be on preparing the Commission's draft report. The Commission will welcome input from the public on the subject of Civil War site evaluation and preservation, especially as it relates to Civil War sites in Washington, DC and surrounding states.

Space and facilities to accommodate members of the public may be limited and persons will be accommodated on a first-come, first-served basis. Anyone may file a written statement with the Commission concerning matters to be discussed.

Persons wishing further information concerning the meeting or who wish to submit written statements, may contact Ms. Jan Townsend, Interagency Resources Division, P.O. Box 37127, Washington, DC 20013–7127 (telephone 202–343–3936). Draft summary minutes of the meeting will be available for public inspection about 8 weeks after the meeting, in suite 250, 800 N. Capitol St., NW., Washington, DC 20002.

Dated: September 21, 1992.

Lawrence E. Aten,
Acting Executive Director and Chief, Interagency Resources Division.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–24,206]

Honeywell, Incorporated; Fort Washington, PA; Revised Determination on Reconsideration

By order dated June 25, 1992, The United States Court of International Trade (USCIT) in *Former Employees of Honeywell, Inc.* v. *U.S. Secretary of Labor* (USCIT 90–08–00437) remanded this case to the Department for further investigation.

On September 3, 1992, the Department met with the union and its counsel in Philadelphia in response to the Court's remand concerning worker separations resulting from the outsourcing of production to foreign companies offshore.

At that meeting the union identified several products imported by the company that replaced similar products formerly produced at Fort Washington and that were marketed to the same customer base served by the Fort Washington plant. Currently, all production at Fort Washington has ceased and all production workers have been separated. The only remaining activities are marketing and sales, administration and engineering and design.

The workers were previously certified for trade adjustment assistance under petition TA–W–16,688 which expired on June 11, 1989. Although the reconsideration findings show that sales for Fort Washington increased in 1989 compared to 1988, it has become clear in this remand investigation that significant items of production have been replaced by products from offshore firms during the relevant period.

The findings illustrate the long term strategy of the company to improve its competitiveness. As a result of this strategy, sometime around the period beginning in 1987 the company began a program of global outsourcing of production. The findings suggest that a significant portion of this outsourcing went to foreign firms offshore. This outsourced production was imported back to Honeywell to serve the same customer base.

Other findings show that the workers were used interchangeably and are not readily identifiable by product. Accordingly, since the worker separations resulting from the transfer of Fort Washington's production to foreign offshore companies and its importation back to Honeywell was significant, the Department is recommending that all the workers of the Fort Washington plant of Honeywell, Inc., be certified eligible to apply for adjustment assistance.

Conclusion

After careful consideration of the new facts obtained on reconsideration, it is concluded that increased imports of articles like or directly competitive with those produced at Honeywell, Inc., Fort Washington, Pennsylvania contributed importantly to total or partial separation of workers at Honeywell, Inc. In accordance with the provisions of the Trade Act of 1974, I make the following revised determination:

All workers of Honeywell, Inc., Fort Washington, Pennsylvania who became totally or partially separated from employment on or after June 11, 1989 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 21st day of September 1992.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Service, Unemployment Insurance Service.

BILLING CODE 4510–30–M

[TA-W-27,474]

Performance Semiconductor Corporation; Sunnyvale, CA; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on July 6, 1992 in response to a worker petition which was filed on July 6, 1992 on behalf of workers at Performance Semiconductor Corporation, Sunnyvale, California.

The petitioner has requested that the petition be withdrawn. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC this 18th day of September, 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Attestations Filed by Employers Using Alien Crewmembers for Longshore Activities in U.S. Ports

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is publishing, for public information, a list of the following employers which have attestations on file with DOL for using alien crewmembers for longshore activities in U.S. ports.

ADDRESSES: Attestations and supporting documentation for each attestation are available for inspection in the Public Disclosure Room, U.S. Employment Service, Employment and Training Administration, Department of Labor, Room N4456, 200 Constitution Avenue, NW., Washington, DC 20210.

Any complaints regarding a particular attestation or an employer's activities under that attestation, shall be filed with a local office of the Wage and Hour Division of the Employment Standards Administration, U.S. Department of Labor. The address of such offices are found in many local telephone directories, or may be obtained by writing to the Wage and Hour Division, Employment Standards Administration, Department of Labor, Room S3502, 200 Constitution Avenue, NW., Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT:

Regarding the Attestation Process

Chief, Division of Foreign Labor Certifications, U.S. Employment Service. Telephone: 202-535-0163 (this is not a toll-free number).

Regarding the Complaint Process

Chief, Farm Labor Program, Wage and Hour Division. Telephone 202-523-7605 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: Under the Immigration and Nationality Act, as amended by the Immigration Act of 1990 (IA), employers are, in certain circumstances, required to submit attestations to the Department of Labor (DOL) in order to be allowed by the Immigration and Naturalization Service (INS) to use alien crewmembers to perform specified longshore activity(ies) at U.S. ports. The employer's attestation must be on file with DOL before the INS will permit such longshore work. Public Law 101-649, 104 Stat. 4978. The Employment and Training Administration, pursuant to 20 CFR 655.550, is publishing the following list of employers which have submitted attestations which have been accepted for filing. The list of employers is published so that U.S. longshore workers and other persons and organizations can be aware of employers who have requested alien crewmembers for longshore activities in U.S. ports. In addition, attestations and supporting documentation are available for inspection at the address for the Employment and Training Administration set forth in the **ADDRESSES** section of this notice.

If a person wishes to file a complaint regarding a particular attestation or an employer's activity(ies) under that attestation, such complaint must be filed at the address for the Wage and Hour Division of the Employment Standards Administration set forth in the **ADDRESSES** section of this notice.

Signed at Washington, DC, this 21st day of September, 1992.

Robert A. Schaerfl,

Director, United States Employment Service.

BILLING CODE 4510–30–M

Mine Safety and Health Administration

Consolidation Coal Co. et al.; Petitions for Modification

The following parties have filed petitions to modify the application of mandatory safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. Consolidation Coal Company

[Docket No. M–92–102–C]

Consolidation Coal Company, 1800 Washington Road, Pittsburgh, PA 15241–1421 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations for hazardous conditions) to its Osage No. 3 Mine (I.D. No. 46–01455) located in Monongalia County, West Virginia. Due to deteriorating roof and rib conditions, the area being evaluated by check point No. 3, which is the subject of a granted petition, docket number (M–83–16–C), cannot be safely traveled and will be eliminated. The petitioner proposes to continue using evaluation check points Nos. 2 and 8 to measure the quantity and quality of air entering and leaving the affected area. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

2. Consolidation Coal Company

[Docket No. M–92–103–C]

Consolidation Coal Company, 1800 Washington Road, Pittsburgh, Pennsylvania 15241–1421 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations for hazardous conditions) to its Osage No. 3 Mine (I.D. No. 46–01455) located in Monongalia County, West Virginia. Due to deteriorating roof conditions and an accumulation of water, the petitioner proposes to eliminate the evaluation point at 7 west, a monitoring point for the bleeder system for check points 7 and 15 which is the subject of a granted petition, docket number (M–88–229–C), and establish check points for Nos. 7, 8 and 9 to evaluate the quantity and quality of air entering and leaving the affected area instead of traveling the return aircourse in its entirety. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

3. Little Rock Coal Company

[Docket No. M–92–104–C]

Little Rock Coal Company, RR 2, Box 39, Hegins, PA 17938 has filed a petition to modify the application of 30 CFR 75.1400 (hoisting equipment; general) to its No. 1 Slope Mine (I.D. No. 36–08320) located in Schuylkill County, Pennsylvania. The petitioner proposes to use a slope conveyance (gunboat) without safety catches to transport persons. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

4. Peabody Coal Company

[Docket No. M–92–105–C]

Peabody Coal Company, P.O. Box 1990, Henderson, Kentucky 42420–1990 has filed a petition to modify the application of 30 CFR 75.1700 (oil and gas wells) to its Camp No. 11 Mine (I.D. No. 15–08357) located in Union County, Kentucky. The petitioner proposes to seal and mine through oil and gas wells. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

5. Western Fuels-Utah, Inc.

[Docket No. M–92–106–C]

Western Fuels-Utah, Inc., P.O. Box 1067, Rangely, Colorado 81648 has filed a petition to modify the application of 30 CFR 75.507 (power connection points) to its Deserado Mine (I.D. No. 05–03505) located in Rio Blanco, Colorado. The petitioner proposes to use a non-permissible submersible pump in return air, bleeder air and sealed areas. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

6. Hobet Mining, Inc.

[Docket No. M–92–107–C]

Hobet Mining, Inc., P.O. box 305, Madison, West Virginia 25130 has filed a petition to modify the application of 30 CFR 77.208(e) (storage of material) to its Beth Station No. 79 Preparation Plant (Mine) (I.D. No. 46–05398), and its No. 21 Surface Mine (I.D. No. 46–04670) both located in Boone County, West Virginia, and to its Pine Creek No. 12 Preparation Plant (Mine) (I.D. No. 46–06197) and its No. 7 Surface Mine (I.D. No. 46–02249) both located in Logan County, West Virginia. The petitioner proposes to transport, store and use compressed gas cylinders on service vehicles and to store and use compressed gas cylinders in a preparation plant without removing the regulators and replacing the protective caps. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

7. Peabody Coal Company

[Docket No. M–92–108–C]

Peabody Coal Company, P.O. Box 1990, Henderson, Kentucky 42420–1990 has filed a petition to modify the application of 30 CFR 75.325(b) (air quantity) to its Camp No. 1 Mine (I.D. No. 15–02709) located in Union County, Kentucky. Section 75.325(b) is not scheduled to be effective until November 16, 1992. The petitioner proposes to use the stopping line constructed to separate the intake and return aircourses in rooms previously developed on the same pool. Permanent stopping lines would be constructed when rooms are driven more than 600 feet deep from the centerline of the panel from which the rooms are driven, and temporary stopping lines would be used when rooms are driven 600 feet deep or less from the centerline of the panel from which the rooms are driven. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

8. Peabody Coal Company

[Docket No. M–92–109–C]

Peabody Coal Company, P.O. Box 1990, Henderson, Kentucky 42420–1990 has filed a petition to modify the application of 30 CFR 75.360(c)(1) (pre-shift examinations) to its Camp No. 1 Mine (I.D. No. 15–02709) located in Union County, Kentucky. Section 75.360(c)(1) is not scheduled to be effective until November 16, 1992. The petitioner proposes to use the stopping line constructed to separate the intake

and return aircourses in rooms previously developed on the same panel. Permanent stopping lines would be constructed when rooms are driven more than 600 feet deep from the centerline of the panel from which the rooms are driven, and temporary stopping lines would be used when rooms are driven 600 feet deep or less from the centerline of the panel from which the rooms are driven. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

9. Peabody Coal Company

[Docket No. M–92–110–C]

Peabody Coal Company, P.O. Box 1990, Henderson, Kentucky 42420–1990 has filed a petition to modify the application of 30 CFR 75.360(c)(1) (pre-shift examinations) to its Martwick Underground Mine (I.D. NO. 15–14070) located in Muhlenberg, Kentucky. Section 75.360(c)(1) is not scheduled to be effective until November 16, 1992. The petitioner proposes to use the stopping line constructed to separate the intake and return aircourses in rooms previously developed on the same panel. Permanent stopping lines would be constructed when rooms are driven more than 600 feet deep from the centerline of the panel from which the rooms are driven, and temporary stopping lines would be used when rooms are driven 600 feet deep or less from the centerline of the panel from which the rooms are driven. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

10. Peabody Coal Company

[Docket No. M–92–111–C]

Peabody Coal Company, P.O. Box 1990, Henderson, Kentucky 42420–1990 has filed a petition to modify the application of 30 CFR 75.362(c)(1) (on-shift examination) to its Martwick Underground Mine (I.D. No. 15–14070) located in Muhlenberg County, Kentucky. Section 75.362(c)(1) is not scheduled to be effective until November 16, 1992. The petitioner proposes to use the stopping line constructed to separate the intake and return aircourses in rooms previously developed on the same panel. Permanent stopping lines would be constructed when rooms are driven more than 600 feet deep from the centerline of the panel from which the rooms are driven, and temporary stopping lines would be used when rooms are driven 600 feet deep or less from the centerline of the panel from which the rooms are driven. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

11. Peabody Coal Company

[Docket No. M–92–112–C]

No. 15–02709) located in Union County, Kentucky. Section 75.362(c)(1) is not scheduled to be effective until November 16, 1992. The petitioner proposes to use the stopping line constructed to separate the intake and return aircourses in rooms previously developed on the same panel. Permanent stopping lines would be constructed when rooms are driven more than 600 feet deep from the centerline of the panel from which the rooms are driven, and temporary stopping lines would be used when rooms are driven 600 feet deep or less from the centerline of the panel from which the rooms are driven. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

12. Peabody Coal Company

[Docket No. M–92–113–C]

Peabody Coal Company, P.O. Box 1990, Henderson, Kentucky 42420–1990 has filed a petition to modify the application of 30 CFR 75.362(c)(1) (on-shift examination) to its Camp No. 11 Mine (I.D. No. 15–08357) located in Union County, Kentucky. Section 75.362(c)(1) is not scheduled to be effective until November 16, 1992. The petitioner proposes to use the stopping line constructed to separate the intake and return aircourses in rooms previously developed on the same panel. Permanent stopping lines would be constructed when rooms are driven more than 600 feet deep from the centerline of the panel from which the rooms are driven, and temporary stopping lines would be used when rooms are driven 600 feet deep or less from the centerline of the panel from which the rooms are driven. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

13. Peabody Coal Company

[Docket No. M–92–114–C]

Peabody Coal company, P.O. Box 1990, Henderson, Kentucky 42420–1990 has filed a petition to modify the application of 30 CFR 75.325(b) (air quantity) to its Camp No. 11 Mine (I.D. No. 15–08357) located in Union County, Kentucky. Section 75.325(b) is not scheduled to be effective until November 16, 1992. The petitioner proposes to use the stopping line constructed to separate the intake and return aircourses in rooms previously developed on the same panel. Permanent stopping lines would be constructed when rooms are driven more than 600 feet deep from the centerline of the panel from which the rooms are driven, and temporary stopping lines would be used when rooms are driven 600 feet deep or less from the centerline of the panel from which the rooms are driven. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

14. Peabody Coal Company

[Docket No. M–92–115–C]

Peabody Coal Company, P.O. box 1990, Henderson, Kentucky 42420–1990 has filed a petition to modify the application of 30 CFR 75.360(c)(1) (pre-shift examinations) to its Camp No. 11 Mine (I.D. No. 15–08357) located in Union County, Kentucky. Section 75.360(c)(1) is not scheduled to be effective until November 16, 1992. The petitioner proposes to use the stopping line constructed to separate the intake and return aircourses in rooms previously developed on the same panel. Permanent stopping lines would be constructed when rooms are driven more than 600 feet deep from the centerline of the panel from which the rooms are driven, and temporary stopping lines would be used when rooms are driven 600 feet deep or less from the centerline of the panel from which the rooms are driven. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

15. Peabody Coal Company

[Docket No. M–92–116–C]

Peabody Coal Company, P.O. box 1990, Henderson, Kentucky 42420–1990 has filed a petition to modify the application of 30 CFR 75.325(b) (air quantity) to its Martwick Underground Mine (I.D. No. 15–14070) located in Muhlenberg, Kentucky. Section 75.325(b)

is not scheduled to be effective until November 16, 1992. The petitioner proposes to use the stopping line constructed to separate the intake and return aircourses in rooms previously developed on the same panel. Permanent stopping lines would be constructed when rooms are driven more than 600 feet deep from the centerline of the panel from which the rooms are driven, and temporary stopping lines would be used when rooms are driven 600 feet deep or less from the centerline of the panel from which the rooms are driven. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

16. Consolidation Coal Company

[Docket No. M–92–117–C]

The United Mine Workers of American (UMWA), 900 Fifteenth Street, NW., Washington, DC has filed a request to amend a petition filed by the Consolidation Coal Company, Robinson Run Mine, (I.D. No. 56–01318), located in Monongalia County, West Virginia for 30 CFR 75.326 (aircourses and belt haulage entries), Docket Number M–90–192–C. The UMWA requests that the petition be amended so that: (1) when the carbon monoxide system gives an audible signal at 15 ppm above the established ambient level and the miners are on the surface, no one is to be permitted to enter the mine except those persons designated to investigate the source of the alarm. When a determination is made as to the source of the alarm and that the mine is safe to enter, the miners may be permitted underground: and (2) When the carbon monoxide system gives an audible signal at 15 ppm above the established ambient level and miners are enroute into the mine, they must be held at or withdrawn to a safe location outby the sensor(s) activating the alarm. An investigation must be made as to the source of such alarm and once a determination is made that the mine is safe to enter, the miners must be permitted to proceed underground.

17. Commercial Stone Company, Inc.

[Docket No. M–92–12–C]

Commercial Stone Company, Inc., 2200 Springfield Pike, Connellsville, Pennsylvania 15425 has filed a petition to modify the application of 30 CFR 56.6220 (I.D. No. 36–00047) located in Fayette County, Pennsylvania. The petitioner proposes to use a bulk blend truck to produce ammonium nitrate-fuel oil and ammonium nitrate-fuel oil emulsions for both face and bench holes.

Request for Comments

Persons interested in these petitions may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before October 29, 1992. Copies of these petitions are available for inspection at that address.

Dated: September 22, 1992.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

NUCLEAR REGULATORY COMMISSION

[Docket No. 40–08027–MLA and ASLBP No. 91–623–01–MLA]

Atomic Safety and Licensing Board Before Administrative Judge James P. Gleason, Presiding Officer

In the Matter of Sequoyah Fuels Corporation, (Source Materials License No. Sub–1010); Order (Status Conference).

September 22, 1992

Under the authority of 10 CFR § 2.1209, a Status Conference will be held on this proceeding at 9 a.m. on November 17, 1992 in the fifth floor hearing room of the Atomic Safety and Licensing Board Panel, East-West Towers, 4350 East West Highway, Bethesda, Maryland.

The Conference is being held to obtain detailed, complete and timely information on schedules in the license renewal application process with the view of determining whether the present hearing proceeding can be accelerated. In the interest of obtaining the latest reliable information, it would be helpful if the Sequoyah Fuels Corporation (licensee) and the Staff would arrange to have officials available at the Conference who have knowledge of the licensee's operations, authority over scheduling plant operations and the scheduling of Staff material licensing activities. The identity and expertise of these individuals should be made known to the parties prior to the Conference. It would also be useful for the Licensee and Staff to submit, at least one week before the Conference, reports of the schedule changes made since the

license renewal application was filed on August 29, 1990.

Ordered: Bethesda, Maryland, September 22, 1992.

For the Atomic Safety and Licensing Board.

James P. Gleason,

Presiding Officer, Administrative Judge.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-31216; File No. SR-NASD-92-16]

Self-Regulatory Organizations; National Association of Securities Dealers; Extension of Public Comment Period for Proposed Rule Change

September 22, 1992.

On May 1, 1992, the National Association of Securities Dealers ("NASD") filed with the Securities and Exchange Commission ("SEC" or "Commission") a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1) and rule 19b-4 thereunder, that would enhance operation of the Select Net Service by adding Consolidated Quotation Service ("CQS") securities to those eligible for trading through SelectNet. Notice of the proposed rule change was provided by the issuance of a Commission release (Securities Exchange Act Release No. 30961, July 27, 1992) and by publication in the **Federal Register** (57 FR 34158, August 3, 1992). On August 24, 1992, the Commission extended the period for public comment until September 24, 1992.[1]

The Commission received a request for another extension of the period for public comment on the proposed rule change.[2] The Commission finds that the complexity and significance of the filing dictates a longer comment period to ensure complete analysis of the proposal. Thus, the Commission finds good cause, pursuant to section 19(b)(2) of the Act, to extend the period for comment.

The Commission hereby extends the period for public comment on the proposed rule change for a period of 36 days, until October 30, 1992.

MuiYield Quality Fund II, Inc.
Common Stock, $.10 Par Value (File No. 7-9179)

TJX Companies, Inc.
Series C Cum. Cv. Pfd. Stock, $1.00 Par Value (File No. 7-9180)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before October 15, 1992, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Investment Company Act Rel. No. 18968; 811-6522]

American Vision Funds, Inc.; Proposed Deregistration

September 22, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of proposed deregistration under the Investment Company Act of 1940 ("Act").

RELEVANT ACT SECTION: Section 8(f).

SUMMARY: The SEC proposed to declare by order, on its own motion, that American Vision Funds, Inc. (the "Fund") has ceased to be an investment company under the Act.

HEARING OR NOTIFICATION OF HEARING: An order of deregistration will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary. Hearing requests should be received by the SEC by 5:30 p.m. on October 19, 1992. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request such notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: James E. Anderson, Law Clerk, at (202) 272-7027, or C. David Messman, Branch Chief, at (202) 272-3018. (Division of

Investment Management, Office of Investment Company Regulation).

STATEMENT OF FACTS: The following is a summary of information regarding the Fund.

1. The Fund is an open-end non-diversified management company organized as a Maryland corporation. The Fund filed a registration statement under the Securities Act of 1933 on December 31, 1991. The registration statement did not become effective. The Fund registered as an investment company under the Act on January 14, 1992.

2. The SEC filed a complaint against the Fund in the United States District Court for the Central District of California on March 17, 1992.[1] The complaint alleged, among other things, that the Fund: (a) Violated section 13(a)(3) of the Act by acquiring assets in violation of the Fund's investment policies and restrictions; (b) violated section 17(f) of and rule 17f–2 under the Act by failing to keep its assets with a proper custodian; (c) violated section 17(g) of the Act by failing to obtain a fidelity bond; (d) violated rule 22c–1 under the Act by selling, redeeming, or repurchasing redeemable securities issued by a registered investment company at prices other than those based on the current net asset value of each security, and (e) violated section 31 of the Act by failing to keep proper books and records. The complaint also alleged that Fund's investment adviser, Public Funding Group, Inc. (the "Advertiser"), and its president, V. Thayne Whipple II, committed fraud in the offer or sale of securities in violation of section 17(a) of the Securities Act of 1933, and in connection with the purchase or sale of securities in violation of section 10(b) of the Securities Exchange Act of 1934, and with aiding and abetting the Fund in committing the violations set forth above.

3. The complaint alleged the following facts. The Fund distributed its securities solely in exchange for portfolio assets. By mid-February 1992, the Fund claimed to have 30 shareholders and total assets of approximately $115 million. The portfolio assets consisted of common stock and "commercial paper" notes. None of the stock held by the Fund was traded on any U.S. stock exchange, nor were any bid or ask prices listed for them during the Fund's existence. None of the commercial paper was rated by any commercially available rating service. All of the "commercial paper" was in fact merely promissory notes that had been signed and presented to the Fund in exchange for Fund shares. Nevertheless, the Adviser calculated the value of the portfolio assets at their face amounts, thus grossly overstating the fund's total asset value. The Fund accepted the stock and notes in exchange for Fund shares in order to allow the use of the Fund's shares by the shareholders as collateral for loans from brokerage firms. To facilitate the use of the Fund's shares as collateral, the Adviser arranged to have the daily net asset values of the Fund's shares reported to the National Association of Securities Dealers, Inc. for public quotation. Subsequently, the Fund shareholders attempted to use the Fund shares as collateral for approximately $18.6 million of margin loans from broker-dealers.

4. On March 31, 1992, the Fund, the Adviser, and Whipple consented to the entry of a judgment and permanent injunction against them. In addition to enjoining them from future violations of the securities laws as set fort in the complaint, the judgment required that the Fund be dissolved by returning the portfolio securities to the shareholders who originally exchanged such securities for shares of the Fund.

5. All of the portfolio securities except shares of IT BK Group of companies, Inc. ("IT Bank") and Sonnergie, Inc. ("Sonnergie") were returned to the persons and entities that exchanged them for shares of the Fund. The Fund shareholders who had exchanged the securities of these two companies did not respond to letters or repeated telephone calls seeking instructions on where to send the IT Bank and Sonnergie stock certificates. When the Fund's president attempted to transfer the shares back to the Fund's shareholders through IT Bank's and Sonnergie's transfer agent, he was informed that the transfer agent records for IT Bank and Sonnergie had been sent to Italy and Germany, respectively.

6. On September 1, 1992, the Fund deposited the stock certificates of IT Bank and Sonnergie with the United States District court for the Central District of California. Each of the remaining thirteen shareholders was mailed a notice stating that their shares of IT Bank and Sonnergie had been deposited with the court. The Fund has no remaining assets and is enjoined from engaging in an further business activities.

7. Section 8(f) of the Act allows the Commission to deregister an investment company on its own motion if it finds that the company has ceased to be an investment company.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end, non-diversified management company organized as a corporation under the laws of the State of Maryland. On January 11, 1989, applicant filed a registration statement pursuant to section 8(b) of the 1940 Act. On that date, applicant also filed a registration statement pursuant to the Securities Act of 1933. The registration statement never became effective and applicant never commenced a public offering of its shares.

2. Applicant was formed because of a beneficial tax treatment which has since expired. With consent of applicant's two shareholders, the board of director's authorized the dissolution of applicant on October 16, 1989.

3. Pursuant to the liquidation, the securities held in applicant's portfolio were sold at competitive bid in the market to brokers who were primary government securities dealers. Because applicant's portfolio consisted solely of fixed income securities, no brokerage commissions were incurred.

4. On November 30, 1989, applicant's shareholders redeemed their shares and received a final distribution of $22,323,436 representing the net asset value of applicant ($5,567 of which was paid in the form of a dividend) less $11,000 being held in an escrow account to pay liquidation expenses. Subsequently, the liquidation expenses were paid and the remainder distributed to shareholders.

5. As of the date of the application, the applicant had no assets, debts or liabilities, and was not a party to any litigation or administrative proceeding.

6. Applicant is neither engaged in nor proposes to engage in any business activities other than those necessary for the winding up of its affairs.

7. On April 26, 1990, applicant filed Articles of Dissolution dissolving its corporate existence in Maryland.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end diversified management investment company that was organized as a corporation under the laws of Texas. On September 16, 1981, applicant registered under the Act and filed a registration statement under the Securities Act of 1933 to register 1,000,000,000 shares of applicant's common stock. Applicant's registration statement was declared effective on November 24, 1981, and applicant commenced its initial public offering on such date.

2. Applicant's assets have steadily decreased since 1987, thereby making it increasingly difficult for applicant to enjoy meaningful economies of scale. On December 30, 1991, the net assets of applicant equaled $1,917,323. If the Fund were to continue in operation, Lexington Management Corporation ("LMC") anticipates that the expense ratio would increase materially.

3. On December 29, 1991, applicant's board of directors approved the Plan of Complete Liquidation and Termination of applicant (the "Plan"). On January 29, 1992, applicant mailed proxy materials relating to the proposed liquidation to its shareholders. At a special meeting of shareholders held on March 16, 1992, applicant's shareholders approved the Plan.

4. Pursuant to the Plan, on May 15, 1992, applicant distributed $1,067,214 to its shareholders, which amount represented the cash value of applicant's portfolio and the net proceeds received from the liquidation of the portfolio holdings of applicant in connection with the winding-up of applicant's business and affairs. Applicant's portfolio securities were sold through brokers at market price without any brokerage commission paid. Each shareholder received his or her proportionate interest based on net asset value.

5. Applicant's liquidation expenses were approximately $3,503. Applicant paid approximately $3 of this amount, and LMC, applicant's management adviser, paid the balance of approximately $3,500.[1]

6. Applicant has no securityholders, assets, debts, or other liabilities. Applicant is not a party to any litigation or administrative proceeding. Applicant is not engaged and does not propose to engage in any business activity other than those necessary for the winding up of its affairs.

7. Applicant intends to file Articles of Dissolution with the Department of Assessments and Taxation of Texas with a request to delay effectiveness until an order has been issued by the Commission.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92-23525 Filed 9-28-92; 8:45 am]

BILLING CODE 8010-01-M

---

[1] Per a letter dated September 16, 1992, applicant stated that its investment advisory agreement required LMC to absorb applicant's ordinary business expenses to the extent such expenses exceeded 1.5% of average daily net assets. As a result, LMC paid liquidation expenses of approximately $3,500.

[Rel. No. IC—18966; 811-3335]

Strategic Gold/Minerals Fund, Inc.; Notice of Application

September 22, 1992.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: Strategic Gold/Minerals Fund, Inc.

RELEVANT ACT SECTIONS: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on June 10, 1992 and amended on August 24, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing request should be received by the SEC by 5:30 p.m. on October 19, 1992, and should be accompanied by proof of service on applicant in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, Park 80 West, Plaza Two, Saddle Brook, New Jersey 07662.

FOR FURTHER INFORMATION CONTACT: James M. Curtis, Staff Attorney, at (202) 504–2406, or Barry D. Miller, Senior Special Counsel (202) 272–3018 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end diversified management investment company that was organized as a corporation under the law of Texas. On December 1, 1981, applicant registered under the Act and filed a registration statement under the Securities Act of 1933 to register 200,000,000 shares of applicant's common stock. Applicant's registration statement was declared effective on May 20, 1982, and applicant commenced its initial public offering on such date.

2. Applicant's assets have steadily decreased since 1985, thereby making it increasingly difficult for applicant to enjoy meaningful economies of scale. On May 14, 1992, applicant had total net assets of $597,636 comprising 326,956 shares outstanding. If the Fund were to continue in operation, Lexington Management Corporation ("LMC") anticipates that the expense ratio would increase materially.

3. On December 29, 1991, applicant's board of directors approved the Plan of Complete Liquidation and Termination of applicant (the "Plan"). On January 29, 1992, applicant mailed proxy materials relating to the proposed liquidation to its shareholders. At a special meeting of shareholders held on March 16, 1992, applicant's shareholders approved the Plan.

4. Pursuant to the Plan, on May 15, 1992, applicant distributed $598,329 to its shareholders, which amount represented the cash value of applicant's portfolio and the net proceeds received from the liquidation of the portfolio holdings of applicant in connection with the winding-up of applicant's business and affairs. The portfolio securities were sold through brokers at market price without any brokerage commission paid. Each shareholder received his or her proportionate interest based on net asset value.

5. Applicant's liquidation expenses were approximately $6,320. Applicant paid approximately $3,520 of this amount, and LMC, applicant's management adviser, paid the balance of approximately $2,800.[1]

6. Applicant has no securityholders, assets, debt, or other liabilities. Applicant is not a party to any litigation or administrative proceeding. Applicant is not engaged and does not propose to engage in any business activity other than those necessary for the winding up of its affairs.

7. Applicant intends to file Articles of Dissolution with the Department of Assessments and Taxation of Texas with a request to delay effectiveness until an order has been issued by the Commission.

[1] Per a letter dated September 16, 1992, applicant stated that its investment advisory agreement required LMC to absorb applicant's ordinary business expenses to the extent such expenses exceeded the most restrictive expense limits imposed by any statute or regulatory authority of any jurisdiction in which applicant's securities were offered for sale. As a result, LMC paid liquidation expenses of approximately $2,800.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Noise Exposure Map Notice; Receipt of Noise Compatibility Program and Request for Review, Midland International Airport; Midland, TX

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure maps submitted by City of Midland, Texas, for Midland International Airport under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Public Law 96–193) and 14 CFR part 150 are in compliance with applicable requirements. The FAA also announces that it is reviewing a proposed noise compatibility program that was submitted for Midland International Airport under part 150 in conjunction with the noise exposure map, and that this program will be approved or disapproved on or before March 16, 1993.

EFFECTIVE DATE: The effective date of the FAA's determination on the noise exposure maps and of the start of its review of the associated noise compatibility program is September 17, 1992. The public comment period ends November 16, 1992.

FOR FURTHER INFORMATION CONTACT: Ben Guttery, Federal Aviation Administration, Texas Airport Development Office, Forth Worth, Texas, 76193–0651, 817/624–5609. Comments on the proposed noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA finds that the noise exposure maps submitted for Midland International Airport are in compliance with applicable requirements of part 150, effective September 17, 1992. Further, FAA is reviewing a proposed noise compatibility program for that airport which will be approved or disapproved on or before March 16, 1993. This notice also announces the availability of this program for public review and comment.

Under section 103 of Title I of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator may submit to the FAA noise exposure maps which meet applicable regulations and which depict noncompatible land uses as of the date of submission of such maps, a description of projected aircraft operations, and the ways in which such operations will affect such maps. The Act requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies, and persons using the airport.

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulations (FAR) part 150, promulgated pursuant to Title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

The City of Midland submitted to the FAA on May 18, 1992, noise exposure maps, descriptions and other documentation which were produced during Midland International Airport FAR part 150 Noise Exposure and Land Use Compatibility Study. It was requested that the FAA review this material as the noise exposure maps, as described in section 103(a)(1) of the Act, and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under section 104(b) of the Act.

The FAA has completed its review of the noise exposure maps and related descriptions submitted by the City of Midland. The specific maps under consideration are identified in the submission as Figure D2 for existing conditions and Figure G1 for the future noise exposure conditions. The FAA has determined that these maps for Midland International Airport are in compliance with applicable requirements. This determination is effective on September 17, 1992. FAA's determination on an airport operator's noise exposure maps is limited to a finding that the maps were developed in accordance with the procedures contained in appendix A of FAR part 150. Such determination does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under section 103 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of section 107 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public agencies and planning agencies with which consultation is required under section 103 of the Act. The FAA has relied on the certification by the airport operator, under § 150.21 of FAR part 150, that the statutorily required consultation has been accomplished.

The FAA has formally received the noise compatibility program for Midland International Airport, also effective on September 17, 1992. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on or before March 16, 1993.

The FAA's evaluation will be conducted under the provisions of 14 CFR part 150, § 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Copies of the noise exposure maps, the FAA's evaluation of the maps, and the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, Airports Division, Southwest Region, Texas Airport Development Office, Fort Worth, Texas 76193-0651.

Midland International Airport, 9506 LaForce Boulevard, Midland, Texas 79711-0305

Questions may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT.**

Issued in Southwest Region, September 17, 1992.

George D. Conley,

Manager, Texas Airport Development Office.

[FR Doc. 92-23567 Filed 9-28-92; 8:45 am]

BILLING CODE 4910-13-M

FAA Approval of Noise Compatibility Program; Valley International Airport; Harlingen, TX

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by City of Harlingen under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Public Law 96-193) and 14 CFR part 150. These findings are made in recognition of the description of Federal and nonfederal responsibilities in Senate Report No. 96-52 (1980). On March 18, 1992, the FAA determined that the noise exposure maps submitted by the City of Harlingen under part 150 were in compliance with applicable requirements. On September 11, 1992, the Administrator approved the Valley International Airport noise compatibility program. Most of the recommendations of the program were approved.

EFFECTIVE DATE: The effective date of the FAA's approval of the Valley International Airport noise compatibility program is September 11, 1992.

FOR FURTHER INFORMATION CONTACT: Ben Guttery, ASW-651F, Texas Airport Development Office, Federal Aviation Administration, Fort Worth, Texas 76193, 817-624-5609. Documents reflecting this FAA action may be reviewed at this same location.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program for Valley International Airport effective September 11, 1992.

Under section 104(a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an

airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Federal Aviation Regulations (FAR) part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR part 150 program recommendations is measured according to the standards expressed in Part 150 and the Act and is limited to the following determinations:

a. The noise compatibility program was developed in accordance with the provisions and procedures of FAR Part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in FAR part 150, § 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where federal funding is sought, requests for project grants must be submitted to the Texas Airport Development Office in Fort Worth, Texas.

The City of Harlingen submitted to the FAA on November 25, 1991, the noise exposure maps, descriptions, and other documentation produced during the noise compatibility planning study conducted from September 1989 through December 1991. The Valley International Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on March 18, 1992. Notice of this determination was published in the **Federal Register** on April 1, 1992.

The Valley International Airport study contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion to the year 1996. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in section 104(b) of the Act. The FAA began its review of the program on March 18, 1992, and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program.

The submitted program contained six proposed actions for noise mitigation on and/or off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR part 150 have been satisfied. The overall program, therefore, was approved by the Administrator effective September 11, 1992.

Outright approval was granted for most of the specific program elements. The establishment of a noise complaint and investigation program, an update and review of the FAR Part 150 Program in 5 years, an improved approach/departure system, and the acquisition of land for the reduction of noise sensitive land uses were all approved. The extension of Runway 13–31 by 1,300 was disapproved pending the submittal of additional information. The implementation of height hazard and airport zoning was approved in part.

These determinations are set forth in detail in a Record of Approval endorsed by the Administrator on September 11, 1992. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices of Valley International Airport.

Issued in Fort Worth, Texas, September 16, 1992.

George D. Conley,

Manager, Texas Airport Development Office.

[FR Doc. 92–23566 Filed 9–28–92; 8:45 am]

BILLING CODE 4910–13–M

Proposed Terminal Control Area at Raleigh, NC; Public Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting.

SUMMARY: This notice announces two fact-finding informal airspace meetings to solicit information from airspace users and others concerning a proposal to establish a Terminal Control Area (TCA) for the Raleigh-Durham, NC, area, and to provide interested persons an opportunity to discuss the proposal. All comments received during these meetings will be considered prior to the issuance of a Notice of Proposed Rulemaking. The establishment of a TCA is being considered due to the increased volume of traffic arriving and departing the Raleigh-Durham Airport.

TIME AND DATES: These meetings will be held at 7 p.m. to 10 p.m., Tuesday, October 27 and Wednesday, October 28, 1992. Comments must be received on or before December 28, 1992.

PLACE: Million Air Maintenance Facility, 1704 E. International Drive, Raleigh-Durham International Airport. (Across the street from RDU AFSS).

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Air Traffic Division, ASO–500, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320.

CONTACT PERSON FOR MORE INFORMATION: Thomas Adams; Air Traffic Manager; Raleigh-Durham, NC, Airport Traffic Control Tower; 1000 Sawyer Circle; Morrisville, NC; telephone: (919) 840–0070.

SUPPLEMENTARY INFORMATION:

Meeting Procedures

(a) These meetings will be informal in nature and will be conducted by a representative of the Administrator,

FAA Southern Region. Each participant will be given an opportunity to make a presentation, although a time limit may be imposed.

(b) These meetings will be open to all persons on a space-available basis. There will be no admission fee or other charge to attend and participate.

(c) Any person wishing to make a presentation to the panel will be asked to sign in and estimate the amount of time needed for such presentation so that timeframes can be established. This will permit the panel to allocate an appropriate amount of time for each presenter. The panel may allocate the time available for each presentation in order to accommodate all speakers. These meetings will not be adjourned until everyone on the list has had an opportunity to address the panel. These meetings may be adjourned at any time if all persons present have had the opportunity to speak.

(d) Position papers or other handout material relating to the substance of the meetings may be accepted. Participants wishing to submit handout material should present three copies to the presiding officer. There should be additional copies of each handout available for other attendees.

(e) These meetings will not be formally recorded. However, a summary of the comments made at these meetings will be filed in the docket.

Agenda for Each Meeting

Opening Remarks and Discussion of Meeting Procedures, Briefing on Background for Proposal, Public Presentations, Closing Comments.

Issued in Washington, DC, on September 18, 1992.

Harold W. Becker,

Manager, Airspace-Rules and Aeronautical Information Division.

BILLING CODE 4910-13-M

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported for Exhibition

Determination

Notice is hereby given on the following determination: Pursuant to the authority vested in me by the Act of October 19, 1965 (79 stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and Delegation Order No. 85-5 of June 27, 1985 (50 FR 27393, July 2, 1985), I hereby determine that the objects to be included in the exhibit, "THE ROYAL CITY OF SUSA: ANCIENT NEAR EASTERN TREASURES FROM THE LOUVRE" (see list [1]), imported from abroad for the temporary exhibition without profit within the United States, are of cultural significance. These objects are imported pursuant to a loan agreement with the foreign lenders. I also determine that the temporary exhibition or display of the listed exhibit objects at the Metropolitan Museum of Art, New York, New York from on or about November 17, 1992, to on or about March 7, 1993, is in the national interest.

Public notice of this determination is ordered to be published in the **Federal Register**.

Dated: September 23, 1992.

Alberto J. Mora,

General Counsel.

Sunshine Act Meetings

Federal Register
Vol. 57, No. 189
Tuesday, September 29, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

DEPARTMENT OF ENERGY

FEDERAL ENERGY REGULATORY COMMISSION

Notice

The following notice of meeting is published pursuant to Section 3(a) of the Government in the Sunshine Act (Pub. L. No. 94–409), 5 U.S.C. 552b:

DATE AND TIME: September 30, 1992, 10:00 a.m.

PLACE: 825 North Capitol Street, N.E., Room 9308, Washington, D.C. 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

Note.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION: Lois D. Cashell, Secretary, Telephone (202) 208–0400. For a recording listing of items stricken from or added to the meeting, call (202) 208–1627.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda; however, all public documents may be examined in the Reference and Information Center.

BILLING CODE 7590-01-M

UNITED STATES POSTAL SERVICE BOARD OF GOVERNORS

Notice of a Meeting.

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 C.F.R. Section 7.5) and the Government in the Sunshine Act (5 U.S.C. Section 552b), hereby gives notice that it intends to hold a meeting at 1:00 p.m. on Monday, October 5, 1992, and at 8:30 a.m. on Tuesday, October 6, 1992, in Washington, D.C. The October 5 meeting, at which the Board will consider 1) the July 17, 1992, Postal Rate Commission Opinion and Recommended Decision in Docket No. MC91-3, Second-Class Pallet Discount, 1991, and 2) a filing with the Postal Rate Commission to Establish a Bulk Small Parcel Service, is closed to the public. (See 57 FR 44404, September 25, 1992)

The October 6 meeting is open to the public and will be held in the Benjamin Franklin Room on the 11th floor of U.S. Postal Service Headquarters, 475 L'Enfant Plaza, S.W. The Board expects to discuss the matters stated in the agenda which is set forth below. Requests for information about the meeting should be addressed to the Secretary of the Board, David F. Harris, at (202) 268-4800.

Agenda

Monday Session

October 5—1:00 p.m. (Closed)

1. Consideration of the Postal Rate Commission Opinion and Recommended Decision in Docket No. MC91-3, Second-Class Pallet Discount, 1991. (John L. DeWeerdt, Associate General Counsel, Office of Postal Rates and Mailing Rules.)
2. Consideration of a Filing with the Postal Rate Commission to Establish a Bulk Small Parcel Service. (Charles C. McBride, Director, Strategic Services Integration.)

Tuesday Session

October 6—8:30 a.m. (Open)

1. Minutes of the Previous Meeting, August 31-September 1, 1992.
2. Remarks of the Postmaster General. (Marvin Runyon.)
3. Board of Governors 1993 Meeting Schedule. (Norma Pace, Chairman.)
4. Board of Governors 1993 Budget. (Norma Pace, Chairman.)
5. Consideration of FY 1993 Operating Budget. (M. Richard Porras, Finance and Planning.)
6. Debt Restructuring Plan. (Michael S. Coughlin, Deputy Postmaster General.)
7. Restoring Mail Service in the Miami Area. (James C. Walton.)
8. Status Report on the Construction of the National Postal Museum. (Dennis E. Wamsley, Facilities.)
9. Tentative Agenda for November 2-3, 1992, meeting in Dallas, Texas.

David F. Harris,

Secretary.

[FR Doc. 92-23674 Filed 9-25-92; 11:03 am]

BILLING CODE 7710-12-M

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meeting during the week of September 28, 1992.

A closed meeting will be held on Monday, September 28, 1992, at 1:30 p.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Schapiro, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Monday, September 28, 1992, at 1:30 p.m., will be:

Institution of administrative proceedings of an enforcement nature.
Institution of injunctive actions.
Formal order of investigation.
Settlement of administrative proceedings of an enforcement nature.
Settlement of injunctive action.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Kaye Williams at (202) 272-2400.

Dated: September 24, 1992.

Jonathan G. Katz,

Secretary.

21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Bambermycins and Tylosin

Correction

In rule document 92-12753 beginning on page 23058 in the issue of Monday, June 1, 1992, make the following correction:

1. On page 23058, in the third column, in the first paragraph, in the sixth line, "Crowmark" should read "Growmark".

2. On the same page, in the same column, in the last paragraph, in the seventh line, "abambermycins" should read "a bambermycins".

Correction

In proposed rule document 92–21037 beginning on page 40361 in the issue of Thursday, September 3, 1992 make the following corrections:

§ 141.89 [Corrected]

1. On page 40367, in § 141.89(a), in the table, in the second column, in 2 d., "is" should read "in".

2. On page 40368, in § 141.89(a), in the table, under Chapter 56, in the second column, in the first line, "NEPS" should read "Neps".

3. On page 40369, in § 141.89(a), in the table, under Chapter 57, "5703" should appear opposite "1." the third time it appears in the second column; "5704" should appear opposite "1." the fourth time it appears in the second column; and "5705" should appear opposite "1." the fifth time it appears in the second column.

4. On page 40370, in § 141.89(a), in the table, under Chapter 58, in the entry for 5811, in the second column, in 2., insert "fiber" after "fabric".

5. On page 40372, in § 141.89(a), in the table, under Chapter 61:

a. "6109.10.0007" should appear opposite "State whether * * *" in the second column.

b. "6109.10.0009" should appear opposite "Identify * * *" the first time it appears in the second column.

c. "6109.10.0037" should appear opposite "Identify * * *" the second time it appears in the second column.

d. "6109.90.1047" should appear opposite "Identify * * *" the third time it appears in the second column.

e. Replace the leaders that appear after "6109.90.1530" with "and",

f. In 6117.10, in the second column, in the first line, "Shaws" should read "Shawls".

6. On page 40373, in § 141.89(a), in the table, under Chapter 62, "6216.00.12 and 6216.10.18" should appear opposite "1." the fifth time it appears in the second column.

7. On page 40375, in § 141.89(a), in the table, under Chapter 64, in the second column, in 6 a., "or" the first time it appears should read "of".

Part II

Department of Education

34 CFR Parts 300 and 301

Assistance to States for the Education of Children with Disabilities Program and Preschool Grants for Children with Disabilities; Final Rule

DEPARTMENT OF EDUCATION

34 CFR Parts 300 and 301

RIN 1820-AA89

Assistance to States for the Education of Children with Disabilities Program and Preschool Grants for Children with Disabilities

AGENCY: Department of Education.

ACTION: Final regulations with comments invited.

SUMMARY: The Secretary issues final regulations for the Assistance to States for the Education of Children with Disabilities Program under part B of the Individuals with Disabilities Education Act (part B). The regulations are needed (1) to implement the amendments to part B that were made by the Handicapped Programs Technical Amendments Act of 1988, the Education of the Handicapped Act Amendments of 1990 (1990 Amendments), the National Literacy Act of 1991, and the Individuals with Disabilities Education Act Amendments of 1991 (1991 Amendments), and (2) to make changes based on the Department's experience in administering part B. The Secretary also amends existing regulations to implement the amendments to the Preschool Grants Program under section 619 of the Individuals with Disabilities Education Act that were made by the 1991 Amendments.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments, with the exception of the following sections: § 300.110; §§ 300.121–300.123; §§ 300.125–300.134; § 300.136; §§ 300.138–300.141; § 300.144; § 300.146; § 300.148; § 300.149; § 300.152; § 300.153; § 300.180; § 300.192; § 300.220; § 300.222–300.227; § 300.231; § 300.235; § 300.238; § 300.240; § 300.280; § 300.281; § 300.284; § 300.341; § 300.343; § 300.345; § 300.346; § 300.349; § 300.380–300.383; § 300.402; § 300.482; § 300.483; § 300.505; § 300.510; § 300.512; § 300.532; § 300.533; § 300.543; §§ 300.561–300.563; § 300.565; § 300.569; § 300.571; § 300.572; § 300.574; § 300.575; § 300.589; § 300.600; § 300.653; §§ 300.660–300.662; § 300.750; § 300.751; and § 300.754.

These sections will become effective after the information collection requirements contained in those sections have been submitted by the Department of Education and approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980.

If you want to know the effective date of these regulations, call or write the Department of Education contact person. A document announcing the effective date will be published in the **Federal Register**.

ADDRESSES: All comments should be addressed to: Lucille Sledger, Department of Education, 400 Maryland Avenue, SW., (Switzer Building, room 3615), Washington, DC 20202–2720.

FOR FURTHER INFORMATION CONTACT: Thomas B. Irvin, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, SW., (Switzer Building, room 3615), Washington, DC. 20202–2720. Telephone: (202) 205–8825. Individuals with deafness or hearing impairments may call (202) 205–9090 for TDD services.

SUPPLEMENTARY INFORMATION:

I. Part B Program

Part B authorizes formula grants to States and, through the State educational agencies (SEAs), to local educational agencies (LEAs) and intermediate educational units (IEUs) to assist them in meeting the special educational needs of children with disabilities. In order to be eligible for funding under this program, SEAs, LEAs, and IEUs are responsible for ensuring that all children with disabilities have available to them a free appropriate public education (FAPE), and that the procedural protections in part B and the implementing regulations are extended to these children and their parents.

These final regulations implement the changes made to part B by the Handicapped Programs Technical Amendments Act of 1988, the 1990 Amendments (Pub. L. 101–476, enacted October 30, 1990), the National Literacy Act of 1991 (Pub. L. 102–73, enacted July 25, 1991), and the 1991 Amendments (Pub. L. 102–119, enacted October 7, 1991). In addition, these regulations make changes based on the Department's experience in administering part B.

On August 19, 1991, the Secretary published a notice of proposed rulemaking (NPRM) for this part in the **Federal Register** (56 FR 41266). The NPRM proposed to make the following changes to implement the 1990 Amendments:

(1) Add "autism" and "traumatic brain injury" as separate disability categories in the definition of children with disabilities, and include definitions of those terms.

(2) Delete "in schools" from "social work services in schools" in the list of eligible related services in § 300.13(a) of the current regulations for this part and delete "in schools" from the definition of "social work services in schools" included at § 300.13(b)(11) of the current regulations for this part.

(3) Add a definition of "rehabilitation counseling services" to implement the statutory amendment to the definition of "related services" in section 602(a)(17) of the Act.

(4) Add the statutory definitions of "assistive technology device" and "assistive technology service" and include a requirement that if a child with a disability requires these devices and services in order to receive FAPE, the public agency must ensure that they are made available.

(5) Add provisions on transition services, including (a) a definition of "transition services" in § 300.18; (b) a provision specifying that the public agency must ensure that certain transition services personnel participate in meetings to develop, review, or revise a student's individualized education program (IEP) if transition services are being considered; (c) a Note, based on § 300.344(a)(4) of the current regulations, stating that, if appropriate, the public agency must include the student in IEP meetings concerning transition services; (d) a requirement that the content of the IEP must include a statement of needed transition services and of interagency responsibilities or linkages if other State agencies have responsibility for providing or paying for those services; and (e) a provision specifying that if a participating agency fails to provide agreed upon transition services, the public agency must reconvene the IEP team to identify alternative strategies to be implemented to meet the transition objectives in the student's IEP.

(6) Replace the current regulations on the comprehensive system of personnel development (CSPD) in §§ 300.380–300.387 with new provisions reflecting changes made by the 1990 Amendments, and make other changes to simplify and update the CSPD provisions of the regulations.

The NPRM also proposed to make other changes in the current regulations for this part, including (1) deleting the data collection reporting provisions in § 300.124 and portions of §§ 300.125–300.127 of the current regulations; (2) deleting the current regulation in § 300.382 regarding inservice training, and at § 300.321(c) prohibiting the use of part B funds for preservice training; (3) adding a Note following § 300.128 to clarify the responsibility of the SEA and the State's part H lead agency for child find activities for infants and toddlers with disabilities if those agencies are different; (4) adding a provision to

§ 300.504 to clarify the conditions that must be met if a State adds consent requirements beyond those in the Federal regulations; (5) specifying that findings of fact and decisions in due process hearings must be made available to the public, after deleting personally identifiable information; (6) adding a provision to § 300.510 regarding which officials may not conduct State-level reviews; and (7) transferring requirements on State complaint procedures from the Education Department General Administrative Regulations (EDGAR) (34 CFR §§ 76.780–76.782) to this part in §§ 300.660–300.662, and making some modifications to those requirements.

These final regulations incorporate technical changes made to part B, including changes made by the 1990 Amendments, to update the terminology and references used in the current regulations. Examples of these technical changes include: (1) Deleting all references to "handicapped children" in the regulations and substituting "children with disabilities;" (2) deleting all references to "annual program plan" and substituting "State plan;" (3) revising the list of other regulations that apply to this program in § 300.3 to include all currently applicable provisions of EDGAR; and (4) abbreviating certain frequently used terms and adding a new note following the heading in subpart A, "Definitions," to specify that abbreviations will be used in place of certain terms in the regulations (e.g., "IEP" for "individualized education program" and "SEA" for "State educational agency").

These final regulations also implement changes to part B made by the National Literacy Act, by amending the list of jurisdictions eligible to participate in the part B program (i.e., by deleting the Trust Territory of the Pacific Islands and adding the Federated States of Micronesia, the Republic of the Marshall Islands, and Palau).

In addition, these final regulations incorporate certain technical changes to part B made by the 1991 Amendments. These changes conform the regulations to the statutory changes and are implemented as final regulations. The Secretary, however, invites comment on these changes and on whether additional regulatory changes are needed with respect to the statutory changes made by the 1991 Amendments.

Analysis of Comments and Changes

In response to the Secretary's invitation in the NPRM, 280 parties submitted comments on the proposed regulations. An analysis of the comments and of the changes that have been made in the regulations since publication of the NPRM is published as an appendix to these final regulations.

Major Changes in the Regulations

The following discussion in section A, Technical Changes, identifies the changes made to reflect statutory amendments to Part B made by the National Literacy Act. Section B, Substantive Changes, identifies all major changes made in the regulations based on the NPRM published on August 19, 1991. Additional changes made in the regulations in this document as a result of the 1991 Amendments are identified separately in section C.

A. Technical Changes

In accordance with changes made by the National Literacy Act, § 300.700 has been revised to reflect the current names of the successor entities to the Trust Territories of the Pacific Islands. Similarly, § 300.711 (previously numbered § 300.710) now lists the current names of these entities, consistent with a statutory change made by the National Literacy Act as amended by the 1991 Amendments.

B. Substantive Changes

Below is a summary of the major substantive changes in these final regulations based on the August 19, 1991 NPRM. References to section numbers are to the final regulations.

1. Changes in Subpart A—General

- The proposed definition of "autism" (§ 300.7(b)(1)) has been revised to clarify that the characteristics listed as generally associated with autism are not an exhaustive list of characteristics necessary for a child to be considered as having autism.
- The proposed definition of "traumatic brain injury" (§ 300.7(b)(12)) has been revised to describe this disability category more appropriately, and to clarify that the term "traumatic brain injury" refers to injuries acquired after birth.
- The proposed definition of "rehabilitation counseling services" (§ 300.16(b)(10)) has been revised to change the term "qualified counseling professional" to "qualified personnel."
- The phrase "in schools" has been retained in the definition of "social work services in schools" (§ 300.16(b)(12)), and the phrase "to receive maximum benefit" in the statement concerning mobilizing school and community resources has been changed.
- The last sentence of the proposed Note following the definition of "transition services" at § 300.18 has been revised to delete the statement that the listed activities are only examples.

2. Changes in Subpart B—State Plans and Local Applications

- Proposed Note 2 following § 300.128 ("Identification, location, and evaluation of children with disabilities") has been revised to clarify that where the part H lead agency is different from the SEA, actual implementation of the child find activities for infants and toddlers with disabilities by the part H lead agency does not alter or diminish the SEA's responsibility for ensuring compliance with child find and evaluation requirements.

3. Changes in Subpart C—Services

- Proposed § 300.308 ("Assistive technology") has been revised to specify that assistive technology devices and services must be provided if required as part of special education under § 300.17, related services under § 300.16, or supplementary aids and services under § 300.550(b)(2).
- Section 300.344 ("Participants in meetings") has been revised (1) to specify that if a purpose of a student's IEP meeting is the consideration of transition services to the student, the public agency must invite the student and a representative of any other agency that is likely to be responsible for providing or paying for transition services, and (2) to clarify what the public agency must do if either the student or the agency representative does not attend.
- Section 300.345 ("Parent participation") has been revised to provide that if a purpose of the IEP meeting is the consideration of transition services, the notice to the parents about the meeting must indicate this purpose and indicate that the student will be invited.
- Section 300.346 ("Content of IEP") has been revised to specify that the statement of needed transition services in a student's IEP must include the three areas listed in the definition of "transition services" in § 300.18(b), unless the IEP team determines that services are not needed in one or more of those areas and includes in the IEP a statement to that effect and the basis for making the determination.
- Proposed § 300.347 ("Agency responsibility for transition services") has been revised (1) to clarify that, if a participating agency does not provide agreed-upon services, the public agency must initiate another IEP meeting "as soon as possible"; (2) to delete the phrase "to be implemented," following "alternative strategies"; and (3) to add

"and if necessary, revising the student's IEP."

• The proposed provision requiring States to describe procedures for enabling teacher aides to acquire the necessary credentials for teaching special education has been deleted from § 300.381 ("Adequate supply of qualified personnel").

• The proposed definition of "regular education personnel," which would have limited the regular education personnel that a State's continuing education system would need to address, has been deleted from § 300.382 ("Personnel preparation and continuing education").

4. Changes in Subpart E—Procedural Safeguards

• Section 300.504 ("Prior notice; parent consent") has been revised (1) to delete the proposed provision requiring States to establish and use informal and formal procedures to deal with parental withholding of consent for services and activities beyond those required in § 300.504(b); and (2) to clarify that if a State has additional parental consent requirements, the State must determine the procedures it will use to ensure that a parent's failure to consent does not result in a failure to provide FAPE to the child. Proposed Note 3 has been revised to reflect these changes. The preexisting provision concerning the circumstances under which a public agency can condition a benefit on parent consent has been moved and modified to accommodate additional State parent consent provisions.

• Section 300.510 ("Administrative appeal; impartial review") has been revised to add a new provision requiring the SEA to transmit review findings and decisions to the State advisory panel and to make those findings and decisions available to the public. The proposed provisions regarding the impartiality of State-level review officials have been deleted.

5. Changes in Subpart F—State Administration

On July 8, 1992, the Department published final regulations making certain amendments to EDGAR and conforming changes in program regulations (57 FR 30328). That regulatory action removed the State complaint procedures (§§ 76.780–76.782) from EDGAR and amended part 300 by adding identical requirements in §§ 300.670–300.672. These final regulations make changes, as described below, to those regulations based on the comments received on the August 19, 1991 NPRM. The State complaint procedures also are renumbered as §§ 300.660–300.662.

• Proposed § 300.660 (Adoption of State complaint procedures) has been revised to clarify that, while the State complaint procedures must provide for filing complaints with the SEA, the SEA may expand its procedures to provide for (1) the filing of a complaint directly with a public agency in lieu of the SEA; and (2) the right to have the SEA review the public agency's decision on the complaint.

• Proposed § 300.661 ("Minimum State complaint procedures") has been revised to clarify that a public agency also has the right to request Secretarial review.

C. Changes Made to Part B by the 1991 Amendments

The primary purpose of the 1991 Amendments was to amend and reauthorize part H of the Act (the Infants and Toddlers with Disabilities program). However, the 1991 Amendments also included revisions to other parts of the Act, including part B.

The following discussion includes descriptions of the revisions to part B made by the 1991 Amendments that have been incorporated into these final regulations:.

1. Permitting Children, Aged 3–5, with Developmental Delays to be Included by States in the Definition of "Children with Disabilities"

The 1991 Amendments revised the definition of "children with disabilities" in section 602(a)(1) of the IDEA. In accordance with that change, § 300.7(b)(2) provides that the term "children with disabilities" may, at a State's discretion, include children, aged 3–5, "(i) who are experiencing developmental delays* * *and (ii) who, for that reason, need special education and related services." (Throughout this document, age ranges referred to in the text are inclusive.) The legislative history of the 1991 Amendments makes clear that the purpose of permitting a State to include these children in its definition of children with disabilities, "is not to expand or diminish the population of children eligible under part B, but rather to provide a State with the discretion to ensure that all eligible preschoolers are served and that children are not inappropriately labeled." (House Report No. 102–198, 4 (1991); Senate Report No. 102–84, 15 (1991).)

The legislative history further clarifies that, although the 1991 revision to the definition of "children with disabilities" in section 602(a)(1) of the IDEA is comparable to a component of the part H definition of "infants and toddlers with disabilities," the amendment should not be construed as requiring a State to use the same criteria for children aged 3–5 as it uses for infants and toddlers. A State may develop different or more stringent criteria for children aged 3–5, inclusive, than it uses for infants and toddlers so long as the criteria do not deny eligibility to a child who would otherwise be eligible under other categories included in section 602(a)(1) of the Act. (House Report No. 102–198, 4 (1991); Senate Report No. 102–84, 15 (1991).)

2. Transition of Individuals from Part H to Part B

The 1991 Amendments added a new provision at section 613(a)(15) that requires that each State plan set forth policies and procedures relating to the smooth transition for those individuals participating in the early intervention program under part H who will participate in preschool programs under part B. This would include a method of ensuring that when a child turns age three an IEP or, if consistent with sections 614(a)(5) and 677(d) of the Act, an individualized family service plan (IFSP) has been developed and is being implemented by the child's third birthday. This change is reflected in a new § 300.154.

3. Permitting LEAs to use IFSPs for Children Aged 3–5

To assist in the transition of children from the part H program to the part B program, the 1991 Amendments added a provision to section 614(a)(5) to permit LEAs to use IFSPs, in lieu of IEPs, for children with disabilities aged 3–5 if consistent with State policy and with the concurrence of the parents. This change is reflected in revised § 300.343 of the regulations. The Secretary notes that the "content of IFSP" provision in the part H regulations (34 CFR 303.344) is more detailed than section 677(d) of the Act. States are encouraged to implement the requirements in 34 CFR 303.344 for the IFSPs that they develop and implement for children aged 3–5.

4. Comprehensive System of Personnel Development (CSPD)

Consistent with a revision of section 613(a)(3) made by the 1991 Amendments, § 300.380 of the regulations has been amended to require that a State's CSPD under part B be consistent with the CSPD for the part H program described in § 303.360. (The 1991 Amendments also add a companion provision to the part H CSPD provision in section 676(b)(8) of the Act.)

5. State Administrative Set-Aside for Small States

The 1991 Amendments revised section 611(c)(2) of the IDEA to increase from $350,000 to $450,000 the minimum amount that each State may reserve from its part B allocation for administrative expenses. This change is reflected in § 300.620.

6. Part B Services for Indian Children with Disabilities

The 1991 Amendments significantly revised section 611(f), which authorizes payments to the Secretary of the Interior under part B for the education of certain Indian children with disabilities. Section 300.709 has been revised in its entirety, consistent with the new section 611(f)(1) of the IDEA. Section 300.709 now provides that, subject to meeting the requirements in § 300.260, the Secretary makes payments to the Secretary of the Interior to meet the need for assistance for the education of children with disabilities on reservations, aged 5–21, who are enrolled in elementary and secondary schools for Indian children operated by the Secretary of the Interior, and for Indian students aged 3–5 who are enrolled in programs affiliated with Bureau of Indian Affairs (BIA) schools that are required by the States in which the schools are located to attain or maintain State accreditation and which schools had such accreditation before the enactment of the 1991 Amendments. Previously, the Secretary of the Interior had been responsible for the education of all Indian children with disabilities, aged 3–21, on reservations (1) served by elementary and secondary schools operated by the Department of the Interior, and (2) for whom services were provided through contract with an Indian tribe or organization prior to FY 1989. The amount of payment is one percent of the aggregate amount of funds available to all States for that fiscal year.

In accordance with the new section 611(f)(3) of the IDEA, and in light of the revised responsibilities of the Secretary of the Interior for the education of Indian children with disabilities aged 3–21 as specified in section 611(f)(1) of the IDEA, § 300.260 also has been revised. That section identifies the specific provisions of sections 612, 613, and 614 of the IDEA that the Secretary has determined continue to be appropriate to applications from the Secretary of the Interior. Similarly, § 300.263 has been revised to reflect the regulatory requirements that continue to apply to the Secretary of the Interior in the implementation of the program supported by part B.

While the 1991 Amendments limited the responsibilities of the Secretary of the Interior for the education of Indian children with disabilities, it expanded the responsibilities of SEAs for Indian children with disabilities on reservations. Consistent with the requirements of the new section 611(f)(2) of the IDEA, § 300.300 (Timelines for FAPE) has been revised by adding a new paragraph (c) to specify that, with the exception of children identified in § 300.709(a) (1) and (2), the SEA shall be responsible for ensuring that all of the requirements of part B are implemented for all children aged 3–21 on reservations.

In addition, in accordance with the new section 611(f)(4) of the IDEA, a new § 300.710 has been added to provide that the Secretary make payments to the Secretary of the Interior to be distributed to tribes or tribal organizations to provide for the coordination of assistance for special education and related services for children with disabilities, aged 3–5, on reservations served by elementary and secondary schools for Indian children operated or funded by the Department of the Interior. The amount of the payment is .25 percent of the aggregate amount of funds available to all States under this part for that fiscal year. These funds are to be used for child find, screening, and other procedures for the early identification of children, aged 3–5, parent training, and for direct services.

The Secretary believes that those statutory changes resulting from the 1991 Amendments can be effectively implemented by incorporation into existing regulations without additional regulatory guidance. However, if experience in the implementation of these provisions indicates that additional regulatory guidance is needed, the Secretary will undertake additional rulemaking at a future date.

II. Preschool Grants Program

The Preschool Grants program under section 619 of part B of the Act provides additional Federal financial assistance to States for providing special education and related services to children with disabilities aged 3–5 and, at a State's discretion, for providing FAPE to two-year-old children with disabilities who will reach age three during the school year. The Preschool Grants regulations in 34 CFR part 301 establish the administrative procedures for applying for and distributing Preschool Grants funds.

The substantive rights and protections established under part B of the Act and its implementing regulations at 34 CFR part 300 apply to 3–5 year old children with disabilities. Therefore, these rights and protections, which include the right to FAPE, placement in the least restrictive environment, and the availability of due process procedures, are not repeated in the part 301 regulations.

The 1991 Amendments included several revisions to section 619. The following is a summary of those revisions:

- The 1991 Amendments expanded the age range for which SEAs and LEAs may use Preschool Grants funds to include two-year-old children with disabilities who will reach age three during the school year, whether or not those children are receiving, or have received, services under part H of the Act. These children are entitled to receive FAPE.

The use of Preschool Grants funds to provide FAPE to two-year-old children with disabilities is at a State's discretion and must be consistent with State policy. This is not a requirement to provide FAPE to all two-year-old children with disabilities who will reach age three during the school year. Rather, this provision increases States' options for use of Preschool Grants funds to meet the needs of children with disabilities and their families during the transition from early intervention services under part H of the Act to preschool special education under part B of the Act. Although children below age 3 cannot be included in the annual part B child count, States are permitted to use their part B funds to serve these children.

- Part H of the Act does not apply to any two-year-old child with disabilities receiving FAPE, in accordance with part B of the Act, with Preschool Grants funds. However, part H of the Act continues to apply to all other two-year-old children with disabilities, including those receiving FAPE with other sources of funds, such as part B funds under section 611 of the Act.

These statutory amendments are incorporated into these final regulations in §§ 301.1, 301.3, 301.6, 301.10, and 301.30.

Waiver of Rulemaking

In accordance with section 431(b)(2)(A) of the General Education Provisions Act (20 U.S.C. 1232(b)(2)(A)) and the Administrative Procedure Act (5 U.S.C. 553), it is the practice of the Secretary to offer interested parties the opportunity to comment on all changes proposed to be made in the Department's regulations. However, since the additional changes made in

these final regulations that were not included in the NPRM published for public comment merely incorporate statutory amendments and do not establish new substantive policy, further public comment could have no effect on the content of the final regulations. Therefore, the Secretary has determined under 5 U.S.C. 553(b)(B) that proposed rulemaking on these changes is unnecessary and contrary to public interest.

Invitation to Comment on Provisions Added to Part B by the 1991 Amendments

Although the Secretary publishes these regulations as final, the Secretary invites comments on whether additional guidance is required with respect to the regulatory changes made to part 300 and described above that reflect statutory changes made by the 1991 Amendments. In addition, the Secretary invites comments on whether other regulatory changes are desirable to implement the provisions of the 1991 Amendments relating to the transition of children from the part H program to the part B program.

Interested parties may send comments to Ms. Lucille Sleger at the address given at the beginning of this document until November 30, 1992.

All comments submitted in response to this document will be available for public inspection, during and after the comment period, in room 3615, 300 C Street, SW., Washington, DC, between the hours of 8:30 a.m and 4 p.m., Monday through Friday of each week, except Federal holidays.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Paperwork Reduction Act of 1980

The following sections contain information collection requirements: § 300.110; §§ 300.121–300.123; §§ 300.125–300.134; § 300.136; §§ 300.138–300.141; § 300.144; § 300.146; § 300.148; § 300.149; § 300.152; § 300.153; § 300.180; § 300.192; § 300.220; §§ 300.222–300.227; § 300.231; § 300.235; § 300.238; § 300.240; § 300.280; § 300.281; § 300.284; § 300.341; § 300.343; § 300.345; § 300.346; § 300.349; §§ 300.380–300.383; § 300.402; § 300.482; § 300.483; § 300.505; § 300.510; § 300.512; § 300.532; § 300.533; § 300.543; §§ 300.561–300.563; § 300.565; § 300.569; § 300.571; § 300.572; § 300.574; § 300.575; § 300.589; § 300.600; § 300.653; §§ 300.660–300.662; § 300.750; § 300.751; and § 300.754. As required by the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these sections to the Office of Management and Budget (OMB) for its review. (44 U.S.C. 3504(h))

The 50 States, the District of Columbia, Puerto Rico, 7 territories, and the Department of the Interior are eligible to apply for grants under this part. The Department needs and uses information submitted by these entities to determine whether they meet the regulatory requirements listed above. The 60 eligible entities under this program submit triennial State plans in order to receive part B grant awards. The annual public reporting burden for this information collection for the year of an entity's submission is estimated at 29 hours, including the time for gathering the data needed, and completing and reviewing the collection of information.

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, room 3002, New Executive Office Building, Washington, DC 20503; Attention: Daniel J. Chenok.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on the processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

List of Subjects

34 CFR Part 300

Administrative practice and procedures, Education, Education of individuals with disabilities, Grant programs—education, Privacy, Private schools, Reporting and record keeping requirements.

34 CFR Part 301

Education, Education of children with disabilities, Grant programs—education, Reporting and record keeping requirements.

Dated: August 18, 1992.

(Catalog of Federal Domestic Assistance number 84.027, Assistance to States for Education of Children with Disabilities; 84.173, Preschool Grants Program)

Lamar Alexander,

Secretary of Education.

The Secretary amends title 34 of the Code of Federal Regulations by revising part 300 and amending part 301 as follows:

1. Part 300 is revised to read as follows:

PART 300—ASSISTANCE TO STATES FOR THE EDUCATION OF CHILDREN WITH DISABILITIES

Subpart A—General

Purpose, Applicability, and Regulations that Apply to this Program

Sec.
300.1 Purpose.
300.2 Applicability to State, local, and private agencies.
300.3 Regulations that apply.
300.4 Act.
300.5 Assistive technology device.
300.6 Assistive technology service.
300.7 Children with disabilities.
300.8 Free appropriate public education.
300.9 Include.
300.10 Intermediate educational unit.
300.11 Local educational agency.
300.12 Native language.
300.13 Parent.
300.14 Public agency.
300.15 Qualified.
300.16 Related services.
300.17 Special education.
300.18 Transition services.

Subpart B—State Plans and Local Educational Agency Applications

State Plans—General

300.110 Condition of assistance.
300.111 Contents of plan.

State Plans—Contents

300.121 Right to a free appropriate public education.
300.122 Timelines and ages for free appropriate public education.
300.123 Full educational opportunity goal.
300.124 [Reserved]
300.125 Full educational opportunity goal—timetable.
300.126 Full educational opportunity goal—facilities, personnel, and services.
300.127 Priorities.
300.128 Identification, location, and evaluation of children with disabilities.
300.129 Confidentiality of personally identifiable information.
300.130 Individualized education programs.
300.131 Procedural safeguards.
300.132 Least restrictive environment.
300.133 Protection in evaluation procedures.
300.134 Responsibility of State educational agency for all educational programs.
300.135 [Reserved]
300.136 Implementation procedures—State educational agency.
300.137 Procedures for consultation.
300.138 Other Federal programs.

300.139 Comprehensive system of personnel development.
300.140 Private schools.
300.141 Recovery of funds for misclassified children.
300.142–300.143 [Reserved]
300.144 Hearing on application.
300.145 Prohibition of commingling.
300.146 Annual evaluation.
300.147 State advisory panel.
300.148 Policies and procedures for use of Part B funds.
300.149 Description of use of Part B funds.
300.150 State-level nonsupplanting.
300.151 Additional information if the State educational agency provides direct services.
300.152 Interagency agreements.
300.153 Personnel standards.
300.154 Transition of individuals from Part H to Part B.

Local Educational Agency Applications—General

300.180 Submission of application.
300.181 [Reserved]
300.182 The excess cost requirement.
300.183 Meeting the excess cost requirement.
300.184 Excess costs—computation of minimum amount.
300.185 Computation of excess costs—consolidated application.
300.186 Excess costs—limitation on use of Part B funds.
300.187–300.189 [Reserved]
300.190 Consolidated applications.
300.191 [Reserved]
300.192 State regulation of consolidated applications.
300.193 State educational agency approval; disapproval.
300.194 Withholding.

Local Educational Agency Applications—Contents

300.220 Child identification.
300.221 Confidentiality of personally identifiable information.
300.222 Full educational opportunity goal—timetable.
300.223 Facilities, personnel, and services.
300.224 Personnel development.
300.225 Priorities.
300.226 Parent involvement.
300.227 Participation in regular education programs.
300.228 [Reserved]
300.229 Excess cost.
300.230 Nonsupplanting.
300.231 Comparable services.
300.232–300.234 [Reserved]
300.235 Individualized education programs.
300.236 [Reserved]
300.237 Procedural safeguards.
300.238 Use of Part B funds.
300.239 [Reserved]
300.240 Other requirements.

Application from Secretary of the Interior

300.260 Submission of application; approval.
300.261 Public participation.
300.262 Use of Part B funds.
300.263 Applicable regulations.

Public Participation

300.280 Public hearings before adopting a State plan.
300.281 Notice.
300.282 Opportunity to participate; comment period.
300.283 Review of public comments before adopting plan.
300.284 Publication and availability of approved plan.

Subpart C—Services

Free Appropriate Public Education

300.300 Timelines for free appropriate public education.
300.301 Free appropriate public education—methods and payments.
300.302 Residential placement.
300.303 Proper functioning of hearing aids.
300.304 Full educational opportunity goal.
300.305 Program options.
300.306 Nonacademic services.
300.307 Physical education.
300.308 Assistive technology.

Priorities in the Use of Part B Funds

300.320 Definitions of "first priority children" and "second priority children."
300.321 Priorities.
300.322 [Reserved]
300.323 Services to other children.
300.324 Application of local educational agency to use funds for the second priority.

Individualized Education Programs

300.340 Definitions.
300.341 State educational agency responsibility.
300.342 When individualized education programs must be in effect.
300.343 Meetings.
300.344 Participants in meetings.
300.345 Parent participation.
300.346 Content of individualized education program.
300.347 Agency responsibilities for transition services.
300.348 Private school placements by public agencies.
300.349 Children with disabilities in parochial or other private schools.
300.350 Individualized education program—accountability.

Direct Service by the State Educational Agency

300.360 Use of local educational agency allocation for direct services.
300.361 Nature and location of services.
300.370 Use of State agency allocations.
300.371 State matching.
300.372 Applicability of nonsupplanting requirement.

Comprehensive System of Personnel Development

300.380 General.
300.381 Adequate supply of qualified personnel.
300.382 Personnel preparation and continuing education.
300.383 Data system on personnel and personnel development.
300.384–300.387 [Reserved]

Subpart D—Private Schools

Children with Disabilities in Private Schools Placed or Referred by Public Agencies

300.400 Applicability of §§ 300.400–300.402.
300.401 Responsibility of State educational agency.
300.402 Implementation by State educational agency.
300.403 Placement of children by parents.

Children with Disabilities Enrolled by their Parents in Private Schools

300.450 Definition of "private school children with disabilities."
300.451 State educational agency responsibility.
300.452 Local educational agency responsibility.

Procedures for By-Pass

300.480 By-pass—general.
300.481 Provisions for services under a by-pass.

Due Process Procedures

300.482 Notice of intent to implement a by-pass.
300.483 Request to show cause.
300.484 Show cause hearing.
300.485 Decision.
300.486 Judicial review.

Subpart E—Procedural Safeguards

Due Process Procedures for Parents and Children

300.500 Definitions of "consent", "evaluation", and "personally identifiable".
300.501 General responsibility of public agencies.
300.502 Opportunity to examine records.
300.503 Independent educational evaluation.
300.504 Prior notice; parent consent.
300.505 Content of notice.
300.506 Impartial due process hearing.
300.507 Impartial hearing officer.
300.508 Hearing rights.
300.509 Hearing decision; appeal.
300.510 Administrative appeal; impartial review.
300.511 Civil action.
300.512 Timelines and convenience of hearings and reviews.
300.513 Child's status during proceedings.
300.514 Surrogate parents.
300.515 Attorneys' fees.

Protection in Evaluation Procedures

300.530 General.
300.531 Preplacement evaluation.
300.532 Evaluation procedures.
300.533 Placement procedures.
300.534 Reevaluation.

Additional Procedures for Evaluating Children with Specific Learning Disabilities

300.540 Additional team members.
300.541 Criteria for determining the existence of a specific learning disability.
300.542 Observation.
300.543 Written report.

Least Restrictive Environment

300.550 General.

300.551 Continuum of alternative placements.
300.552 Placements.
300.553 Nonacademic settings.
300.554 Children in public or private institutions.
300.555 Technical assistance and training activities.
300.556 Monitoring activities.

Confidentiality of Information

300.560 Definitions.
300.561 Notice to parents.
300.562 Access rights.
300.563 Record of access.
300.564 Records on more than one child.
300.565 List of types and locations of information.
300.566 Fees.
300.567 Amendment of records at parent's request.
300.568 Opportunity for a hearing.
300.569 Result of hearing.
300.570 Hearing procedures.
300.571 Consent.
300.572 Safeguards.
300.573 Destruction of information.
300.574 Children's rights.
300.575 Enforcement.
300.576 Department.

Department Procedures

300.580 [Reserved]
300.581 Disapproval of a State plan.
300.582 Content of notice.
300.583 Hearing Official or Panel.
300.584 Hearing procedures.
300.585 Initial decision; final decision.
300.586 Judicial review.
300.587–300.588 [Reserved]
300.589 Waiver of requirement regarding supplementing and supplanting with Part B funds.

Subpart F—State Administration

General

300.600 Responsibility for all educational programs.
300.601 Relation of Part B to other Federal programs.

Use of Funds

300.620 Federal funds for State administration.
300.621 Allowable costs.

State Advisory Panel

300.650 Establishment.
300.651 Membership.
300.652 Advisory panel functions.
300.653 Advisory panel procedures.

State Complaint Procedures

300.660 Adoption of State complaint procedures.
300.661 Minimum State complaint procedures.
300.662 Filing a complaint.

Subpart G—Allocation of Funds; Reports

Allocations

300.700 Special definition of the term State.
300.701 State entitlement; formula.
300.702 Limitations and exclusions.
300.703 Ratable reductions.
300.704 Hold harmless provision.
300.705 Allocation for State in which by-pass is implemented for private school children with disabilities.
300.706 Within-State distribution: Fiscal Year 1979 and after.
300.707 Local educational agency entitlement; formula.
300.708 Reallocation of local educational agency funds.
300.709 Payments to the Secretary of the Interior for the education of Indian children.
300.710 Payments to the Secretary of the Interior for Indian tribes or tribal organizations.
300.711 Entitlements to jurisdictions.

Reports

300.750 Annual report of children served—report requirement.
300.751 Annual report of children served—information required in the report.
300.752 Annual report of children served—certification.
300.753 Annual report of children served—criteria for counting children.
300.754 Annual report of children served—other responsibilities of the State educational agency.

Appendix A to Part 300—[Reserved]
Appendix B to Part 300—[Reserved]
Appendix C to Part 300—Notice of Interpretation

Authority: 20 U.S.C. 1411–1420, unless otherwise noted.

Subpart A—General

Purpose, Applicability, and Regulations That Apply to this Program

§ 300.1 Purpose.

The purpose of this part is—

(a) To ensure that all children with disabilities have available to them a free appropriate public education that includes special education and related services to meet their unique needs;

(b) To ensure that the rights of children with disabilities and their parents are protected;

(c) To assist States and localities to provide for the education of all children with disabilities; and

(d) To assess and ensure the effectiveness of efforts to educate those children.

(Authority: 20 U.S.C. 1401 Note)

§ 300.2 Applicability to State, local, and private agencies.

(a) *States.* This part applies to each State that receives payments under Part B of the Act.

(b) *Public agencies within the State.* The State plan is submitted by the State educational agency on behalf of the State as a whole. Therefore, the provisions of this part apply to all political subdivisions of the State that are involved in the education of children with disabilities. These would include:

(1) The State educational agency;

(2) Local educational agencies and intermediate educational units;

(3) Other State agencies and schools (such as Departments of Mental Health and Welfare and State schools for students with deafness or students with blindness); and

(4) State correctional facilities.

(c) *Private schools and facilities.* Each public agency in the State is responsible for ensuring that the rights and protections under this part are given to children referred to or placed in private schools and facilities by that public agency. (See §§ 300.400–300.402)

(Authority: 20 U.S.C. 1412(1), (6); 1413(a); 1413(a)(4)(B))

Note: The requirements of this part are binding on each public agency that has direct or delegated authority to provide special education and related services in a State that receives funds under Part B of the Act, regardless of whether that agency is receiving funds under Part B.

§ 300.3 Regulations that apply.

The following regulations apply to this program:

(a) 34 CFR part 76 (State-Administered Programs) except for §§ 76.780–76.782.

(b) 34 CFR part 77 (Definitions).

(c) 34 CFR part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(d) 34 CFR part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments).

(e) 34 CFR part 81 (General Education Provisions Act— Enforcement).

(f) 34 CFR part 82 (New Restrictions on Lobbying).

(g) 34 CFR part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)).

(h) 34 CFR part 86 (Drug-Free Schools and Campuses).

(i) The regulations in this part—34 CFR part 300 (Assistance to States for Education of Children with Disabilities).

(Authority: 20 U.S.C. 1221e-3(a)(1))

Definitions

Note 1: Definitions of terms that are used throughout these regulations are included in this subpart. Other terms are defined in the specific subparts in which they are used. Below is a list of those terms and the specific sections in which they are defined:

Appropriate professional requirements in the State (§ 300.153(a)(1))
Average per pupil expenditure in public elementary and secondary schools in the United States (§ 300.701(c))
Consent (§ 300.500)
Destruction (§ 300.560)

Direct services (§ 300.370(b)(1))
Education records (§ 300.560)
Evaluation (§ 300.500)
First priority children (§ 300.320(a)) Highest requirements in the State applicable to a specific profession or discipline (§ 300.153(a)(2))
Independent educational evaluation (§ 300.503(a)(3)(i))
Individualized education program (§ 300.340)
Participating agency, as used in the IEP requirements in §§ 300.346 and 300.347 (§ 300.340(b))
Participating agency, as used in the confidentiality requirements in §§ 300.560–300.576 (§ 300.560)
Party or parties (§ 300.584(a))
Personally identifiable (§ 300.500)
Private school children with disabilities (§ 300.450)
Profession or discipline (§ 300.153(a)(3))
Public expense (§ 300.503(a)(3)(ii))
Second priority children (§ 300.320(b))
Special definition of "State" (§ 300.700)
State-approved or recognized certification, licensing, registration, or other comparable requirements (§ 300.153(a)(4))
Support services (§ 300.370(b)(2))

Note 2: Below are abbreviations for selected terms that are used throughout these regulations:

"FAPE" means "free appropriate public education."
"IEP" means "individualized education program."
"IEU" means "intermediate educational unit."
"LEA" means "local educational agency."
"LRE" means "least restrictive environment."
"SEA" means "State educational agency."

As appropriate, each abbreviation is used interchangeably with its nonabbreviated term.

§ 300.4 Act.

As used in this part, "Act" means the Individuals with Disabilities Education Act, formerly the Education of the Handicapped Act.

(Authority: 20 U.S.C. 1400)

§ 300.5 Assistive technology device.

As used in this part, "assistive technology device" means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve the functional capabilities of children with disabilities.

(Authority: 20 U.S.C. 1401(a)(25))

§ 300.6 Assistive technology service.

As used in this part, "assistive technology service" means any service that directly assists a child with a disability in the selection, acquisition, or use of an assistive technology device. The term includes —

(a) The evaluation of the needs of a child with a disability, including a functional evaluation of the child in the child's customary environment;

(b) Purchasing, leasing, or otherwise providing for the acquisition of assistive technology devices by children with disabilities;

(c) Selecting, designing, fitting, customizing, adapting, applying, retaining, repairing, or replacing assistive technology devices;

(d) Coordinating and using other therapies, interventions, or services with assistive technology devices, such as those associated with existing education and rehabilitation plans and programs;

(e) Training or technical assistance for a child with a disability or, if appropriate, that child's family; and

(f) Training or technical assistance for professionals (including individuals providing education or rehabilitation services), employers, or other individuals who provide services to, employ, or are otherwise substantially involved in the major life functions of children with disabilities.

(Authority: 20 U.S.C. 1401(a)(26))

Note: The definitions of "assistive technology device" and "assistive technology service" used in this part are taken directly from section 602(a)(25)–(26) of the Act, but in accordance with Part B, the statutory reference to "individual with a disability" has been replaced with "child with a disability." The Act's definitions of "assistive technology device" and "assistive technology service" incorporate verbatim the definitions of these terms used in the Technology-Related Assistance for Individuals with Disabilities Act of 1988.

§ 300.7 Children with disabilities.

(a)(1) As used in this part, the term "children with disabilities" means those children evaluated in accordance with §§ 300.530–300.534 as having mental retardation, hearing impairments including deafness, speech or language impairments, visual impairments including blindness, serious emotional disturbance, orthopedic impairments, autism, traumatic brain injury, other health impairments, specific learning disabilities, deaf-blindness, or multiple disabilities, and who because of those impairments need special education and related services.

(2) The term "children with disabilities" for children aged 3 through 5 may, at a State's discretion, include children—

(i) Who are experiencing developmental delays, as defined by the State and as measured by appropriate diagnostic instruments and procedures, in one or more of the following areas: physical development, cognitive development, communication development, social or emotional development, or adaptive development; and

(ii) Who, for that reason, need special education and related services.

(b) The terms used in this definition are defined as follows:

(1) "Autism" means a developmental disability significantly affecting verbal and nonverbal communication and social interaction, generally evident before age 3, that adversely affects a child's educational performance. Other characteristics often associated with autism are engagement in repetitive activities and stereotyped movements, resistance to environmental change or change in daily routines, and unusual responses to sensory experiences. The term does not apply if a child's educational performance is adversely affected primarily because the child has a serious emotional disturbance, as defined in paragraph (b)(9) of this section.

(2) "Deaf-blindness" means concomitant hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational problems that they cannot be accommodated in special education programs solely for children with deafness or children with blindness.

(3) "Deafness" means a hearing impairment that is so severe that the child is impaired in processing linguistic information through hearing, with or without amplification, that adversely affects a child's educational performance.

(4) "Hearing impairment" means an impairment in hearing, whether permanent or fluctuating, that adversely affects a child's educational performance but that is not included under the definition of deafness in this section.

(5) "Mental retardation" means significantly subaverage general intellectual functioning existing concurrently with deficits in adaptive behavior and manifested during the developmental period that adversely affects a child's educational performance.

(6) "Multiple disabilities" means concomitant impairments (such as mental retardation-blindness, mental retardation-orthopedic impairment, etc.), the combination of which causes such severe educational problems that they cannot be accommodated in special education programs solely for one of the impairments. The term does not include deaf-blindness.

(7) "Orthopedic impairment" means a severe orthopedic impairment that adversely affects a child's educational performance. The term includes impairments caused by congenital

anomaly (e.g., clubfoot, absence of some member, etc.), impairments caused by disease (e.g., poliomyelitis, bone tuberculosis, etc.), and impairments from other causes (e.g., cerebral palsy, amputations, and fractures or burns that cause contractures).

(8) "Other health impairment" means having limited strength, vitality or alertness, due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes that adversely affects a child's educational performance.

(9) "Serious emotional disturbance" is defined as follows:

(i) The term means a condition exhibiting one or more of the following characteristics over a long period of time and to a marked degree that adversely affects a child's educational performance—

(A) An inability to learn that cannot be explained by intellectual, sensory, or health factors;

(B) An inability to build or maintain satisfactory interpersonal relationships with peers and teachers;

(C) Inappropriate types of behavior or feelings under normal circumstances;

(D) A general pervasive mood of unhappiness or depression; or

(E) A tendency to develop physical symptoms or fears associated with personal or school problems.

(ii) The term includes schizophrenia. The term does not apply to children who are socially maladjusted, unless it is determined that they have a serious emotional disturbance.

(10) "Specific learning disability" means a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, that may manifest itself in an imperfect ability to listen, think, speak, read, write, spell, or to do mathematical calculations. The term includes such conditions as perceptual disabilities, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. The term does not apply to children who have learning problems that are primarily the result of visual, hearing, or motor disabilities, of mental retardation, of emotional disturbance, or of environmental, cultural, or economic disadvantage.

(11) "Speech or language impairment" means a communication disorder such as stuttering, impaired articulation, a language impairment, or a voice impairment that adversely affects a child's educational performance.

(12) "Traumatic brain injury" means an acquired injury to the brain caused by an external physical force, resulting in total or partial functional disability or psychosocial impairment, or both, that adversely affects a child's educational performance. The term applies to open or closed head injuries resulting in impairments in one or more areas, such as cognition; language; memory; attention; reasoning; abstract thinking; judgment; problem-solving; sensory, perceptual and motor abilities; psychosocial behavior; physical functions; information processing; and speech. The term does not apply to brain injuries that are congenital or degenerative, or brain injuries induced by birth trauma.

(13) "Visual impairment including blindness" means an impairment in vision that, even with correction, adversely affects a child's educational performance. The term includes both partial sight and blindness.

(Authority: 20 U.S.C. 1401(a)(1))

Note: If a child manifests characteristics of the disability category "autism" after age 3, that child still could be diagnosed as having "autism" if the criteria in paragraph (b)(1) of this section are satisfied.

§ 300.8 Free appropriate public education.

As used in this part, the term "free appropriate public education" means special education and related services that—

(a) Are provided at public expense, under public supervision and direction, and without charge;

(b) Meet the standards of the SEA, including the requirements of this part;

(c) Include preschool, elementary school, or secondary school education in the State involved; and

(d) Are provided in conformity with an IEP that meets the requirements of §§ 300.340–300.350.

(Authority: 20 U.S.C. 1401(a)(18))

§ 300.9 Include.

As used in this part, the term "include" means that the items named are not all of the possible items that are covered, whether like or unlike the ones named.

(Authority: 20 U.S.C. 1417(b))

§ 300.10 Intermediate educational unit.

As used in this part, the term "intermediate educational unit" means any public authority, other than an LEA, that—

(a) Is under the general supervision of an SEA;

(b) Is established by State law for the purpose of providing free public education on a regional basis; and

(c) Provides special education and related services to children with disabilities within that State.

(Authority: 20 U.S.C. 1401(a)(23))

§ 300.11 Local educational agency.

(a) [Reserved]

(b) For the purposes of this part, the term "local educational agency" also includes intermediate educational units.

(Authority: 20 U.S.C. 1401(a)(8))

§ 300.12 Native language.

As used in this part, the term "native language" has the meaning given that term by section 703(a)(2) of the Bilingual Education Act, which provides as follows:

The term "native language," when used with reference to an individual of limited English proficiency, means the language normally used by that individual, or in the case of a child, the language normally used by the parents of the child.

(Authority: 20 U.S.C. 3283(a)(2); 1401(a)(22))

Note: Section 602(a)(22) of the Act states that the term "native language" has the same meaning as the definition from section 703(a)(2) of the Bilingual Education Act. (The term is used in the prior notice and evaluation sections under § 300.505(b)(2) and § 300.532(a)(1).) In using the term, the Act does not prevent the following means of communication:

(1) In all direct contact with a child (including evaluation of the child), communication would be in the language normally used by the child and not that of the parents, if there is a difference between the two.

(2) For individuals with deafness or blindness, or for individuals with no written language, the mode of communication would be that normally used by the individual (such as sign language, braille, or oral communication).

§ 300.13 Parent.

As used in this part, the term "parent" means a parent, a guardian, a person acting as a parent of a child, or a surrogate parent who has been appointed in accordance with § 300.514. The term does not include the State if the child is a ward of the State.

(Authority: 20 U.S.C. 1415)

Note: The term "parent" is defined to include persons acting in the place of a parent, such as a grandmother or stepparent with whom a child lives, as well as persons who are legally responsible for a child's welfare.

§ 300.14 Public agency.

As used in this part, the term "public agency" includes the SEA, LEAs, IEUs, and any other political subdivisions of the State that are responsible for providing education to children with disabilities.

(Authority: 20 U.S.C. 1412(2)(B); 1412(6); 1413(a))

§ 300.15 Qualified.

As used in this part, the term "qualified" means that a person has met SEA approved or recognized certification, licensing, registration, or other comparable requirements that apply to the area in which he or she is providing special education or related services.

(Authority: 20 U.S.C. 1417(b))

§ 300.16 Related services.

(a) As used in this part, the term "related services" means transportation and such developmental, corrective, and other supportive services as are required to assist a child with a disability to benefit from special education, and includes speech pathology and audiology, psychological services, physical and occupational therapy, recreation, including therapeutic recreation, early identification and assessment of disabilities in children, counseling services, including rehabilitation counseling, and medical services for diagnostic or evaluation purposes. The term also includes school health services, social work services in schools, and parent counseling and training.

(b) The terms used in this definition are defined as follows:

(1) "Audiology" includes—

(i) Identification of children with hearing loss;

(ii) Determination of the range, nature, and degree of hearing loss, including referral for medical or other professional attention for the habilitation of hearing;

(iii) Provision of habilitative activities, such as language habilitation, auditory training, speech reading (lip-reading), hearing evaluation, and speech conservation;

(iv) Creation and administration of programs for prevention of hearing loss;

(v) Counseling and guidance of pupils, parents, and teachers regarding hearing loss; and

(vi) Determination of the child's need for group and individual amplification, selecting and fitting an appropriate aid, and evaluating the effectiveness of amplification.

(2) "Counseling services" means services provided by qualified social workers, psychologists, guidance counselors, or other qualified personnel.

(3) "Early identification and assessment of disabilities in children" means the implementation of a formal plan for identifying a disability as early as possible in a child's life.

(4) "Medical services" means services provided by a licensed physician to determine a child's medically related disability that results in the child's need for special education and related services.

(5) "Occupational therapy" includes—

(i) Improving, developing or restoring functions impaired or lost through illness, injury, or deprivation;

(ii) Improving ability to perform tasks for independent functioning when functions are impaired or lost; and

(iii) Preventing, through early intervention, initial or further impairment or loss of function.

(6) "Parent counseling and training" means assisting parents in understanding the special needs of their child and providing parents with information about child development.

(7) "Physical therapy" means services provided by a qualified physical therapist.

(8) "Psychological services" includes—

(i) Administering psychological and educational tests, and other assessment procedures;

(ii) Interpreting assessment results;

(iii) Obtaining, integrating, and interpreting information about child behavior and conditions relating to learning.

(iv) Consulting with other staff members in planning school programs to meet the special needs of children as indicated by psychological tests, interviews, and behavioral evaluations; and

(v) Planning and managing a program of psychological services, including psychological counseling for children and parents.

(9) "Recreation" includes—

(i) Assessment of leisure function;

(ii) Therapeutic recreation services;

(iii) Recreation programs in schools and community agencies; and

(iv) Leisure education.

(10) "Rehabilitation counseling services" means services provided by qualified personnel in individual or group sessions that focus specifically on career development, employment preparation, achieving independence, and integration in the workplace and community of a student with a disability. The term also includes vocational rehabilitation services provided to students with disabilities by vocational rehabilitation programs funded under the Rehabilitation Act of 1973, as amended.

(11) "School health services" means services provided by a qualified school nurse or other qualified person.

(12) "Social work services in schools" includes—

(i) Preparing a social or developmental history on a child with a disability;

(ii) Group and individual counseling with the child and family;

(iii) Working with those problems in a child's living situation (home, school, and community) that affect the child's adjustment in school; and

(iv) Mobilizing school and community resources to enable the child to learn as effectively as possible in his or her educational program.

(13) "Speech pathology" includes—

(i) Identification of children with speech or language impairments;

(ii) Diagnosis and appraisal of specific speech or language impairments;

(iii) Referral for medical or other professional attention necessary for the habilitation of speech or language impairments;

(iv) Provision of speech and language services for the habilitation or prevention of communicative impairments; and

(v) Counseling and guidance of parents, children, and teachers regarding speech and language impairments.

(14) "Transportation" includes—

(i) Travel to and from school and between schools;

(ii) Travel in and around school buildings; and

(iii) Specialized equipment (such as special or adapted buses, lifts, and ramps), if required to provide special transportation for a child with a disability.

(Authority: 20 U.S.C. 1401(a)(17))

Note: With respect to related services, the Senate Report states:

The Committee bill provides a definition of related services, making clear that all such related services may not be required for each individual child and that such term includes early identification and assessment of handicapping conditions and the provision of services to minimize the effects of such conditions.

(S. Rep. No. 94-168, p. 12 (1975))

The list of related services is not exhaustive and may include other developmental, corrective, or supportive services (such as artistic and cultural programs, and art, music, and dance therapy), if they are required to assist a child with a disability to benefit from special education.

There are certain kinds of services that might be provided by persons from varying professional backgrounds and with a variety of operational titles, depending upon requirements in individual States. For example, counseling services might be provided by social workers, psychologists, or guidance counselors, and psychological testing might be done by qualified psychological examiners, psychometrists, or psychologists, depending upon State standards.

Each related service defined under this part may include appropriate administrative and

supervisory activities that are necessary for program planning, management, and evaluation.

§ 300.17 Special education.

(a)(1) As used in this part, the term "special education" means specially designed instruction, at no cost to the parents, to meet the unique needs of a child with a disability, including—

(i) Instruction conducted in the classroom, in the home, in hospitals and institutions, and in other settings; and

(ii) Instruction in physical education.

(2) The term includes speech pathology, or any other related service, if the service consists of specially designed instruction, at no cost to the parents, to meet the unique needs of a child with a disability, and is considered special education rather than a related service under State standards.

(3) The term also includes vocational education if it consists of specially designed instruction, at no cost to the parents, to meet the unique needs of a child with a disability.

(b) The terms in this definition are defined as follows:

(1) "At no cost" means that all specially designed instruction is provided without charge, but does not preclude incidental fees that are normally charged to nondisabled students or their parents as a part of the regular education program.

(2) "Physical education" is defined as follows:

(i) The term means the development of—

(A) Physical and motor fitness;

(B) Fundamental motor skills and patterns; and

(C) Skills in aquatics, dance, and individual and group games and sports (including intramural and lifetime sports).

(ii) The term includes special physical education, adaptive physical education, movement education, and motor development.

(Authority: 20 U.S.C. 1401(a)(16))

(3) "Vocational education" means organized educational programs offering a sequence of courses that are directly related to the preparation of individuals in paid or unpaid employment in current or emerging occupations requiring other than a baccalaureate or advanced degree. Such programs shall include competency-based applied learning that contributes to an individual's academic knowledge, higher-order reasoning, and problem-solving skills, work attitudes, general employability skills, and the occupation-specific skills necessary for economic independence as a productive and contributing member of society. Such term also includes applied technology education.

(Authority: 20 U.S.C. 1401(16))

Note 1: The definition of special education is a particularly important one under these regulations, since a child does not have a disability under this part unless he or she needs special education. (See the definition of children with disabilities in § 300.7.) The definition of related services (§ 300.16) also depends on this definition, since a related service must be necessary for a child to benefit from special education. Therefore, if a child does not need special education, there can be no related services, and the child is not a child with a disability and is therefore not covered under the Act.

Note 2: The above definition of vocational education is taken from the Carl D. Perkins Vocational and Applied Technology Education Act (Pub. L. 98–524, as amended by Pub. L. 101–392). Section 118(a)(3)(A)–(B) of this statute further provides—

Vocational education programs and activities for individuals with handicaps will be provided in the least restrictive environment in accordance with section 612(5)(B) of the Individuals with Disabilities Education Act and will, whenever appropriate, be included as a component of the individualized education program developed under section 614(a)(5) of such Act. Students with handicaps who have individualized education programs developed under section 614(a)(5) of the Individuals with Disabilities Education Act shall, with respect to vocational education programs, be afforded the rights and protections guaranteed such students under sections 612, 614, and 615 of such Act.

§ 300.18 Transition services.

(a) As used in this part, "transition services" means a coordinated set of activities for a student, designed within an outcome-oriented process, that promotes movement from school to post-school activities, including postsecondary education, vocational training, integrated employment (including supported employment), continuing and adult education, adult services, independent living, or community participation.

(b) The coordinated set of activities described in paragraph (a) of this section must—

(1) Be based on the individual student's needs, taking into account the student's preferences and interests; and

(2) Include needed activities in the areas of—

(i) Instruction;

(ii) Community experiences;

(iii) The development of employment and other post-school adult living objectives; and

(iv) If appropriate, acquisition of daily living skills and functional vocational evaluation.

(Authority: 20 U.S.C. 1401(a)(19))

Note: Transition services for students with disabilities may be special education, if they are provided as specially designed instruction, or related services, if they are required to assist a student with a disability to benefit from special education. The list of activities in paragraph (b) is not intended to be exhaustive.

Subpart B—State Plans and Local Educational Agency Applications

State Plans—General

§ 300.110 Condition of assistance.

In order to receive funds under Part B of the Act for any fiscal year, a State must submit a State plan to the Secretary through its SEA, which plan shall be effective for a period of 3 fiscal years.

(Authority: 20 U.S.C. 1231g, 1412, 1413)

§ 300.111 Contents of plan.

Each State plan must contain the provisions required in §§ 300.121–300.153.

(Authority: 20 U.S.C. 1412, 1413)

State Plans—Contents

§ 300.121 Right to a free appropriate public education.

(a) Each State plan must include information that shows that the State has in effect a policy that ensures that all children with disabilities have the right to FAPE within the age ranges and timelines under § 300.122.

(b) The information must include a copy of each State statute, court order, State Attorney General opinion, and other State documents that show the source of the policy.

(c) The information must show that the policy—

(1) Applies to all public agencies in the State;

(2) Applies to all children with disabilities;

(3) Implements the priorities established under §§ 300.320–300.324; and

(4) Establishes timelines for implementing the policy, in accordance with § 300.122.

(Authority: 20 U.S.C. 1412(1), (2)(B), (6); 1413(a)(1))

§ 300.122 Timelines and ages for free appropriate public education.

(a) *General.* Each State plan must include in detail the policies and procedures that the State will undertake or has undertaken in order to ensure that FAPE is available for all children with disabilities aged 3 through 18 within the State not later than September 1, 1978, and for all children with disabilities aged 3 through 21

within the State not later than September 1, 1980.

(b) *Documents relating to timelines.* Each State plan must include a copy of each State statute, court order, Attorney General decision, and other State documents that demonstrate that the State has established timelines in accordance with paragraph (a) of this section.

(c) *Exception.* The requirement in paragraph (a) of this section does not apply to a State with respect to children with disabilities aged 3, 4, 5, 18, 19, 20, or 21 to the extent that the requirement would be inconsistent with State law or practice, or the order of any court, respecting public education for one or more of those age groups in the State.

(d) *Documents relating to exceptions.* Each State plan must—

(1) Describe in detail the exception in paragraph (c) of this section applies to the State; and

(2) Include a copy of each State law, court order, and other documents that provide a basis for the exception.

(Authority: 20 U.S.C. 1412(2)(B))

§ 300.123 Full educational opportunity goal.

Each State plan must include in detail the policies and procedures that the State will undertake, or has undertaken, in order to ensure that the State has a goal of providing full educational opportunity to all children with disabilities aged birth through 21.

(Authority: 20 U.S.C. 1412(2)(A))

§ 300.124 [Reserved]

§ 300.125 Full educational opportunity goal—timetable.

Each State plan must contain a detailed timetable for accomplishing the goal of providing full educational opportunity for all children with disabilities.

(Authority: 20 U.S.C. 1412(2)(A))

§ 300.126 Full educational opportunity goal—facilities, personnel, and services.

Each State plan must include a description of the kind and number of facilities, personnel, and services necessary throughout the State to meet the goal of providing full educational opportunity for all children with disabilities.

(Authority: 20 U.S.C. 1412(2)(A))

§ 300.127 Priorities.

Each State plan must include information that shows that —

(a) The State has established priorities that meet the requirements of §§ 300.320–300.324;

(b) The State priorities meet the timelines under § 300.122; and

(c) The State has made progress in meeting those timelines.

(Authority: 20 U.S.C. 1412(3))

§ 300.128 Identification, location, and evaluation of children with disabilities.

(a) *General requirement.* Each State plan must include in detail the policies and procedures that the State will undertake, or has undertaken, to ensure that—

(1) All children with disabilities, regardless of the severity of their disability, and who are in need of special education and related services are identified, located, and evaluated; and

(2) A practical method is developed and implemented to determine which children are currently receiving needed special education and related services and which children are not currently receiving needed special education and related services.

(b) *Information.* Each State plan must:

(1) Designate the State agency (if other than the SEA) responsible for coordinating the planning and implementation of the policies and procedures under paragraph (a) of this section.

(2) Name each agency that participates in the planning and implementation and describe the nature and extent of its participation.

(3) Describe the extent that—

(i) The activities described in paragraph (a) of this section have been achieved under the current State plan; and

(ii) The resources named for these activities in that plan have been used.

(4) Describe each type of activity to be carried out during the next school year, including the role of the agency named under paragraph (b)(1) of this section, timelines for completing those activities, resources that will be used, and expected outcomes.

(5) Describe how the policies and procedures under paragraph (a) of this section will be monitored to ensure that the SEA obtains—

(i) The number of children with disabilities within each disability category that have been identified, located, and evaluated; and

(ii) Information adequate to evaluate the effectiveness of those policies and procedures.

(6) Describe the method the State uses to determine which children are currently receiving special education and related services and which children are not receiving special education and related services.

(Authority: 20 U.S.C. 1412(2)(C))

Note 1: The State is responsible for ensuring that all children with disabilities are identified, located, and evaluated, including children in all public and private agencies and institutions in the State. Collection and use of data are subject to the confidentiality requirements of §§ 300.560–300.576.

Note 2: Under both Parts B and H of the Act, States are responsible for identifying, locating, and evaluating infants and toddlers from birth through 2 years of age who have disabilities or who are suspected of having disabilities. In States where the SEA and the State's lead agency for the Part H program are different and the Part H lead agency will be participating in the child find activities described in paragraph (a) of this section, the nature and extent of the Part H lead agency's participation must, under paragraph (b)(2) of this section, be included in the State plan. With the SEA's agreement, the Part H lead agency's participation may include the actual implementation of child find activities for infants and toddlers. The use of an interagency agreement or other mechanism for providing for the Part H lead agency's participation would not alter or diminish the responsibility of the SEA to ensure compliance with all child find requirements, including the requirement in paragraph (a)(1) of this section that all children with disabilities who are in need of special education and related services are evaluated.

§ 300.129 Confidentiality of personally identifiable information.

(a) Each State plan must include in detail the policies and procedures that the State will undertake, or has undertaken, in order to ensure the protection of the confidentiality of any personally identifiable information collected, used, or maintained under this part.

(b) The Secretary shall use the criteria in §§ 300.560–300.576 to evaluate the policies and procedures of the State under paragraph (a) of this section.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

Note: The confidentiality regulations were published in the **Federal Register** in final form on February 27, 1976 (41 FR 8603–8610), and met the requirements of Part B of the Act. Those regulations are incorporated in §§ 300.560–300.576.

§ 300.130 Individualized education programs.

(a) Each State plan must include information that shows that each public agency in the State maintains records of the IEP for each child with disabilities, and each public agency establishes, reviews, and revises each program as provided in §§ 300.340–300.350.

(b) Each State plan must include—

(1) A copy of each State statute, policy, and standard that regulates the manner in which IEPs are developed, implemented, reviewed, and revised; and

(2) The procedures that the SEA follows in monitoring and evaluating those programs.

(Authority: 20 U.S.C. 1412(4), 1413(a)(1))

§ 300.131 Procedural safeguards.

Each State plan must include procedural safeguards that ensure that the requirements of §§ 300.500–300.514 are met.

(Authority: 20 U.S.C. 1412(5)(A))

§ 300.132 Least restrictive environment.

(a) Each State plan must include procedures that ensure that the requirements of §§ 300.550–300.556 are met.

(b) Each State plan must include the following information:

(1) The number of children with disabilities in the State, within each disability category, who are participating in regular education programs, consistent with §§ 300.550–300.556.

(2) The number of children with disabilities who are in separate classes or separate school facilities, or who are otherwise removed from the regular education environment.

(Authority: 20 U.S.C. 1412(5)(B))

§ 300.133 Protection in evaluation procedures.

Each State plan must include procedures that ensure that the requirements of §§ 300.530–300.534 are met.

(Authority: 20 U.S.C. 1412(5)(C))

§ 300.134 Responsibility of State educational agency for all educational programs.

(a) Each State plan must include information that shows that the requirements of § 300.600 are met.

(b) The information under paragraph (a) of this section must include a copy of each State statute, State regulation, signed agreement between respective agency officials, and any other documents that show compliance with that paragraph.

(Authority: 20 U.S.C. 1412(6))

§ 300.135 [Reserved]

§ 300.136 Implementation procedures—State educational agency.

Each State plan must describe the procedures the SEA follows to inform each public agency of its responsibility for ensuring effective implementation of procedural safeguards for the children with disabilities served by that public agency.

(Authority: 20 U.S.C. 1412(6))

§ 300.137 Procedures for consultation.

Each State plan must include an assurance that in carrying out the requirements of section 612 of the Act, procedures are established for consultation with individuals involved in or concerned with the education of children with disabilities, including individuals with disabilities and parents of children with disabilities.

(Authority: 20 U.S.C. 1412(7)(A))

§ 300.138 Other Federal programs.

Each State plan must provide that programs and procedures are established to ensure that funds received by the State or any public agency in the State under any other Federal program, including subpart 2 of part D of chapter 1 of title I of the Elementary and Secondary Education Act of 1965, under which there is specific authority for assistance for the education of children with disabilities, are used by the State, or any public agency in the State, only in a manner consistent with the goal of providing FAPE for all children with disabilities, except that nothing in this section limits the specific requirements of the laws governing those Federal programs.

(Authority: 20 U.S.C. 1413(a)(2))

§ 300.139 Comprehensive system of personnel development.

Each State plan must include the procedures required under §§ 300.380–300.383.

(Authority: 20 U.S.C. 1413(a)(3))

§ 300.140 Private schools.

Each State plan must include policies and procedures that ensure that the requirements of §§ 300.400–300.403 and §§ 300.450–300.452 are met.

(Authority: 20 U.S.C. 1413(a)(4))

§ 300.141 Recovery of funds for misclassified children.

Each State plan must include policies and procedures that ensure that the State seeks to recover any funds provided under Part B of the Act for services to a child who is determined to be erroneously classified as eligible to be counted under section 611(a) or (d) of the Act.

(Authority: 20 U.S.C. 1413(a)(5))

§§ 300.142–300.143 [Reserved]

§ 300.144 Hearing on application.

Each State plan must include procedures to ensure that the SEA does not take any final action with respect to an application submitted by an LEA before giving the LEA reasonable notice and an opportunity for a hearing under § 76.401(d) of this title.

(Authority: 20 U.S.C. 1413(a)(8))

§ 300.145 Prohibition of commingling.

Each State plan must provide assurance satisfactory to the Secretary that funds provided under part B of the Act are not commingled with State funds.

(Authority: 20 U.S.C. 1413(a)(9))

Note: This assurance is satisfied by the use of a separate accounting system that includes an audit trail of the expenditure of the part B funds. Separate bank accounts are not required. (See 34 CFR 76.702 (Fiscal control and fund accounting procedures).)

§ 300.146 Annual evaluation.

Each State plan must include procedures for evaluation at least annually of the effectiveness of programs in meeting the educational needs of children with disabilities, including evaluation of IEPs.

(Authority: 20 U.S.C. 1413(a)(11))

§ 300.147 State advisory panel.

Each State plan must provide that the requirements of §§ 300.650–300.653 are met.

(Authority: 20 U.S.C. 1413(a)(12))

§ 300.148 Policies and procedures for use of Part B funds.

Each State plan must set forth policies and procedures designed to ensure that funds paid to the State under Part B of the Act are spent in accordance with the provisions of Part B, with particular attention given to sections 611(b), 611(c), 611(d), 612(2), and 612(3) of the Act.

(Authority: 20 U.S.C. 1413(a)(1))

§ 300.149 Description of use of Part B funds.

(a) State allocation. Each State plan must include the following information about the State's use of funds under § 300.370 and § 300.620:

(1) A list of administrative positions, and a description of duties for each person whose salary is paid in whole or in part with those funds.

(2) For each position, the percentage of salary paid with those funds.

(3) A description of each administrative activity the SEA will carry out during the next school year with those funds.

(4) A description of each direct service and each support service that the SEA will provide during the next period covered by the State plan with those funds, and the activities the State advisory panel will undertake during that period with those funds.

(b) Local educational agency allocation. Each State plan must include—

(1) An estimate of the number and percent of LEAs in the State that will receive an allocation under this part (other than LEAs that submit a consolidated application);

(2) An estimate of the number of LEAs that will receive an allocation under a consolidated application;

(3) An estimate of the number of consolidated applications and the average number of LEAs per application; and

(4) A description of direct services that the SEA will provide under § 300.360.

(Authority: 20 U.S.C.1412(6))

§ 300.150 State-level nonsupplanting.

Each State plan must provide assurance satisfactory to the Secretary that funds provided under this part will be used so as to supplement and increase the level of Federal (other than funds available under this part), State, and local funds—including funds that are not under the direct control of the SEA or LEAs — expended for special education and related services provided to children with disabilities under this part and in no case to supplant those Federal (other than funds available under this part), State, and local funds unless a waiver is granted in accordance with § 300.589.

(Authority: 20 U.S.C. 1413(a)(9))

Note: This requirement is distinct from the LEA nonsupplanting provision already contained in these regulations at § 300.230. Under this State-level provision, the State must assure that Part B funds distributed to LEAs and IEUs will be used to supplement and not supplant other Federal, State, and local funds (including funds not under the control of educational agencies) that would have been expended for special education and related services provided to children with disabilities in the absence of the Part B funds. The portion of Part B funds that are not distributed to LEAs or IEUs under the statutory formula (20 U.S.C. 1411(d)) are not subject to this nonsupplanting provision. See 20 U.S.C. 1411(c)(3). States may not permit LEAs or IEUs to use Part B funds to satisfy a financial commitment for services that would have been paid for by a health or other agency pursuant to policy or practice but for the fact that these services are now included in the IEPs of children with disabilities.

(H.R. Rep. No. 860, 99th Cong., 21–22 (1986))

§ 300.151 Additional information if the State educational agency provides direct services.

If an SEA provides FAPE for children with disabilities or provides them with direct services, its State plan must include the information required under §§ 300.226, 300.227, 300.231, and 300.235.

(Authority: 20 U.S.C. 1413(b))

§ 300.152 Interagency agreements.

(a) Each State plan must set forth policies and procedures for developing and implementing interagency agreements between—

(1) The SEA; and

(2) All other State and local agencies that provide or pay for services required under this part for children with disabilities.

(b) The policies and procedures referred to in paragraph (a) of this section must—

(1) Describe the role that each of those agencies plays in providing or paying for services required under this part for children with disabilities; and

(2) Provide for the development and implementation of interagency agreements that—

(i) Define the financial responsibility of each agency for providing children with disabilities with FAPE;

(ii) Establish procedures for resolving interagency disputes among agencies that are parties to the agreements; and

(iii) Establish procedures under which LEAs may initiate proceedings in order to secure reimbursement from agencies that are parties to the agreements or otherwise implement the provisions of the agreements.

(Authority: 20 U.S.C. 1413(a)(13))

§ 300.153 Personnel standards.

(a) As used in this part:

(1) "Appropriate professional requirements in the State" means entry level requirements that—

(i) Are based on the highest requirements in the State applicable to the profession or discipline in which a person is providing special education or related services; and

(ii) Establish suitable qualifications for personnel providing special education and related services under this part to children and youth with disabilities who are served by State, local, and private agencies (see § 300.2).

(2) "Highest requirements in the State applicable to a specific profession or discipline" means the highest entry-level academic degree needed for any State approved or recognized certification, licensing, registration, or other comparable requirements that apply to that profession or discipline.

(3) "Profession or discipline" means a specific occupational category that—

(i) Provides special education and related services to children with disabilities under this part;

(ii) Has been established or designated by the State; and

(iii) Has a required scope of responsibility and degree of supervision.

(4) "State approved or recognized certification, licensing, registration, or other comparable requirements" means the requirements that a State legislature either has enacted or has authorized a State agency to promulgate through rules to establish the entry-level standards for employment in a specific profession or discipline in that State.

(b)(1) Each State plan must include policies and procedures relating to the establishment and maintenance of standards to ensure that personnel necessary to carry out the purposes of this part are appropriately and adequately prepared and trained.

(2) The policies and procedures required in paragraph (b)(1) of this section must provide for the establishment and maintenance of standards that are consistent with any State approved or recognized certification, licensing, registration, or other comparable requirements that apply to the profession or discipline in which a person is providing special education or related services.

(c) To the extent that a State's standards for a profession or discipline, including standards for temporary or emergency certification, are not based on the highest requirements in the State applicable to a specific profession or discipline, the State plan must include the steps the State is taking and the procedures for notifying public agencies and personnel of those steps and the timelines it has established for the retraining or hiring of personnel to meet appropriate professional requirements in the State.

(d)(1) In meeting the requirements in paragraphs (b) and (c) of this section, a determination must be made about the status of personnel standards in the State. That determination must be based on current information that accurately describes, for each profession or discipline in which personnel are providing special education or related services, whether the applicable standards are consistent with the highest requirements in the State for that profession or discipline.

(2) The information required in paragraph (d)(1) of this section must be on file in the SEA, and available to the public.

(e) In identifying the highest requirements in the State for purposes of this section, the requirements of all State statutes and the rules of all State agencies applicable to serving children and youth with disabilities must be considered.

(Authority: 20 U.S.C. 1413(a)(14))

Note: The regulations require that the State use its own existing highest requirements to determine the standards appropriate to personnel who provide special education and

related services under this part. The regulations do not require States to set any specified training standard, such as a master's degree, for employment of personnel who provide services under this part. In some instances, States will be required to show that they are taking steps to retrain or to hire personnel to meet the standards adopted by the SEA that are based on requirements for practice in a specific profession or discipline that were established by other State agencies. States in this position need not, however, require personnel providing services under this part to apply for and obtain the license, registration, or other comparable credential required by other agencies of individuals in that profession or discipline. The regulations permit each State to determine the specific occupational categories required to provide special education and related services and to revise or expand these categories as needed. The professions or disciplines defined by the State need not be limited to traditional occupational categories.

§ 300.154 Transition of individuals from Part H to Part B.

Each State plan must set forth policies and procedures relating to the smooth transition for those individuals participating in the early intervention program under Part H of the Act who will participate in preschool programs assisted under this part, including a method of ensuring that when a child turns age 3 an IEP, or, if consistent with sections 614(a)(5) and 677(d) of the Act, an individualized family service plan, has been developed and implemented by the child's third birthday.

(Authority: 20 U.S.C. 1413(a)(15))

Local Educational Agency Applications—General

§ 300.180 Submission of application.

In order to receive payments under Part B of the Act for any fiscal year, an LEA must submit an application to the SEA.

(Authority: 20 U.S.C. 1414(a))

§ 300.181 [Reserved]

§ 300.182 The excess cost requirement.

An LEA may only use funds under part B of the Act for the excess costs of providing special education and related services for children with disabilities.

(Authority: 20 U.S.C. 1414(a)(1), (a)(2)(B)(i))

§ 300.183 Meeting the excess cost requirement.

(a) An LEA meets the excess cost requirement if it has on the average spent at least the amount determined under § 300.184 for the education of each of its children with disabilities. This amount may not include capital outlay or debt service.

(Authority: 20 U.S.C. 1402(20); 1414(a)(1))

Note: The excess cost requirement means that the LEA must spend a certain minimum amount for the education of its children with disabilities before part B funds are used. This ensures that children served with part B funds have at least the same average amount spent on them, from sources other than part B, as do the children in the school district taken as a whole.

The minimum amount that must be spent for the education of children with disabilities is computed under a statutory formula. Section 300.184 implements this formula and gives a step-by-step method to determine the minimum amount. Excess costs are those costs of special education and related services that exceed the minimum amount. Therefore, if an LEA can show that it has (on the average) spent the minimum amount for the education of each of its children with disabilities, it has met the excess cost requirement, and all additional costs are excess costs. Part B funds can then be used to pay for these additional costs, subject to the other requirements of part B (priorities, etc.). In the Note under § 300.184, there is an example of how the minimum amount is computed.

§ 300.184 Excess costs—computation of minimum amount.

The minimum average amount that an LEA must spend under § 300.183 for the education of each of its children with disabilities is computed as follows:

(a) Add all expenditures of the LEA in the preceding school year, except capital outlay and debt service—

(1) For elementary school students, if the child with a disability is an elementary school student; or

(2) For secondary school students, if the child with a disability is a secondary school student.

(b) From this amount, subtract the total of the following amounts spent for elementary school students or for secondary school students, as the case may be—

(1) Amounts the agency spent in the preceding school year from funds awarded under part B of the Act and titles I and VII of the Elementary and Secondary Education Act of 1965; and

(2) Amounts from State and local funds that the agency spent in the preceding school year for—

(i) Programs for children with disabilities;

(ii) Programs to meet the special educational needs of educationally deprived children; and

(iii) Programs of bilingual education for limited English proficient children.

(c) Divide the result under paragraph (b) of this section by the average number of students enrolled in the agency in the preceding school year—

(1) In its elementary schools, if the child with a disability is an elementary school student; or

(2) In its secondary schools, if the child with a disability is a secondary school student.

(Authority: 20 U.S.C. 1414(a)(1))

Note: The following is an example of how an LEA might compute the average minimum amount it must spend for the education of each of its children with disabilities, under § 300.183. This example follows the formula in § 300.184. Under the statute and regulations, the LEA must make one computation for children with disabilities in its elementary schools and a separate computation for children with disabilities in its secondary schools. The computation for elementary school students with disabilities would be done as follows:

a. First, the LEA must determine its total amount of expenditures for elementary school students from all sources—local, State, and Federal (including part B)—in the preceding school year. Only capital outlay and debt service are excluded.

Example: An LEA spent the following amounts last year for elementary school students (including its elementary school students with disabilities):

(1) From local tax funds	$2,750,000
(2) From State funds	7,000,000
(3) From Federal funds	750,000
	10,500,000

Of this total, $500,000 was for capital outlay and debt service relating to the education of elementary school students. This must be subtracted from total expenditures:

	$10,500,000
	−500,000
Total expenditures for elementary school students (less capital outlay and debt service)	10,000,000

b. Next, the LEA must subtract amounts spent for:

(1) Programs for children with disabilities;

(2) Programs to meet the special educational needs of educationally deprived children; and

(3) Programs of bilingual education for limited English proficient children.

These are funds that the LEA actually spent, not funds received last year but carried over for the current school year.

Example: The LEA spent the following amounts for elementary school students last year:

(1) From funds under Chapter 1 of title I of the Elementary and Secondary Education Act of 1965	300,000
(2) From a special State program for educationally deprived children	200,000
(3) From a grant under Part B	200,000
(4) From State funds for the education of children with disabilities	500,000
(5) From a locally-funded program for children with disabilities	250,000

(6) From a grant for a bilingual education program under Title VII of the Elementary and Secondary Education Act of 1965.....	150,000
Total.....	1,600,000

(An LEA would also include any other funds it spent from Federal, State, or local sources for the three basic purposes: Children with disabilities, educationally deprived children, and bilingual education for limited English proficient children.)

This amount is subtracted from the LEA's total expenditure for elementary school students computed above:

	$10,000,000
	−1,600,000
	8,400,000

c. The LEA next must divide by the average number of students enrolled in the elementary schools of the agency last year (including its students with disabilities).

Example: Last year, an average of 7,000 students were enrolled in the agency's elementary schools. This must be divided into the amount computed under the above paragraph: $8,400,000/7,000 students = $1,200/student.

This figure is in the minimum amount the LEA must spend (on the average) for the education of each of its students with disabilities. Funds under Part B may be used only for costs over and above this minimum. In this example, if the LEA has 100 elementary school students with disabilities, it must keep records adequate to show that it has spent at least $120,000 for the education of those students (100 students times $1,200/student), not including capital outlay and debt service.

This $120,000 may come from any funds except funds under Part B, subject to any legal requirements that govern the use of those other funds.

If the LEA has secondary school students with disabilities, it must do the same computation for them. However the amounts used in the computation would be those the LEA spent last year for the education of secondary school students, rather than for elementary school students.

§ 300.185 Computation of excess costs—consolidated application.

The minimum average amount under § 300.183, if two or more LEAs submit a consolidated application, is the average of the combined minimum average amounts determined under § 300.184 in those agencies for elementary or secondary school students, as the case may be.

(Authority: 20 U.S.C. 1414(a)(1))

§ 300.186 Excess costs—limitation on use of Part B funds.

(a) The excess cost requirement prevents an LEA from using funds provided under Part B of the Act to pay for all of the costs directly attributable to the education of a child with a disability, subject to paragraph (b) of this section.

(b) The excess cost requirement does not prevent an LEA from using Part B funds to pay for all of the costs directly attributable to the education of a child with a disability in any of the age ranges three, four, five, eighteen, nineteen, twenty, or twenty-one, if no local or State funds are available for nondisabled children in that age range. However, the LEA must comply with the nonsupplanting and other requirements of this part in providing the education and services.

(Authority: 20 U.S.C. 1402(20); 1414(a)(1))

§ 300.187–300.189 [Reserved]

§ 300.190 Consolidated applications.

(a) [Reserved]

(b) *Required applications.* An SEA may require LEAs to submit a consolidated application for payments under Part B of the Act if the SEA determines that an individual application submitted by an LEA will be disapproved because—

(1) The agency's entitlement is less than the $7,500 minimum required by section 611(c)(4)(A)(i) of the Act (§ 300.360(a)(1)); or

(2) The agency is unable to establish and maintain programs of sufficient size and scope to effectively meet the educational needs of children with disabilities.

(c) *Size and scope of program.* The SEA shall establish standards and procedures for determinations under paragraph (b)(2) of this section.

(Authority: 20 U.S.C. 1414(c)(1))

§ 300.191 [Reserved]

§ 300.192 State regulation of consolidated applications.

(a) The SEA shall issue regulations with respect to consolidated applications submitted under this part.

(b) The SEA's regulations must—

(1) Be consistent with sections 612(1)–(7) and 613(a) of the Act; and

(2) Provide participating LEAs with joint responsibilities for implementing programs receiving payments under this part.

(Authority: 20 U.S.C. 1414(c)(2)(B))

(c) If an IEU is required by State law to carry out this part, the joint responsibilities given to LEAs under paragraph (b)(2) of this section do not apply to the administration and disbursement of any payments received by the IEU. Those administrative responsibilities must be carried out exclusively by the IEU.

(Authority: 20 U.S.C. 1414(c)(2)(C))

§ 300.193 State educational agency approval; disapproval.

(a)–(b) [Reserved]

(c) In carrying out its functions under this section, each SEA shall consider any decision resulting from a hearing under §§ 300.506–300.513 that is adverse to the LEA involved in the decision.

(Authority: 20 U.S.C. 1414(b)(3))

§ 300.194 Withholding.

(a) If an SEA, after giving reasonable notice and an opportunity for a hearing to an LEA, decides that the LEA in the administration of an application approved by the SEA has failed to comply with any requirement in the application, the SEA, after giving notice to the LEA, shall—

(1) Make no further payments to the LEA until the SEA is satisfied that there is no longer any failure to comply with the requirement; or

(2) Consider its decision in its review of any application made by the LEA under § 300.180; or

(3) Both.

(b) [Reserved]

(Authority: 20 U.S.C. 1414(b)(2))

Local Educational Agency Applications—Contents

§ 300.220 Child identification.

Each application must include procedures that ensure that all children residing within the jurisdiction of the LEA who have disabilities, regardless of the severity of their disability, and who are in need of special education and related services, are identified, located, and evaluated, including a practical method for determining which children are currently receiving needed special education and related services and which children are not currently receiving needed special education and related services.

(Authority: 20 U.S.C. 1414(a)(1)(A))

Note: The LEA is responsible for ensuring that all children with disabilities within its jurisdiction are identified, located, and evaluated, including children in all public and private agencies and institutions within that jurisdiction. Collection and use of data are subject to the confidentiality requirements of §§ 300.560–300.576.

§ 300.221 Confidentiality of personally identifiable information.

Each application must include policies and procedures that ensure that the criteria in §§ 300.560–300.574 are met.

(Authority: 20 U.S.C. 1414(a)(1)(B))

§ 300.222 Full educational opportunity goal—timetable.

Each application must—(a) Include a goal of providing full educational opportunity to all children with disabilities, aged birth through 21; and

(b) Include a detailed timetable for accomplishing the goal.

(Authority: 20 U.S.C. 1414(a)(1)(C), (D))

§ 300.223 Facilities, personnel, and services.

Each application must provide a description of the kind and number of facilities, personnel, and services necessary to meet the goal in § 300.222.

(Authority: 20 U.S.C. 1414(a)(1)(E))

§ 300.224 Personnel development.

Each application must include procedures for the implementation and use of the comprehensive system of personnel development established by the SEA under § 300.139.

(Authority: 20 U.S.C. 1414(a)(1)(C)(i))

§ 300.225 Priorities.

Each application must include priorities that meet the requirements of §§ 300.320–300.324.

(Authority: 20 U.S.C. 1414(a)(1)(C)(ii))

§ 300.226 Parent involvement.

Each application must include procedures to ensure that, in meeting the goal under § 300.222, the LEA makes provision for participation of and consultation with parents or guardians of children with disabilities.

(Authority: 20 U.S.C. 1414(a)(1)(C)(iii))

§ 300.227 Participation in regular education programs.

(a) Each application must include procedures to ensure that to the maximum extent practicable, and consistent with §§ 300.550–300.553, the LEA provides special services to enable children with disabilities to participate in regular educational programs.

(b) Each application must describe—(1) The types of alternative placements that are available for children with disabilities; and

(2) The number of children with disabilities within each disability category who are served in each type of placement.

(Authority: 20 U.S.C. 1414(a)(1)(C)(iv))

§ 300.228 [Reserved]

§ 300.229 Excess cost.

Each application must provide assurance satisfactory to the SEA that the LEA uses funds provided under part B of the Act only for costs that exceed the amount computed under § 300.184 and that are directly attributable to the education of children with disabilities.

(Authority: 20 U.S.C. 1414(a)(2)(B))

§ 300.230 Nonsupplanting.

(a) Each application must provide assurance satisfactory to the SEA that the LEA uses funds provided under part B of the Act to supplement and, to the extent practicable, increase the level of State and local funds expended for the education of children with disabilities, and in no case to supplant those State and local funds.

(b) To meet the requirement in paragraph (a) of this section, the total amount or average per capita amount of State and local school funds budgeted by the LEA for expenditures in the current fiscal year for the education of children with disabilities must be at least equal to the total amount or average per capita amount of State and local school funds actually expended for the education of children with disabilities in the most recent preceding fiscal year for which the information is available. Allowance may be made for—

(1) Decreases in enrollment of children with disabilities; and

(2) Unusually large amounts of funds expended for such long-term purposes as the acquisition of equipment and the construction of school facilities.

(Authority: 20 U.S.C. 1414(a)(2)(B))

§ 300.231 Comparable services.

(a) Each application must provide assurance satisfactory to the SEA that the LEA meets the requirements of this section.

(b) An LEA may not use funds under part B of the Act to provide services to children with disabilities unless the LEA uses State and local funds to provide services to those children that, taken as a whole, are at least comparable to services provided to other children with disabilities in that LEA.

(c) Each LEA shall maintain records that show that the LEA meets the requirement in paragraph (b) of this section.

(Authority: 20 U.S.C. 1414(a)(2)(C))

Note: Under the "comparability" requirement, if State and local funds are used to provide certain services, those services must be provided with State and local funds to all children with disabilities in the LEA who need them. Part B funds may then be used to supplement existing services, or to provide additional services to meet special needs. This, of course, is subject to the other requirements of the Act, including the priorities under §§ 300.320–300.324.

§§ 300.232–300.234 [Reserved]

§ 300.235 Individualized education programs.

Each application must include procedures to assure that the LEA complies with §§ 300.340–300.350.

(Authority: 20 U.S.C. 1414(a)(5))

§ 300.236 [Reserved]

§ 300.237 Procedural safeguards.

Each application must provide assurance satisfactory to the SEA that the LEA has procedural safeguards that meet the requirements of §§ 300.500–300.515.

(Authority: 20 U.S.C. 1414(a)(7))

§ 300.238 Use of Part B funds.

Each application must describe how the LEA will use the funds under part B of the Act during the next school year.

(Authority: 20 U.S.C. 1414(a))

§ 300.239 [Reserved]

§ 300.240 Other requirements.

Each local application must include additional procedures and information that the SEA may require in order to meet the State plan requirements of §§ 300.121–300.153.

(Authority: 20 U.S.C. 1414(a)(6))

Application From Secretary of the Interior

§ 300.260 Submission of application; approval.

(a) In order to receive a grant under this part, the Secretary of the Interior shall submit an application that—

(1) Meets the requirements of section 612(1), 612(2)(C)–(E), 612(4), 612(5), 612(6), and 612(7) of the Act (including monitoring and evaluation activities);

(2) Meets the requirements of section 613(a), (2), (3), (4)(B), (5), (6), (7), (10), (11), (12), (13), (14), and (15), 613(b), and 613(e) of the Act;

(3) Meets the requirements of section 614(a)(1)(A)–(B), (2)(A), (C), (3), (4), (5), and (7) of the Act;

(4) Meets the requirements of this part that implement the sections of the Act listed in paragraphs (a)(1)–(3) of this section.

(5) Includes a description of how the Secretary of the Interior will coordinate the provision of services under this part with LEAs, tribes and tribal organizations, and other private and Federal service providers;

(6) Includes an assurance that there are public hearings, adequate notice of such hearings, and an opportunity for comment afforded to members of tribes, tribal governing bodies, and affected

local school boards before the adoption of the policies, programs, and procedures required under paragraphs (a)(1)–(3) of this section;

(7) Includes an assurance that the Secretary of the Interior will provide such information as the Secretary may require to comply with section 618(b)(1) of the Act, including data on the number of children and youth with disabilities served and the types and amounts of services provided and needed;

(8) Includes an assurance that, by October 1, 1992, the Secretaries of the Interior and Health and Human Services will enter into a memorandum of agreement, to be provided to the Secretary, for the coordination of services, resources, and personnel between their respective Federal, State, and local offices and with SEAs and LEAs and other entities to facilitate the provision of services to Indian children with disabilities residing on or near reservations. That agreement must provide for the apportionment of responsibilities and costs, including, but not limited to, those related to child find, evaluation, diagnosis, remediation or therapeutic measures, and (where appropriate) equipment and medical or personal supplies, or both, as needed for a child to remain in school or a program; and

(9) Includes an assurance that the Department of the Interior will cooperate with the Department of Education in the latter's exercise of monitoring and oversight of this application, and any agreements entered into between the Secretary of the Interior and other entities under the Act and will fulfill its duties under the Act.

(b) Sections 300.581–300.585 apply to grants available to the Secretary of the Interior under this part.

(Authority: 20 U.S.C. 1411(f))

§ 300.261 Public participation.

In the development of the application for the Department of the Interior, the Secretary of the Interior shall provide for public participation consistent with §§ 300.280–300.284.

(Authority: 20 U.S.C. 1411(f))

§ 300.262 Use of Part B funds.

(a)(1) The Department of the Interior may use five percent of its payment under § 300.709 in any fiscal year, or $350,000, whichever is greater, for administrative costs in carrying out the provisions of this part.

(2) The remainder of the payments to the Secretary of the Interior under § 300.709 in any fiscal year must be used in accordance with the priorities under §§ 300.320–300.324.

(b) Payments to the Secretary of the Interior under § 300.710 must be used in accordance with that section.

(Authority: 20 U.S.C. 1411(f))

§ 300.263 Applicable regulations.

The Secretary of the Interior shall comply with the requirements of §§ 300.301–300.303, §§ 300.305–300.307, and §§ 300.340–300.347, § 300.350, §§ 300.360–300.383, §§ 300.400–300.402, §§ 300.500–300.585, §§ 300.600–300.621, and §§ 300.660–300.662.

(Authority: 20 U.S.C. 1411(f)(2))

Public Participation

§ 300.280 Public hearings before adopting a State plan.

Prior to its adoption of a State plan, the SEA shall—

(a) Make the plan available to the general public;

(b) Hold public hearings; and

(c) Provide an opportunity for comment by the general public on the plan.

(Authority: 20 U.S.C. 1412(7))

§ 300.281 Notice.

(a) The SEA shall provide notice to the general public of the public hearings.

(b) The notice must be in sufficient detail to inform the general public about—

(1) The purpose and scope of the State plan and its relation to part B of the Act;

(2) The availability of the State plan;

(3) The date, time, and location of each public hearing;

(4) The procedures for submitting written comments about the plan; and

(5) The timetable for developing the final plan and submitting it to the Secretary for approval.

(c) The notice must be published or announced—

(1) In newspapers or other media, or both, with circulation adequate to notify the general public about the hearings; and

(2) Enough in advance of the date of the hearings to afford interested parties throughout the State a reasonable opportunity to participate.

(Authority: 20 U.S.C. 1412(7))

§ 300.282 Opportunity to participate; comment period.

(a) The SEA shall conduct the public hearings at times and places that afford interested parties throughout the State a reasonable opportunity to participate.

(b) The plan must be available for comment for a period of at least 30 days following the date of the notice under § 300.281.

(Authority: 20 U.S.C. 1412(7))

§ 300.283 Review of public comments before adopting plan.

Before adopting its State plan, the SEA shall—

(a) Review and consider all public comments; and

(b) Make any necessary modifications in the plan.

(Authority: 20 U.S.C. 1412(7))

§ 300.284 Publication and availability of approved plan.

After the Secretary approves a State plan, the SEA shall give notice in newspapers or other media, or both, that the plan is approved. The notice must name places throughout the State where the plan is available for access by any interested person.

(Authority: 20 U.S.C. 1412(7))

Subpart C—Services

Free Appropriate Public Education

§ 300.300 Timelines for free appropriate public education.

(a) *General.* Each State shall ensure that FAPE is available to all children with disabilities aged 3 through 18 within the State not later than September 1, 1978, and to all children with disabilities aged 3 through 21 within the State not later than September 1, 1980.

(b) *Age ranges 3–5 and 18–21.* This paragraph provides rules for applying the requirement in paragraph (a) of this section to children with disabilities aged 3, 4, 5, 18, 19, 20, and 21:

(1) If State law or a court order requires the State to provide education for children with disabilities in any disability category in any of these age groups, the State must make FAPE available to all children with disabilities of the same age who have that disability.

(2) If a public agency provides education to nondisabled children in any of these age groups, it must make FAPE available to at least a proportionate number of children with disabilities of the same age.

(3) If a public agency provides education to 50 percent or more of its children with disabilities in any disability category in any of these age groups, it must make FAPE available to all its children with disabilities of the same age who have that disability. This provision does not apply to children aged 3 through 5 for any fiscal year for which the State receives a grant under section 619(a)(1) of the Act.

(4) If a public agency provides education to a child with a disability in any of these age groups, it must make

FAPE available to that child and provide that child and his or her parents all of the rights under Part B of the Act and this part.

(5) A State is not required to make FAPE available to a child with a disability in one of these age groups if—

(i) State law expressly prohibits, or does not authorize, the expenditure of public funds to provide education to nondisabled children in that age group; or

(ii) The requirement is inconsistent with a court order that governs the provision of free public education to children with disabilities in that State.

(c) *Children aged 3 through 21 on reservations.* With the exception of children identified in § 300.709(a)(1) and (2), the SEA shall be responsible for ensuring that all of the requirements of Part B of the Act are implemented for all children aged 3 through 21 on reservations.

(Authority: 20 U.S.C. 1411(f); 1412(2)(B); S. Rep. No. 94–168, p. 19 (1975))

Note 1: The requirement to make FAPE available applies to all children with disabilities within the State who are in the age ranges required under § 300.300 and who need special education and related services. This includes children with disabilities already in school and children with less severe disabilities, who are not covered under the priorities under § 300.321.

Note 2: In order to be in compliance with § 300.300, each State must ensure that the requirement to identify, locate, and evaluate all children with disabilities is fully implemented by public agencies throughout the State. This means that before September 1, 1978, every child who has been referred or is on a waiting list for evaluation (including children in school as well as those not receiving an education) must be evaluated in accordance with §§ 300.530–300.533. If, as a result of the evaluation, it is determined that a child needs special education and related services, an IEP must be developed for the child by September 1, 1978, and all other applicable requirements of this part must be met.

Note 3: The requirement to identify, locate, and evaluate children with disabilities (commonly referred to as the "child find system") was enacted on August 21, 1974, under Pub. L. 93–380. While each State needed time to establish and implement its child find system, the four year period between August 21, 1974, and September 1, 1978, is considered to be sufficient to ensure that the system is fully operational and effective on a State-wide basis.

Under the statute, the age range for the child find requirement (0–21) is greater than the mandated age range for providing FAPE. One reason for the broader age requirement under "child find" is to enable States to be aware of and plan for younger children who will require special education and related services. It also ties in with the full educational opportunity goal requirement that has the same age range as child find. Moreover, while a State is not required to provide FAPE to children with disabilities below the age ranges mandated under § 300.300, the State may, at its discretion, extend services to those children, subject to the priority requirements of §§ 300.320–300.324.

§ 300.301 Free appropriate public education—methods and payments.

(a) Each State may use whatever State, local, Federal, and private sources of support are available in the State to meet the requirements of this part. For example, when it is necessary to place a child with a disability in a residential facility, a State could use joint agreements between the agencies involved for sharing the cost of that placement.

(b) Nothing in this part relieves an insurer or similar third party from an otherwise valid obligation to provide or to pay for services provided to a child with a disability.

(Authority: 20 U.S.C. 1401 (18); 1412(2)(B))

§ 300.302 Residential placement.

If placement in a public or private residential program is necessary to provide special education and related services to a child with a disability, the program, including non-medical care and room and board, must be at no cost to the parents of the child.

(Authority: 20 U.S.C. 1412(2)(B); 1413(a)(4)(B))

Note: This requirement applies to placements that are made by public agencies for educational purposes, and includes placements in State-operated schools for children with disabilities, such as a State school for students with deafness or students with blindness.

§ 300.303 Proper functioning of hearing aids.

Each public agency shall ensure that the hearing aids worn by children with hearing impairments including deafness in school are functioning properly.

(Authority: 20 U.S.C. 1412(2)(B))

Note: The report of the House of Representatives on the 1978 appropriation bill includes the following statement regarding hearing aids:

In its report on the 1976 appropriation bill the Committee expressed concern about the condition of hearing aids worn by children in public schools. A study done at the Committee's direction by the Bureau of Education for the Handicapped reveals that up to one-third of the hearing aids are malfunctioning. Obviously, the Committee expects the Office of Education will ensure that hearing impaired school children are receiving adequate professional assessment, follow-up and services.

(Authority: H. R. Rep. No. 95–381, p. 67 (1977))

§ 300.304 Full educational opportunity goal.

(a) Each SEA shall ensure that each public agency establishes and implements a goal of providing full educational opportunity to all children with disabilities in the area served by the public agency.

(b) Subject to the priority requirements of §§ 300.320–300.324, an SEA or LEA may use Part B funds to provide facilities, personnel, and services necessary to meet the full educational opportunity goal.

(Authority: 20 U.S.C. 1412(2)(A); 1414(a)(1)(C))

Note: In meeting the full educational opportunity goal, the Congress also encouraged LEAs to include artistic and cultural activities in programs supported under this part, subject to the priority requirements of §§ 300.320–300.324. This point is addressed in the following statements from the Senate Report on Public Law 94–142:

The use of the arts as a teaching tool for the handicapped has long been recognized as a viable, effective way not only of teaching special skills, but also of reaching youngsters who had otherwise been unteachable. The Committee envisions that programs under this bill could well include an arts component and, indeed, urges that local educational agencies include the arts in programs for the handicapped funded under this Act. Such a program could cover both appreciation of the arts by the handicapped youngsters, and the utilization of the arts as a teaching tool per se.

Museum settings have often been another effective tool in the teaching of handicapped children. For example, the Brooklyn Museum has been a leader in developing exhibits utilizing the heightened tactile sensory skill of the blind. Therefore, in light of the national policy concerning the use of museums in federally supported education programs enunciated in the Education Amendments of 1974, the Committee also urges local educational agencies to include museums in programs for the handicapped funded under this Act.

(Authority: S. Rep. No. 94–168, p. 13 (1975))

§ 300.305 Program options.

Each public agency shall take steps to ensure that its children with disabilities have available to them the variety of educational programs and services available to nondisabled children in the area served by the agency, including art, music, industrial arts, consumer and homemaking education, and vocational education.

(Authority: 20 U.S.C. 1412(2)(A); 1414(a)(1)(C))

Note: The above list of program options is not exhaustive, and could include any program or activity in which nondisabled students participate.

§ 300.306 Nonacademic services.

(a) Each public agency shall take steps to provide nonacademic and extracurricular services and activities in such manner as is necessary to afford children with disabilities an equal opportunity for participation in those services and activities.

(b) Nonacademic and extracurricular services and activities may include counseling services, athletics, transportation, health services, recreational activities, special interest groups or clubs sponsored by the public agency, referrals to agencies that provide assistance to individuals with disabilities, and employment of students, including both employment by the public agency and assistance in making outside employment available.

(Authority: 20 U.S.C. 1412(2)(A); 1414(a)(1)(C))

§ 300.307 Physical education.

(a) *General.* Physical education services, specially designed if necessary, must be made available to every child with a disability receiving FAPE.

(b) *Regular physical education.* Each child with a disability must be afforded the opportunity to participate in the regular physical education program available to nondisabled children unless—

(1) The child is enrolled full time in a separate facility; or

(2) The child needs specially designed physical education, as prescribed in the child's IEP.

(c) *Special physical education.* If specially designed physical education is prescribed in a child's IEP, the public agency responsible for the education of that child shall provide the services directly, or make arrangements for those services to be provided through other public or private programs.

(d) *Education in separate facilities.* The public agency responsible for the education of a child with a disability who is enrolled in a separate facility shall ensure that the child receives appropriate physical education services in compliance with paragraphs (a) and (c) of this section.

(Authority: 20 U.S.C. 1401(a)(16); 1412(5)(B); 1414(a)(6))

Note: The Report of the House of Representatives on Public Law 94–142 includes the following statement regarding physical education:

Special education as set forth in the Committee bill includes instruction in physical education, which is provided as a matter of course to all non-handicapped children enrolled in public elementary and secondary schools. The Committee is concerned that although these services are available to and required of all children in our school systems, they are often viewed as a luxury for handicapped children.

* * * * *

The Committee expects the Commissioner of Education to take whatever action is necessary to assure that physical education services are available to all handicapped children, and has specifically included physical education within the definition of special education to make clear that the Committee expects such services, specially designed where necessary, to be provided as an integral part of the educational program of every handicapped child.

(Authority: H. R. Rep. No. 94–332, p. 9 (1975))

§ 300.308 Assistive technology.

Each public agency shall ensure that assistive technology devices or assistive technology services, or both, as those terms are defined in §§ 300.5–300.6, are made available to a child with a disability if required as a part of the child's—

(a) Special education under § 300.17;

(b) Related services under § 300.16; or

(c) Supplementary aids and services under § 300.550(b)(2).

(Authority: 20 U.S.C. 1412(2), (5)(B))

Priorities in the Use of Part B Funds

§ 300.320 Definitions of first priority children and second priority children.

For the purposes of §§ 300.321–300.324, the term:

(a) "First priority children" means children with disabilities who—

(1) Are in an age group for which the State must make FAPE available under § 300.300; and

(2) Are not receiving any education.

(b) "Second priority children" means children with disabilities, within each disability category, with the most severe disabilities who are receiving an inadequate education.

(Authority: 20 U.S.C. 1412(3))

Note 1: After September 1, 1978, there should be no second priority children, since States must ensure, as a condition of receiving Part B funds for fiscal year 1979, that all children with disabilities will have FAPE available by that date.

Note 2: The term "free appropriate public education," as defined in § 300.8, means special education and related services that * * * "are provided in conformity with an IEP" * * *.

New first priority children will continue to be found by the State after September 1, 1978 through on-going efforts to identify, locate, and evaluate all children with disabilities.

§ 300.321 Priorities.

(a) Each SEA and LEA shall use funds provided under part B of the Act in the following order of priorities:

(1) To provide FAPE to first priority children, including the identification, location, and evaluation of first priority children.

(2) To provide FAPE to second priority children, including the identification, location, and evaluation of second priority children.

(3) To meet the other requirements of this part.

(b) The requirements of paragraph (a) of this section do not apply to funds that the State uses for administration under § 300.620.

(Authority: 20 U.S.C. 1411 (b)(1)(B), (b)(2)(B), (c)(1)(B), (c)(2)(A)(ii))

Note: SEAs as well as LEAs must use part B funds (except the portion used for State administration) for the priorities. A State may have to set aside a portion of its part B allotment to be able to serve newly identified first priority children.

After September 1, 1978, part B funds may be used—

(1) To continue supporting child identification, location, and evaluation activities;

(2) To provide FAPE to newly identified first priority children;

(3) To meet the full educational opportunity goal required under § 300.304, including employing additional personnel and providing inservice training, in order to increase the level, intensity and quality of services provided to individual children with disabilities; and

(4) To meet the other requirements of part B.

§ 300.322 [Reserved]

§ 300.323 Services to other children.

If a State or an LEA is providing FAPE to all of its first priority children, that State or LEA may use funds provided under part B of the Act—

(a) To provide FAPE to children with disabilities who are not receiving any education and who are in the age groups not covered under § 300.300 in that State; or

(b) To provide FAPE to second priority children; or

(c) Both.

(Authority: 20 U.S.C. 1411 (b)(1)(B), (b)(2)(B), (c)(2)(A)(ii))

§ 300.324 Application of local educational agency to use funds for the second priority.

An LEA may use funds provided under part B of the Act for second priority children, if it provides assurance satisfactory to the SEA in its application (or an amendment to its application)—

(a) That all first priority children have FAPE available to them;

(b) That the LEA has a system for the identification, location, and evaluation of children with disabilities, as described in its application; and

(c) That whenever a first priority child is identified, located, and evaluated, the LEA makes FAPE available to the child.

(Authority: 20 U.S.C. 1411 (b)(1)(B), (c)(1)(B); 1414(a)(1)(C)(ii))

Individualized Education Programs

§ 300.340 Definitions.

(a) As used in this part, the term "individualized education program" means a written statement for a child with a disability that is developed and implemented in accordance with §§ 300.341-300.350.

(b) As used in §§ 300.346 and 300.347, "participating agency" means a State or local agency, other than the public agency responsible for a student's education, that is financially and legally responsible for providing transition services to the student.

(Authority: 20 U.S.C. 1401(a)(20))

§ 300.341 State educational agency responsibility.

(a) *Public agencies.* The SEA shall ensure that each public agency develops and implements an IEP for each of its children with disabilities.

(b) *Private schools and facilities.* The SEA shall ensure that an IEP is developed and implemented for each child with a disability who—

(1) Is placed in or referred to a private school or facility by a public agency; or

(2) Is enrolled in a parochial school or other private school and receives special education or related services from a public agency.

(Authority: 20 U.S.C. 1412 (4), (6); 1413(a)(4))

Note: This section applies to all public agencies, including other State agencies (e.g., departments of mental health and welfare) that provide special education to a child with a disability either directly, by contract or through other arrangements. Thus, if a State welfare agency contracts with a private school or facility to provide special education to a child with a disability, that agency would be responsible for ensuring that an IEP is developed for the child.

§ 300.342 When individualized education programs must be in effect.

(a) At the beginning of each school year, each public agency shall have in effect an IEP for every child with a disability who is receiving special education from that agency.

(b) An IEP must—

(1) Be in effect before special education and related services are provided to a child; and

(2) Be implemented as soon as possible following the meetings under § 300.343.

(Authority: 20 U.S.C. 1412(2)(B), (4), (6); 1414(a)(5); Pub. L. 94-142, sec. 8(c) (1975))

Note: Under paragraph (b)(2) of this section, it is expected that the IEP of a child with a disability will be implemented immediately following the meetings under § 300.343. An exception to this would be (1) when the meetings occur during the summer or a vacation period, or (2) where there are circumstances that require a short delay (e.g., working out transportation arrangements). However, there can be no undue delay in providing special education and related services to the child.

§ 300.343 Meetings.

(a) *General.* Each public agency is responsible for initiating and conducting meetings for the purpose of developing, reviewing, and revising the IEP of a child with a disability (or, if consistent with State policy and at the discretion of the LEA, and with the concurrence of the parents, an individualized family service plan described in section 677(d) of the Act for each child with a disability, aged 3 through 5).

(b) [Reserved]

(c) *Timeline.* A meeting to develop an IEP for a child must be held within 30 calendar days of a determination that the child needs special education and related services.

(d) *Review.* Each public agency shall initiate and conduct meetings to review each child's IEP periodically and, if appropriate, revise its provisions. A meeting must be held for this purpose at least once a year.

(Authority: 20 U.S.C. 1412(2)(B), (4), (6); 1414(a)(5))

Note: The date on which agencies must have IEPs in effect is specified in § 300.342 (the beginning of each school year). However, except for new children with disabilities (i.e., those evaluated and determined to need special education and related services for the first time), the timing of meetings to develop, review, and revise IEPs is left to the discretion of each agency.

In order to have IEPs in effect at the beginning of the school year, agencies could hold meetings either at the end of the preceding school year or during the summer prior to the next school year. Meetings may be held any time throughout the year, as long as IEPs are in effect at the beginning of each school year.

The statute requires agencies to hold a meeting at least once each year in order to review and, if appropriate, revise each child's IEP. The timing of those meetings could be on the anniversary date of the child's last IEP meeting, but this is left to the discretion of the agency.

§ 300.344 Participants in meetings.

(a) *General.* The public agency shall ensure that each meeting includes the following participants:

(1) A representative of the public agency, other than the child's teacher, who is qualified to provide, or supervise the provision of, special education.

(2) The child's teacher.

(3) One or both of the child's parents, subject to § 300.345.

(4) The child, if appropriate.

(5) Other individuals at the discretion of the parent or agency.

(b) *Evaluation personnel.* For a child with a disability who has been evaluated for the first time, the public agency shall ensure—

(1) That a member of the evaluation team participates in the meeting; or

(2) That the representative of the public agency, the child's teacher, or some other person is present at the meeting, who is knowledgeable about the evaluation procedures used with the child and is familiar with the results of the evaluation.

(c) *Transition services participants.* (1) If a purpose of the meeting is the consideration of transition services for a student, the public agency shall invite—

(i) The student; and

(ii) A representative of any other agency that is likely to be responsible for providing or paying for transition services.

(2) If the student does not attend, the public agency shall take other steps to ensure that the student's preferences and interests are considered; and

(3) If an agency invited to send a representative to a meeting does not do so, the public agency shall take other steps to obtain the participation of the other agency in the planning of any transition services.

(Authority: 20 U.S.C. 1401(a)(19), (a)(20); 1412(2)(B), (4), (6); 1414(a)(5))

Note 1: In deciding which teacher will participate in meetings on a child's IEP, the agency may wish to consider the following possibilities:

(a) For a child with a disability who is receiving special education, the teacher could be the child's special education teacher. If the child's disability is a speech impairment, the teacher could be the speech-language pathologist.

(b) For a child with a disability who is being considered for placement in special education, the teacher could be the child's regular teacher, or a teacher qualified to provide education in the type of program in which the child may be placed, or both.

(c) If the child is not in school or has more than one teacher, the agency may designate which teacher will participate in the meeting.

Either the teacher or the agency representative should be qualified in the area of the child's suspected disability.

For a child whose primary disability is a speech or language impairment, the evaluation personnel participating under paragraph (b)(1) of this section would normally be the speech-language pathologist.

Note 2: Under paragraph (c) of this section, the public agency is required to invite each student to participate in his or her IEP

meeting, if a purpose of the meeting is the consideration of transition services for the student. For all students who are 16 years of age or older, one of the purposes of the annual meeting will always be the planning of transition services, since transition services are a required component of the IEP for these students.

For a student younger than age 16, if transition services are initially discussed at a meeting that does not include the student, the public agency is responsible for ensuring that, before a decision about transition services for the student is made, a subsequent IEP meeting is conducted for that purpose, and the student is invited to the meeting.

§ 300.345 Parent participation.

(a) Each public agency shall take steps to ensure that one or both of the parents of the child with a disability are present at each meeting or are afforded the opportunity to participate, including—

(1) Notifying parents of the meeting early enough to ensure that they will have an opportunity to attend; and

(2) Scheduling the meeting at a mutually agreed on time and place.

(b)(1) The notice under paragraph (a)(1) of this section must indicate the purpose, time, and location of the meeting and who will be in attendance;

(2) If a purpose of the meeting is the consideration of transition services for a student, the notice must also—

(i) Indicate this purpose;

(ii) Indicate that the agency will invite the student; and

(iii) Identify any other agency that will be invited to send a representative.

(c) If neither parent can attend, the public agency shall use other methods to ensure parent participation, including individual or conference telephone calls.

(d) A meeting may be conducted without a parent in attendance if the public agency is unable to convince the parents that they should attend. In this case the public agency must have a record of its attempts to arrange a mutually agreed on time and place such as—

(1) Detailed records of telephone calls made or attempted and the results of those calls;

(2) Copies of correspondence sent to the parents and any responses received; and

(3) Detailed records of visits made to the parent's home or place of employment and the results of those visits.

(e) The public agency shall take whatever action is necessary to ensure that the parent understands the proceedings at a meeting, including arranging for an interpreter for parents with deafness or whose native language is other than English.

(f) The public agency shall give the parent, on request, a copy of the IEP.

(Authority: 20 U.S.C. 1401(a)(20); 1412 (2)(B), (4), (6); 1414(a)(5))

Note: The notice in paragraph (a) of this section could also inform parents that they may bring other people to the meeting. As indicated in paragraph (c) of this section, the procedure used to notify parents (whether oral or written or both) is left to the discretion of the agency, but the agency must keep a record of its efforts to contact parents.

§ 300.346 Content of individualized education program.

(a) *General.* The IEP for each child must include—

(1) A statement of the child's present levels of educational performance;

(2) A statement of annual goals, including short-term instructional objectives;

(3) A statement of the specific special education and related services to be provided to the child and the extent that the child will be able to participate in regular educational programs;

(4) The projected dates for initiation of services and the anticipated duration of the services; and

(5) Appropriate objective criteria and evaluation procedures and schedules for determining, on at least an annual basis, whether the short term instructional objectives are being achieved.

(b) *Transition services.* (1) The IEP for each student, beginning no later than age 16 (and at a younger age, if determined appropriate), must include a statement of the needed transition services as defined in § 300.18, including, if appropriate, a statement of each public agency's and each participating agency's responsibilities or linkages, or both, before the student leaves the school setting.

(2) If the IEP team determines that services are not needed in one or more of the areas specified in § 300.18 (b)(2)(i) through (b)(2)(iii), the IEP must include a statement to that effect and the basis upon which the determination was made.

(Authority: 20 U.S.C. 1401 (a)(19), (a)(20); 1412 (2)(B), (4), (6); 1414(a)(5))

Note 1: The legislative history of the transition services provisions of the Act suggests that the statement of needed transition services referred to in paragraph (b) of this section should include a commitment by any participating agency to meet any financial responsibility it may have in the provision of transition services. See House Report No. 101–544, p. 11 (1990).

Note 2: With respect to the provisions of paragraph (b) of this section, it is generally expected that the statement of needed transition services will include the areas listed in § 300.18 (b)(2)(i) through (b)(2)(iii). If the IEP team determines that services are not needed in one of those areas, the public agency must implement the requirements in paragraph (b)(2) of this section. Since it is a part of the IEP, the IEP team must reconsider its determination at least annually.

Note 3: Section 602(a)(20) of the Act provides that IEPs must include a statement of needed transition services for students beginning no later than age 16, but permits transition services to students below age 16 (i.e., "* * * and, when determined appropriate for the individual, beginning at age 14 or younger."). Although the statute does not mandate transition services for all students beginning at age 14 or younger, the provision of these services could have a significantly positive effect on the employment and independent living outcomes for many of these students in the future, especially for students who are likely to drop out before age 16. With respect to the provision of transition services to students below age 16, the Report of the House Committee on Education and Labor on Public Law 101–476 includes the following statement:

> Although this language leaves the final determination of when to initiate transition services for students under age 16 to the IEP process, it nevertheless makes clear that Congress expects consideration to be given to the need for transition services for some students by age 14 or younger. The Committee encourages that approach because of their concern that age 16 may be too late for many students, particularly those at risk of dropping out of school and those with the most severe disabilities. Even for those students who stay in school until age 18, many will need more than two years of transitional services. Students with disabilities are now dropping out of school before age 16, feeling that the education system has little to offer them. Initiating services at a younger age will be critical. (House Report No. 101–544, 10 (1990).)

§ 300.347 Agency responsibilities for transition services.

(a) If a participating agency fails to provide agreed-upon transition services contained in the IEP of a student with a disability, the public agency responsible for the student's education shall, as soon as possible, initiate a meeting for the purpose of identifying alternative strategies to meet the transition objectives and, if necessary, revising the student's IEP.

(b) Nothing in this part relieves any participating agency, including a State vocational rehabilitation agency, of the responsibility to provide or pay for any transition service that the agency would otherwise provide to students with disabilities who meet the eligibility criteria of that agency.

(Authority: 20 U.S.C. 1401 (a)(18), (a)(19), (a)(20); 1412(2)(B))

§ 300.348 Private school placements by public agencies.

(a) *Developing individualized education programs.* (1) Before a public agency places a child with a disability in, or refers a child to, a private school or facility, the agency shall initiate and conduct a meeting to develop an IEP for the child in accordance with § 300.343.

(2) The agency shall ensure that a representative of the private school or facility attends the meeting. If the representative cannot attend, the agency shall use other methods to ensure participation by the private school or facility, including individual or conference telephone calls.

(3) [Reserved]

(b) *Reviewing and revising individualized education programs.* (1) After a child with a disability enters a private school or facility, any meetings to review and revise the child's IEP may be initiated and conducted by the private school or facility at the discretion of the public agency.

(2) If the private school or facility initiates and conducts these meetings, the public agency shall ensure that the parents and an agency representative:

(i) Are involved in any decision about the child's IEP; and

(ii) Agree to any proposed changes in the program before those changes are implemented.

(c) *Responsibility.* Even if a private school or facility implements a child's IEP, responsibility for compliance with this part remains with the public agency and the SEA.

(Authority: 20 U.S.C. 1413(a)(4)(B))

§ 300.349 Children with disabilities in parochial or other private schools.

If a child with a disability is enrolled in a parochial or other private school and receives special education or related services from a public agency, the public agency shall—

(a) Initiate and conduct meetings to develop, review, and revise an IEP for the child, in accordance with § 300.343; and

(b) Ensure that a representative of the parochial or other private school attends each meeting. If the representative cannot attend, the agency shall use other methods to ensure participation by the private school, including individual or conference telephone calls.

(Authority: 20 U.S.C. 1413(a)(4)(A))

§ 300.350 Individualized education program—accountability.

Each public agency must provide special education and related services to a child with a disability in accordance with an IEP. However, Part B of the Act does not require that any agency, teacher, or other person be held accountable if a child does not achieve the growth projected in the annual goals and objectives.

(Authority: 20 U.S.C. 1412(2)(B); 1414(a) (5), (6); Cong. Rec. at H7152 (daily ed., July 21, 1975))

Note: This section is intended to relieve concerns that the IEP constitutes a guarantee by the public agency and the teacher that a child will progress at a specified rate. However, this section does not relieve agencies and teachers from making good faith efforts to assist the child in achieving the goals and objectives listed in the IEP. Further, the section does not limit a parent's right to complain and ask for revisions of the child's program, or to invoke due process procedures, if the parent feels that these efforts are not being made.

Direct Service by the State Educational Agency

§ 300.360 Use of local educational agency allocation for direct services.

(a) An SEA may not distribute funds to an LEA, and shall use those funds to ensure the provision of FAPE to children with disabilities residing in the area served by the LEA, if the LEA, in any fiscal year—

(1) Is entitled to less than $7,500 for that fiscal year (beginning with fiscal year 1979);

(2) Does not submit an application that meets the requirements of §§ 300.220–300.240;

(3) Is unable or unwilling to establish and maintain programs of FAPE;

(4) Is unable or unwilling to be consolidated with other LEAs in order to establish and maintain those programs; or

(5) Has one or more children with disabilities who can best be served by a regional or State center designed to meet the needs of those children.

(b) In meeting the requirements in paragraph (a) of this section, the SEA may provide special education and related services directly, by contract, or through other arrangements.

(c) The excess cost requirements of §§ 300.182–300.186 do not apply to the SEA.

(Authority: 20 U.S.C. 1411(c)(4); 1413(b); 1414(d))

Note: Section 300.360 is a combination of three provisions in the statute (Sections 611(c)(4), 613(b), and 614(d)). This section focuses mainly on the State's administration and use of local entitlements under Part B.

The SEA, as a recipient of Part B funds, is responsible for ensuring that all public agencies in the State comply with the provisions of the Act, regardless of whether they receive Part B funds. If an LEA elects not to apply for its Part B entitlement, the State would be required to use those funds to ensure that FAPE is made available to children residing in the area served by that local agency. However, if the local entitlement is not sufficient for this purpose, additional State or local funds would have to be expended in order to ensure that FAPE and the other requirements of the Act are met.

Moreover, if the LEA is the recipient of any other Federal funds, it would have to be in compliance with 34 CFR §§ 104.31–104.39 of the regulations implementing Section 504 of the Rehabilitation Act of 1973. It should be noted that the term "FAPE" has different meanings under Part B and Section 504. For example, under Part B, FAPE is a statutory term that requires special education and related services to be provided in accordance with an IEP. However, under Section 504, each recipient must provide an education that includes services that are "designed to meet individual educational needs of handicapped persons as adequately as the needs of nonhandicapped persons are met * * *" Those regulations state that implementation of an IEP, in accordance with Part B, is one means of meeting the FAPE requirement.

§ 300.361 Nature and location of services.

The SEA may provide special education and related services under § 300.360(a) in the manner and at the location it considers appropriate. However, the manner in which the education and services are provided must be consistent with the requirements of this part (including the LRE provisions of §§ 300.550–300.556).

(Authority: 20 U.S.C. 1414(d))

§ 300.370 Use of State agency allocations.

(a) The State may use the portion of its allocation that it does not use for administration under §§ 300.620–300.621—

(1) For support services and direct services in accordance with the priority requirements of §§ 300.320–300.324; and

(2) For the administrative costs of the State's monitoring activities and complaint investigations, to the extent that these costs exceed the administrative costs for monitoring and complaint investigations incurred during fiscal year 1985.

(b) For the purposes of paragraph (a) of this section—

(1) "Direct services" means services provided to a child with a disability by the State directly, by contract, or through other arrangements; and

(2) "Support services" includes implementing the comprehensive system of personnel development of §§ 300.380–300.383, recruitment and training of hearing officers and surrogate parents, and public information and parent training activities relating to FAPE for children with disabilities.

(Authority: 20 U.S.C. 1411 (b)(2), (c)(2))

§ 300.371 State matching.

Beginning with the period July 1, 1978-June 30, 1979, and for each following fiscal year, the funds that a State uses for direct and support services under § 300.370 must be matched on a program basis by the State from funds other than Federal funds. This requirement does not apply to funds that the State uses under § 300.360.

(Authority: 20 U.S.C. 1411 (c)(2)(B), (c)(4)(B))

Note: The requirement in § 300.371 would be satisfied if the State can document that the amount of State funds expended for each major program area (e.g., the comprehensive system of personnel development) is at least equal to the expenditure of Federal funds in that program area.

§ 300.372 Applicability of nonsupplanting requirement.

Beginning with funds appropriated for fiscal year 1979 and for each following fiscal year, the requirement in section 613(a)(9) of the Act, which prohibits supplanting with Federal funds, does not apply to funds that the State uses from its allocation under § 300.706(a) for administration, direct services, or support services.

(Authority: 20 U.S.C. 1411(c)(3))

Comprehensive System of Personnel Development

§ 300.380 General.

Each State shall—

(a) Develop and implement a comprehensive system of personnel development that—

(1) Is consistent with the purposes of the Act and with the comprehensive system of personnel development described in 34 CFR § 303.360;

(2) Meets the requirements in §§ 300.381–300.383; and

(3) Is consistent with the provisions on personnel standards in § 300.153; and

(b) Include in its State plan a description of the personnel development system required in paragraph (a)(1) of this section.

(Authority: 20 U.S.C. 1413 (a)(3), (a)(14))

§ 300.381 Adequate supply of qualified personnel.

Each State plan must include a description of the procedures and activities the State will undertake to ensure an adequate supply of qualified personnel (as the term "qualified" is defined at § 300.15), including special education and related services personnel and leadership personnel, necessary to carry out the purposes of this part. The procedures and activities must include the development, updating, and implementation of a plan that—

(a) Addresses current and projected special education and related services personnel needs, including the need for leadership personnel; and

(b) Coordinates and facilitates efforts among SEA and LEAs, institutions of higher education, and professional associations to recruit, prepare, and retain qualified personnel, including personnel from minority backgrounds, and personnel with disabilities.

(Authority: 20 U.S.C. 1413(a)(3)(A))

§ 300.382 Personnel preparation and continuing education.

Each State plan must include a description of the procedures and activities the State will undertake to ensure that all personnel necessary to carry out this part are appropriately and adequately prepared. The procedures and activities must include—

(a) A system for the continuing education of regular and special education and related services personnel to enable these personnel to meet the needs of children with disabilities under this part;

(b) Procedures for acquiring and disseminating to teachers, administrators, and related services personnel significant knowledge derived from education research and other sources; and

(c) Procedures for adopting, if appropriate, promising practices, materials, and technology, proven effective through research and demonstration.

(Authority: 20 U.S.C. 1413(a)(3)(B))

§ 300.383 Data system on personnel and personnel development.

(a) *General.* The procedures and activities required in §§ 300.381 and 300.382 must include the development and maintenance of a system for determining, on an annual basis, the data required in paragraphs (b) and (c) of this section.

(b) *Data on qualified personnel.* (1) The system required by paragraph (a) of this section must enable each State to determine, on an annual basis—

(i) The number and type of personnel, including leadership personnel, employed in the provision of special education and related services, by profession or discipline;

(ii) The number and type of personnel who are employed with emergency, provisional, or temporary certification in each profession or discipline who do not hold appropriate State certification, licensure, or other credentials comparable to certification or licensure for that profession or discipline; and

(iii) The number and type of personnel, including leadership personnel, in each profession or discipline needed, and a projection of the numbers of those personnel that will be needed in five years, based on projections of individuals to be served, retirement and other departures of personnel from the field, and other relevant factors.

(2) The data on special education and related services personnel required in paragraph (b)(1) of this section must include audiologists, counselors, diagnostic and evaluation personnel, home-hospital teachers, interpreters for students with hearing impairments including deafness, occupational therapists, physical education teachers, physical therapists, psychologists, rehabilitation counselors, social workers, speech-language pathologists, teacher aides, recreation and therapeutic recreation specialists, vocational education teachers, work-study coordinators, and other instructional and noninstructional staff.

(3) The data on leadership personnel required by paragraph (b)(1) of this section must include administrators and supervisors of State or local agencies who are involved in the provision or supervision of services or activities necessary to carry out the purposes of this part.

(c) *Data on personnel development.* The system required in paragraph (a) of this section must enable each State to determine, on an annual basis, the institutions of higher education within the State that are preparing special education and related services personnel, including leadership personnel, by area of specialization, including—

(1) The numbers of students enrolled in programs for the preparation of special education and related services personnel administered by these institutions of higher education; and

(2) The numbers of students who graduated during the past year with certification or licensure, or with credentials to qualify for certification or licensure, from programs for the preparation of special education and related services personnel administered by institutions of higher education.

(Authority: 20 U.S.C. 1413(a)(3)(A))

§§ 300.384–300.387 [Reserved].

Subpart D—Private Schools

Children With Disabilities in Private Schools Placed or Referred by Public Agencies

§ 300.400 Applicability of §§ 300.400–300.402.

Sections 300.401–300.402 apply only to children with disabilities who are or have been placed in or referred to a

private school or facility by a public agency as a means of providing special education and related services.

(Authority: 20 U.S.C. 1413(a)(4)(B))

§ 300.401 Responsibility of State educational agency.

Each SEA shall ensure that a child with a disability who is placed in or referred to a private school or facility by a public agency:

(a) Is provided special education and related services—

(1) In conformance with an IEP that meets the requirements of §§ 300.340–300.350;

(2) At no cost to the parents; and

(3) At a school or facility that meets the standards that apply to the SEA and LEAs (including the requirements of this part); and

(b) Has all of the rights of a child with a disability who is served by a public agency.

(Authority: 20 U.S.C. 1413(a)(4)(B))

§ 300.402 Implementation by State educational agency.

In implementing § 300.401, the SEA shall—

(a) Monitor compliance through procedures such as written reports, on-site visits, and parent questionnaires;

(b) Disseminate copies of applicable standards to each private school and facility to which a public agency has referred or placed a child with a disability; and

(c) Provide an opportunity for those private schools and facilities to participate in the development and revision of State standards that apply to them.

(Authority: 20 U.S.C. 1413(a)(4)(B))

§ 300.403 Placement of children by parents.

(a) If a child with a disability has FAPE available and the parents choose to place the child in a private school or facility, the public agency is not required by this part to pay for the child's education at the private school or facility. However, the public agency shall make services available to the child as provided under §§ 300.450–300.452.

(b) Disagreements between a parent and a public agency regarding the availability of a program appropriate for the child, and the question of financial responsibility, are subject to the due process procedures of §§ 300.500–300.515.

(Authority: 20 U.S.C. 1412(2)(B); 1415)

Children With Disabilities Enrolled by Their Parents in Private Schools

§ 300.450 Definition of "private school children with disabilities."

As used in this part, "private school children with disabilities" means children with disabilities enrolled by their parents in private schools or facilities other than children with disabilities covered under §§ 300.400–300.402.

(Authority: 20 U.S.C. 1413(a)(4)(A))

§ 300.451 State educational agency responsibility.

The SEA shall ensure that—

(a) To the extent consistent with their number and location in the State, provision is made for the participation of private school children with disabilities in the program assisted or carried out under this part by providing them with special education and related services; and

(b) The requirements of 34 CFR §§ 76.651–76.662 are met.

(Authority: 20 U.S.C. 1413(a)(4)(A))

§ 300.452 Local educational agency responsibility.

Each LEA shall provide special education and related services designed to meet the needs of private school children with disabilities residing in the jurisdiction of the agency.

(Authority: 20 U.S.C. 1413(a)(4)(A); 1414(a)(6))

Procedures for By-Pass

§ 300.480 By-pass—general.

(a) The Secretary implements a by-pass if an SEA is, and was on December 2, 1983, prohibited by law from providing for the participation of private school children with disabilities in the program assisted or carried out under this part, as required by section 613(a)(4)(A) of the Act and by §§ 300.451–300.452.

(b) The Secretary waives the requirement of section 613(a)(4)(A) of the Act and of §§ 300.451–300.452 if the Secretary implements a by-pass.

(Authority: 20 U.S.C. 1413(d)(1))

§ 300.481 Provisions for services under a by-pass.

(a) Before implementing a by-pass, the Secretary consults with appropriate public and private school officials, including SEA officials, in the affected State to consider matters such as—

(1) The prohibition imposed by State law that results in the need for a by-pass;

(2) The scope and nature of the services required by private school children with disabilities in the State, and the number of children to be served under the by-pass; and

(3) The establishment of policies and procedures to ensure that private school children with disabilities receive services consistent with the requirements of section 613(a)(4)(A) of the Act, §§ 300.451–300.452, and 34 CFR §§ 76.651–76.662.

(b) After determining that a by-pass is required, the Secretary arranges for the provision of services to private school children with disabilities in the State in a manner consistent with the requirements of section 613(a)(4)(A) of the Act and §§ 300.451–300.452 by providing services through one or more agreements with appropriate parties.

(c) For any fiscal year that a by-pass is implemented, the Secretary determines the maximum amount to be paid to the providers of services by multiplying—

(1) A per child amount that may not exceed the amount per child provided by the Secretary under this part for all children with disabilities in the State for the preceding fiscal year; by

(2) The number of private school children with disabilities (as defined by §§ 300.7(a) and 300.450) in the State, as determined by the Secretary on the basis of the most recent satisfactory data available, which may include an estimate of the number of those children with disabilities.

(d) The Secretary deducts from the State's allocation under this part the amount the Secretary determines is necessary to implement a by-pass and pays that amount to the provider of services. The Secretary may withhold this amount from the State's allocation pending final resolution of any investigation or complaint that could result in a determination that a by-pass must be implemented.

(Authority: 20 U.S.C. 1413(d)(2))

Due Process Procedures

Source: Sections 300.482 through 300.486 appear at 49 FR 48526, Dec. 12, 1984, unless otherwise noted.

§ 300.482 Notice of intent to implement a by-pass.

(a) Before taking any final action to implement a by-pass, the Secretary provides the affected SEA with written notice.

(b) In the written notice, the Secretary—

(1) States the reasons for the proposed by-pass in sufficient detail to allow the SEA to respond; and

(2) Advises the SEA that it has a specific period of time (at least 45 days) from receipt of the written notice to

submit written objections to the proposed by-pass and that it may request in writing the opportunity for a hearing to show cause why a by-pass should not be implemented.

(c) The Secretary sends the notice to the SEA by certified mail with return receipt requested.

(Authority: 20 U.S.C. 1413(d)(3)(A))

§ 300.483 Request to show cause.

An SEA seeking an opportunity to show cause why a by-pass should not be implemented shall submit a written request for a show cause hearing to the Secretary.

(Authority: 20 U.S.C. 1413(d)(3)(A))

§ 300.484 Show cause hearing.

(a) If a show cause hearing is requested, the Secretary—

(1) Notifies the SEA and other appropriate public and private school officials of the time and place for the hearing; and

(2) Designates a person to conduct the show cause hearing. The designee must not have had any responsibility for the matter brought for a hearing.

(b) At the show cause hearing, the designee considers matters such as—

(1) The necessity for implementing a by-pass;

(2) Possible factual errors in the written notice of intent to implement a by-pass; and

(3) The objections raised by public and private school representatives.

(c) The designee may regulate the course of the proceedings and the conduct of parties during the pendency of the proceedings. The designee takes all steps necessary to conduct a fair and impartial proceeding, to avoid delay, and to maintain order.

(d) The designee may interpret applicable statutes and regulations, but may not waive them or rule on their validity.

(e) The designee arranges for the preparation, retention, and, if appropriate, dissemination of the record of the hearing.

(Authority: 20 U.S.C. 1413(d)(3)(A))

§ 300.485 Decision.

(a) The designee who conducts the show cause hearing—

(1) Issues a written decision that includes a statement of findings; and

(2) Submits a copy of the decision to the Secretary and sends a copy to each party by certified mail with return receipt requested.

(b) Each party may submit comments and recommendations on the designee's decision to the Secretary within 15 days of the date the party receives the designee's decision.

(c) The Secretary adopts, reverses, or modifies the designee's decision and notifies the SEA of the Secretary's final action. That notice is sent by certified mail with return receipt requested.

(Authority: 20 U.S.C. 1413(d)(3)(A))

§ 300.486 Judicial review.

If dissatisfied with the Secretary's final action, the SEA may, within 60 days after notice of that action, file a petition for review with the United States court of appeals for the circuit in which the State is located. The procedures for judicial review are described in section 613(d)(3)(B)–(D) of the Act.

(Authority: 20 U.S.C. 1413(d)(3)(B)–(D))

Subpart E—Procedural Safeguards

Due Process Procedures for Parents and Children

§ 300.500 Definitions of "consent," "evaluation," and "personally identifiable."

(a) As used in this part: "Consent" means that—

(1) The parent has been fully informed of all information relevant to the activity for which consent is sought, in his or her native language, or other mode of communication;

(2) The parent understands and agrees in writing to the carrying out of the activity for which his or her consent is sought, and the consent describes that activity and lists the records (if any) that will be released and to whom; and

(3) The parent understands that the granting of consent is voluntary on the part of the parent and may be revoked at any time.

(b) "Evaluation" means procedures used in accordance with §§ 300.530–300.534 to determine whether a child has a disability and the nature and extent of the special education and related services that the child needs. The term means procedures used selectively with an individual child and does not include basic tests administered to or procedures used with all children in a school, grade, or class.

(c) "Personally identifiable" means that information includes—

(1) The name of the child, the child's parent, or other family member;

(2) The address of the child;

(3) A personal identifier, such as the child's social security number or student number; or

(4) A list of personal characteristics or other information that would make it possible to identify the child with reasonable certainty.

(Authority: 20 U.S.C. 1415, 1417(c))

§ 300.501 General responsibility of public agencies.

Each SEA shall ensure that each public agency establishes and implements procedural safeguards that meet the requirements of §§ 300.500–300.515.

(Authority: 20 U.S.C. 1415(a))

§ 300.502 Opportunity to examine records.

The parents of a child with a disability shall be afforded, in accordance with the procedures of §§ 300.562–300.569, an opportunity to inspect and review all education records with respect to—

(a) The identification, evaluation, and educational placement of the child; and

(b) The provision of FAPE to the child.

(Authority: 20 U.S.C. 1415(b)(1)(A))

§ 300.503 Independent educational evaluation.

(a) *General.* (1) The parents of a child with a disability have the right under this part to obtain an independent educational evaluation of the child, subject to paragraphs (b) through (e) of this section.

(2) Each public agency shall provide to parents, on request, information about where an independent educational evaluation may be obtained.

(3) For the purposes of this part:

(i) "Independent educational evaluation" means an evaluation conducted by a qualified examiner who is not employed by the public agency responsible for the education of the child in question.

(ii) "Public expense" means that the public agency either pays for the full cost of the evaluation or ensures that the evaluation is otherwise provided at no cost to the parent, consistent with § 300.301.

(b) *Parent right to evaluation at public expense.* A parent has the right to an independent educational evaluation at public expense if the parent disagrees with an evaluation obtained by the public agency. However, the public agency may initiate a hearing under § 300.506 to show that its evaluation is appropriate. If the final decision is that the evaluation is appropriate, the parent still has the right to an independent educational evaluation, but not at public expense.

(c) *Parent initiated evaluations.* If the parent obtains an independent educational evaluation at private expense, the results of the evaluation—

(1) Must be considered by the public agency in any decision made with respect to the provision of FAPE to the child; and

(2) May be presented as evidence at a hearing under this subpart regarding that child.

(d) *Requests for evaluations by hearing officers.* If a hearing officer requests an independent educational evaluation as part of a hearing, the cost of the evaluation must be at public expense.

(e) *Agency criteria.* Whenever an independent evaluation is at public expense, the criteria under which the evaluation is obtained, including the location of the evaluation and the qualifications of the examiner, must be the same as the criteria which the public agency uses when it initiates an evaluation.

(Authority: 20 U.S.C. 1415(b)(1)(A))

§ 300.504 Prior notice; parent consent.

(a) *Notice.* Written notice that meets the requirements of § 300.505 must be given to the parents of a child with a disability a reasonable time before the public agency—

(1) Proposes to initiate or change the identification, evaluation, or educational placement of the child or the provision of FAPE to the child; or

(2) Refuses to initiate or change the identification, evaluation, or educational placement of the child or the provision of FAPE to the child.

(b) *Consent; procedures if a parent refuses consent.* (1) Parental consent must be obtained before—

(i) Conducting a preplacement evaluation; and

(ii) Initial placement of a child with a disability in a program providing special education and related services.

(2) If State law requires parental consent before a child with a disability is evaluated or initially provided special education and related services, State procedures govern the public agency in overriding a parent's refusal to consent.

(3) If there is no State law requiring consent before a child with a disability is evaluated or initially provided special education and related services, the public agency may use the hearing procedures in §§ 300.506–300.508 to determine if the child may be evaluated or initially provided special education and related services without parental consent. If it does so and the hearing officer upholds the agency, the agency may evaluate or initially provide special education and related services to the child without the parent's consent, subject to the parent's rights under §§ 300.510–300.513.

(c) *Additional State consent requirements.* In addition to the parental consent requirements described in paragraph (b) of this section, a State may require parental consent for other services and activities under this part if it ensures that each public agency in the State establishes and implements effective procedures to ensure that a parent's refusal to consent does not result in a failure to provide the child with FAPE.

(d) *Limitation.* A public agency may not require parental consent as a condition of any benefit to the parent or the child except for the service or activity for which consent is required under paragraphs (b) or (c) of this section.

(Authority: 20 U.S.C. 1415(b)(1)(C), (D); 1412(2), (6))

Note 1: Any changes in a child's special education program after the initial placement are not subject to the parental consent requirements in paragraph (b)(1) of this section, but are subject to the prior notice requirement in paragraph (a) of this section and the IEP requirements of §§ 300.340–300.350.

Note 2: Paragraph (b)(2) of this section means that if State law requires parental consent before evaluation or before special education and related services are initially provided, and the parent refuses (or otherwise withholds) consent, State procedures, such as obtaining a court order authorizing the public agency to conduct the evaluation or provide the education and related services, must be followed.

If, however, there is no legal requirement for consent outside of these regulations, the public agency may use the due process procedures of §§ 300.506–300.508 to obtain a decision to allow the evaluation or services without parental consent. The agency must notify the parent of its actions, and the parent has appeal rights as well as rights at the hearing itself.

Note 3: If a State adopts a consent requirement in addition to those described in paragraph (b) of this section and consent is refused, paragraph (d) of this section requires that the public agency must nevertheless provide the services and activities that are not in dispute. For example, if a State requires parental consent to the provision of all services identified in an IEP and the parent refuses to consent to physical therapy services included in the IEP, the agency is not relieved of its obligation to implement those portions of the IEP to which the parent consents.

If the parent refuses to consent and the public agency determines that the service or activity in dispute is necessary to provide FAPE to the child, paragraph (c) of this section requires that the agency must implement its procedures to override the refusal. This section does not preclude the agency from reconsidering its proposal if it believes that circumstances warrant.

§ 300.505 Content of notice.

(a) The notice under § 300.504 must include—

(1) A full explanation of all of the procedural safeguards available to the parents under § 300.500, §§ 300.502–300.515, and §§ 300.562–300.569;

(2) A description of the action proposed or refused by the agency, an explanation of why the agency proposes or refuses to take the action, and a description of any options the agency considered and the reasons why those options were rejected;

(3) A description of each evaluation procedure, test, record, or report the agency uses as a basis for the proposal or refusal; and

(4) A description of any other factors that are relevant to the agency's proposal or refusal.

(b) The notice must be—

(1) Written in language understandable to the general public; and

(2) Provided in the native language of the parent or other mode of communication used by the parent, unless it is clearly not feasible to do so.

(c) If the native language or other mode of communication of the parent is not a written language, the SEA or LEA shall take steps to ensure—

(1) That the notice is translated orally or by other means to the parent in his or her native language or other mode of communication;

(2) That the parent understands the content of the notice; and

(3) That there is written evidence that the requirements in paragraphs (c)(1) and (2) of this section have been met.

(Authority: 20 U.S.C. 1415(b)(1)(D))

§ 300.506 Impartial due process hearing.

(a) A parent or a public educational agency may initiate a hearing on any of the matters described in § 300.504(a)(1) and (2).

(b) The hearing must be conducted by the SEA or the public agency directly responsible for the education of the child, as determined under State statute, State regulation, or a written policy of the SEA.

(c) The public agency shall inform the parent of any free or low-cost legal and other relevant services available in the area if—

(1) The parent requests the information; or

(2) The parent or the agency initiates a hearing under this section.

(Authority: 20 U.S.C. 1415(b)(2))

Note: Many States have pointed to the success of using mediation as an intervening step prior to conducting a formal due process hearing. Although the process of mediation is not required by the statute or these regulations, an agency may wish to suggest mediation in disputes concerning the identification, evaluation, and educational placement of children with disabilities, and

the provision of FAPE to those children. Mediations have been conducted by members of SEAs or LEA personnel who were not previously involved in the particular case. In many cases, mediation leads to resolution of differences between parents and agencies without the development of an adversarial relationship and with minimal emotional stress. However, mediation may not be used to deny or delay a parent's rights under §§ 300.500–300.515.

§ 300.507 Impartial hearing officer.

(a) A hearing may not be conducted—

(1) By a person who is an employee of a public agency that is involved in the education or care of the child; or

(2) By any person having a personal or professional interest that would conflict with his or her objectivity in the hearing.

(b) A person who otherwise qualifies to conduct a hearing under paragraph (a) of this section is not an employee of the agency solely because he or she is paid by the agency to serve as a hearing officer.

(c) Each public agency shall keep a list of the persons who serve as hearing officers. The list must include a statement of the qualifications of each of those persons.

(Authority: 20 U.S.C. 1414(b)(2))

§ 300.508 Hearing rights.

(a) Any party to a hearing has the right to:

(1) Be accompanied and advised by counsel and by individuals with special knowledge or training with respect to the problems of children with disabilities.

(2) Present evidence and confront, cross-examine, and compel the attendance of witnesses.

(3) Prohibit the introduction of any evidence at the hearing that has not been disclosed to that party at least five days before the hearing.

(4) Obtain a written or electronic verbatim record of the hearing.

(5) Obtain written findings of fact and decisions. The public agency, after deleting any personally identifiable information, shall—

(i) Transmit those findings and decisions to the State advisory panel established under § 300.650; and

(ii) Make those findings and decisions available to the public.

(b) Parents involved in hearings must be given the right to—

(1) Have the child who is the subject of the hearing present; and

(2) Open the hearing to the public.

(Authority: 20 U.S.C. 1415(d))

§ 300.509 Hearing decision; appeal.

A decision made in a hearing conducted under § 300.506 is final, unless a party to the hearing appeals the decision under § 300.510 or § 300.511.

(Authority: 20 U.S.C. 1415(c))

§ 300.510 Administrative appeal; impartial review.

(a) If the hearing is conducted by a public agency other than the SEA, any party aggrieved by the findings and decision in the hearing may appeal to the SEA.

(b) If there is an appeal, the SEA shall conduct an impartial review of the hearing. The official conducting the review shall:

(1) Examine the entire hearing record.

(2) Ensure that the procedures at the hearing were consistent with the requirements of due process.

(3) Seek additional evidence if necessary. If a hearing is held to receive additional evidence, the rights in 300.508 apply.

(4) Afford the parties an opportunity for oral or written argument, or both, at the discretion of the reviewing official.

(5) Make an independent decision on completion of the review.

(6) Give a copy of written findings and the decision to the parties.

(c) The SEA, after deleting any personally identifiable information, shall—

(1) Transmit the findings and decisions referred to in paragraph (b)(6) of this section to the State advisory panel established under § 300.650; and

(2) Make those findings and decisions available to the public.

(d) The decision made by the reviewing official is final unless a party brings a civil action under § 300.511.

(Authority: 20 U.S.C. 1415(c), (d); H. R. Rep. No. 94–664, at p. 49 (1975))

Note 1: The SEA may conduct its review either directly or through another State agency acting on its behalf. However, the SEA remains responsible for the final decision on review.

Note 2: All parties have the right to continue to be represented by counsel at the State administrative review level, whether or not the reviewing official determines that a further hearing is necessary. If the reviewing official decides to hold a hearing to receive additional evidence, the other rights in § 300.508 relating to hearings also apply.

§ 300.511 Civil action.

Any party aggrieved by the findings and decision made in a hearing who does not have the right to appeal under § 300.510, and any party aggrieved by the decision of a reviewing officer under § 300.510, has the right to bring a civil action under section 615(e)(2) of the Act.

(Authority: 20 U.S.C. 1415)

§ 300.512 Timelines and convenience of hearings and reviews.

(a) The public agency shall ensure that not later than 45 days after the receipt of a request for a hearing—

(1) A final decision is reached in the hearing; and

(2) A copy of the decision is mailed to each of the parties.

(b) The SEA shall ensure that not later than 30 days after the receipt of a request for a review—

(1) A final decision is reached in the review; and

(2) A copy of the decision is mailed to each of the parties.

(c) A hearing or reviewing officer may grant specific extensions of time beyond the periods set out in paragraphs (a) and (b) of this section at the request of either party.

(d) Each hearing and each review involving oral arguments must be conducted at a time and place that is reasonably convenient to the parents and child involved.

(Authority: 20 U.S.C. 1415)

§ 300.513 Child's status during proceedings.

(a) During the pendency of any administrative or judicial proceeding regarding a complaint, unless the public agency and the parents of the child agree otherwise, the child involved in the complaint must remain in his or her present educational placement.

(b) If the complaint involves an application for initial admission to public school, the child, with the consent of the parents, must be placed in the public school program until the completion of all the proceedings.

(Authority: 20 U.S.C. 1415(e)(3))

Note: Section 300.513 does not permit a child's placement to be changed during a complaint proceeding, unless the parents and agency agree otherwise. While the placement may not be changed, this does not preclude the agency from using its normal procedures for dealing with children who are endangering themselves or others.

§ 300.514 Surrogate parents.

(a) *General.* Each public agency shall ensure that the rights of a child are protected when—

(1) No parent (as defined in § 300.13) can be identified;

(2) The public agency, after reasonable efforts, cannot discover the whereabouts of a parent; or

(3) The child is a ward of the State under the laws of that State.

(b) *Duty of public agency.* The duty of a public agency under paragraph (a) of this section includes the assignment of an individual to act as a surrogate for

the parents. This must include a method: (1) For determining whether a child needs a surrogate parent, and (2) for assigning a surrogate parent to the child.

(c) *Criteria for selection of surrogates.* (1) The public agency may select a surrogate parent in any way permitted under State law.

(2) Public agencies shall ensure that a person selected as a surrogate—

(i) Has no interest that conflicts with the interest of the child he or she represents; and

(ii) Has knowledge and skills that ensure adequate representation of the child.

(d) *Non-employee requirement; compensation.* (1) A person assigned as a surrogate may not be an employee of a public agency that is involved in the education or care of the child.

(2) A person who otherwise qualifies to be a surrogate parent under paragraphs (c) and (d)(1) of this section, is not an employee of the agency solely because he or she is paid by the agency to serve as a surrogate parent.

(e) *Responsibilities.* The surrogate parent may represent the child in all matters relating to—

(1) The identification, evaluation, and educational placement of the child; and

(2) The provision of FAPE to the child.

(Authority: 20 U.S.C. 1415(b)(1)(B))

§ 300.515 Attorneys' fees.

Each public agency shall inform parents that in any action or proceeding under section 615 of the Act, courts may award parents reasonable attorneys' fees under the circumstances described in section 615(e)(4) of the Act.

(Authority: 20 U.S.C. 1415(b)(1)(D); 1415(e)(4))

Protection in Evaluation Procedures

§ 300.530 General.

(a) Each SEA shall ensure that each public agency establishes and implements procedures that meet the requirements of §§ 300.530–300.534.

(b) Testing and evaluation materials and procedures used for the purposes of evaluation and placement of children with disabilities must be selected and administered so as not to be racially or culturally discriminatory.

(Authority: 20 U.S.C. 1412(5)(C))

§ 300.531 Preplacement evaluation.

Before any action is taken with respect to the initial placement of a child with a disability in a program providing special education and related services, a full and individual evaluation of the child's educational needs must be conducted in accordance with the requirements of § 300.532.

(Authority: 20 U.S.C. 1412(5)(C))

§ 300.532 Evaluation procedures.

State educational agencies and LEAs shall ensure, at a minimum, that:

(a) Tests and other evaluation materials—

(1) Are provided and administered in the child's native language or other mode of communication, unless it is clearly not feasible to do so;

(2) Have been validated for the specific purpose for which they are used; and

(3) Are administered by trained personnel in conformance with the instructions provided by their producer.

(b) Tests and other evaluation materials include those tailored to assess specific areas of educational need and not merely those that are designed to provide a single general intelligence quotient.

(c) Tests are selected and administered so as best to ensure that when a test is administered to a child with impaired sensory, manual, or speaking skills, the test results accurately reflect the child's aptitude or achievement level or whatever other factors the test purports to measure, rather than reflecting the child's impaired sensory, manual, or speaking skills (except where those skills are the factors that the test purports to measure).

(d) No single procedure is used as the sole criterion for determining an appropriate educational program for a child.

(e) The evaluation is made by a multidisciplinary team or group of persons, including at least one teacher or other specialist with knowledge in the area of suspected disability.

(f) The child is assessed in all areas related to the suspected disability, including, if appropriate, health, vision, hearing, social and emotional status, general intelligence, academic performance, communicative status, and motor abilities.

(Authority: 20 U.S.C. 1412(5)(C))

Note: Children who have a speech or language impairment as their primary disability may not need a complete battery of assessments (e.g., psychological, physical, or adaptive behavior). However, a qualified speech-language pathologist would: (1) Evaluate each child with a speech or language impairment using procedures that are appropriate for the diagnosis and appraisal of speech and language impairments, and (2) if necessary, make referrals for additional assessments needed to make an appropriate placement decision.

§ 300.533 Placement procedures.

(a) In interpreting evaluation data and in making placement decisions, each public agency shall—

(1) Draw upon information from a variety of sources, including aptitude and achievement tests, teacher recommendations, physical condition, social or cultural background, and adaptive behavior;

(2) Ensure that information obtained from all of these sources is documented and carefully considered;

(3) Ensure that the placement decision is made by a group of persons, including persons knowledgeable about the child, the meaning of the evaluation data, and the placement options; and

(4) Ensure that the placement decision is made in conformity with the LRE rules in §§ 300.550–300.554.

(b) If a determination is made that a child has a disability and needs special education and related services, an IEP must be developed for the child in accordance with §§ 300.340–300.350.

(Authority: 20 U.S.C. 1412(5)(C); 1414(a)(5))

Note: Paragraph (a)(1) of this section includes a list of examples of sources that may be used by a public agency in making placement decisions. The agency would not have to use all the sources in every instance. The point of the requirement is to ensure that more than one source is used in interpreting evaluation data and in making placement decisions. For example, while all of the named sources would have to be used for a child whose suspected disability is mental retardation, they would not be necessary for certain other children with disabilities, such as a child who has a severe articulation impairment as his primary disability. For such a child, the speech-language pathologist, in complying with the multiple source requirement, might use: (1) A standardized test of articulation, and (2) observation of the child's articulation behavior in conversational speech.

§ 300.534 Reevaluation.

Each SEA and LEA shall ensure—

(a) That the IEP of each child with a disability is reviewed in accordance with §§ 300.340–300.350; and

(b) That an evaluation of the child, based on procedures that meet the requirements of § 300.532, is conducted every three years, or more frequently if conditions warrant, or if the child's parent or teacher requests an evaluation.

(Authority: 20 U.S.C. 1412(5)(c))

Additional Procedures for Evaluating Children With Specific Learning Disabilities

§ 300.540 Additional team members.

In evaluating a child suspected of having a specific learning disability, in addition to the requirements of § 300.532, each public agency shall include on the multidisciplinary evaluation team—

(a)(1) The child's regular teacher; or
(2) If the child does not have a regular teacher, a regular classroom teacher qualified to teach a child of his or her age; or
(3) For a child of less than school age, an individual qualified by the SEA to teach a child of his or her age; and
(b) At least one person qualified to conduct individual diagnostic examinations of children, such as a school psychologist, speech-language pathologist, or remedial reading teacher.

(Authority: 20 U.S.C. 1411 note)

§ 300.541 Criteria for determining the existence of a specific learning disability.

(a) A team may determine that a child has a specific learning disability if—
(1) The child does not achieve commensurate with his or her age and ability levels in one or more of the areas listed in paragraph (a)(2) of this section, when provided with learning experiences appropriate for the child's age and ability levels; and
(2) The team finds that a child has a severe discrepancy between achievement and intellectual ability in one or more of the following areas—
(i) Oral expression;
(ii) Listening comprehension;
(iii) Written expression;
(iv) Basic reading skill;
(v) Reading comprehension;
(vi) Mathematics calculation; or
(vii) Mathematics reasoning.
(b) The team may not identify a child as having a specific learning disability if the severe discrepancy between ability and achievement is primarily the result of—
(1) A visual, hearing, or motor impairment;
(2) Mental retardation;
(3) Emotional disturbance; or
(4) Environmental, cultural or economic disadvantage.

(Authority: 20 U.S.C. 1411 note)

§ 300.542 Observation.

(a) At least one team member other than the child's regular teacher shall observe the child's academic performance in the regular classroom setting.
(b) In the case of a child of less than school age or out of school, a team member shall observe the child in an environment appropriate for a child of that age.

(Authority: 20 U.S.C. 1411 note)

§ 300.543 Written report.

(a) The team shall prepare a written report of the results of the evaluation.
(b) The report must include a statement of—
(1) Whether the child has a specific learning disability;
(2) The basis for making the determination;
(3) The relevant behavior noted during the observation of the child;
(4) The relationship of that behavior to the child's academic functioning;
(5) The educationally relevant medical findings, if any;
(6) Whether there is a severe discrepancy between achievement and ability that is not correctable without special education and related services; and
(7) The determination of the team concerning the effects of environmental, cultural, or economic disadvantage.
(c) Each team member shall certify in writing whether the report reflects his or her conclusion. If it does not reflect his or her conclusion, the team member must submit a separate statement presenting his or her conclusions.

(Authority: 20 U.S.C. 1411 note)

Least Restrictive Environment

§ 300.550 General.

(a) Each SEA shall ensure that each public agency establishes and implements procedures that meet the requirements of §§ 300.550–300.556.
(b) Each public agency shall ensure—
(1) That to the maximum extent appropriate, children with disabilities, including children in public or private institutions or other care facilities, are educated with children who are nondisabled; and
(2) That special classes, separate schooling or other removal of children with disabilities from the regular educational environment occurs only when the nature or severity of the disability is such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily.

(Authority: 20 U.S.C. 1412(5)(B); 1414(a)(1)(C)(iv))

§ 300.551 Continuum of alternative placements.

(a) Each public agency shall ensure that a continuum of alternative placements is available to meet the needs of children with disabilities for special education and related services.
(b) The continuum required in paragraph (a) of this section must—
(1) Include the alternative placements listed in the definition of special education under § 300.17 (instruction in regular classes, special classes, special schools, home instruction, and instruction in hospitals and institutions); and
(2) Make provision for supplementary services (such as resource room or itinerant instruction) to be provided in conjunction with regular class placement.

(Authority: 20 U.S.C. 1412(5)(B))

§ 300.552 Placements.

Each public agency shall ensure that:
(a) The educational placement of each child with a disability—
(1) Is determined at least annually;
(2) Is based on his or her IEP; and
(3) Is as close as possible to the child's home.
(b) The various alternative placements included at § 300.551 are available to the extent necessary to implement the IEP for each child with a disability.
(c) Unless the IEP of a child with a disability requires some other arrangement, the child is educated in the school that he or she would attend if nondisabled.
(d) In selecting the LRE, consideration is given to any potential harmful effect on the child or on the quality of services that he or she needs.

(Authority: 20 U.S.C. 1412(5)(B))

Note: Section 300.552 includes some of the main factors that must be considered in determining the extent to which a child with a disability can be educated with children who are nondisabled. The overriding rule in this section is that placement decisions must be made on an individual basis. The section also requires each agency to have various alternative placements available in order to ensure that each child with a disability receives an education that is appropriate to his or her individual needs.

The requirements of § 300.552, as well as the other requirements of §§ 300.550–300.556, apply to all preschool children with disabilities who are entitled to receive FAPE. Public agencies that provide preschool programs for nondisabled preschool children must ensure that the requirements of § 300.552(c) are met. Public agencies that do not operate programs for nondisabled preschool children are not required to initiate such programs solely to satisfy the requirements regarding placement in the LRE embodied in §§ 300.550–300.556. For these public agencies, some alternative methods for meeting the requirements of §§ 300.550–300.556 include—
(1) Providing opportunities for the participation (even part-time) of preschool children with disabilities in other preschool programs operated by public agencies (such as Head Start);
(2) Placing children with disabilities in private school programs for nondisabled preschool children or private school preschool programs that integrate children with disabilities and nondisabled children; and
(3) Locating classes for preschool children with disabilities in regular elementary schools.

In each case the public agency must ensure that each child's placement is in the LRE in which the unique needs of that child can be met, based upon the child's IEP, and meets all of the other requirements of §§ 300.340–300.350 and §§ 300.550–300.556.

The analysis of the regulations for Section 504 of the Rehabilitation Act of 1973 (34 CFR part 104—Appendix, Paragraph 24) includes several points regarding educational placements of children with disabilities that are pertinent to this section:

1. With respect to determining proper placements, the analysis states: "* * * it should be stressed that, where a handicapped child is so disruptive in a regular classroom that the education of other students is significantly impaired, the needs of the handicapped child cannot be met in that environment. Therefore regular placement would not be appropriate to his or her needs * * *."

2. With respect to placing a child with a disability in an alternate setting, the analysis states that among the factors to be considered in placing a child is the need to place the child as close to home as possible. Recipients are required to take this factor into account in making placement decisions. The parents' right to challenge the placement of their child extends not only to placement in special classes or separate schools, but also to placement in a distant school, particularly in a residential program. An equally appropriate education program may exist closer to home; and this issue may be raised by the parent under the due process provisions of this subpart.

§ 300.553 Nonacademic settings.

In providing or arranging for the provision of nonacademic and extracurricular services and activities, including meals, recess periods, and the services and activities set forth in § 300.306, each public agency shall ensure that each child with a disability participates with nondisabled children in those services and activities to the maximum extent appropriate to the needs of that child.

(Authority: 20 U.S.C. 1412(5)(B))

Note: Section 300.553 is taken from a requirement in the final regulations for Section 504 of the Rehabilitation Act of 1973. With respect to this requirement, the analysis of the Section 504 Regulations includes the following statement: "[This paragraph] specifies that handicapped children must also be provided nonacademic services in as integrated a setting as possible. This requirement is especially important for children whose educational needs necessitate their being solely with other handicapped children during most of each day. To the maximum extent appropriate, children in residential settings are also to be provided opportunities for participation with other children." (34 CFR part 104—Appendix, Paragraph 24.)

§ 300.554 Children in public or private institutions.

Each SEA shall make arrangements with public and private institutions (such as a memorandum of agreement or special implementation procedures) as may be necessary to ensure that § 300.550 is effectively implemented.

(Authority: 20 U.S.C. 1412(5)(B))

Note: Under section 612(5)(B) of the statute, the requirement to educate children with disabilities with nondisabled children also applies to children in public and private institutions or other care facilities. Each SEA must ensure that each applicable agency and institution in the State implements this requirement. Regardless of other reasons for institutional placement, no child in an institution who is capable of education in a regular public school setting may be denied access to an education in that setting.

§ 300.555 Technical assistance and training activities.

Each SEA shall carry out activities to ensure that teachers and administrators in all public agencies—

(a) Are fully informed about their responsibilities for implementing § 300.550; and

(b) Are provided with technical assistance and training necessary to assist them in this effort.

(Authority: 20 U.S.C. 1412(5)(B))

§ 300.556 Monitoring activities.

(a) The SEA shall carry out activities to ensure that § 300.550 is implemented by each public agency.

(b) If there is evidence that a public agency makes placements that are inconsistent with § 300.550, the SEA shall—

(1) Review the public agency's justification for its actions; and

(2) Assist in planning and implementing any necessary corrective action.

(Authority: 20 U.S.C. 1412(5)(B))

Confidentiality of Information

§ 300.560 Definitions.

As used in §§ 300.560–300.576—

Destruction means physical destruction or removal of personal identifiers from information so that the information is no longer personally identifiable.

Education records means the type of records covered under the definition of education records in part 99 of this title (the regulations implementing the Family Educational Rights and Privacy Act of 1974).

Participating agency means any agency or institution that collects, maintains, or uses personally identifiable information, or from which information is obtained, under this part.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

§ 300.561 Notice to parents.

(a) The SEA shall give notice that is adequate to fully inform parents about the requirements of § 300.128, including—

(1) A description of the extent that the notice is given in the native languages of the various population groups in the State;

(2) A description of the children on whom personally identifiable information is maintained, the types of information sought, the methods the State intends to use in gathering the information (including the sources from whom information is gathered), and the uses to be made of the information;

(3) A summary of the policies and procedures that participating agencies must follow regarding storage, disclosure to third parties, retention, and destruction of personally identifiable information; and

(4) A description of all of the rights of parents and children regarding this information, including the rights under the Family Educational Rights and Privacy Act of 1974 and implementing regulations in part 99 of this title.

(b) Before any major identification, location, or evaluation activity, the notice must be published or announced in newspapers or other media, or both, with circulation adequate to notify parents throughout the State of the activity.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

§ 300.562 Access rights.

(a) Each participating agency shall permit parents to inspect and review any education records relating to their children that are collected, maintained, or used by the agency under this part. The agency shall comply with a request without unnecessary delay and before any meeting regarding an IEP or any hearing relating to the identification, evaluation, or educational placement of the child, or the provision of FAPE to the child, and in no case more than 45 days after the request has been made.

(b) The right to inspect and review education records under this section includes—

(1) The right to a response from the participating agency to reasonable requests for explanations and interpretations of the records;

(2) The right to request that the agency provide copies of the records containing the information if failure to provide those copies would effectively prevent the parent from exercising the right to inspect and review the records; and

(3) The right to have a representative of the parent inspect and review the records.

(c) An agency may presume that the parent has authority to inspect and review records relating to his or her child unless the agency has been advised that the parent does not have the authority under applicable State law governing such matters as guardianship, separation, and divorce.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

§ 300.563 Record of access.

Each participating agency shall keep a record of parties obtaining access to education records collected, maintained, or used under this part (except access by parents and authorized employees of the participating agency), including the name of the party, the date access was given, and the purpose for which the party is authorized to use the records.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

§ 300.564 Records on more than one child.

If any education record includes information on more than one child, the parents of those children shall have the right to inspect and review only the information relating to their child or to be informed of that specific information.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

§ 300.565 List of types and locations of information.

Each participating agency shall provide parents on request a list of the types and locations of education records collected, maintained, or used by the agency.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

§ 300.566 Fees.

(a) Each participating agency may charge a fee for copies of records that are made for parents under this part if the fee does not effectively prevent the parents from exercising their right to inspect and review those records.

(b) A participating agency may not charge a fee to search for or to retrieve information under this part.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

§ 300.567 Amendment of records at parent's request.

(a) A parent who believes that information in the education records collected, maintained, or used under this part is inaccurate or misleading or violates the privacy or other rights of the child may request the participating agency that maintains the information to amend the information.

(b) The agency shall decide whether to amend the information in accordance with the request within a reasonable period of time of receipt of the request.

(c) If the agency decides to refuse to amend the information in accordance with the request, it shall inform the parent of the refusal, and advise the parent of the right to a hearing under § 300.568.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

§ 300.568 Opportunity for a hearing.

The agency shall, on request, provide an opportunity for a hearing to challenge information in education records to ensure that it is not inaccurate, misleading, or otherwise in violation of the privacy or other rights of the child.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

§ 300.569 Result of hearing.

(a) If, as a result of the hearing, the agency decides that the information is inaccurate, misleading or otherwise in violation of the privacy or other rights of the child, it shall amend the information accordingly and so inform the parent in writing.

(b) If, as a result of the hearing, the agency decides that the information is not inaccurate, misleading, or otherwise in violation of the privacy of other rights of the child, it shall inform the parent of the right to place in the records it maintains on the child a statement commenting on the information or setting forth any reasons for disagreeing with the decision of the agency.

(c) Any explanation placed in the records of the child under this section must—

(1) Be maintained by the agency as part of the records of the child as long as the record or contested portion is maintained by the agency; and

(2) If the records of the child or the contested portion is disclosed by the agency to any party, the explanation must also be disclosed to the party.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

§ 300.570 Hearing procedures.

(1) A hearing held under § 300.568 must be conducted according to the procedures under § 99.23 of this title.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

§ 300.571 Consent.

(a) Parental consent must be obtained before personally identifiable information is—

(1) Disclosed to anyone other than officials of participating agencies collecting or using the information under this part, subject to paragraph (b) of this section; or

(2) Used for any purpose other than meeting a requirement of this part.

(b) An educational agency or institution subject to part 99 of this title may not release information from education records to participating agencies without parental consent unless authorized to do so under part 99 of this title.

(c) The SEA shall include policies and procedures in its State plan that are used in the event that a parent refuses to provide consent under this section.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

§ 300.572 Safeguards.

(a) Each participating agency shall protect the confidentiality of personally identifiable information at collection, storage, disclosure, and destruction stages.

(b) One official at each participating agency shall assume responsibility for ensuring the confidentiality of any personally identifiable information.

(c) All persons collecting or using personally identifiable information must receive training or instruction regarding the State's policies and procedures under § 300.129 and part 99 of this title.

(d) Each participating agency shall maintain, for public inspection, a current listing of the names and positions of those employees within the agency who may have access to personally identifiable information.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

§ 300.573 Destruction of information.

(a) The public agency shall inform parents when personally identifiable information collected, maintained, or used under this part is no longer needed to provide educational services to the child.

(b) The information must be destroyed at the request of the parents. However, a permanent record of a student's name, address, and phone number, his or her grades, attendance record, classes attended, grade level completed, and year completed may be maintained without time limitation.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

Note: Under § 300.573, the personally identifiable information on a child with a disability may be retained permanently unless the parents request that it be destroyed. Destruction of records is the best protection against improper and unauthorized disclosure. However, the records may be needed for other purposes. In informing parents about their rights under this section, the agency should remind them that the records may be needed by the child or the parents for social security benefits or other purposes. If the parents request that the information be destroyed, the agency may retain the information in paragraph (b) of this section.

§ 300.574 Children's rights.

The SEA shall include policies and procedures in its State plan regarding the extent to which children are afforded rights of privacy similar to those afforded to parents, taking into consideration the age of the child and type or severity of disability.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

Note: Under the regulations for the Family Educational Rights and Privacy Act of 1974 (34 CFR 99.5(a)), the rights of parents regarding education records are transferred to the student at age 18.

§ 300.575 Enforcement.

The SEA shall describe in its State plan the policies and procedures, including sanctions, that the State uses to ensure that its policies and procedures are followed and that the requirements of the Act and the regulations in this part are met.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

§ 300.576 Department.

If the Department or its authorized representatives collect any personally identifiable information regarding children with disabilities that is not subject to 5 U.S.C. 552a (The Privacy Act of 1974), the Secretary shall apply the requirements of 5 U.S.C. section 552a (b)(1)–(2), (4)–(11); (c); (d); (e)(1); (2); (3)(A), (B), and (D), (5)–(10); (h); (m); and (n), and the regulations implementing those provisions in part 5b of this title.

(Authority: 20 U.S.C. 1412(2)(D); 1417(c))

Department Procedures

§ 300.580 [Reserved]

§ 300.581 Disapproval of a State plan.

Before disapproving a State plan, the Secretary gives the SEA written notice and an opportunity for a hearing.

(Authority: 20 U.S.C. 1413(c))

§ 300.582 Content of notice.

(a) In the written notice, the Secretary—

(1) States the basis on which the Secretary proposes to disapprove the State plan;

(2) May describe possible options for resolving the issues;

(3) Advises the SEA that it may request a hearing and that the request for a hearing must be made not later than 30 calendar days after it receives the notice of proposed disapproval; and

(4) Provides information about the procedures followed for a hearing.

(b) The Secretary sends the written notice to the SEA by certified mail with return receipt requested.

(Authority: 20 U.S.C. 1413(c))

§ 300.583 Hearing official or panel.

(a) If the SEA requests a hearing, the Secretary designates one or more individuals, either from the Department or elsewhere, not responsible for or connected with the administration of this program, to conduct a hearing.

(b) If more than one individual is designated, the Secretary designates one of those individuals as the Chief Hearing Official of the Hearing Panel. If one individual is designated, that individual is the Hearing Official.

(Authority: 20 U.S.C. 1413(c))

§ 300.584 Hearing procedures.

(a) As used in §§ 300.581–300.586 the term *party or parties* means the following:

(1) An SEA that requests a hearing regarding the proposed disapproval of its State plan under this part.

(2) The Department of Education official who administers the program of financial assistance under this part.

(3) A person, group or agency with an interest in and having relevant information about the case that has applied for and been granted leave to intervene by the Hearing Official or Panel.

(b) Within 15 calendar days after receiving a request for a hearing, the Secretary designates a Hearing Official or Panel and notifies the parties.

(c) The Hearing Official or Panel may regulate the course of proceedings and the conduct of the parties during the proceedings. The Hearing Official or Panel takes all steps necessary to conduct a fair and impartial proceeding, to avoid delay, and to maintain order, including the following:

(1) The Hearing Official or Panel may hold conferences or other types of appropriate proceedings to clarify, simplify, or define the issues or to consider other matters that may aid in the disposition of the case.

(2) The Hearing Official or Panel may schedule a prehearing conference of the Hearing Official or Panel and parties.

(3) Any party may request the Hearing Official or Panel to schedule a prehearing or other conference. The Hearing Official or Panel decides whether a conference is necessary and notifies all parties.

(4) At a prehearing or other conference, the Hearing Official or Panel and the parties may consider subjects such as—

(i) Narrowing and clarifying issues;

(ii) Assisting the parties in reaching agreements and stipulations;

(iii) Clarifying the positions of the parties;

(iv) Determining whether an evidentiary hearing or oral argument should be held; and

(v) Setting dates for—

(A) The exchange of written documents;

(B) The receipt of comments from the parties on the need for oral argument or evidentiary hearing;

(C) Further proceedings before the Hearing Official or Panel (including an evidentiary hearing or oral argument, if either is scheduled);

(D) Requesting the names of witnesses each party wishes to present at an evidentiary hearing and estimation of time for each presentation; or

(E) Completion of the review and the initial decision of the Hearing Official or Panel.

(5) A prehearing or other conference held under paragraph (b)(4) of this section may be conducted by telephone conference call.

(6) At a prehearing or other conference, the parties shall be prepared to discuss the subjects listed in paragraph (b)(4) of this section.

(7) Following a prehearing or other conference the Hearing Official or Panel may issue a written statement describing the issues raised, the action taken, and the stipulations and agreements reached by the parties.

(d) The Hearing Official or Panel may require parties to state their positions and to provide all or part of the evidence in writing.

(e) The Hearing Official or Panel may require parties to present testimony through affidavits and to conduct cross-examination through interrogatories.

(f) The Hearing Official or Panel may direct the parties to exchange relevant documents or information and lists of witnesses, and to send copies to the Hearing Official or Panel.

(g) The Hearing Official or Panel may receive, rule on, exclude, or limit evidence at any stage of the proceedings.

(h) The Hearing Official or Panel may rule on motions and other issues at any stage of the proceedings.

(i) The Hearing Official or Panel may examine witnesses.

(j) The Hearing Official or Panel may set reasonable time limits for submission of written documents.

(k) The Hearing Official or Panel may refuse to consider documents or other submissions if they are not submitted in a timely manner unless good cause is shown.

(l) The Hearing Official or Panel may interpret applicable statutes and regulations but may not waive them or rule on their validity.

(m) (1) The parties shall present their positions through briefs and the submission of other documents and may request an oral argument or evidentiary hearing. The Hearing Official or Panel shall determine whether an oral argument or an evidentiary hearing is needed to clarify the positions of the parties.

(2) The Hearing Official or Panel gives each party an opportunity to be represented by counsel.

(n) If the Hearing Official or Panel determines that an evidentiary hearing would materially assist the resolution of the matter, the Hearing Official or Panel gives each party, in addition to the opportunity to be represented by counsel—

(1) An opportunity to present witnesses on the party's behalf; and

(2) An opportunity to cross-examine witnesses either orally or with written questions.

(o) The Hearing Official or Panel accepts any evidence that it finds is relevant and material to the proceedings and is not unduly repetitious.

(p) (1) The Hearing Official or Panel—

(i) Arranges for the preparation of a transcript of each hearing;

(ii) Retains the original transcript as part of the record of the hearing; and

(iii) Provides one copy of the transcript to each party.

(2) Additional copies of the transcript are available on request and with payment of the reproduction fee.

(q) Each party shall file with the Hearing Official or Panel all written motions, briefs, and other documents and shall at the same time provide a copy to the other parties to the proceedings.

(Authority: 20 U.S.C. 1413(c))

§ 300.585 Initial decision; final decision.

(a) The Hearing Official or Panel prepares an initial written decision that addresses each of the points in the notice sent by the Secretary to the SEA under § 300.582.

(b) The initial decision of a Panel is made by a majority of Panel members.

(c) The Hearing Official or Panel mails by certified mail with return receipt requested a copy of the initial decision to each party (or to the party's counsel) and to the Secretary, with a notice stating that each party has an opportunity to submit written comments regarding the decision to the Secretary.

(d) Each party may file comments and recommendations on the initial decision with the Hearing Official or Panel within 15 calendar days of the date the party receives the Panel's decision.

(e) The Hearing Official or Panel sends a copy of a party's initial comments and recommendations to the other parties by certified mail with return receipt requested. Each party may file responsive comments and recommendations with the Hearing Official or Panel within seven calendar days of the date the party receives the initial comments and recommendations.

(f) The Hearing Official or Panel forwards the parties' initial and responsive comments on the initial decision to the Secretary who reviews the initial decision and issues a final decision.

(g) The initial decision of the Hearing Official or Panel becomes the final decision of the Secretary unless, within 25 calendar days after the end of the time for receipt of written comments, the Secretary informs the Hearing Official or Panel and the parties to a hearing in writing that the decision is being further reviewed for possible modification.

(h) The Secretary may reject or modify the initial decision of the Hearing Official or Panel if the Secretary finds that it is clearly erroneous.

(i) The Secretary conducts the review based on the initial decision, the written record, the Hearing Official's or Panel's proceedings, and written comments. The Secretary may remand the matter for further proceedings.

(j) The Secretary issues the final decision within 30 calendar days after notifying the Hearing Official or Panel that the initial decision is being further reviewed.

§ 300.586 Judicial review.

If a State is dissatisfied with the Secretary's final action with respect to its State plan, the State may, within 60 calendar days after notice of that action, file a petition for review with the United States court of appeals for the circuit in which the State is located.

(Authority: 20 U.S.C. 1416(b)(1))

§§ 300.587–300.588 [Reserved]

§ 300.589 Waiver of requirement regarding supplementing and supplanting with Part B funds.

(a) Under sections 613(a)(9)(B) and 614(a)(2)(B)(ii) of the Act, SEAs and LEAs must ensure that Federal funds provided under this part are used to supplement and increase the level of Federal, State, and local funds (including funds that are not under the direct control of SEAs or LEAs) expended for special education and related services provided to children with disabilities under this part and in no case to supplant those Federal, State, and local funds. The nonsupplanting requirement applies only to funds allocated to LEAs (See § 300.372).

(b) If the State provides clear and convincing evidence that all children with disabilities have FAPE available to them, the Secretary may waive in part the requirement under sections 613(a)(9)(B) and 614(a)(2)(B)(ii) of the Act if the Secretary concurs with the evidence provided by the State.

(c) If a State wishes to request a waiver, it must inform the Secretary in writing. The Secretary then provides the State with a finance and membership report form that provides the basis for the request.

(d) In its request for a waiver, the State shall include the results of a special study made by the State to obtain evidence of the availability of FAPE to all children with disabilities. The special study must include statements by a representative sample of organizations that deal with children with disabilities, and parents and teachers of children with disabilities, relating to the following areas—

(1) The adequacy and comprehensiveness of the State's system for identifying, locating, and evaluating children with disabilities;

(2) The cost to parents, if any, for education for children enrolled in public and private day schools, and in public and private residential schools and institutions; and

(3) The adequacy of the State's due process procedures.

(e) In its request for a waiver, the State shall include finance data relating to the availability of FAPE for all children with disabilities, including—

(1) The total current expenditures for regular education programs and special education programs by function and by source of funds (State, local, and Federal) for the previous school year; and

(2) The full-time equivalent membership of students enrolled in regular programs and in special programs in the previous school year.

(f) The Secretary considers the information that the State provides under paragraphs (d) and (e) of this section, along with any additional information he may request, or obtain through on-site reviews of the State's education programs and records, to determine if all children have FAPE available to them, and if so, the extent of the waiver.

(g) The State may request a hearing with regard to any final action by the Secretary under this section.

(Authority: 20 U.S.C. 1411(c)(3); 1413(a)(9)(B))

Subpart F—State Administration

General

§ 300.600 Responsibility for all educational programs.

(a) The SEA is responsible for ensuring—

(1) That the requirements of this part are carried out; and

(2) That each educational program for children with disabilities administered within the State, including each program administered by any other public agency—

(i) Is under the general supervision of the persons responsible for educational programs for children with disabilities in the SEA; and

(ii) Meets the education standards of the SEA (including the requirements of this part).

(b) The State must comply with paragraph (a) of this section through State statute, State regulation, signed agreement between respective agency officials, or other documents.

(c) This part may not be construed to limit the responsibility of agencies other than educational agencies for providing or paying some or all of the costs of FAPE to children with disabilities in the State.

(Authority: 20 U.S.C. 1412(6))

Note: The requirement in § 300.600(a) is taken essentially verbatim from section 612(6) of the statute and reflects the desire of the Congress for a central point of responsibility and accountability in the education of children with disabilities within each State. With respect to SEA responsibility, the Senate Report on Pub. L. 94–142 includes the following statements:

This provision is included specifically to assure a single line of responsibility with regard to the education of handicapped children, and to assure that in the implementation of all provisions of this Act and in carrying out the right to education for handicapped children, the State educational agency shall be the responsible agency * * *.

Without this requirement, there is an abdication of responsibility for the education of handicapped children. Presently, in many States, responsibility is divided, depending upon the age of the handicapped child, sources of funding, and type of services delivered. While the Committee understands that different agencies may, in fact, deliver services, the responsibility must remain in a central agency overseeing the education of handicapped children, so that failure to deliver services or the violation of the rights of handicapped children is squarely the responsibility of one agency. (S. Rep. No. 94–168, p. 24 (1975))

In meeting the requirements of this section, there are a number of acceptable options that may be adopted, including the following:

(1) Written agreements are developed between respective State agencies concerning SEA standards and monitoring. These agreements are binding on the local or regional counterparts of each State agency.

(2) The Governor's Office issues an administrative directive establishing the SEA responsibility.

(3) State law, regulation, or policy designates the SEA as responsible for establishing standards for all educational programs for individuals with disabilities, and includes responsibility for monitoring.

(4) State law mandates that the SEA is responsible for all educational programs.

§ 300.601 Relation of part B to other Federal programs.

This part may not be construed to permit a State to reduce medical and other assistance available to children with disabilities, or to alter the eligibility of a child with a disability, under title V (Maternal and Child Health) or title XIX (Medicaid) of the Social Security Act, to receive services that are also part of FAPE.

(Authority: 20 U.S.C. 1413(e))

Use of Funds

§ 300.620 Federal funds for State administration.

A State may use five percent of the total State allotment in any fiscal year under part B of the Act, or $450,000, whichever is greater, for administrative costs related to carrying out sections 612 and 613 of the Act. However, this amount cannot be greater than twenty-five percent of the State's total allotment for the fiscal year under part B of the Act.

(Authority: 20 U.S.C. 1411(b), (c))

§ 300.621 Allowable costs.

(a) The SEA may use funds under § 300.620 for—

(1) Administration of the State plan and for planning at the State level, including planning, or assisting in the planning, of programs or projects for the education of children with disabilities;

(2) Approval, supervision, monitoring, and evaluation of the effectiveness of local programs and projects for the education of children with disabilities;

(3) Technical assistance to LEAs with respect to the requirements of this part;

(4) Leadership services for the program supervision and management of special education activities for children with disabilities; and

(5) Other State leadership activities and consultative services.

(b) The SEA shall use the remainder of its funds under § 300.620 in accordance with § 300.370.

(Authority: 20 U.S.C. 1411(b), (c))

State Advisory Panel

§ 300.650 Establishment.

(a) Each State shall establish, in accordance with the provisions of §§ 300.650–300.653, a State advisory panel on the education of children with disabilities.

(b) The advisory panel must be appointed by the Governor or any other official authorized under State law to make those appointments.

(c) If a State has an existing advisory panel that can perform the functions in § 300.652, the State may modify the existing panel so that it fulfills all of the requirements of §§ 300.650–300.653, instead of establishing a new advisory panel.

(Authority: 20 U.S.C. 1413(a)(12))

§ 300.651 Membership.

(a) The membership of the State advisory panel must be composed of persons involved in or concerned with the education of children with disabilities. The membership must include at least one person representative of each of the following groups—

(1) Individuals with disabilities;

(2) Teachers of children with disabilities;

(3) Parents of children with disabilities;

(4) State and local educational officials; and

(5) Special education program administrators.

(b) The State may expand the advisory panel to include additional persons in the groups listed in paragraph (a) of this section and representatives of other groups not listed.

(Authority: 20 U.S.C. 1413(a)(12))

Note: The membership of the State advisory panel, as listed in paragraphs (a)(1)–(5) of this section, is required in section 613(a)(12) of the Act. As indicated in paragraph (b) of this section, the composition of the panel and the number of members may be expanded at the discretion of the State. In adding to the membership, consideration could be given to having—

(1) An appropriate balance between professional groups and consumers (i.e., parents, advocates, and individuals with disabilities);

(2) Broad representation within the consumer-advocate groups, to ensure that the interests and points of view of various parents, advocates and individuals with disabilities are appropriately represented;

(3) Broad representation within professional groups (e.g., regular education personnel; special educators, including teachers, teacher trainers, and administrators, who can properly represent various dimensions in the education of

children with disabilities; and appropriate related services personnel); and

(4) Representatives from other State advisory panels (such as vocational education).

If a State elects to maintain a small advisory panel (e.g., 10–15 members), the panel itself could take steps to ensure that it (1) consults with and receives inputs from various consumer and special interest professional groups, and (2) establishes committees for particular short-term purposes composed of representatives from those input groups.

§ 300.652 Advisory panel functions.

The State advisory panel shall—

(a) Advise the SEA of unmet needs within the State in the education of children with disabilities;

(b) Comment publicly on the State plan and rules or regulations proposed for issuance by the State regarding the education of children with disabilities and the procedures for distribution of funds under this part; and

(c) Assist the State in developing and reporting such information and evaluations as may assist the Secretary in the performance of his responsibilities under section 618 of the Act.

(Authority: 20 U.S.C. 1413(a)(12))

§ 300.653 Advisory panel procedures.

(a) The advisory panel shall meet as often as necessary to conduct its business.

(b) By July 1 of each year, the advisory panel shall submit an annual report of panel activities and suggestions to the SEA. This report must be made available to the public in a manner consistent with other public reporting requirements of this part.

(c) Official minutes must be kept on all panel meetings and shall be made available to the public on request.

(d) All advisory panel meetings and agenda items must be publicly announced prior to the meeting, and meetings must be open to the public.

(e) Interpreters and other necessary services must be provided at panel meetings for panel members or participants. The State may pay for these services from funds under § 300.620.

(f) The advisory panel shall serve without compensation but the State must reimburse the panel for reasonable and necessary expenses for attending meetings and performing duties. The State may use funds under § 300.620 for this purpose.

(Authority: 20 U.S.C. 1413(a)(12))

State Complaint Procedures

§ 300.660 Adoption of State complaint procedures.

Each SEA shall adopt written procedures for:

(a) Resolving any complaint that meets the requirements of § 300.662 by—

(1) Providing for the filing of a complaint with the SEA; and

(2) At the SEA's discretion, providing for the filing of a complaint with a public agency and the right to have the SEA review the public agency's decision on the complaint.

(b) Informing parents and other interested individuals about the procedures in §§ 300.660–300.662.

(Authority: 20 U.S.C. 2831(a))

§ 300.661 Minimum State complaint procedures.

Each SEA shall include the following in its complaint procedures:

(a) A time limit of 60 calendar days after a complaint is filed under § 300.660(a) to—

(1) Carry out an independent on-site investigation, if the SEA determines that such an investigation is necessary;

(2) Give the complainant the opportunity to submit additional information, either orally or in writing, about the allegations in the complaint;

(3) Review all relevant information and make an independent determination as to whether the public agency is violating a requirement of part B of the Act or of this part; and

(4) Issue a written decision to the complainant that addresses each allegation in the complaint and contains—

(i) Findings of fact and conclusions; and

(ii) The reasons for the SEA's final decision.

(b) An extension of the time limit under paragraph (a) of this section only if exceptional circumstances exist with respect to a particular complaint.

(c) Procedures for effective implementation of the SEA's final decision, if needed, including technical assistance activities, negotiations, and corrective actions to achieve compliance.

(d) The right of the complainant or the public agency to request the Secretary to review the SEA's final decision.

(Authority: 20 U.S.C. 2831(a))

§ 300.662 Filing a complaint.

An organization or individual may file a signed written complaint under the procedures described in §§ 300.600–300.661. The complaint must include—

(a) A statement that a public agency has violated a requirement of part B of the Act or of this part; and

(b) The facts on which the statement is based.

(Authority: 20 U.S.C. 2831(a))

Subpart G—Allocation of Funds; Reports

Allocations

§ 300.700 Special definition of the term State.

For the purposes of § 300.701, § 300.702, and §§ 300.704–300.708, the term "State" does not include Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, the Federated States of Micronesia, the Republic of the Marshall Islands, or Palau.

(Authority: 20 U.S.C. 1411(a)(2))

§ 300.701 State entitlement; formula.

(a) The Secretary calculates the maximum amount of the grant to which a State is entitled under section 611 of the Act in any fiscal year as follows:

(1) If the State is eligible for a grant under section 619 of the Act, the maximum entitlement is equal to the number of children with disabilities aged 3 through 21 in the State who are receiving special education and related services, multiplied by 40 percent of the average per pupil expenditure in public elementary and secondary schools in the United States.

(2) If the State is not eligible for a grant under section 619 of the Act, the maximum entitlement is equal to the number of children with disabilities aged 6 through 21 in the State who are receiving special education and related services, multiplied by 40 percent of the average per pupil expenditure in public elementary and secondary schools in the United States.

(Authority: 20 U.S.C. 1411(a)(1))

(b) [Reserved]

(c) For the purposes of this section, the *average per pupil expenditure in public elementary and secondary schools in the United States*, means the aggregate expenditures during the second fiscal year preceding the fiscal year for which the computation is made (or if satisfactory data for that year are not available at the time of computation, then during the most recent preceding fiscal year for which satisfactory data are available) of all LEAs in the United States (which, for the purpose of this section, means the 50 States and the District of Columbia), plus any direct expenditures by the State for operation of those agencies (without regard to the

source of funds from which either of those expenditures are made), divided by the aggregate number of children in average daily attendance to whom those agencies provided free public education during that preceding year.

(Authority: 20 U.S.C. 1411(a)(4))

§ 300.702 Limitations and exclusions.

(a) In determining the amount of a grant under § 300.701:

(1) If a State serves all children with disabilities aged 3 through 5 in the State, the Secretary does not count children with disabilities aged 3 through 17 in the State to the extent that the number of those children is greater than 12 percent of the number of all children aged 3 through 17 in the State.

(2) If a State does not serve all children with disabilities aged 3 through 5 in the State, the Secretary does not count children with disabilities aged 5 through 17 to the extent that the number of those children is greater than 12 percent of the number of all children aged 5 through 17 in the State.

(3) The Secretary does not count children with disabilities who are counted under subpart 2 of part D of chapter 1 of title I of the Elementary and Secondary Education Act of 1965.

(b) For the purposes of paragraph (a) of this section, the number of children aged 3 through 17 and 5 through 17 in any State is determined by the Secretary on the basis of the most recent satisfactory data available.

(Authority: 20 U.S.C. 1411(a)(5))

§ 300.703 Ratable reductions.

(a) *General.* If the sums appropriated for any fiscal year for making payments to States under section 611 of the Act are not sufficient to pay in full the total amounts that all States are entitled to receive for that fiscal year, the maximum amount that all States are entitled to receive for that fiscal year shall be ratably reduced. In case additional funds become available for making payments for any fiscal year during which the preceding sentence is applicable, those reduced amounts shall be increased on the same basis they were reduced.

(Authority: 20 U.S.C. 1411(g)(1))

(b) *Reporting dates for Local educational agencies and reallocations.* (1) In any fiscal year that the State entitlement has been ratably reduced, and that additional funds have not been made available to pay in full the total of the amounts under paragraph (a) of this section, the SEA shall fix dates before which each LEA shall report to the State the amount of funds available to it under this part that it estimates it will expend.

(2) The amounts available under paragraph (a) of this section, or any amount that would be available to any other LEA if it were to submit an application meeting the requirements of this part, that the SEA determines will not be used for the period of its availability shall be available for allocation to those LEAs, in the manner provided in § 300.707, that the SEA determines will need and be able to use additional funds to carry out approved programs.

(Authority: 20 U.S.C. 1411(g)(2))

§ 300.704 Hold harmless provision.

No State shall receive less than the amount it received under part B of the Act for fiscal year 1977.

(Authority: 20 U.S.C. 1411(a)(1))

§ 300.705 Allocation for State in which by-pass is implemented for private school children with disabilities.

In determining the allocation under §§ 300.700–300.703 of a State in which the Secretary will implement a by-pass for private school children with disabilities under §§ 300.451–300.486, the Secretary includes in the State's child count—

(a) For the first year of a by-pass, the actual or estimated number of private school children with disabilities (as defined in §§ 300.7(a) and 300.450) in the State, as of the preceding December 1; and

(b) For succeeding years of a by-pass, the number of private school children with disabilities who received special education and related services under the by-pass in the preceding year.

(Authority: 20 U.S.C. 1411(a)(1)(A), 1411(a)(3), 1413(d))

§ 300.706 Within-State distribution: fiscal year 1979 and after.

Of the funds received under § 300.701 by any State for fiscal year 1979, and for each fiscal year after fiscal year 1979—

(a) 25 percent may be used by the State in accordance with § 300.620 and § 300.370; and

(b) 75 percent shall be distributed to the LEAs in the State in accordance with § 300.707.

(Authority: 20 U.S.C. 1411(c)(1))

§ 300.707 Local educational agency entitlement; formula.

From the total amount of funds available to all LEAs, each LEA is entitled to an amount that bears the same ratio to the total amount as the number of children with disabilities aged 3 through 21 in that agency who are receiving special education and related services bears to the aggregate number of children with disabilities aged 3 through 21 receiving special education and related services in all LEAs that apply to the SEA for funds under part B of the Act.

(Authority: 20 U.S.C. 1411(d))

§ 300.708 Reallocation of local educational agency funds.

If an SEA determines that an LEA is adequately providing FAPE to all children with disabilities residing in the area served by the local agency with State and local funds otherwise available to the local agency, the SEA may reallocate funds (or portions of those funds that are not required to provide special education and related services) made available to the local agency under § 300.707, to other LEAs within the State that are not adequately providing special education and related services to all children with disabilities residing in the areas served by the other LEAs.

(Authority: 20 U.S.C. 1414(e))

§ 300.709 Payments to the Secretary of the Interior for the education of Indian children.

(a) *General.* (1) The Secretary makes payments to the Secretary of the Interior to meet the need for assistance for the education of children with disabilities on reservations, aged 5 through 21, who are enrolled in elementary and secondary schools for Indian children operated or funded by the Secretary of the Interior.

(2) In the case of Indian students aged 3 through 5 who are enrolled in programs affiliated with Bureau of Indian Affairs (BIA) schools that are required by the States in which the schools are located to attain or maintain State accreditation and had State accreditation prior to October 7, 1991, the schools may count those children for the purpose of distribution of the funds provided under paragraph (a)(1) of this section to the Secretary of the Interior.

(3) The amount of the payment under paragraph (a)(1) of this section for any fiscal year is one percent of the aggregate amounts available to all States under this part for that fiscal year.

(b) *Responsibility for meeting the requirements of part B.* The Secretary of the Interior shall be responsible for meeting all of the requirements of part B of the Act for the children described in paragraph (a) of this section, in accordance with § 300.260.

(Authority: 20 U.S.C. 1411(f))

§ 300.710 Payments to the Secretary of the Interior for Indian tribes or tribal organizations.

(a) *General.* (1) Beginning with funds appropriated under part B of the Act for fiscal year 1992, the Secretary, subject to this section, makes payments to the Secretary of the Interior to be distributed to tribes or tribal organizations (as defined under section 4 of the Indian Self-Determination and Education Assistance Act) or consortiums of those tribes or tribal organizations to provide for the coordination of assistance for special education and related services for children with disabilities, aged 3 through 5, on reservations served by elementary and secondary schools for Indian children operated or funded by the Department of the Interior.

(2) The amount of the payment under paragraph (b)(1) of this section for any fiscal year is .25 percent of the aggregate amounts available for all States under this part for that fiscal year.

(3) None of the funds allocated under this section may be used by the Secretary of the Interior for administrative purposes, including child count, and the provision of technical assistance.

(b) *Distribution of funds.* The Secretary of the Interior shall distribute the total amount of the .25 percent under paragraph (a) of this section in accordance with section 611(f)(4) of the Act.

(Authority: 20 U.S.C. 1411(f))

§ 300.711 Entitlements to jurisdictions.

(a) The jurisdictions to which this section applies are Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, the Federated States of Micronesia, the Republic of the Marshall Islands, and Palau, (until the Compact of Free Association with Palau takes effect pursuant to section 101(a) of Pub. L. 99-658).

(b) Each jurisdiction under paragraph (a) of this section is entitled to a grant for the purposes set forth in section 601(c) of the Act. The amount to which those jurisdictions are so entitled for any fiscal year shall not exceed an amount equal to 1 percent of the aggregate of the amounts available to all States under this part for that fiscal year. Funds appropriated for those jurisdictions shall be allocated proportionately among them on the basis of the number of children aged 3 through 21 in each jurisdiction. However, no jurisdiction shall receive less than $150,000, and other allocations shall be ratably reduced if necessary to ensure that each jurisdiction receives at least that amount.

(c) The amount expended for administration by each jurisdiction under this section shall not exceed 5 percent of the amount allotted to the jurisdiction for any fiscal year, or $35,000, whichever is greater.

(Authority: 20 U.S.C. 1411(e))

Reports

§ 300.750 Annual report of children served—report requirement.

(a) The SEA shall report to the Secretary no later than February 1 of each year the number of children with disabilities aged 3 through 21 residing in the State who are receiving special education and related services.

(Authority: 20 U.S.C. 1411(a)(3))

(b) The SEA shall submit the report on forms provided by the Secretary.

(Authority: 20 U.S.C. 1411(a)(3))

Note: It is very important to understand that this report and the requirements that relate to it are solely for allocation purposes. The population of children the State may count for allocation purposes may differ from the population of children to whom the State must make FAPE available. For example, while section 611(a)(5) of the Act limits the number of children who may be counted for allocation purposes to 12 percent of the general school population aged 3 through 17 (in States that serve all children with disabilities aged 3 through 5) or 5 through 17 (in States that do not serve all children with disabilities aged 3 through 5), a State might find that 14 percent (or some other percentage) of its children have disabilities. In that case, the State must make FAPE available to all of those children with disabilities.

§ 300.751 Annual report of children served—information required in the report.

(a) In its report, the SEA shall include a table that shows—

(1) The number of children with disabilities receiving special education and related services on December 1 of that school year;

(2) The number of children with disabilities aged 3 through 5 who are receiving FAPE;

(3) The number of those children with disabilities aged 6 through 21 within each disability category, as defined in the definition of "children with disabilities" in § 300.7; and

(4) The number of those children with disabilities aged 3 through 21 for each year of age (3, 4, 5, etc.).

(b) For the purpose of this part, a child's age is the child's actual age on the date of the child count: December 1.

(c) The SEA may not report a child aged 6 through 21 under more than one disability category.

(d) If a child with a disability aged 6 through 21 has more than one disability, the SEA shall report that child in accordance with the following procedure:

(1) A child with deaf-blindness must be reported under the category "deaf-blindness."

(2) A child who has more than one disability (other than deaf-blindness) must be reported under the category "multiple disabilities."

(Authority: 20 U.S.C. 1411(a)(3); (5)(A)(ii); 1418(b))

§ 300.752 Annual report of children served—certification.

The SEA shall include in its report a certification signed by an authorized official of the agency that the information provided is an accurate and unduplicated count of children with disabilities receiving special education and related services on the dates in question.

(Authority: 20 U.S.C. 1411(a)(3); 1417(b))

§ 300.753 Annual report of children served—criteria for counting children.

(a) The SEA may include in its report children with disabilities who are enrolled in a school or program that is operated or supported by a public agency, and that either—

(1) Provides them with both special education and related services; or

(2) Provides them only with special education if they do not need related services to assist them in benefitting from that special education.

(b) The SEA may not include children with disabilities in its report who—

(1) Are not enrolled in a school or program operated or supported by a public agency;

(2) Are not provided special education that meets State standards;

(3) Are not provided with a related service that they need to assist them in benefitting from special education;

(4) Are counted by a State agency under subpart 2 of part D of chapter 1 of Title I of the Elementary and Secondary Education Act of 1965; or

(5) Are receiving special education funded solely by the Federal Government. However, the State may count children covered under § 300.186(b).

(Authority: 20 U.S.C. 1411(a)(3); 1417(b))

Note 1: Under paragraph (a) of this section, the State may count children with disabilities in a Head Start or other preschool program operated or supported by a public agency if those children are provided special education that meets State standards.

Note 2: Special education, by statutory definition, must be at no cost to parents. As

of September 1, 1978, under the FAPE requirement, both special education and related services must be at no cost to parents.

There may be some situations, however, where a child receives special education from a public source at no cost, but whose parents pay for the basic or regular education. This child may be counted. The Department expects that there would only be limited situations where special education would be clearly separate from regular education—generally, where speech services is the only special education required by the child. For example, the child's parents may have enrolled the child in a regular program in a private school, but the child might be receiving speech services in a program funded by the LEA. Allowing these children to be counted will provide incentives (in addition to complying with the legal requirement in section 613(a)(4)(A) of the Act regarding private schools) to public agencies to provide services to children enrolled by their parents in private schools, since funds are generated in part on the basis of the number of children provided special education and related services. Agencies should understand, however, that if a public agency places or refers a child with a disability to a public or private school for educational purposes, special education includes the entire educational program provided to the child. In that case, parents may not be charged for any part of the child's education.

A State may not count Indian children on or near reservations and children on military facilities if it provides them no special education. If an SEA or LEA is responsible for serving these children, and does provide them special education and related services, they may be counted.

§ 300.754 Annual report of children served—other responsibilities of the State educational agency.

In addition to meeting the other requirements of §§ 300.750–300.753, the SEA shall—

(a) Establish procedures to be used by LEAs and other educational institutions in counting the number of children with disabilities receiving special education and related services;

(b) Set dates by which those agencies and institutions must report to the SEA to ensure that the State complies with § 300.750(a);

(c) Obtain certification from each agency and institution that an unduplicated and accurate count has been made;

(d) Aggregate the data from the count obtained from each agency and institution, and prepare the reports required under §§ 300.750–300.753; and

(e) Ensure that documentation is maintained that enables the State and the Secretary to audit the accuracy of the count.

(Authority: 20 U.S.C. 1411(a)(3); 1417(b))

Note: States should note that the data required in the annual report of children served are not to be transmitted to the Secretary in personally identifiable form. States are encouraged to collect these data in non-personally identifiable form.

Appendix A to Part 300—[Reserved]

Appendix B to Part 300—[Reserved]

Appendix C to Part 300—Notice of Interpretation

I. Purpose of the IEP
II. IEP Requirements

§ 300.340 Definition

§ 300.341 State educational agency responsibility

1. Who is responsible for ensuring the development of IEPs for children with disabilities served by a public agency other than an LEA?
2. For a child placed out of State by a public agency, is the placing or receiving State responsible for the child's IEP?

§ 300.342 When individualized education programs must be in effect

3. In requiring that an IEP be in effect before special education and related services are provided, what does "be in effect" mean?
4. How much of a delay is permissible between the time an IEP of a child with a disability is finalized and when special education is provided?
5. For a child with a disability receiving special education for the first time, when must an IEP be developed—before placement or after placement?
6. If a child with a disability has been receiving special education in one LEA and moves to another community, must the new LEA hold an IEP meeting before the child is placed in a special education program?

§ 300.343 Meetings

7. What is the purpose of the 30 day timeline in § 300.343(c)?
8. Must the agency hold a separate meeting to determine a child's eligibility for special education and related services, or can this step be combined with the IEP meeting?
9. Must IEPs be reviewed or revised at the beginning of each school year?
10. How frequently must IEP meetings be held and how long should they be?
11. Who can initiate IEP meetings?
12. May IEP meetings be tape-recorded?

§ 300.344 Participants in meetings

(Agency representative)

13. Who can serve as the representative of the public agency at an IEP meeting?
14. Who is the representative of the public agency if a child with a disability is served by a public agency other than the SEA or LEA?

(The child's teacher)

15. For a child with a disability being considered for initial placement in special education, which teacher should attend the IEP meeting?
16. If a child with a disability is enrolled in both regular and special education classes, which teacher should attend the IEP meeting?
17. If a child with a disability in high school attends several regular classes, must all of the child's regular teachers attend the IEP meeting?
18. If a child's primary disability is a speech impairment, must the child's regular teacher attend the IEP meeting?
19. If a child is enrolled in a special education class because of a primary disability and also receives speech-language pathology services, must both specialists attend the IEP meeting?

(The child, parents, other individuals)

20. When may representatives of teacher organizations attend IEP meetings?
21. When may a child with a disability attend an IEP meeting?
22. Do the parents of a student with a disability retain the right to attend the IEP meeting when the student reaches the age of majority?
23. Must related services personnel attend IEP meetings?
24. Are agencies required to use a case manager in the development of an IEP for a child with a disability?
25. For a child with a suspected speech impairment, who must represent the evaluation team at the IEP meeting?

§ 300.345 Parent participation

26. What is the role of the parents at an IEP meeting?
27. What is the role of a surrogate parent at an IEP meeting?
28. Must the public agency let the parents know who will be at the IEP meeting?
29. Are parents required to sign IEPs?
30. If the parent signs the IEP, does the signature indicate consent for initial placement?
31. Do parents have the right to a copy of their child's IEP?
32. Must parents be informed at the IEP meeting of their right to appeal?
33. Does the IEP include ways for parents to check the progress of their children?
34. Must IEPs include specific checkpoint intervals for parents to confer with teachers and to revise or update their children's IEPs?
35. If the parents and agency are unable to reach agreement at an IEP meeting, what steps should be followed until agreement is reached?

§ 300.346 Content of the individualized education program (Present levels of educational performance)

36. What should be included in the statement of the child's present levels of educational performance?

(Annual goals and short term instructional objectives)

37. Why are goals and objectives required in the IEP?
38. What are annual goals in an IEP?
39. What are short term instructional objectives in an IEP?
40. Should the IEP goals and objectives focus only on special education and related services, or should they relate to the total education of the child?
41. Should there be a relationship between the goals and objectives in the IEP and those that are in the instructional plans of special education personnel?

42. When must IEP objectives be written—before placement or after placement?

43. Can short term instructional objectives be changed without initiating another IEP meeting?

(Specific special education and related services)

44. Must the IEP include all special education and related services needed by the child or only those available from the public agency?

45. Is the IEP a commitment to provide services—i.e., must a public agency provide all of the services listed in the IEP?

46. Must the public agency itself directly provide the services set out in the IEP?

47. Does the IEP include only special education and related services or does it describe the total education of the child?

48. If modifications are necessary for a child with a disability to participate in a regular education program, must they be included in the IEP?

49. When must physical education (PE) be described or referred to in an IEP?

50. If a child with a disability is to receive vocational education, must it be described or referred to in the student's IEP?

51. Must the IEP specify the amount of services or may it simply list the services to be provided?

52. Must an IEP for a child with a disability indicate the extent that the child will be educated in the regular educational program?

(Projected dates/Evaluation)

53. Can the anticipated duration of services be for more than twelve months?

54. Must the evaluation procedures and schedules be included as a separate item in the IEP?

(Other IEP content questions)

55. Is it permissible for an agency to have the IEP completed when the IEP meeting begins?

56. Is there a prescribed format or length for an IEP?

57. Is it permissible to consolidate the IEP with the individualized service plan developed under another Federal program?

58. What provisions on confidentiality of information apply to IEPs?

§ 300.348 Private school placements by Public Agencies

59. If placement decisions are made at the time the IEP is developed, how can a private school representative attend the meeting?

§ 300.349 Children with Disabilities Enrolled in Parochial or Other Private Schools

§ 300.350 Individualized education programs—accountability

60. Is the IEP a performance contract?

Authority: Part B of the Individuals with Disabilities Education Act (20 U.S.C. 1411–1420), unless otherwise noted.

Individualized Education Programs (IEPs)

Interpretation of Requirements of Part B of the Individuals With Disabilities Education Act

I. Purpose of the IEP

There are two main parts of the IEP requirement, as described in the Act and regulations: (1) The IEP meeting(s), where parents and school personnel jointly make decisions about an educational program for a child with a disability, and (2) the IEP document itself, that is, a written record of the decisions reached at the meeting. The overall IEP requirement, comprised of these two parts, has a number of purposes and functions:

a. The IEP meeting serves as a communication vehicle between parents and school personnel, and enables them, as equal participants, to jointly decide what the child's needs are, what services will be provided to meet those needs, and what the anticipated outcomes may be.

b. The IEP process provides an opportunity for resolving any differences between the parents and the agency concerning the special education needs of a child with a disability; first, through the IEP meeting, and second, if necessary, through the procedural protections that are available to the parents.

c. The IEP sets forth in writing a commitment of resources necessary to enable a child with a disability to receive needed special education and related services.

d. The IEP is a management tool that is used to ensure that each child with a disability is provided special education and related services appropriate to the child's special learning needs.

e. The IEP is a compliance/monitoring document that may be used by authorized monitoring personnel from each governmental level to determine whether a child with a disability is actually receiving the FAPE agreed to by the parents and the school.

f. The IEP serves as an evaluation device for use in determining the extent of the child's progress toward meeting the projected outcomes.

Note: The Act does not require that teachers or other school personnel be held accountable if a child with a disability does not achieve the goals and objectives set forth in the IEP. See § 300.350, Individualized education program—accountability.

II. IEP Requirements

This part (1) repeats the IEP requirements in §§ 300.340–300.350 of the regulations (boxed material), (2) provides additional clarification, as necessary, on sections or paragraphs of the regulations on which such clarification is needed, and (3) answers some questions regarding implementation of the IEP requirements that are not expressly addressed in the regulations. These questions and clarifying information are presented in a question and answer format immediately after the particular section of the regulations that is presented.

1. Who is responsible for ensuring the development of IEPs for children with disabilities served by a public agency other than an LEA?

The answer will vary from State to State, depending upon State law, policy, or practice. In each State, however, the SEA is ultimately responsible for ensuring that each agency in the State is in compliance with the IEP requirements and the other provisions of the Act and regulations. (See § 300.600 regarding SEA responsibility for all education programs.)

The SEA must ensure that every child with a disability in the State has FAPE available, regardless of which agency, State or local, is responsible for the child. While the SEA has flexibility in deciding the best means to meet this obligation (e.g., through interagency agreements), there can be no failure to provide FAPE due to jurisdictional disputes among agencies.

Note: Section 300.2(b) states that the requirements of the Act and regulations apply to all political subdivisions of the State that are involved in the education of children with disabilities, including (1) the SEA, (2) LEAs, (3) other State agencies (such as Departments of Mental Health and Welfare, and State schools for students with deafness or students with blindness), and (4) State correctional facilities.

The following paragraphs outline (1) some of the SEA's responsibilities for developing policies or agreements under a variety of interagency situations, and (2) some of the responsibilities of an LEA when it initiates the placement of a child with a disability in a school or program operated by another State agency:

a. *SEA POLICIES OR INTERAGENCY AGREEMENTS.* The SEA, through its written policies or agreements, must ensure that IEPs are properly written and implemented for all children with disabilities in the State. This applies to each interagency situation that exists in the State, including any of the following:

(1) When an LEA initiates the placement of a child in a school or program operated by another State agency (see "LEA-Initiated Placements" in paragraph "b", below); (2) when a State or local agency other than the SEA or LEA places a child in a residential facility or other program; (3) when parents initiate placements in public institutions; and (4) when the courts make placements in correctional facilities.

Note: This is not an exhaustive list. The SEA's policies must cover any other interagency situation that is applicable in the State, including placements that are made for both educational and non-educational purposes.

Frequently, more than one agency is involved in developing or implementing an IEP of a child with a disability (e.g., when the LEA remains responsible for the child, even though another public agency provides the special education and related services, or when there are shared cost arrangements). It is important that SEA policies or agreements define the role of each agency involved in the situations described above, in order to resolve any jurisdictional problems that could delay the provision of FAPE to a child with a disability. For example, if a child is placed in a residential facility, any one or all of the following agencies might be involved in the development and/or implementation of the child's IEP: The child's LEA, the SEA, another State agency, an institution or school under that agency, and the LEA where the institution is located.

Note: The SEA must also ensure that any agency involved in the education of a child with a disability is in compliance with the LRE provisions of the Act and regulations.

and, specifically, with the requirement that the placement of each child with a disability (1) be determined at least annually, (2) be based on the child's IEP, and (3) be as close as possible to the child's home (§ 300.552(a), Placements.)

b. *LEA-INITIATED PLACEMENTS.* When an LEA is responsible for the education of a child with a disability, the LEA is also responsible for developing the child's IEP. The LEA has this responsibility even if development of the IEP results in placement in a State-operated school or program.

Note: The IEP must be developed before the child is placed. (See Question 5, below.) When placement in a State-operated school is necessary, the affected State agency or agencies must be involved by the LEA in the development of the IEP. (See response to Question 59, below, regarding participation of a private school representative at the IEP meeting.)

After the child enters the State school, meetings to review or revise the child's IEP could be conducted by either the LEA or the State school, depending upon State law, policy, or practice. However, both agencies should be involved in any decisions made about the child's IEP (either by attending the IEP meetings, or through correspondence or telephone calls). There must be a clear decision, based on State law, as to whether responsibility for the child's education is transferred to the State school or remains with the LEA, since this decision determines which agency is responsible for reviewing or revising the child's IEP.

2. For a child placed out of State by a public agency, is the placing or receiving State responsible for the child's IEP?

The "placing" State is responsible for developing the child's IEP and ensuring that it is implemented. The determination of the specific agency in the placing State that is responsible for the child's IEP would be based on State law, policy, or practice. However, as indicated in Question 1, above, the SEA in the placing State is responsible for ensuring that the child has FAPE available.

3. In requiring that an IEP be in effect before special education and related services are provided, what does "be in effect" mean?

As used in the regulations, the term "be in effect" means that the IEP (1) has been developed properly (i.e., at a meeting(s) involving all of the participants specified in the Act (parent, teacher, agency representative, and, if appropriate, the child)); (2) is regarded by both the parents and agency as appropriate in terms of the child's needs, specified goals and objectives, and the services to be provided; and (3) will be implemented as written.

4. How much of a delay is permissible between the time an IEP of a child with a disability is finalized and when special education is provided?

In general, no delay is permissible. It is expected that the special education and related services set out in a child's IEP will be provided by the agency beginning immediately after the IEP is finalized. The Note following § 300.342 identifies some exceptions ((1) when the meetings occur during the summer or other vacation period, or (2) when there are circumstances that require a short delay, such as working out transportation arrangements). However, unless otherwise specified in the IEP, the IEP services must be provided as soon as possible following the meeting.

Note: Section 300.346(e) requires that the IEP include the projected dates for initiation of services.

5. For a child with a disability receiving special education for the first time, when must an IEP be developed—before placement or after placement?

An IEP must *be in effect* before special education and related services are provided to a child. (§ 300.342(b)(1), emphasis added.) The appropriate placement for a given child with a disability cannot be determined until after decisions have been made about what the child's needs are and what will be provided. Since these decisions are made at the IEP meeting, it would not be permissible to first place the child and then develop the IEP. Therefore, the IEP must be developed before placement. The above requirement does not preclude temporarily placing an eligible child with a disability in a program as part of the evaluation process—before the IEP is finalized—to aid in determining the most appropriate placement for the child. It is essential that the temporary placement not become the final placement before the IEP is finalized. In order to ensure that this does not happen, the State might consider requiring LEAs to take the following actions:

a. Develop an interim IEP for the child that sets out the specific conditions and timelines for the trial placement. (See paragraph "c", below.)

b. Ensure that the parents agree to the interim placement before it is carried out, and that they are involved throughout the process of developing, reviewing, and revising the child's IEP.

c. Set a specific timeline (e.g., 30 days) for completing the evaluation and making judgments about the most appropriate placement for the child.

d. Conduct an IEP meeting at the end of the trial period in order to finalize the child's IEP.

Note: Once the IEP of the child with a disability is in effect and the child is placed in a special education program, the teacher might develop detailed lesson plans or objectives based on the IEP. However, these lesson plans and objectives are not required to be a part of the IEP itself. (See Questions 37–43, below, regarding IEP goals and objectives.)

6. If a child with a disability has been receiving special education in one LEA and moves to another community, must the new LEA hold an IEP meeting before the child is placed in a special education program?

It would not be necessary for the new LEA to conduct an IEP meeting if:

(1) A copy of the child's current IEP is available; (2) the parents indicate that they are satisfied with the current IEP; and (3) the new LEA determines that the current IEP is appropriate and can be implemented as written.

If the child's current IEP is not available, or if either the LEA or the parent believes that it is not appropriate, an IEP meeting would have to be conducted. This meeting should take place within a short time after the child enrolls in the new LEA (normally, within one week).

Note: The child must be placed in a special education program immediately after the IEP is finalized. (See Question 4, above.)

If the LEA or the parents believe that additional information is needed (e.g., the school records from the former LEA) or that a new evaluation is necessary before a final placement decision can be made, it would be permissible to temporarily place the child in an interim program before the IEP is finalized. (See Question 5, above.)

7. What is the purpose of the 30 day timeline in § 300.343(c)?

The 30 day timeline in § 300.343(c) ensures that there will not be a significant delay between the time a child is evaluated and when the child begins to receive special education. Once it is determined—through the evaluation—that a child has a disability, the public agency has up to 30 days to hold an IEP meeting.

Note: See Questions 4 and 5, above, regarding finalization of IEP and placement of the child.

8. Must the agency hold a separate meeting to determine a child's eligibility for special education and related services, or can this step be combined with the IEP meeting?

Paragraph (e) of § 300.532 (Evaluation procedures) provides that the evaluation of each child with a disability must be "made by a multidisciplinary team or group of persons * * *". The decisions regarding (1) whether the team members actually meet together, and (2) whether such meetings are separate from the IEP meeting are matters that are left to the discretion of State or local agencies.

In practice, some agencies hold separate eligibility meetings with the multidisciplinary team before the IEP meeting.

Note: When separate meetings are conducted, placement decisions would be made at the IEP meeting. However, placement options could be discussed at the eligibility meeting.

Other agencies combine the two steps into one. If a combined meeting is conducted, the public agency must include the parents as participants at the meeting. (See § 300.345 for requirements on parent participation.)

Note: If, at a separate eligibility meeting, a decision is made that a child is not eligible for special education, the parents should be notified about the decision.

9. Must IEPs be reviewed or revised at the beginning of each school year?

No. The basic requirement in the regulations is that IEPs must be in effect at the beginning of each school year. Meetings must be conducted at least once each year to review and, if necessary, revise the IEP of each child with a disability. However, the meetings may be held anytime during the year, including (1) at the end of the school year, (2) during the summer, before the new school year begins, or (3) on the anniversary date of the last IEP meeting on the child.

10. How frequently must IEP meetings be held and how long should they be?

Section 614(a)(5) of the Act provides that each public agency must hold meetings periodically, but not less than annually, to review each child's IEP and, if appropriate, revise its provisions. The legislative history of the Act makes it clear that there should be as many meetings a year as any one child may need. (121 Cong. Rec. S20428–29 (Nov. 19, 1975) (remarks of Senator Stafford))

There is no prescribed length for IEP meetings. In general, meetings (1) will be longer for initial placements and for children who require a variety of complex services, and (2) will be shorter for continuing placements and for children who require only a minimum amount of services. In any event, however, it is expected that agencies will allow sufficient time at the meetings to ensure meaningful parent participation.

11. Who can initiate IEP meetings?

IEP meetings are initiated and conducted at the discretion of the public agency. However, if the parents of a child with a disability believe that the child is not progressing satisfactorily or that there is a problem with the child's current IEP, it would be appropriate for the parents to request an IEP meeting. The public agency should grant any reasonable request for such a meeting.

Note: Under § 300.506(a), the parents or agency may initiate a due process hearing at any time regarding any matter related to the child's IEP.

If a child's teacher(s) feels that the child's placement or IEP services are not appropriate to the child, the teacher(s) should follow agency procedures with respect to (1) calling or meeting with the parents and/or (2) requesting the agency to hold another meeting to review the child's IEP.

12. May IEP meetings be tape-recorded?

The use of tape recorders at IEP meetings is not addressed by either the Act or the regulations. Although taping is clearly not required, it is permissible at the option of either the parents or the agency. However, if the recording is maintained by the agency, it is an education record, within the meaning of the Family Educational Rights and Privacy Act ("FERPA"; 20 U.S.C. 1232g), and would, therefore, be subject to the confidentiality requirements of the regulations under both FERPA (34 CFR part 99) and Part B (34 CFR §§ 300.560–300.575).

13. Who can serve as the representative of the public agency at an IEP meeting?

The representative of the public agency could be any member of the school staff, other than the child's teacher, who is qualified to provide, or supervise the provision of, specially designed instruction to meet the unique needs of children with disabilities. (Section 602(a)(20) of the Act.) Thus, the agency representative could be (1) a qualified special education administrator, supervisor, or teacher (including a speech-language pathologist), or (2) a school principal or other administrator—if the person is qualified to provide, or supervise the provision of, special education.

Each State or local agency may determine which specific staff member will serve as the agency representative. However, the representative should be able to ensure that whatever services are set out in the IEP will actually be provided and that the IEP will not be vetoed at a higher administrative level within the agency. Thus, the person selected should have the authority to commit agency resources (i.e., to make decisions about the specific special education and related services that the agency will provide to a particular child).

For a child with a disability who requires only a limited amount of special education, the agency representative able to commit appropriate resources could be a special education teacher, or a speech-language pathologist, other than the child's teacher. For a child who requires extensive special education and related services, the agency representative might need to be a key administrator in the agency.

Note: IEP meetings for continuing placements could be more routine than those for initial placements, and, thus, might not require the participation of a key administrator.

14. Who is the representative of the public agency if a child with a disability is served by a public agency other than the SEA or LEA?

The answer depends on which agency is responsible, under State law, policy, or practice, for any one or all of the following: (1) The child's education, (2) placing the child, and (3) providing (or paying for the provision of) special education and related services to the child.

In general, the agency representative at the IEP meeting would be a member of the agency or institution that is responsible for the child's education. For example, if a State agency (1) places a child in an institution, (2) is responsible under State law for the child's education, and (3) has a qualified special education staff at the institution, then a member of the institution's staff would be the agency representative at the IEP meetings.

Sometimes there is no special education staff at the institution, and the children are served by special education personnel from the LEA where the institution is located. In this situation, a member of the LEA staff would usually serve as the agency representative.

Note: In situations where the LEA places a child in an institution, paragraph "b" of the response to Question 1, above, would apply.

15. For a child with a disability being considered for initial placement in special education, which teacher should attend the IEP meeting?

The teacher could be either (1) a teacher qualified to provide special education in the child's area of suspected disability, or (2) the child's regular teacher. At the option of the agency, both teachers could attend. In any event, there should be at least one member of the school staff at the meeting (e.g., the agency representative or the teacher) who is qualified in the child's area of suspected disability.

Note: Sometimes more than one meeting is necessary in order to finalize a child's IEP. If, in this process, the special education teacher who will be working with the child is identified, it would be useful to have that teacher participate in the meeting with the parents and other members of the IEP team in finalizing the IEP. When this is not possible, the agency should ensure that the teacher is given a copy of the child's IEP as soon as possible after the IEP is finalized and before the teacher begins working with the child.

16. If a child with a disability is enrolled in both regular and special education classes, which teacher should attend the IEP meeting?

In general, the teacher at the IEP meeting should be the child's special education teacher. At the option of the agency or the parent, the child's regular teacher also might attend. If the regular teacher does not attend, the agency should either provide the regular teacher with a copy of the IEP or inform the regular teacher of its contents. Moreover, the agency should ensure that the special education teacher, or other appropriate support person, is able, as necessary, to consult with and be a resource to the child's regular teacher.

17. If a child with a disability in high school attends several regular classes, must all of the child's regular teachers attend the IEP meeting?

No. Only one teacher must attend. However, at the option of the LEA, additional teachers of the child may attend. The following points should be considered in making this decision:

a. Generally, the number of participants at IEP meetings should be small. Small meetings have several advantages over large ones. For example, they (1) allow for more open, active parent involvement, (2) are less costly, (3) are easier to arrange and conduct, and (4) are usually more productive.

b. While large meetings are generally inappropriate, there may be specific circumstances where the participation of additional staff would be beneficial. When the participation of the regular teachers is considered by the agency or the parents to be beneficial to the child's success in school (e.g., in terms of the child's participation in the regular education program), it would be appropriate for them to attend the meeting.

c. Although the child's regular teachers would not routinely attend IEP meetings, they should either (1) be informed about the child's IEP by the special education teacher or agency representative, and/or (2) receive a copy of the IEP itself.

18. If a child's primary disability is a speech impairment, must the child's regular teacher attend the IEP meeting?

No. A speech-language pathologist would usually serve as the child's teacher for purposes of the IEP meeting. The regular teacher could also attend at the option of the school.

19. If a child is enrolled in a special education class because of a primary disability, and also receives speech-language pathology services, must both specialists attend the IEP meeting?

No. It is not required that both attend. The special education teacher would attend the meeting as the child's teacher. The speech-language pathologist could either (1) participate in the meeting itself, or (2) provide a written recommendation concerning the nature, frequency, and amount of services to be provided to the child.

20. When may representatives of teacher organizations attend IEP meetings?
